THE KLEMME TIMES

Fortieth Year—Number 31. KLEMME, IOWA, THURSDAY, JANUARY 5, 1928. $2.00 Per Year In Advance—Outside of Iowa $2.50

IN ROCK ISLAND SERVICE 42 YEARS

TOM BLANK RETIRES AFTER A LONG TIME SERVICE

Has Made A Record H eCan Well Feel Proud To Possess

Forty-two years continuous service with one organization is a record very few persons can boast of, but Tom Blank of Klemme has just such a record on the books of the Rock Island Lines and has just retired, December 31st, after forty-two years continuous service and has been honorably discharged with a nice, steady bonus coming in for the balance of his life, as a reward from the company for his service rendered the past years.

Since moving to this country from Germany many years ago, the Blank family have made but three moves: They first lived at Belmond, then moved to Hayfield, and a short time later to Klemme, and have resided here for a period of some thirty-two years.

Mr. Blank, during his service with the company has had several chances for higher positions, but being a home loving man, and his family wishing to remain in Klemme instead of moving elsewhere, he has rejected these offers. For a time he was foreman of the bridge between Armstrnog and Estherville; later had the roadmaster job t Estherville, but as Mrs Blank did not like to move from Klemme, Mr. Blank came back and continued as Section Boss here.

Mr. Blank has had an active part in the building of the railroad in this branch to Estherville, and many a mile of track has been laid under Mr. Blank's supe vision.

Mr. and Mrs. Blank were married in Germany and their daughters, Mrs. A. Ahrenkeil and Mrs. A. Lau (deceased) were born there. Ten children were born o Mr. and Mrs. Blank; an infant son died, and in more recent years their daughter, Miss Gretchen, and Mrs. Sena Lau passed away. Their other children live in Klemme and near by in Iowa.

A remarkable fact is that Mr. Blanks sons, Ralph, Fred and Casey, are all in the employ of the Rock Island, and all are maing good.

Since moving to Klemme at which time they purchased a home and have lived in the same place since.

Mr. Blank has always been interested in the affirs of the town and for a long number of years was an active member on the town council Mr. Blank has always been a faithful worker for the betterment of the town and is a good booster.

We congratulate him on his fine service record.

SCHOOL BEGAN HERE WEDNESDAY AFTER VACATION

Basket Ball Team To Play At Garner This Friday Evening

Our High School and grades play Garner two games of basket ball on Friday evening of this week. We shall need lots of noise there for Klemme. We held Belmond to a very low score on their own floor before hte holidays. We expect to make as good a showing against Garner or defeat them.

Declamatory Contest Next Week

Miss Mabel Schott, of Mason City, will be here Friday morning to assist Miss Trumbell with our Declamatory contestants. We believe they will be able to insure a good local contest on Friday evening of next week Let none forget to hold this date open and attend. Our speakers need to be encouraged in their efforts along this line. Admision will be 35 and 25 cents. The speaking will be intersperced with music. The program will begin at 7:45 We shall probably have one expert judge this year instead of three non-professionals as heretofore. She will announce her placements and explain to our audience her reasons for them This will make the work more intelligible to those unfamiliar with the plan of marking and ranking the speakers.

Our Musical Trio of our Lyceum Course has been made ill due to exposure during the blizzard in December and will be unable to be with us on January 12 as previously announced Their program will be announced at a later date as none has been set as yet We have been assured that all three of the remaining numbers will appear.

Spelling Contest In Spring

Our office is in receipt of an announcement of another spelling contest this spring with the usual awards promised the winners. Parents of grade pupils should encourage their children to employ their spare moments n getting ready for our local contest. We expect to make it public this year and require all of our grade pupils to enter if All should try to make as good a showing as possible even tho they may feel others are likely to outspell them.

Our next P T. A. program is scheduled for next Tuesday evening We hope to have Rev Scott of Goodell with us on this occasion besides a brief discussion of mental defects and mental disorders, byt the superintendent. A report on our undreweights and over-weights in school will be made by one of our faculty. Special music will be provided.

But two weeks yet remain, after this one, of the first semester's work Every student should spend some time in reviewing for the mid-year examinations. Those who neglect to do this are very certain to be disappointed when the reports are all in.

The latter part of last week and the fore part of this week have been record breakers for cold weather. The thermometer took a sudden fall Thursday night and eaoh day and night became colder than the preceding until the lowest point was reached Monday morning when several thermometers about town registered 25 to 26 below zero. For a number of days the thermometer remained below the 10 degrees below zero mark. Tuesday the weather began to warm up and yesterday it was quite nice again.

Clark Bredbenner is carrying his right arm in a sling as a result of a rather serious accident Saturday evening. Clark was cranking his Ford truck when the engine back-fired, as they sometimes do, the crank striking bis arm and breakin gthe bone just above the wrist, and tearing the forearm ligaments.

Mr. and Mrs. Harold Gruetzmacher and baby left Saturday for Iowa Falls, having concluded their holiday visit at the F. Gruetzmacher home in Klemme. At Iowa Falls they visited with Mrs. Gruetzmacher's parents before driving to their home at Tekamah, Nebraska where Harold is the coach in the high school.

Liberty Township District No. 7 School Is Modern Brick Structure

NEW SCHOOL BUILDING IS WELL ARRANGED

Is Well Lighted From Rear And The Side; Furnace Heated

The new school house in Liberty No 7 is constructed f Adel Hackberry face building tile. The brick are mottled in color and are mixed around in the wall, giving the exterior of the building pleasing appearance The entire building is so constructed as to give both beauty and serviceability.

Being 28x34 feet in size, it has ample room to house a large number of pupils.

The building faces the east and has a nice main entrance, as the picture shows. Entering the building from the main entrance into the vestibule a cloak room for the girls is located on the right side, and the boys cloak room on the left side f the vestibule. Doors from the vestibule and either cloak room open into the main school room.

The entrance on the left, seen n the picture, is a grade entrance and leads either to the basement, or up a short fligh of steps o the school room.

The school room is lighed only y windows at the left and back of the pupils, who sit faced north.

The back of the school room is lighted by three large windows, the other window shown on the south provides light for the grade entrance and a hal Three large windows on he west also provide light for the school room The two windows as shown in the picture in the front provide light for each of the cloak rooms.

The basement is well lighted by eight large basement windows.

In the northwest corner of the basement a bricked in coal bin has been built A Globe three-way hot air furnace provides ample heat and air circulation for the building, and is so arranged that a small amount of heat is thrown into the basement, for ordinary use, or more can be heated if the occasion demands.

Te entire building, both interior and exterior is very pleasing in appearance.

BIG FAMILY RE-UNION HELD ON NEW YEAR'S DAY

Mrs. August Schlawin's home in Klemme was the scene of a happy gathering on New Year's day when a big family re-union was held there.

The ladies of the families represented brought with them wlel filled baskets of good things to eat and a big feas was spread at the appointed hour. When a count was made the following people were found present: Mr. and Mrs. Louis Griffen, Mabel, Lyda and Gladys; Mr. and Mrs. Carl Wille and Arlene; Mr and Mrs. Ben Greimann; Mr and Mrs. Will Schlawin and Arthur; Mr. and Mrs. Werner Schlawin and Lavonne; Mr ad Mrs Paul Goll and Eunice; Alvin Goll; Mrs. Noah Holdt Mr. and Mrs. Otto Schlawin, Norva, Myra and Mathilda; Mr. and Mrs. Henry Boland.

Needless to say an immense dinner was served and all enjoyed a wonderful good time.

Frank Gibbs left for Sioux City Saturday evening by train from Belmond. Frank is a student at Morningside College.

LIBERTY'S NEW SCHOOL HOUSE HAS MANY CONVENIENCES

Children Can Play In Large Basement On Stormy Days

There are many conveniences to be found in the school which makes it both pleasant for the teacher and the pupils In the school room are found modern Stanford Desks for the comfort of the pupils A large built-in cupboard in the east wall near the north side of the room is to be found a sizable collection of good reference books. The school room is equipped with two wall map cases a general set of maps and an Iowa map A large globe is also in use for the study of geography. A large dictionary and stand has been provided the pupils For the more pleasurable moments in school entertainment is provided with a phonograph and a good supply of suitable records. Singing is made better with the use of an organ which has been provided.

The entire school room is indeed quite cozy and the surroundings are pleasant. Pleasing curtains and light colored shades adorn all of the windows. A picture molding around the upper walls sets off the room in nice shape and is convenient for the hanging of pictures.

A full size basement, about eight feet in height provides ample room for the pupils to play indoors when the weather is bad The basement is even provided with a well, pump, wash sink and drain.

GARNER FARMER HURT IN CRASH

ALBERT BOEHNKE, GARNER, HIT BY FREIGHT TRAIN

Seriously Injured Man Taken to Mason City Hospital

Albert Boehnke, 32 year o'd farmer living northeast of Garner is at the Mercy Hospital, Mason City recovering from injuries which he received shortly after noon Tuesday when the car he was driving was struck by a Milwaukee westbound freight on a crossing one mile east and a quarter mile north of Garner

Mr Boehnke, it is reported, was driving his car with the curtains well closed and his cap pulled down tight o protec himself against the cold, and did not see or hear the train approach The crossing where his car was struck was unobstructed as to view for some distance on either side of the track. The train crew attempted o stop bu could not and he crash was unavoidable. The train men immediately brought Mr. Boehnke to a Garner doctor's office for first aid and later he was taken to the hospital Reports are that Mr Boehnke is suffering from cuts and bruises but no bones were broken. His car was a total wreck.

I clean and repair Clocks, clean and adjust sewing machines. Frank Carpenter, Klemme, Iowa. tfc

Avery-Twin Lakes News

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is fifteen minutes late, this ordinary little Pennsylvania Dutch girl, Meely Schweneikton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his "class."

CHAPTER I—Continued

—2—

"But look here," he said, puzzled, "I'm sure the Pennsylvania law has, for the past ten years or more, required children to attend school up to the age of fourteen years, and recently longer. Don't tell me you are over twenty-four years old—only a year younger than I am!"

"But you see," Meely offered in explanation, "Pop he was a school director and could do what he liked. He's awful determined. That's why our Jake he won't live at home no more, Pop he's so determined. Leave him think a thing's right and he wouldn't listen to even Roosevelt or—or even you yet!"

"Do you know," he said after an instant's silence, "I am seriously displeased with you today?"

"What for, Mr. Creighton?" she asked plaintively. "What did I—done—did?"

"You were fifteen minutes late! When I say I'll meet you at half-past four I don't mean a quarter to five."

"But—but I was here before you, Mr Creighton," she answered in surprise. "I didn't keep you waiting—I waited."

"That's not the point. The point is you weren't here at half-past four. Don't—let—it—happen—again!"

"But—how do you know I wasn't here—seein' you wasn't here your own self?"

"Never mind how I know. I know a lot more about you than you think I do, my little girl!"

"Oh!" She looked at him queerly—almost as though she were trying not to laugh.

"Now then, why were you fifteen minutes late?"

"I had to mind my step-mom's baby whiles the others helped Pop with his cider-makin'.

"And then," she continued, "till I was through all I had to wait till Pop was out of the way; I darsen't leave him see me come away! Well, I guess anyhow not!"

"He is 'determined' with you, too, is he?"

"Well, I guess anyhow then!"

"You use five words, Meely, where two or three would suffice. Instead of 'Well-I-guess-anyhow-then,' just answer yes."

"I know I talk awful dumb!" Meely humbly admitted, looking abashed. "I don't see why you bother to make dates with a common thing like me!—that I don't."

"'Make dates?'" he repeated dubiously.

"Yes, and listen oncet, Mr. Creighton"—Meely lowered her voice, though the nearest human being was two miles away—"that there crabbed old-maid sister of my step-mom's that's come to help out over my step-mom's confinement, she's suspicioning me!"

"Of meeting me?" he asked a bit uneasily. He had such a very strong reason for being afraid of an awkward entanglement, or of its being known that he philandered with a farmer's common daughter.

"Ach, she don't go so far as to suspicion my Date is a swell like you, Mr. Creighton. She says to me, she says, 'I know who your Date is, he's that there blond young man at Zentmyer's farm!' she says. And me, I just left her think it was him."

"But," St. Croix demanded, instantly jealous, and himself as suspicious as the "old-maid sister," "what reason does she have for thinking your 'Date' is 'the blond young man'? You must have given her reason."

"Ach, well!" Meely cast down her eyes and looked self-conscious. "To be sure, Mr. Creighton, there's others that admars me besides yourself—that's only to be expected, ain't it?"

"And do you have 'dates' with this blond young man?"

"Well, to be sure, since I knowed you, Mr. Creighton, other ones does seem awful common to me, that they do!"

St. Croix had a passing twinge of conscience for his own responsibility in possibly spoiling this girl's chances for a contented married life with a husband of her own class. But he reassured himself with the reflection that from the first she had sought him out quite as much as he had pursued her. Seducing an innocent virgin was certainly not one of the things he was capable of doing!

"What I have afraid of," said Meely, "is that my step-mom's old-maid sister will take a sneak on me some day and follow me up here unknownst—she's just that mean-dispositioned! And you see, Pop he'd say you wasn't keepin' comp'ny with me fur really; not to marry me; a swell like you yet! Well, I guess anyhow not!"

"Is your stepmother's sister a permanent fixture at the farm?" St. Croix uneasily inquired.

"No, thanks be! Till my step-mom's well again, her sister goes—and good riddance!"

St. Croix had often noticed with a slight surprise that in spite of her awful English, Meely was never at a loss when he used words of several syllables not in her own vocabulary.

"Do you like your stepmother any better than you like her old-maid sister?"

"Well, she ain't so crabbed and bossy like her sister, but she's awfully sulky to my little sister and brother—and me. If it wasn't that I

But Meely Was Always as Fresh and Fragrant as the Morning Dew.

hate to leave Sammy and Lizzie," said Meely mournfully, "I'd do like our Jakey done—I'd take and run off, too!"

"But," said St. Croix hastily, "you wouldn't go so far that I—that you couldn't see me, would you? Come here!"

She sprang up, her face alight, as the permission was given, and went to him. He held her close as they sat together on the broad flat stone, his arm about her waist, her head on his breast. Girls of her "class" had always been to him, hitherto, untouchable, so fastidious was his distaste for any contact with the unbathed. But Meely was always as fresh and fragrant as the morning dew!

His fingers caressed her hair, her white slender neck, her delicate sweet face. But though he could never quite understand just how she did it, she had always somehow managed to hold him off from kissing her lips. He kissed her hands, her throat, her bare arms—her lips ever eluded him; in spite of the fact that she seemed as much enamored of him as he of her.

"Do you know, Meely, ever since I first met you, that night at the barn dance, I've had the queerest feeling of something familiar in your face—I'm sure I never saw you before that night"—he knew he could not have seen her and forgotten it—"yet I can't get away from the feeling of something familiar about you."

Meely shook her head over it. "I ain't familiar with you," she said.

"I believe," said St. Croix, frowning thoughtfully, "that there's surely some psychic reason for my feeling!"

"How do you spell that?" asked Meely.

"Another thing"—he ignored her question—"your Pennsylvania Dutch accent is a bit different—"

"I know I don't talk so dumb like some talks—for all I do talk pretty dumb. But some 'round here gives awful funny sounds when they talk! Did you ever take notice to it a'ready?"

"Did I? Gosh!"

"Say, Mr. Creighton, you've been sayin' what you think is queer at me, darst I tell you what wonders me at you?"

"Shoot it!"

"You are the first swell I ever knowed—have knew—though I have saw 'em a'ready—but not to keep comp'ny with 'em, you understand. Well, you're awful diff'runt to what I'd conceited a swell gentleman was like!"

St. Croix looked amused. "No doubt!"

"You see, when Pop first brang home his young wife I was that mad I run in town and hired myself fur a week to a family where the son was the high-toned-est party I ever have saw!—and he was awful diff'runt to what you are. He was so polite to the ladies that way—he belittled hisself pickin' up fur 'em and fetchin' and carryin' fur 'em—and hoppin' up to give 'em his seat—my goodness! It looked awful nice! Ach!" said Meely, with a long sigh of pleasant reminiscence, "wouldn't it be grand to have your Mister act that polite to you even when there wasn't no comp'ny! This here gentleman to which I make reference to, he acted just that polite when no one was 'round to see him do it! Yes, mind you! Why, he acted just that polite to me yet and me only one of the help!"

"Oh, he did, did he?" St. Croix murmured jealously. "He was only stringing you, Meely—"

"Ach, no! Fur to all the other help, too, old and young, he was just that polite. And so, till I met up with you a'ready, Mr. Creighton, I conceited all high gentlemen was like that there."

St. Croix was surprised to find himself piqued uncomfortably by this ignorant girl's intimation (unconscious though it was) that he did not measure up to her funny standard of a "gentleman"—just imagine! Yes, grotesque it might be, but it pricked him.

A sudden suspicion flashed on him—was she unconscious of what she was implying, or was she actually giving him a sly dig? Her amiable patience under his bullying had sometimes seemed "a bit thick"!

"Say, Mr. Creighton," she continued, "I'd like awful well to see you in the comp'ny of swell ladies oncet! I bet you'd be just as polite as that there party to which I made reference to. For to be sure, you couldn't boss swell ladies 'round like you do me, could you, now? And you'd have to fetch and carry fur 'em and hop up and give 'em your chair just that nice!—ach! Wouldn't I like to see you at it! I bet you'd look nice!" She fetched a long breath. "I wisht I was nice educated that men would treat me like that!"

St. Croix was smitten with compunction. "You poor kid!" he said, patting her cheek, "you'd like to be treated 'like a swell lady,' would you?"

"No, it's the other way 'round—I'd like a man to treat me like as if he was a fine gentleman."

She said it so innocently he could not suspect her of guile.

"And you think," he smiled, "that I don't treat you as if I were 'a fine gentleman'?"

"Well, you can judge of that better'n me, you know the ways of gentlemen better'n me. Anyhow," she conceded, as though offering him consolation, "you look awful swell anyhow, with all the different tony suits you're got with hose and neckties to match—ach!"

"Meely!" he exclaimed, trying to kiss her on the mouth, but achieving only a peck at her chin, "sometimes I think you're just a sly little cat!"

As her head was on his shoulder and his cheek against her hair, he did not see the sudden flash of her eyes which momentarily transformed her face from its usual vacancy to a sparkling vivacity. When, however, as she did not reply, he turned up her chin to look at her, the dullness which now veiled her countenance like a mask effectually dispelled his momentary doubts.

(TO BE CONTINUED.)

Believe That Stolen Articles Bring Luck

An extraordinary example of the survival of foolish superstition was disclosed in the case of a Hampshire (England) farmer who was convicted of stealing turnips from a neighbor. He explained to the magistrate that he could easily afford to pay for them, and that, moreover, he had plenty of turnips of his own, but he wanted stolen ones to make a concoction for a cow which had fallen sick, for he firmly believed no other could be so efficacious.

A similar belief is held in many parts of Germany, where practically everyone buys a ticket for one or other of the state lotteries. Many uneducated peasants will tell you they are sure of winning if the ticket they have was bought with stolen money.

In Turkey, copper rings are worn on the fingers to prevent erysipelas. If the ring has been stolen from some one else, it is supposed to answer its purpose twice as well.

Examples might be multiplied from every quarter of the earth. Most probably the superstition arose from the natural desire of the criminal to find some excuse for his delinquencies.

Too Many Butts in Joke

When Peter Campbell of Elaine, Australia, entered his bachelor quarters he was knocked flat on the floor. Regaining his feet he was knocked down again. Crawling out of the way of danger, he struck a match, and found facing him a large ram with a district-wide reputation for butting. Campbell sustained severe bruises and lots of shocks. His door was locked when he left home, and the police are looking for the practical joker who opened it to pass in the butter that caused Campbell nearly to pass out.

Farm Products Sold by Grades

Notable Progress Was First Achieved During Recent Depression.

(Prepared by the United States Department of Agriculture.)

Although preliminary work in the development of national standards for farm products has been under way for many years, notable progress was first achieved during the recent period of agricultural depression when every function of the marketing machine was tested with a view to the possible elimination of waste. The value of standards and the probability of profit from grading have been widely discussed by many groups. In this connection, says Lloyd S. Tenny, chief of the bureau of agricultural economics, "whether or not the producer or marketer is paid for the additional effort and expense involved in making such classifications depends upon his subsequent marketing practice. For example, a country merchant seldom establishes price differentials for different grades when buying from producers in very small lots. On the contrary, a large assembler of eggs might find it practically impossible to engage in business through regular trade trade channels without conforming to recognized grading practices. As a general statement it may be said that the smaller the volume of business the less likely it is that grading to generally recognized standards will pay. In large-scale operation, however, standardization is now universally recognized as a basic requirement for success."

Standards Formulated.

Among the farm products for which standards have been formulated by the United States Department of Agriculture are cotton, dairy and poultry products, grains (corn, wheat, oats, rye, sorghums, barley, and rice), nine kinds of hay and related products, live stock and meats, tobacco, wool, and fruits, vegetables, and related products, including apples, artichokes, asparagus, beans, beets, cabbage, cantaloupes, carrots, cauliflower, celery, cherries, citrus fruit, green corn, cucumbers, dewberries and blackberries, eggplant, grapes, honey, lettuce, onion, peaches, peanuts, pears, peas, peppers, pineapples, plums and prunes, potatoes, sweet potatoes, radishes, shallots, spinach, strawberries, tomatoes, turnips and water melons.

Containers Standardized.

Several of the styles of containers for fruits and vegetables have also been standardized. In several of these classifications more than one set of standards have been prepared, depending on the use of the product, as for table use or canning, or by origin or variety.

Before recommending standards every effort is made to make them practical and acceptable to the established trade.

Common Smut of Corn Is Most Familiar Disease

Common smut of corn is one of the most familiar and widespread of all plant diseases. It undoubtedly is the most destructive disease of the corn crop that is now known if we take into account the whole wide range of its occurrence. Smut attacks only the parts of the plant that are above the ground. It lives through the winter in soil, in manure, and in other decaying organic material such as compost, and spreads by means of spores (virtually its seeds) which drift through the air. The spores lodge on the corn plant and enter its tissues through wounds or bruised places. They germinate and grow rapidly and soon form on the surfaces of the plant the lustrous lead-colored boils which darken and swell until they burst and let loose the black smut spores that carry over the disease in the soil for another year. If the smut boils form in the ear, the ear is ruined. If they form on another part of the plant, the whole plant is weakened and the yield is reduced though the ear may not be directly injured.

Agricultural Squibs

A wise farmer knows by records what his crops cost.

* * *

A bobsled is a handy winter tool for odd jobs around the farm.

* * *

Start keeping farm records this winter when work is slack. You may be too busy to start next spring.

* * *

Close confinement reduces the resistance to disease, results in heavy mortality, poor egg production, and small profits.

* * *

The farm wagon is the most used piece of farm equipment. When its length of life is considered it is one of the cheapest.

* * *

Unless feeding begins soon after the silo is filled, considerable silage will spoil at the top from being exposed to the air.

* * *

Be fair to the young alfalfa. Don't pasture or graze the fields the first year. Give them a chance to grow a cover for a "hard winter."

* * *

The best and tidiest way to keep leaves while they are rotting down to leaf-mold is to dig a pit for them in some odd corner of the garden.

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Italian Fascists Get Chance to See World

A young Italian who lately finished his university course and means to take up architecture as a profession has been one of the first to benefit by Mussolini's order that every Italian merchant ship should reserve two berths free on every voyage for young Italians desirous of seeing the world.

They can choose their route and the extent of the journey, paying only about 18 or 20 lire a day. This brings "the grand tour" within the reach of the professional classes and will surely serve as a liberal education.

"Book and rifle make the perfect fascist," Mussolini often reminds his young followers, and now he adds the traveler's compass to the emblems of excellence.—Chicago Journal.

Faster Time on Rails

Railroad speed of from 200 to 300 miles an hour will be common if a test line being built by an English engineer is successful. He plans to eliminate trains, substituting a single car containing the propelling unit, which will be operated by electricity or gasoline and streamlined to decrease air resistance to the utmost limit. Each car will carry from 60 to 350 persons, and there is a special arrangement replacing the usual flange tire to prevent derailment. Grade crossings would be eliminated to insure fast schedules with safety and it is expected that the car will be able to climb steep grades with ease as a special design of outer tires of high frictional capacity has been provided.—Popular Mechanics Magazine.

Australia's Cattle King

A man who owns so many horses that he recently destroyed 4,000 of them because he couldn't sell them and they cost too much to keep is, at seventy years of age, visiting London. He is Sir Sydney Kidman, the veteran cattle king of Australia. He began his career as a teamster at $2 a week. Now he owns 30 ranches covering more than 30,000,000 acres of land; more than 100,000 cattle and 10,000 horses; 1,500 camels and thousands of donkeys and sheep.

Phew!

"So you have forgotten our wedding anniversary," she said bitterly.

"How could I remember it?" he inquired. "Time has slipped away so fast and so happily that the wedding seems but yesterday."—Washington Star.

No Complaints

Eager Angler—How are the fish in the lake?

Bored Stranger—Quite contented.

Older people like to yell, occasionally, too, but they have no excuse for it as college boys have.

Discussion Vs. Argument

The man who enters into a discussion is full of a passion for truth and eager to hear it. The man who argues is full of vanity and desires only to hear himself talk.—American Magazine.

The Explanation

"Why did she marry Jack? I thought she valued her freedom."

"She did. But she couldn't bear to think of Jack having any."—New Haven Register.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster without the burn. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, croup, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu"

Jars & Tubes

MUSTEROLE

Liberty Township Has Modern Face Tile School Hous

FIRST SCHOOL WAS BUILT IN '85

HISTORY OF SCHOOL DATES BACK FORTY TWO YEARS

George Wellemeyer Was The First Teacher In District No. 7

A description of the new brick school house in Liberty, District No 7 would not be complete without a historical sketch.

Way back in n1885, forty-two long years ago, District No 7 was established in then what was German township, when a small school house was built in 1885 and Fred Grau was the lucky contractor who got the job The place was then known as the "Koerner school" called because the site of the building was on the land owned by Mr. Koerner father of A G Koerner of Klemme

Geo. Wellemeyer First Teacher

No doubt a number of middle- ged people in this community can recall the fact that George Wellemeyer, hen a young man, aught the school, instructing in the three R's, and perhaps with the assisance of a good willow stick. Mr. Wellemeyer is an uncel of Art Wellemeyer and was at one time editor of The Times.

This old school soon became to small and it was found necessary t build a new school house on the same site, and acordingly a contra was let to Thomas Farthingham 1891. At this time John Suckow a brother of H L Suckow was the teacher.

However, prior to this we will quote from a sheet in the records as follows:

"On March 10, 1890 the electors assembled and—

"Moved to sell the Koerner school house to the highest bidder." Motion carried.

"E. H. Schuldt putting in the highest bid the Koerner School House was sold to him for the sum of (81) Eighty one Dollars."

"Mr. L. Sampson moved to build a new School House on the old site 18x26 feet with 10 foot posts with an Arch to be 12 feet high in the Cener" Said motion carried.

"Mr. John Gruetzmacher moved to vote a tax of ($400, Four Hundred Dollars for the use of the School House Fund." Motion carried year 1891 and has stood until the

Thus was the school built in the present time.

The new brick school house in Liberty No. 7 is now located on a piece of ground on the north east corner of the Minnie Josten farm and was built by the board in 1927, the contract being let to John Suckow, Klemme contractor.

The following are members of the school board: R. V. Upmeyer, Elmer Haes, Frank Kopacek, J. L. Abele, Fred Klinge, Jr., W. L. Haberkamp, J. E. Stille, Elmer Schaefer and Roy Schaefer; with Roy Schaefer as president, Joseph Schuldt, secretary and W. G. Lenz, treasurer.

Thirteen pupils attend the new school, with Miss Annabelle Carlson as their teacher. J. E. Stille is the director of this school.

The new building was accepted by the Board at their meeting on Nov. 15th.

Pupils In Liberty District Number 7

Reading from left to right, the names of the pupils and their ages are as follows:

Arthur Swamley 9, Paul Ludeke 8, Everett Stokesbary 8, Lyle Ludeke 7, La Rayne Stille 6, Irene Spitler 7, Marie Stille 10, Merle Ludeke 10, Lucille Ludeke 12, Kermit Schlei 13, Melvin Schlei 9, Aaron Kreitlow, 13.

HACKBERRY FACE BUILDING TILE USED

Walls Of Two Unit Construction Insures Warmth And Dryness

This beautiful, permanent school house in Liberty Township, District No 7, is built of Hackberry Face Tile which has been furnished in n attractive mingling of red, green, and golden colors The walls are of a two unit construction insuring warmth and dryness. By the use of this indestructable building material, the fire hazard is reduced to a minimum and the painting of the exterior walls is unnecessary.

The tile were manufactured by the United Clay Products Corporation at one of our eight Iowa factories, located at Adel, Iowa.

LOCAL CONTRACTOR BUILT NEW SCHOOL IN DISTRICT 7

Board Well Pleased With Work Of John Suckow, Contractor

John Suckow, Klemme contractor and builder is responsible for the fine appearance, and the good workmanship in the new school house in Liberty District No. 7.

Mr. Suckow revised the original plans and specifications which had been used for a frame school, and provided new plans and specifications for a brick school.

Mr. Suckow was awarded the contract by the Board and completed the building on schedule time and to the entire satisfacion of the board.

The building is constructed on a substantial concrete foundation, and the walls are double construction, providing air spaces between the two walls which are bound together and heavily reinforced. The air spaces help to keep the building warm and dry in cold weather, and insures a cool building in warm weather.

The entire building is put up very substantial and only the very best workmanship went into the building. Every par of the building was put up under the personal supervision of Mr. Suckow.

HARDWARE AND FURNACE WAS SUPPLIED BY JACOBS

Two Way Hot ir Furnaces Ideal For School Houses Says Jacobs

E. F. Jacobs, Klemme Hardware and Furnace dealer, was the successful bidder for the hardware, fittings and furnace installed in the new school house in Liberty No. 7

The building is amply and economically heated with a Globe three-way hot air furnace. This is the type of furnace Mr. Jacobs has installed in a number of school houses and is the type of heating plant he recommends for this kind of building.

All of the hardware, fittings, supplies, etc., which went into the new building are high grade, standard products, nationally advertised, and as good as the market affords.

The Jacobs Hardware carry a full line of building hardware of all kinds, for any type of building, as well as full stock of furnaces, suitable for any heating requirement. Jacobs Hardware handles the well known Lowe Bros line of paints, varnish, stains, etc.

These Parents Are Especially Interested In Liberty No. 7

The following parents in Liberty township have either boys and girls in school, or are looking after children in District No. 7:- Howard Spitler; Elvin Stokesbary; Harvey Harberts; Henry Schlei; Harvey Stille; J E. Stille; Elmer Ludeke and Henry Ludeke.

Mrs. Will Lemke visited in Britt last week at the home of her mother Mrs Whitney.

Mr and Mrs. Glen Latch mourn the loss of their baby. The little babay died following an operation. The entire community extends their sympathy to the bereaved family

Flapper's Clock

"We have all heard of the old-fashioned woman who sang one or more verses of 'Nearer, My God to Thee,' to determine the exact moment when the boiled eggs were properly done," writes Pansy of Urbana, "but it remained for a modern flapper to give us a brand-new and practical idea on the subject

"Recently married, she was being 'razzed' about her inability to cook, and her brother remarked: 'Why, she can't even boil eggs!'

"'I can, too,' she said 'I smoke one cigarette for soft, two for medium and three for hard-boiled!'"—Cleveland Plain Dealer

Surely in Hard Luck

The prize example of hard luck we think is illustrated in the following episode: August Winkler was burned out in Wisconsin recently and started south to regain his fortune On his way there his wife died He started in business, and the Mississippi flood wiped him out He went to Kansas, arriving at Rossville with his flivver and $165 in cash He put the cash in the Rossville bank, and the bank failed the following day.—The Outlook.

Thrives on Hard Work

"Hard work never killed anybody," says Mrs. Charles Gould, eighty-three, of Hillsborough, N. H., and points to herself and the seven cords of rock maple and birch wood that she split and piled in the shed last summer to prove her statement. Furthermore, Mrs. Gould expects to reach the century mark by dint of hard work alone and challenges any woman of her age to duplicate the splitting and piling of seven cords of wood

Nothing More

Perksby—Well, they say money talks, you know

Ziggsby—Yep, it certainly does—it always says good-by to me.—New Bedford Standard

Life's Darkest Moment

Servant—My lord, Messire Polon Spaghetti has called

Borgia—Confound it! And there isn't a drop of poison in the house—London Opinion.

VARIETY OF FOODS BEST FOR HEALTH

For the sake of health, everyone should strive to maintain the normal weight for his height and age, to be neither too fat nor too thin, declares Ethel Somers, dietetic expert, in an article in Liberty.

"If one eats a great variety of foods in quantities sufficient to maintain normal body weight," Miss Somers explains, "the diet is usually a satisfactory one. Every pound of body weight is known to be the equivalent of 4,000 stored calories, yet counting calories is no longer considered essential reckoning in the program of getting fat or thin

"A liberal and persistent daily use of simple foods which do not upset digestion is the best way to put on weight," the writer continues. "Out-of-door activity, limited exercises, warm clothing and change of health habits, especially sleeping habits, will help in the struggle which in time will meet with success. Adding avoirdupois necessarily means eating regularly more than one needs."

Empress Lives Simply in Twilight of Life

Once the dazzling beauty and central light in the oriental splendor of the court of Petrograd, Maria Feodorowna, eighty-year-old dowager empress of Russia, is now living the Spartan life of a humble citizen. Her home is a modest seaside residence. Hvidoere, just outside Copenhagen bought years ago by her sister, the late Queen Alexandra of England. It is without central heating or stoves of any kind, for it was built as a summer residence only. Amid this comparative poverty the empress knits and embroiders and sells her handiwork at the charity bazars for the benefit of Russian refugees. Her bed spreads and scarfs fetch fancy prices Once a day she goes for a short drive in the adjacent woods, and this is the only break in her daily life. On the doormat outside her bedroom sleeps a gigantic old Cossack, guarding the life of his mistress as he has done for 30 years.

The Way It Goes

"It's queer how the affairs of the average man purseed," stated old Riley Rezzidew of Petunia. "A feller will go spraddling along for years without any premeditation, getting the itch and religion and being run over by Fords and drug around by the same, and getting shot for an innocent bystander, and fighting with his kin, and just sorter fiddlin' along that a-way, and then all of a sudden wake up and find hisself dead or famous nobody knows why."

"Aw, looky here!" ejaculated Constable Sam T. Slackputter. "What the dickens are you trying to say, anyhow?"

"Durned if I know!"—Kansas City Star.

Home Runs

The strange fighting that has been going on in Nicaragua led Gen Hugh Drum to say at a Washington tea:

"They don't battle down there. The rebels' method is more like a street brawl It reminds me of a story

"Some years ago, in a war between Chili and Peru, a young war correspondent said to an old one:

"'Neither army goes in for uniforms and in consequence I can't tell which is which.'

"'Oh, that's easy, said the old correspondent 'If you see an army running towards Chile it's Chilean, and if it's running towards Peru it's Peruvian.'"—Kansas City Times.

"Died Last Week"

Jimmy, the young son of Mr. and Mrs. George O Jackson will be six years old in January and ready for school Instead of being happy over the prospect, Jimmy does not want to go. The following conversation recently took place between the youngster and his mother:

"Mother, I'm not going to school.'

"But, Jim, how can you get out of it? All little boys and girls have to go to school."

"We—ll, I'll just have Bob take a note to the teacher and say 'Jim died last week.'"—Indianapolis News

World's Swiftest Girl

The fleetest girl in the world hails from Japan. Miss Fumiko Terao exchanged her kimono for running shorts, and earned her right to the title of "swiftest girl alive" when she won the 100-meter sprint in the all-Japanese sports carnival held recently near Tokyo.

Her time was 10 4-5 seconds. Fumiko has beaten all men runners of her own country and all the best women runners in the world.—London Tit Bits.

Good Start

Diner—That young waiter is looking very proud today.

Head Waiter—Yes, sir; you see he's just miscalculated his first bill.—Passing Show.

Jealousy

"Why were you speeding?" demanded the cop.

"I wasn't speeding," answered Mr. Brown humbly. "I was just trying to pass the man who bought my old car."

Feminine Age

She—I'm not on speaking terms with Freddie. The mean thing wouldn't give me his seat at the barber's this morning.—Sydney Bulletin.

Howe About—

By ED HOWE

©, Bell Syndicate. WNU Service.

In a recent cartoon a number of men are shown arriving at a resort to have a "good time."

Only one man brings his wife; all the others jeer at him because his wife is along. This note is seen in pictures and print every day. Who is to blame? Wives or husbands?

The impression is given that wives are wet blankets. Is it the fault of wives? Or are husbands so low the presence of good women spoil their fun?

Do women spoil the "good times" of men by nagging, or do husbands just naturally find wives annoying.

* * *

An unusual writer has just appeared: he frankly confesses he does not believe the world will ever be rid of poverty, crime, ignorance, misery and meanness. Most of the good gentlemen are working to get rid of all these, and think success is almost within sight.

* * *

There is actually no such thing as equality except in constitutions and other scraps of paper.

* * *

The burdens of men are steadily growing heavier: the women are becoming more unmanageable and expensive and so are the children.

* * *

Accept the leadership of no one man unreservedly. However wise a man may be, he cannot know it all: other men know a little. Accept truth here and there, first trying it out carefully in your own laboratory

* * *

How the world progresses! . . See that you progress and have some part in the big things being accomplished To progress is the natural way; the steady growth of the world proves it.

* * *

If a man has a wife who doesn't perform very well, the women say: "Isn't it too bad he didn't get a good one?" And usually they have one picked out for him. Usually he has, too.

* * *

An old medical man I know says doctors are not much needed, except surgeons. And this man is not a surgeon He further says that nine out of ten cases of illness are due to improper diet, and might be cured by fasting and less and more proper food thereafter. "The few wonders in my profession," the doctor says, "are accomplished not with medicine, but with surgery"

* * *

I do not like certain things What are my rights when I come in contact with them? Should I sneer, attack fly into a rage, or get away from them as soon as possible, remembering that I annoy others?

* * *

There are certain womanly qualities so admirable that the world has long agreed in admiration I wonder that so many flappers in politics and social life depart from them, and take the risk.

* * *

I never knew a foolish person who did not endeavor to frequently give the impression that he was a real thinker and that real thinkers are exceedingly scarce.

* * *

I'm not grumbling at public affairs: I'm looking at them.

* * *

I am grateful to the few who like me, and endeavor to be agreeable, that I may not lose their favor. There are certain types of men I know will not like me; and they will misrepresent me; every one is a liar in speaking of those he does not like. So I am not annoyed because of their misrepresentations: I know it is one of the natural things, and natural things we must respect.

* * *

The professional writers are indignant because business men are lately writing for print.

Why should writing for print be confined to a class more than conversation? Everyone is able to write (or should be, considering the number of schools maintained) Why should not anyone express his ideas and discoveries? When amateurs need assistance, professional editors are able to give it, and literature is being benefited by the invasion.

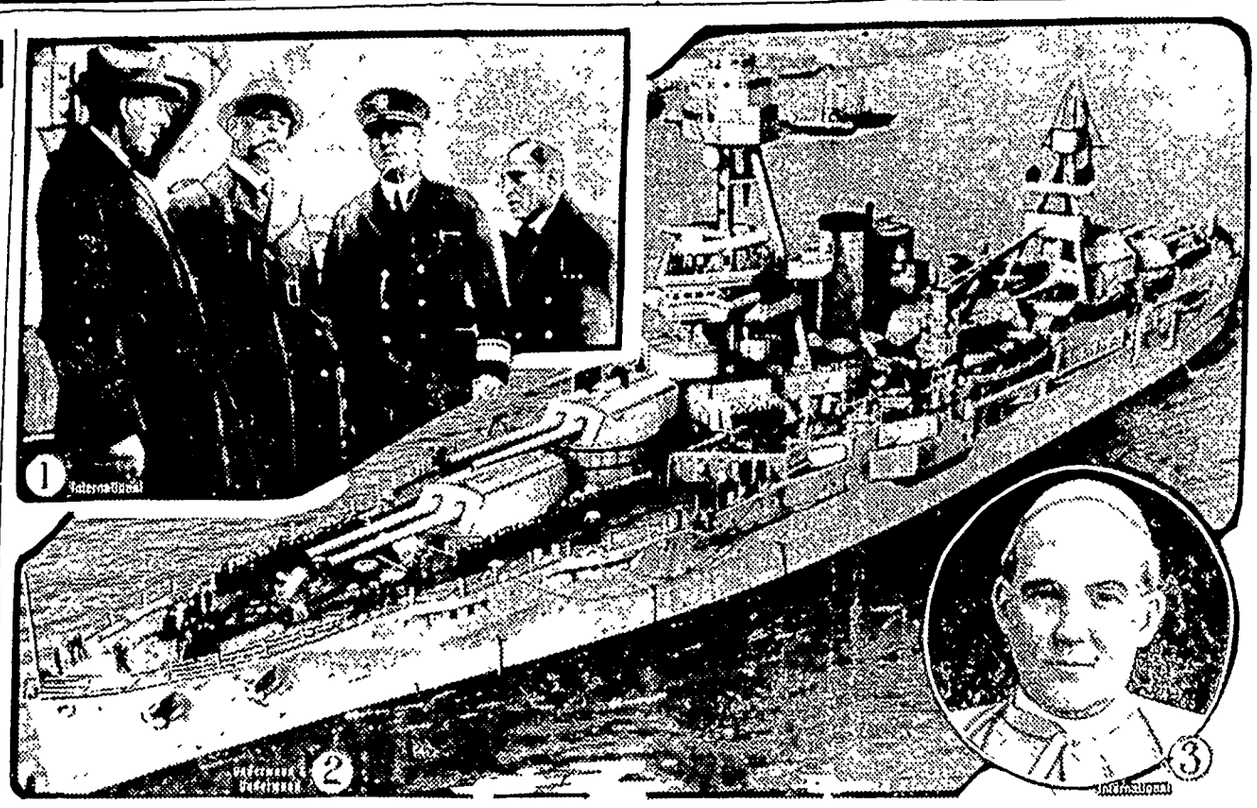
Learn to write and talk better, that you may be in position to oppose the professionals who are almost ruining the country with lack of information, wit, candor, and common sense.

* * *

After the people find out for themselves the common and important truths, literature disputes them and brings confusion. Literature has always been more concerned with fancy than with fact.

* * *

Popular belief is very unreliable It is generally believed that no negro attends a party, or goes on the streets, without carrying a razor as a defensive weapon. Policemen say they very rarely find a negro carrying a razor. It is the poorest of defensive weapons. A dagger is much better; a pistol better still No man could put up a fairly good fight with a razor, as it has no handle to support a thrust.



1—Secretary of the Navy Davis, Admiral Hughes, Admiral Brumby and Lieutenant Commander Ellesburgh on the U. S. S. Falcon at Provincetown conferring about salvaging of the sunken submarine S-4. 2—Battleship Texas, which will carry President Coolidge to Havana for the Pan-American congress. 3—Archbishop Raymond M. Roulaue of Quebec, created a cardinal by the pope.

NEWS REVIEW OF CURRENT EVENTS

Mexico Backing Down in Oil Land Controversy With United States.

By EDWARD W. PICKARD

FIRST fruits of the efforts of Ambassador Dwight Morrow in Mexico and the "good will" flight of Col. Charles A. Lindbergh to the capital of that republic are seen in the action of the Mexican house of deputies in the oil land controversy which has been the main barrier to entirely friendly relations between the two countries Urged on by President Calles, the house passed a bill wiping out the provision requiring owners of oil lands acquired prior to May 1, 1917, to exchange their fee simple titles for concessions terminating in fifty years.

This provision was a part of the law carrying into effect the constitution of 1917 nationalizing Mexican natural resources. The retroactive application of this and other provisions to American properties acquired before the new constitution went into effect was objected to by the American government as confiscatory. Several months ago the Mexican Supreme court held the provision unconstitutional, but under Mexican law a law is not nullified until the Supreme court has held it invalid in five decisions. President Calles did not wait for the five decisions before yielding to the contentions of the American State department. Although news dispatches from Mexico City attribute the action of Calles to the friendlier relations established by Morrow and Lindbergh, there is ample ground for the belief that the Mexican President was forced to take the step by the virtual state of bankruptcy of the Mexican government.

That the American government also is in a conciliatory mood was evidenced by its intention to relax the embargo on export of war munitions and military equipment to Mexico The first instance of this relaxation was the permission given by the State department for the purchase by the Mexican government of the Ford airplane in which Mrs. Lindbergh flew to Mexico City.

COLONEL LINDBERGH terminated his Mexican visit Wednesday, when he hopped off for a tour of Central America. Escorted by seven Mexican planes, the Spirit of St. Louis took the air early in the morning, skimmed past the great volcanoes Popocatapetl and Ixtaccihuati, and was on its way to Gautemala City, the first scheduled stop, 675 miles away. About seven hours later he was being most enthusiastically welcomed by the Guatemalans. His tour will take him to Panama, where great doings are planned, and thence he will fly back by way of Honduras and Progreso to Havana, Cuba.

Mrs. Evangeline Lindbergh bade her son farewell as he left Mexico City, and a few minutes later she and her companions from Detroit started on their flight back to Michigan. They headed for Tampico and were accompanied by two Mexican army planes.

AT THIS writing hope for the amphibian monoplane Dawn has dwindled almost to the vanishing point, and it is believed Mrs. Frances Grayson and her companions, Oskar Omdal, Brice Goldsborough and Fred Koehler, have perished. Starting from Roosevelt field, New York, for Harbor Grace, Newfoundland, on what was intended to be the first leg of a flight to Croydon, England, the Dawn immediately ran into rough weather and, save for a fragmentary SOS call picked up Sunday by the Canadian wireless station on Sable island, has not been heard from. At that time the plane was long overdue at Harbor Grace. On Monday a cable operator on the opposite side of Trinity bay from Harbor Grace picked up part of a call which it was surmised might be from the Dawn, and it was thought possible the Grayson party might be down in some isolated spot not far away. Meanwhile a number of American destroyers, the dirigible Los Angeles and all vessels in the region sought diligently for traces of the missing plane, examing waters and the coast carefully but without result. The search, however, was continued.

HEARST'S wonderful Mexican documents were still further discredited when Frank Y. McLaughlin, a civil engineer of Mexico City, appeared voluntarily before the senate investigating committee and declared that Miguel Avila, who procured the papers, was "a notorious purveyor of documents." McLaughlin, who said he knew nothing of the papers published in the Hearst papers purporting to show creation of a $1,215,000 fund for four United States senators, told the committee that Avila had peddled "twenty or thirty worthless documents" to him, including one purporting to have come from the American embassy.

This latter, McLaughlin said, was brought to him by Avila in Mexico City. McLaughlin then was vice president of the El Sol Petroleum company, which has a contract with the Mexican government. It consisted of a single typewritten sheet of American embassy stationery offering to disclose for $10,000 with $1,000 down what transpired between Secretary Kellogg and Ambassador Sheffield upon the envoy's visit to Washington. Although the paper was unsigned, McLaughlin related that Avila told him Arthur Bliss Lane, then first secretary of the American embassy, was outside the building in an automobile and would furnish the information. McLaughlin said he did not believe Avila's story and told him so. That Lane had any part in such a scheme was denied on behalf of the State department, although the department itself declined to dignify the story with a formal denial.

J. P. MORGAN has been elected chairman of the board of the United States Steel corporation to succeed the late Elbert H Gary. James A. Farrell continues as president and chief executive, and Myron C. Taylor as chairman of the finance committee will supervise the concern's fiscal policies. The three thus form a triumvirate to direct the affairs of the great corporation. Mr. Morgan will perform no executive duties but will be responsible in a general way for the corporation's operations. Mr. Farrell will be the chief executive officer.

Closely related to the steel corporation was the announcement in New York that Harold Stanley, president of the Guaranty company of New York, will become a partner in J. P. Morgan & Co., succeeding Dwight W. Morrow, recently appointed United States ambassador to Mexico. Mr. Stanley, who is only forty-two years old, has been president of the Guaranty company since December, 1921. He also is vice president of the Guaranty Trust company.

THIRTY-NINE exceptions, disputing the findings of Charles Evans Hughes, who, as special master for the United States Supreme court, upheld Chicago's right to divert Lake Michigan water for sanitary purposes, have been filed in the court by William W. Potter, attorney general of Michigan.

Michigan, and five other lake states —Minnesota, Wisconsin, Ohio, Pennsylvania and New York—were ordered by the court to file their exceptions to the Hughes report before January 3, and Michigan was the first to comply.

The Michigan exceptions attack practically every major conclusion of fact and law recommended in his report by Master Hughes and reassert the common contention of all the complaining states that neither the War department nor congress has power to authorize a diversion of water from one watershed to another.

HUNDREDS of savants from all parts of the country gathered in Nashville, Tenn., for the eighty-fourth annual convention of the American Association for the Advancement of Science, and it was noted that, out of courtesy to their hosts, the word "evolution" was entirely absent from their program. The convention officials explained also that they sought to demonstrate to the people of the state that while evolution may be a fundamental hypothesis in biology, it is only one of the important subjects investigated in the broad field of science. Dr. L. H. Bailey of Ithaca, retiring president, was absent because of illness and his place on the program was given to Dr. Sylvanus G. Morley, anthropologist of the Carnegie Institution. He told of the institution's investigation of the remarkable civilization developed by the Mayas, 2,000 years ago in what is now Guatemala and Mexico.

Dr. Clarence C. Little, president of the University of Michigan, laid before the association a program for pushing out the boundaries of man's knowledge of man. Citing the fact that there is a growing insistence "that the supply of defectives should be controlled and diminished by preventing their reproduction," he emphasized the importance of turning from insects to mammals, such as cats, dogs, rabbits, mice, and rats, in the laboratory phase of experimental genetics

---

THE necessity of immediate legislation empowering the War department to build up the nation's depleted munitions reserve by placing "educational orders" with private concerns is stressed by Secretary of War Davis in letters received by the chairman of the senate and house committees on military affairs.

The war secretary points out that failure of this government to place munitions orders with private concerns since the war has resulted in the disappearance of the munitions industry with the single exception of certain kinds of ammunition. He asks that the department be allowed to give annual orders to private concerns not only for ammunition, but for pilot models of the newly developed artillery and infantry weapons recently demonstrated at the army proving ground at Aberdeen.

NOTWITHSTANDING Secretary Davis' complaint, President Coolidge believes the American army and navy are in better shape now than they ever before have been in peace time. He told the White House correspondents that the budget policy toward appropriations for the armed services were liberal and in keeping with the nation's needs. In this connection he pointed out that budget estimates for the next fiscal year carry approximately $100.000,000 more for national defense purposes than was carried in the budgets of two or three years ago. Congress also has been generous with appropriations, the President believes. In view of the President's expressed attitude, there is apparently little hope that he will ask for the appointment of a board to study the munitions situation.

CALIFORNIANS exhibited unexpected restraint when William Edward Hickman was taken from Oregon back to Los Angeles to be tried for one of the most revolting crimes of recent years. The young man had confessed that he was guilty of the kidnaping and brutal murder of little Marian Parker, callously giving all the terrible details of his crimes. The law officers were fearful that attempts would be made to lynch him—and perhaps there would have been found few to blame the men of Los Angeles had they given Hickman such summary justice. However, the slayer was safely lodged in jail, and his trial was delayed only for the arrival of counsel engaged by his mother. On the train from Oregon Hickman made two futile attempts at suicide.

BRIG. GEN SMEDLEY D BUTLER, who commands the American marines at Tientsin, China, got into action the other day when the $25,000,000 plant of the Standard Oil company there was threatened with destruction by fire. General Butler personally directed the marines and Chinese, British, French and Italian fire brigade in fighting the conflagration and by his orders dirt barricades were thrown up that saved the 3,000,000-gallon oil tanks.

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.)

(©, 1927, by Western Newspaper Union.)

Lesson for January 8

JESUS AND THE SICK

LESSON TEXT—Mark 1:21-45.

GOLDEN TEXT—He hath done all things well: He maketh both the deaf to hear and the dumb to speak.

PRIMARY TOPIC—Jesus Makes Sick People Well.

JUNIOR TOPIC—John Welcomes and Baptizes Jesus.

INTERMEDIATE AND SENIOR TOPIC—Jesus Shows His Sympathy and Power

YOUNG PEOPLE AND ADULT TOPIC—Jesus' Power to Make Whole

The purpose of Mark in this section is to show Jesus Christ the Divine Servant bearing God's message and clothed with the power to save lost souls. Coupled with His superhuman strength is revealed His unwearied sympathy, giving itself out in helpful and saving service.

I. Jesus Teaching With Authority (vv. 21, 22).

1. The place (v. 21).

It was in the synagogue in Capernaum where He with four disciples repaired "straightway" upon His entrance into the village. He availed Himself of the regular channel of instruction. Though many abuses had crept into the synagogue service, He chose to associate the new with the old order.

2. The time (v. 21).

His faithfulness in observing the Sabbath brought Him to the place where the people assembled to worship and to hear the Scriptures expounded. He came not to destroy but to fulfill the law, even the law of the Sabbath.

3. The impression (v. 22).

The people were astonished. Two things about His teaching impressed the hearers.

The substance of His message. The scribes, the professional teachers of the law merely quoted the authorities, but Jesus with first-hand knowledge set forth the truth with the enthusiasm of freshness and personal conviction. This distinction was quickly detected by those who heard Him.

II. Jesus Conquering Demons (vv. 23-28).

1. The outcry of the demon possessed man (v. 23).

Perhaps he interrupted Jesus while He was teaching. When the power of God is manifested there is bound to be an outcry of the evil spirits.

2. The demon's confession (v. 24).

"Thou art the Holy One of God." The one whose chief business it was to waste and destroy human life was in such miserable state as to desire to have nothing to do with Christ, and was now forced to confess Him as the Holy One.

3. Christ's attitude toward him (v. 25).

He asked and accepted no testimony from Him, but sternly rebuked and cast out the foul spirit. He not only is Himself pure but is able to deliver others from impurity. Christ wants confession only from pure lips.

4. The obedience of the demon (v 26).

The spirit was reluctant to leave the man and malicious to the end, for he tore the man whom he had to leave He had to acknowledge his defeat and went out in a howling rage.

5. The impression made upon the people (vv. 27, 28).

The news of Christ's power spread rapidly over Galilee. The people were startled by two things:

(1) The new doctrince which He brought.

(2) His authority over demons.

III. Jesus Heals Peter's Mother-in-Law of Fever (vv. 29-31).

This scene lies in the home of one of the disciples. He went home with Simon and Andrew who told Him of the condition of Peter's mother-in-law. He came at once and lifted her up and the fever departed. She immediately ministered to Him.

IV. Jesus Ministering to Many (vv. 32-34).

Though the day was strenuous in its labors, He came unwearied even when the sun had set, to meet the needs of the multitudes who had gathered from all parts of the city. He healed many of their diseases, cast out demons, not allowing them to speak. The demons knew Him, but the poor, blind people knew Him not.

V. Jesus Cleansing a Leper (vv. 35-45).

As Jesus preached in the synagogues of Galilee and cast out demons, His power became known. A leper came to Him saying, "If Thou wilt, Thou canst make me clean." Jesus put forth His hand and touched him, saying, "I will, be thou clean," and immediately the leprosy departed and he was cleansed.

Beauty of Bible Thoughts

I am of the opinion that the Bible contains more true sensibility, more exquisite beauty, more pure morality, more important history, and finer strains of poetry and eloquence than can be collected from all other books in whatever age or language they may be written.—Sir William Jones.

Occupation

Absence of occupation is not rest; a mind quite vacant is a mind distressed.—Cowper.

MONARCH
QUALITY FOOD PRODUCTS

set the standard. If you paid a dollar a pound you could not buy better food products than those you find packed under the *Monarch* label.

"Not One Drink in Thirty Years!"

Former Heavy Drinker—Now Successful Business Man Saved From Ruin by Dr. Keeley's Famous Treatment

"Yes sir, I am proud to say I have not had a single drink in thirty years. And I used to drink to excess every day before I took the Keeley Treatment," says a former patient. Thousands of others, men and women formerly hopelessly afflicted with the disease of drunkenness, today point with pride to records of many years of total abstinence. To The Keeley Treatment alone they owe their present happiness and freedom from the greatest curse of all time—liquor and drugs. If you know anyone suffering from these vicious diseases—write us today. Let us tell you how The Keeley Treatment obtains permanent results in the treatment of liquor and drug addicts. Keeley record dates back over a period of more than fifty years. The success of The Keeley Treatment is proved by its record in thousands upon thousands of cases. Don't delay Investigate today. Learn how The Keeley method obtains sure freedom from liquor or drug cravings. Take steps at once to send the victim to The Keeley Institute. Your letter will be treated confidentially.

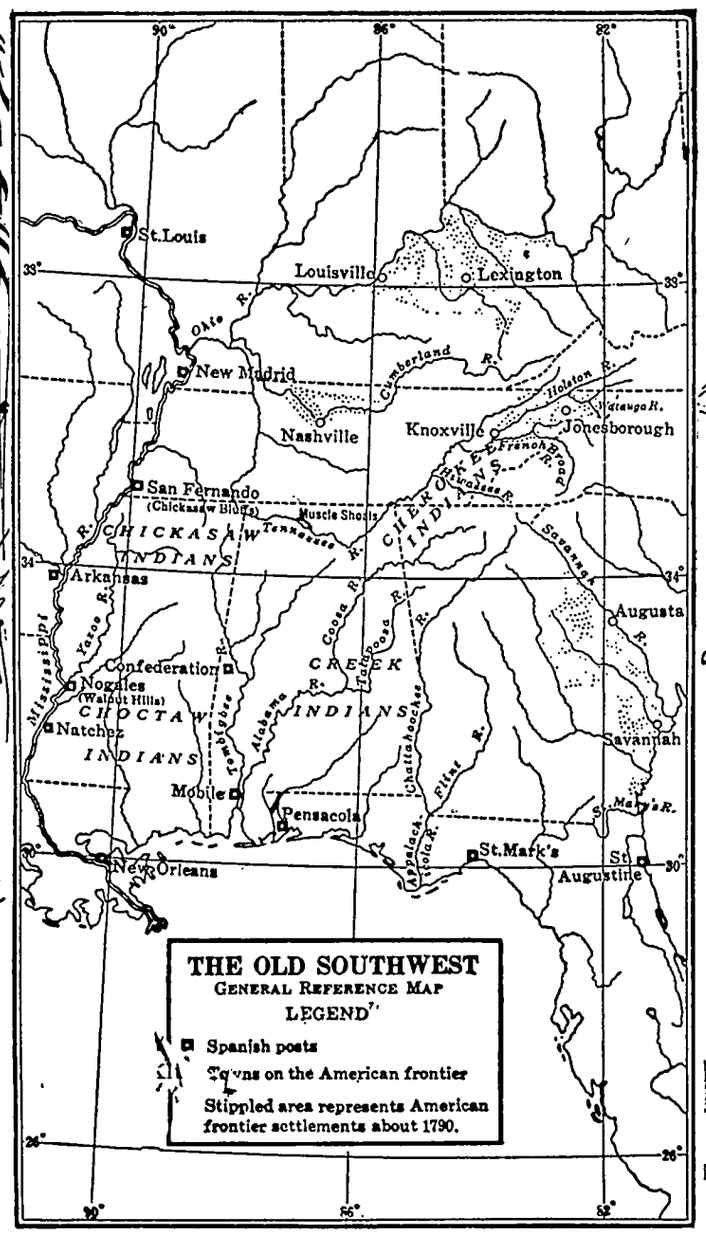
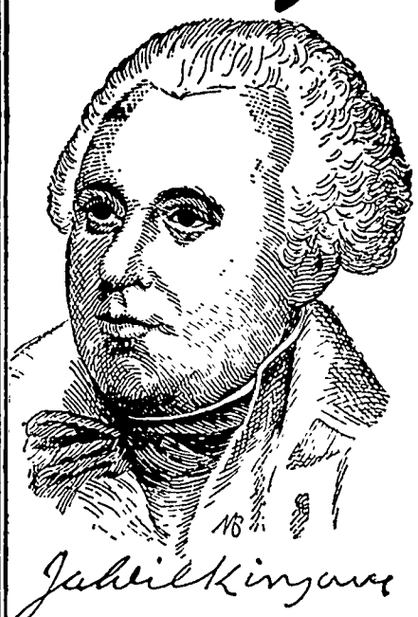
Little-Known Chapter in American History





Jabil Kingsbury

BERNARDO DE GALVEZ

By ELMO SCOTT WATSON

TO THE average American the history of the Revolution in its general outline is a familiar story—the oppression of British rule in America, the rebellion of the Thirteen Colonies, the Declaration of Independence, the selection of George Washington to lead the Continental army, the long, weary struggle against what seemed at times hopeless odds and then own and victory! Then, so they think, the Republic, with the hero of the Revolution first President, started on its triumphant toward becoming what we fondly believe the greatest nation on earth. But they comparatively little of those stormy years intervened between the signing of the of peace and the adoption of the Consti- nor of the troubled waters through which ew ship of state was compelled to sail e it reached a safe haven.

ast of all do they realize that scarcely was Revolution over than these new states, not ruly united states even though there was a al government, almost had a revolution of own upon their hands. It will be a surprise any to know that there was a time in the history of our nation when the people of ection of the country were looking upon those nother as oppressors, just as much as the een Colonies had looked upon King George his ministers as tyrannical rulers, were tening to fight for their independence so they could set up a union of their own and even seeking foreign aid in their project!

t these are the facts that modern historical arship is bringing to light and giving to icans a better conception of the many trials igh which their nation was borne and the factors involved in making that nation it is today. One of the latest of the ucts of this scholarship is the book "The ish-American Frontier" by Arthur Preston taker, recently published by the Houghton lin company of Boston, which deals with this erto neglected period in American history. tory has been touched upon by various his- ans, such as Roosevelt, Windsor, and Hender- but none of them has attempted to connect l the links in the story. When Roosevelt, instance, wrote his "Winning of the West" ould tell but little that was certain about this od. Now, however, it can be told with great- certainty for Doctor Whitaker, by spending years as Amherst Memorial Fellow from erst college, in France, Spain, England and to the Spanish archives has written the inating narrative of the days when "through amazing web of intrigue and diplomacy the pressible frontiersmen of the old South- burst their way through to the Mississippi.

A Dramatic Story

ramatic story is that, and it is an interest- ay of actors who appear from time to time drama. There are "rough-necked back- men of the Daniel Boone breed and courtly ntatives of the king of Spain, Scotch fur and half-breed chiefs of Creek and Chero- Indians, picturesque rascals, venal legis- and a host of others. Across the stage Bernardo de Galvez, whose conquest of Florida from the British during the Revolu- as the beginning of the contest between rd and American frontiersmen; Conde de blanca, the crafty Spanish minister; hucky Jack" Sevier, Indian fighter, idol of ontier and founder of the short-lived state anklin; James Robertson, "the Father of ssee;" Gen. James Wilkinson, the arch-con- or, and some lesser lights in his plots, such ns Benjamin Sebastian and Harry Innes ntucky. Then there are others whose names ore familiar—George Rogers Clark, brood- er his wrongs at the hands of a nation he erved so well, Patrick Henry, still con- ed to the cause of human liberty; John Jay, s Pinckney and above all others, the ic figure of George Washington.

whole story of the intrigues, the plots and r-plots, the secret treaties and the various on the diplomatic chessboard made by by England, by France and by the young can nation just emerging from its swad- clothes is too long to be told here. But the on which brought the "men of the western " to the verge of a revolution against their en on the Atlantic seaboard is found in the t between Spain and the new Republic for over the Old Southwest (shown in the bove) and the crux of that situation which d a climax just 140 years ago was whether or not Spain had the right to close the Mississippi to the frontiersmen who had settled in that territory. In one of the chapters in "The Spanish-American Frontier" Doctor Whitaker tells of that little known chapter in American history as follows:

By the very mode of its settlement, the West of our period was dedicated to particularism (i. e. the theory which leaves each state in a federation free to promote its own interests without regard to the whole). Its communities were established by the individual initiative of land speculator and pioneer in flat defiance of the colonial governments of North Carolina and Virginia—as in the case of the Holston settlements of western North Carolina and Richard Henderson's colony of Transylvania in Kentucky—or with at most the passive acquiescence of the revolutionary state governments, as in the case of Cumberland. By their own efforts these settlements maintained themselves, receiving from the foster-parent state little more than the skeleton of government, which they themselves had to invest with living substance. The frontiersmen felt that the Atlantic states were much more interested in western lands than in western people, and that even with the best will in the world legislatures sitting at Williamsburg, Va., and Hillsborough, N. C., were incapacitated by remoteness and the intervening mountains from giving good government to the Mississippi valley settlements. Current ideas with regard to natural frontiers and the economic basis of political systems pointed to the erection of these western communities into separate states with equal membership in the Federal Union, if indeed they remained a part of it at all.

The example of the American Revolution, so vividly recent, exerted a powerful influence over the frontiersmen, who now thought of themselves as playing the part of oppressed colonists, with the Atlantic governments in the role of the tyrant formerly filled by George III. Declaiming in the manner of Patrick Henry and Samuel Adams against taxation and misgovernment, the frontiersmen followed the process through its various stages of conventions, petitions and remonstrances to the culminating step of a declaration of independence. At first, however, they sought only what the Atlantic colonists had at first tried to secure from England: recognition as autonomous members of a federative empire. This was the situation from 1783 to 1786, when the indignation of the frontier was directed against the individual states alone and the frontiersmen professed devotion to congress

In 1786 the situation assumed a new and dangerous aspect. The frontiermen's illusion of a beneficent congress was shattered and many of them began to question the advisability of a continued union with the Atlantic states on any terms whatever This change of sentiment was due in part to the resolution of congress authorizing the conclusion of a treaty with Spain that would close the Mississippi to American shipping for a generation The "secret" resolution of congress was adopted in August, 1786, and by the following December it was common property in Kentucky The indignation of the people there was white-hot, and they protested that they had been sacrificed for the benefit of eastern fishermen and farmers.

Other grievances increased their ire against congress. The state of Franklin had applied for admission to the Union and had been rebuffed. Might other frontier communities expect more friendly treatment? The Indian policy of congress was still more offensive to them Unable to protect the Kentuckians against the northern tribes, congress seemed actually to favor the southern Indians over their white neighbors in western North Carolina Its commissioners negotiated a treaty with the Cherokee Indians in December, 1785, that aroused keen resentment in North Carolina and Virginia, not merely among the frontiersmen, but on the Atlantic coast as well, for it restored to the Indians, under a perpetual guarantee, lands granted and settled under the authority of the state of North Carolina.

The result was that by the end of 1786 there were many people in the West who were threatening not merely separation from the parent states on the Atlantic, but secession from the United States. It was no longer autonomy, but outright independence that the more radical frontiersmen were planning, and this new phase of particularism was all the more dangerous because its goal was a new union, a Mississippi valley republic. The very phrase with which they described themselves, "the men of the Western waters," suggested unity by indicating the bond of union all of these settlements were situated on the waters of the Ohio on or near the Cumberland plateau Indian affairs and the navigation of the Mississippi were matters of common interest in these settlements, and when they were not managed to the satisfaction of the people there, inflammatory addresses were circulated and committees of correspondence formed in Kentucky, Cumberland, Franklin and even western Pennsylvania. So far the frontiersmen had closely and consciously imitated the patriots of '76, but there was still one step that they had not taken they had not yet sought foreign aid against the oppressor. There was curiously enough much talk of British intervention, but it came to nothing. The current of the rivers that passed their doors pointed to Spain as the nation that should play the part of France in this second American Revolution. Floridablanca, however, was no Vergennes and Wilkinson no Washington.

That step, however, was taken when there began the negotiations between the frontiersmen and the Spanish authorities, looking toward some sort of an arrangement which would be mutually satisfactory, with General Wilkinson acting as agent for Spain in Kentucky. Wilkinson's scheme as presented to the Spanish officers in Louisiana was a sort of double-header in that it offered two alternatives.

The government (Spanish) should either build up a Spanish party in Kentucky by a judicious manipulation of commercial regulations on the Mississippi and then foment a revolution that would result in its secession from the Union and the formation of a close connection with Spain; or it should adopt an immigration policy with such liberal concessions in the way of land grants, religious toleration and political privileges as would depopulate Kentucky and fill the waste spaces of Louisiana.

Climax of Conspiracy

When this proposal was put up to the Spanish ministry in Madrid and considered by Floridablanca, it was met by a proposal, incorporated in a royal order, which would have given Spain pretty much what she wanted, but which would not have proved at all satisfactory to the frontiersmen. In the meantime things were coming to a head in Kentucky.

The climax of the Spanish conspiracy in its first phase came with the convention of July, 1788 (in Kentucky), when, according to Wilkinson, Innes and Sebastian openly urged the convention to carry Kentucky out of the Union We know but little of the proceedings of that convention or of the considerations that led the convention to reject the proposal It was obvious, however, that the analogy so often drawn by frontier agitators between their situation and that of the Atlantic colonies in 1775 was far from perfect. Even admitting genuine grievances and a diversity of interest, the numbers, wealth and political experience of the frontiersmen were inadequate for the maintenance of an independent state, and their geographical situation was extremely likely to entail either a conflict with Spain or subjection to it. The time for independence had not yet arrived. This was the judgment of the convention it seems and that body decided to await the result of the new federal experiment; and when the substance of the royal order of December 1, 1788, was communicated to Wilkinson, it gave the separatist cause another blow.

Meanwhile the governments on the Atlantic coast had heard reports of the progress of the Spanish intrigue and rumors of a British intrigue in the West. Alarmed at the prospect of disunion, they took measures to placate the westerners. The legislatures of Virginia and North Carolina both on their own account and in the interest of the frontiersmen passed resolutions (1788) asserting the inalienable right of their citizens to the navigation of the Mississippi Virginia gave encouragement to the movement in Kentucky to form a separate state and secure admission in the Union North Carolina extended government facilities in its West, creating in November, 1788, a district to which it gave the name of "Miro" and erecting new counties. In December, 1789, it pardoned Sevier and restored him to his former office of brigadier general of militia. In November of that year it again ceded its western territory to congress, and this time the act was not repealed Congress accepted the cession without delay

Even General Washington was so alarmed in 1787 by the ferment in the West that he advised that Jay's offensive proposals (viz to accept a closing of the Mississipoi) be quietly dropped In July, 1788, the congress of the Confederation adopted a resolution deferring the Spanish negotiation until the establishment of the new government of the United States, declaring that its citizens had a natural and inalienable right to the navigation of the Mississippi . When the new government was organized in 1789, one of its chief problems was to conciliate the outraged West. There was a manifest design in Washington's administration to convince the western frontiersmen that a new era had begun, that eastern provincialism was no longer ascendant in national councils, and that western interests would be safe in the hands of the new federal government.

Their efforts were so successful that the new nation was saved from disunion almost at its beginning. So this little-known chapter in American history came to an end, to be almost forgotten until the researches of late years have brought it out again into the light of day.

Around Orchard

PRUNING GRAPES IS WINTER TASK

The vineyard, often the most neglected part of the garden, is the one most easily handled and which will respond to pruning with greater returns than any other. Fortunately, grapes can be trimmed very severely without doing any great damage to the vines. In fact, it is best to trim a little more than you think is necessary rather than to trim too little.

When on the farm I was often called on by neighbors to trim their vineyards, says a writer in the Prairie Farmer. Usually the vines were a tangled mass about to choke themselves out with their own growth. When I got through with a job like that there was usually an exclamation of awe from the owner and an expression of fear that I had ruined the vineyard. By fruiting time, however, their fear had turned to thankfulness that they had allowed me a free hand in the work.

Grapes are borne on wood of the present season's growth from buds that were formed the year before. Right now you will find on your grapevines, buds which will send out shoots next spring. A cane 10 or 12 feet long may have 20 or 30 buds on it. When the growing season comes it is going to push the plant to send sufficient nourishment to make each one of these buds produce a bunch of grapes. By pruning and reducing the number of these buds, the number of bunches of grapes will be decreased but the increased goodness of those left will easily make up for the difference.

As the sap begins to flow rather early in grapes it is best to do all trimming in February. When the vines are massed and tangled, thin them down to four or five of the best canes and cut these canes back, leaving only three or four buds on each.

Young Apple Tree Borer Is Quite Destructive

The apple tree borer is much less well known than the peach tree borer. This does not mean that its work is not very destructive.

Many growers who regularly apply P. D. B. to their young peach trees completely neglect to look after digging the borers out of their young apple trees.

If a young apple tree has two or three borers in it and they are allowed to remain in it until they mature, it will never amount to anything. Even if it lives the tree will be stunted and weak for several years. Probably it never will be as vigorous as it would have been had it not suffered so severely from the borers.

If you examine the work of one of these big borers you can well understand why their injury to a small apple tree is so great.

Cut All Dead Brambles From the Berry Patch

All of the blackberry and raspberry canes which bore fruit during the past season are through bearing and should be cut off as near the surface as possible, says Ernest Angelo of the West Virginia College of Agriculture. The canes produced by these plants are biennial, that is, they live two years. Those that bore fruit during the 1927 season were produced during 1926. Canes which bore fruit during the past summer are either dead or dying and should be removed. Old brambles should be disposed of by burning in order to destroy any insects or fungi which may be present.

New growths made during the 1927 season should be thinned until there are not more than four canes to the cluster. Weaker canes or any that show any signs of disease should also be cut out.

Horticulture Facts

The Montgomery cherry is superior to Early Richmond unless it is earliness you are after.

* * *

Much trouble in spraying will be avoided when both materials and water are put through a good strainer. Either cloth or wire can be used for the purpose.

* * *

If apples do not have sufficient color, or if they show considerable scab in spite of spraying, look at the branches. The trees may need pruning to admit more sunlight, air and spray.

* * *

A good way to detect nematodes in the soil where the orchard is to be located is to carefully examine the roots of the plants growing there, prior to the planting of the trees.

* * *

The peach bears its fruit on new wood and should have the new growth cut back about a fourth or a third annually, depending upon the growth and the set of fruit buds.

* * *

See that the apple-picking ladders are under cover. If these are made of light wood, as they should be, one winter's exposure may weaken them enough to make them unsafe.

* * *

The cherry needs a moderate annual thinning out with the suppression of rampant limbs.

SHE WENT FROM BAD TO WORSE

Down to 98 Pounds — Finally Restored to Health by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—"After having my first baby, I lost weight, no matter what I did. Then a doctor told me I would be better if I had another baby, which I did. But I got worse, was always sickly and went down to 98 pounds. My neighbor told me about Lydia E. Pinkham's Vegetable Compound, as it helped her very much, so I tried it. After taking four bottles, I weigh 116 pounds. It has just done wonders for me and I can do my housework now without one bit of trouble." —Mrs. M. Riessinger, 10004 Nelson Ave., Cleveland, Ohio.

If some good fairy should appear, and offer to grant your heart's desire, what would you choose? Wealth? Happiness?

Health? That's the best gift. Health is riches that gold cannot buy and surely health is cause enough for happiness.

Lydia E. Pinkham's Vegetable Compound may be the good fairy who offers you better health.

Old-Timers in Line

In an old-timers parade at Hereford, Va., J. Ludwig, eighty-two, drove a twenty-eight-year-old horse; Nathaniel Gregory, ninety, came next, driving a horse thirty-three years old. Then came Jere Moll, ninety-one, driving a horse thirty-five years old. And last came Samuel Gehret, ninety-seven, with a horse thirty-seven years old.

Just One Trouble

The trouble with gossips is that their eyes are never open and their mouths are never shut.—The American Magazine.

Drink Water to Help Wash Out Kidney Poison

If Your Back Hurts or Bladder Bothers You, Begin Taking Salts

When your kidneys hurt and your back feels sore don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which helps to remove the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of good water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate clogged kidneys; also to neutralize the acids in the system so they are no longer a source of irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink, which everyone should take now and then to help keep their kidneys clean and active. Try this; also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

A Minute A Day Makes Milking Pay
It takes less than a minute a day per cow to weigh each cow's grain feed & record her milk production
BLUE VALLEY CREAMERY INSTITUTE

MINUTE A DAY TO WEIGH FEED, MILK

Find Which Cows Are Most Efficient and Profitable.

had to spare. Since every farm cow is the "market place" for the grain and hay she consumes, it pays to know which individual cows are the most efficient and most profitable. It takes less than a minute a day per cow to weigh each cow's grain feed and record her milk production. By keeping this simple record, a farmer is able to feed each cow according to profit above feed cost on each cow This plan also makes it possible to secure maximum production from each cow and almost invariably the more a cow produces, the greater the profit she makes for her owner. Cow testing association records show that where cows produced 150 pounds of butterfat in a year, they returned $21.70 a ton for grain, $8.32 a ton for hay, and $2.22 a ton for silage; where cows produced 150 to 200 pounds of butterfat they returned $18.94 a ton for grain, $20.34 for hay, and $5.28 for silage, and where they produced between 300-350 pounds of butterfat, they returned $02.42 for grain, $33.10 for hay and $8.76 for silage

Grind Your Own Feed

Start Right! Grind All Your Feed!

Let us show you how the W-W *Hammer* Mill will bring you better feeding profits. How it will quickly grind and mix your own rations. Grinds any feed from the ground up—ear corn, fodder, snapped corn, bundle feed, small grain, etc., separately or together. No burrs, no knives. Power requirements do the work. Timing gears. Fits any size flower or elevator. We will gladly demonstrate the W-W *on your farm, under your own power, on your own feed.* (101)

THE KLEMME TIMES

Fortieth Year—Number 32. KLEMME, IOWA, THURSDAY, JANUARY 12, 1928. $2.00 Per Year In Advance—Outside of Iowa $2.50

370 CARS OF STOCK SHIPPED LAST YEAR

EXCEEDS BUSINESS IN STOCK IN PREVIOUS YEAR

Other Out Going And In Coming Shipments Are Compared

Each year in the fore part of January The Times makes a survey of rail shipments 'out-going" and "incoming" over the Rock sland at this point. The information we gather is reliable and is furnished to us by M. O. Barr, agent of the Rock Island here. The report covers shipping by frieght only. We have no way to get a check on shipments made by truck for stock, grain, feeds, etc.

The report for the year 1927 compares very favorably with the report for 1926, and indicates that business in Klemme is about normal in most lines, and has increased in other lines, despite the fact that some calamity howlers report poor business and hard times. In general, we will say that Klemme is holding its own and is far ahead of most towns of this size.

Following is the report of the number of car loads of freight shipments for both 1927 and 1926:-

Out Going Shipping

Carloads of	1927	1926
Corn	13	40
Oats	53	73
Seeds, grains, etc	2	4
CATTLE	156	151
HOGS	213	192
SHEEP	1	0
Butter	7	0
Miscellaneous	1	7
TOTAL	448	467

In Coming Shipping

Carloads of	1927	1926
Corn	5	0
Flour	9	11
Coal	60	57
Lumber	18	20
Mill Products	2	14
Building Material, Cement, etc.	20	29
Furniture	1	0
Cattle	19	29
Horses	0	1
Sheep	0	2
Implements	1	1
Machinery	1	1
Automobiles	0	1
Salt	4	4
Petroleum, etc.	24	22
Hay	3	2
Packing House Pro.	9	5
Potatoes	1	0
Immigrants	1	6
Tile, all others	45	27
TOTAL	223	232

LIVE STOCK SHIPMENTS FOR THE PAST FEW WEEKS

Forty Five Cars Shipped Out In December Period

Live stock shipments from Klemme for the December Report of the Rock Island agent, M. O. Barr, shows that 45 car loads, consisting of 27 car loads of hogs and 18 car loads of cattle, For the Jan. 7th shipment there were but 2 car loads of hogs and 3 car loads of cattle.

Live stock shipments for the past year have totaled more than one car load for each day of the year, with some to spare. This is an average that very few towns can boast of.

RUTH SUCKOW SUFFERS LOSS IN NEW YORK BLAZE

Well Known Author Is Neice Of Mr. And Mrs. H. L. Suckow

Miss Ruth Suckow, daughter of Rev. and Mrs. W. J. Suckow, of Forest City, suffered considerable loss in a fire which damaged her apartment in New York City recently.

Miss Suckow lost practically all of her clothes and other articles in the fire and a bundle of currency amounting to $100 was missing, although the container in which it had been kept was not damaged.

Miss Suckow's manuscripts were saved. She is just completing the work of writing, "The Story of the Bonney Family," scheduled for publication at an early date.

MRS. HARVEY'S MUSIC PUPILS IN RECITAL MONDAY NIGHT

Musicale Will Be Held At School House Beginning At 8:00 P. M.

Mrs. S. A. Harvey, piano instructor, will present her music pupils in a musicale, or recital, to be held on Monday evening, January 16th, at the school building, beginning at 8:00 o'clock. Mrs. Harvey announces that there will be no admission charged and all who are interested are invited to attend.

Following is the program which will be given:-

Part One

"The Robbins Return" Fisher
Wayne Pavey
"Silver Nympth" Carl Heins
Gracka Quandt
"Lullaby" G. Martin
Milvern Barz
"Tales of Hoffman" J. Offenbach
Raymond Schuldt
"Red Rose" Waltz J. De Lancey
Max Barz
"Cupid's Dance" Percy Wenrich
Thelma Kluckhohn
"Among the Roses" W. Field
Irene Harms
"June Flowers" Waltz A. A. Ford
Clarence Kluckhohn
"Cricket" M. H. Bodhran
Irene Lemke
"Edelweiss Glide" E. S. Vanderbeck
Ethel Barz
March "Militaire" L. Streabbog
Leona Buseman
"Dance of the Demons" Holst
Gracka Quandt and Mrs. Harvey

Part Two

"National Airs" R. Keiser
Wayne Pavey
"Life Let Us Cherish" From Roots
Milvern Barz

CHRIS JOHANSON WILL MAKE RUN FOR COUNTY CLERK

"Christy" Has Given Fine Service In Clerk's Office

Chris Johanson's announcement appears in this paper as a candidate for the office of Clerk of the District Court, of Hancock County, Iowa.

If "Christy" was announcing for the office of Clerk of the Supreme Court, we would say "go ahead."

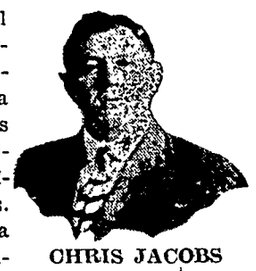
Mr. Johanson has handled the work in his office with courtesy, dispatch and accuracy, and if he would like to have that office for another term it is perfectly all right as far as we are concerned. We would not know where to pick another man who could serve any better than "Christy."

We are glad t see Mr. Johanson in the campaign and wish him success.

POPULAR MAN IS OUT FOR THE OFFICE OF AUDITOR

Chris Jacobs Has Had The Experience Needed For Important Office

This week The Times publishes an announcement of more than mere interest to the tax payers and voters of Hancock County. We refer to the announceemnt of Chris Jacobs, of Garner, who is a candidate for the office of Auditor of Hancock County.



CHRIS JACOBS

Chris is well known all over the county and is a man who is well qualified for the office he seeks. He has had a lot of valuable experience in county affairs which fits him for the office he seeks. Before coming to this county a number of years ago, he was supervisor at Maquoketa, Iowa, and his services were very highly recommended there. A few years after taking up his residence in this county he was eected County Auditor and served two terms.

Mr Jacobs has a fine record as an official and is well known all over the county. Nothing we could say would in the least alter his good standing with the voters at the primary election. Mr. Jacobs, we predict will make his influence felt when the votes are counted

Good luck, Chris!

THREE STORES AT GARNER ENTERED MONDAY NIGHT

Hounds Put On Trail Trace Robbers As Far As Clear Lake

Bloodhounds brought from Waterloo followed the scent of persons as far as Clear Lake, who entered three Garner stores Monday night.

Two stores were entered through basement windows, while the third was attempted by jimying a window at the rear. Stores visited by the robbers were the W J. Barz store, F. W. Zeiger's drug store and the Sterling dry goods store.

But little was taken and according to Marshall Lenz it appears that the thieves were perhaps frightened away. It is believed that the robbers put in their work between 9:00 and 10:00 o'clock.

SCHLICHTING—KROPP

On Wednesday, January 11th, at 11:00 o'clock in the morning, the marriage of Miss Alice Schlichting and Mr. Gilbert Kropp, both of Goodell, took place at the Methodist Parsonage, solemnized by Rev. A. W. Gauger

The bridal couple was accompanied by Mr. and Mrs. Herman Gast of Liberty Township.

Both bride and groom are some of the fine young people of Hancock County. Both have grown up here and are well and favorably known

The bride is the daughter of Mr and Mrs. Wm. Schlichting of Twin Lakes Township, living several miles northwest of Goodell.

The groom is the son of Mr. and Mrs. August Kropp of Liberty township

They will live on a farm in Twin Lakes township.

METHODIST CHURCH NOTES
A. W. Gauger, Pastor

Preaching service at 10:00 a. m.
Sunday school at 11:00 a. m.
Epworth League at 7:00 p. m.
Evening worship at 7:30 p 'm.

KLEMME REFORMED CHURCH
Calvin Grosshuesch, Pastor

11:00 a m. Sunday school.
8:00 p. m. Wednesday, Young People's Bible Class.

The Confirmation Class will meet Saturday afternoon at 1:00 o'clock. Choir practice at 3:00 p. m.

Rev. Gauger called on Mrs. David Schwichtenberg, who is a patient in Mercy hospital, this morning.

LOCAL DECLAMATORY CONTEST WILL BE HELD SOON

Fourteen High School Students In Contest This Year

Fourteen young people of our high school who have been in training for some time at the hands of Miss Trumbell, our High School Principal, and for the last week by Miss Stott, of Mason City, will contest for a chance to represent Klemme High School in the preliminary County and State contests at a later date to be announced in due time.

Will Play Rowan Tuesday Nite

We have no basket ball games here this week but have one scheduled with Rowan here on next Tuesday evening. Rowan usually has a fast team and will probably give our boys a battle royal. K. H. S. lost to Garner last week by five points, the final score being 16 to 21. The score was tied at the half way mark

Rev. Scott Gave Good Talk

Our P. T. A. listened to a splendid address by Rev. Scott on Tuesday evening of this week. His address was on the morals of modern youth and who are responsible. He stressed the importance of the example set by the adults and the necessity of proper training in the home. He might have placed a little greater share of the blame on others outside of the home. Parents are not always to blame for the waywardness of some children, tho they are probably most to blame. Teachers and associates outside of the home have their influence for good or ill. A teacher who is profane and irreligious and lacking in sincerity and integrity will tear down much that a parent is trying to build. But we believe most teachers influence children favorably.

P. T. A. Boosts Spelling Bee

Our P. T. A. took favorable action toward encouraging our grade pupils in the annual spelling bee and voted to allow awards to the best spellers. Mr. Gimer, president of our school board, very generously offered $5.00 toward the purchase of suitable awards for proficiency in spelling. Possibly others will offer additional sums for the same object.

Next week will be week of horrors for many of our students for it will decide whether semester credits are earned for the first half of the year. We hope few will be disappointed.

Mr. and Mrs. Edwin Josten drove to Fenton last Friday for a visit at the home of her sister, Mrs. Ed Weisbrod, and at the Ed. Schlei home.

COOK SCORES HIGH IN C. T. A. NO. 3

V. A. COOK HAS BOTH HIGH COW AND HIGH HERD IN NO. 3

Emil Beier Scores Second High With His Herd Of Holsteins

339 cows were on test in the Hancock No. 3 Cow Testing Association in December. Out of this number, 52 cows produced over 40 pounds of fat, and 21 cows produced over 5 pounds of fat. The association average based on the 339 cows on test, 266 in milk and 73 dry was:-

Average Milk	540 lbs.
Average Fat	21.1 lbs.
Average Feed Cost per pound of fat	28.08 cts.
Separator loss	$2.21

The highest average for herds was made by the P. B. and G. Holstein herd of V. A. Cook. This herd of 15 cows, 14 of which were in milk, made an average of 1066 pounds f milk and 42.36 pounds of fat.

Emil Beier was second with his herd of 10 P. B. and G. Holsteins. 9 cows in milk and one dry made an average of 1118 pounds of milk and 38 47 pounds of fat.

Louis Quintus, of Garner, with his herd of 10 G. H. and Sh., all in milk, made an average of 1009 pounds of milk and 36.07 pounds of fat.

Ben Goll with his herd of 10 G. H., all being in milk, made an average of 947 pounds of milk and 35.8 pounds of fat.

M. T. Love of Garner with his 16 P. B. and G. Guernseys, 15 in milk and one dry, made an average f 645 pounds of milk and 35.2 pound of fat.

"Grannie" Wins Again

Grannie, a Grade Holstein, owned by V. A. Cook, was high cow, having produced 2380 pounds of milk and 92 6 pounds of fat.

Syke, a grade Guernsey owned by M. T. Love, produced 1149 pounds of milk and 70.1 pounds of fat.

Tester Sets Forth Resolutions For The Prosperous Dairyman

The first attempt for improvement in my dairy business for the New Year, will be the lowering of my feed cost per pound of butterfat produced, then if fat lowers in price I will still be making as much profit, because of the lowered feed cost. In order to lower the feed cost and make as much profit from the herd, I will need to cull out all boarder cows and feed the good cows more intelligently.

In place of chopping the ice out of the tank in order that the cows can drink, I resolve to heat the water with a tank heater.

I resolve to feed my cows while on pasture during the summer. The value of feeding grain to cows on pasture cannot be measured by their production at that time.

I resolve to start that patch of alfalfa, another way of lowering my feed cost.

I resolve instead of selling my grain after threshing, as I have been doing, for $25 per ton, I will sell to the Creamery in the form of a dairy cow's product for $75 per ton.

I resolve not to be so busy next fall that my cows will need to grind their own feed and then produce at a loss. The fall freshening cows will receive a balanced grain ration from the start, and never see the corn stalks after the corn is out.

I resolve next fall and winter to duplicate the advantages of early summer in feeding, as closely as possible. If I know what each individual cow in the herd produces I can handle her as such.

CAMP FIRE NOTES

The Camp Fire Girls held a meeting Monday, January 9th, at the home of their guardian, Miss Marie Blank. Every one was present except one.

They had a New Years grab bag.

After the meeting refreshments were served.

Reva Elder, one of our Camp, received a National "Uta" honor. She sent in a picture of a tree to the "Tree Year" Week contest and received the honor.

Annual Meeting

Klemme Live Stock Shipping Association

The Klemme Live Stock Shipping Association has just closed another successful year. The Board of Directors have decided to give a free Banquet, or Dinner, on—

Thursday, January 19, 1928

At The Idle Hour Theatre, Klemme, Iowa

and extends a welcome invitation to all of it's Members, their Families and Friends, to enjoy a pleasant time.

Immediately after the banquet dinner will follow the Annual Meeting, the Reading of Reports of the Manager and Secretary, Election of Directors, and other business which may come before the meeting. The County Agnt will close the program with Free Moving Pictures.

Peter Josten, Secretary

WISE WORDS

Speech is power.—Emerson.

There's no success without faith.

The best policy is a paid-up one.

The truth of truths is love.—Bailey.

You must think you can, before you can.

Statistics do not tell the whole truth.

Biggest leak of a foolish mind is the tongue.

Dog barking never annoys the owner of the dog.

Some fools and their money are difficult to separate.

An outward laugh sometimes conceals an inward groan.

If one loves his friend thoroughly he will laugh at his jokes.

Average man is to be encouraged in trying to excel the average.

No man is able to see all the sides of even the simplest question.

Farmers don't much believe in smoking. Too many inflammable barns.

Waiting for something to turn up is one of the greatest obstacles to success.

Solomon had an experience that was enough to inspire him to write proverbs.

When you can't get yourself in a cheerful mood any other way, turn to the funny page.

If a man can remember two or three hymns of his boyhood and sing them, he thinks he is pious.

Where one man has been ruined by his enemies hundreds have been ruined by their friends.

Seek Specific Name for the Boy Friend

"She's my girl," is carroled by every male human heart when in love, but the girls themselves have never agreed upon what "he" is to them. Some 20 names "he" has given are listed by a writer in the Survey, ranging from the romantic but discarded beau" to the modern "steady," "cutie," "sheik," "date," and even "boy friend." The writer, Eleanor Rowland Wembridge, makes a plea for the world to get busy and find a noble name to denote the attendant male person—a word free from self-conscious personalities, one not too humorous, apologetic, romantic, rude, rustic or in any way specific, yet one applicable "equally to Zeke the baggageman or the prince of Wales." How about it, girls? What is he to you?

The New Woman

Governor Weeks of Vermont, who designed the 4 by 6-foot birthday card sent to President Coolidge in South Dakota, has the Vermonter's sturdy hatred of ultra-modern fashions and customs.

At a Montpelier reception a banker nodded in the direction of a New York lady in a very short skirt who sat with her knees crossed smoking a cigarette in a long tube.

"A new woman, I suppose," he said.

Governor Weeks glanced at the lady and observed:

"I should say an old woman repainted."

Celebrates 104th Birthday

"I be merry," was the quick response of Mrs. Sophia Bird of Loughborough, Ireland, when congratulated on her recent birthday, which was her one hundred fourth. "I am very comfortable, and shall do my best to hold up for another birthday, she added smiling. All day long there was a procession of well-wishers who were met with a cheerful word and smile. Mrs. Bird arises at 9:30 o'clock every morning and retires at 9.

Sad Reminder

Wife—Every time you see a pretty girl, you forget you're married.

Hubby—You're wrong m' dear. Nothing brings home the fact more forcibly.—Air Station News.

Fair Defense

Bobby—I do wish aunty wouldn't smoke.

Mother—Why, dear?

Bobby—When she kisses me it's so much like being kissed by a man.

Her Face

Wife—Don't you think it would be a good idea to have my face lifted?

Hubby—Clean off, my dear, if you could get another one.

Trusting It Is

Youthful Writer—What do you think of this last story of mine?

Magazine Editor—If it's your last, it's fine.

Practical Solution

Mrs. A.—I sat up for hours last night with a wet towel around my head trying to solve the help problem.

Mrs. B.—And I stood up half an hour with a dish towel in my hand, solving mine.

NO CORN STALK DISEASE THIS YEAR

Normal Ripening Of Corn Prevented Disease Spread

The normal ripening of corn this year is undoubtedly responsible for the fact that we have not heard of any losses from corn-stalk disease this year, stated Dr. Peter Malcolm, Chief of the Animal Industry Division of the Iowa Department of Agriculture. Last year at this time farmers were suffering heavy losses.

The early frost last year, followed by hot weather caused a second growth which was undoubtedly responsible for the trouble last year, states Dr. Malcolm. It is thought that the second growth after a heavy frost causes prussic acid to form in the stalk. The prussic acid, plus lack of proper attention to the animals, is responsible for most of the losses.

IMPOSSIBLE TO SET COLORS

Clothing Specialist Advises Purchase Of Everfast Materials

Contrary to common belief, there is no means of setting the color in non-washable material. Rather than trying to set the color, Miss Katherine Cranor, professor of textiles and clothing at Iowa State College, recommends that housewives demand color-fast material when making their purchases.

During the past few years numerous housewives have used salt, vinegar, turpentine and other similar solutions in attempts to set he color. It has been found, however, that if the color is not set in the fabric before it leaves the hands of the manufacturer, nothing will set it.

Miss Cranor states that many everfast color materials are now on the market in all shades, that are backed by a good manufacturer's guarantee. In many instances the factory offers not only to replace the material which fades out, but also to pay for the cost of making the material into a garment.

HIGHER CORN YIELDS COMING AS RESULT OF EXPERIMENTS

Strains Produced At Ames Greatly Excel Best Common Varieties

Iowa farmers some day will be growing corn which will yield far more than the varieties now commonly grown, if preliminary results obtained in the extensive corn breeding experiments now under way at Iowa State College are an indication.

When the first crosses of the inbred strains of corn were made last year, it was found that out of 281 crosses tested, 223 excelled Reid's Yellow Dent in yield, the highest yield obtained being 112.2 busehls to the acre. Fifteen of the best crosses averaged 102.5 bushels to the acre, which was 28 9 bushels an acre more than Reid's yielded and 16 9 more than the Krug variety produced In all, 99 crosses excelled Krug corn in yielding power.

The corn breeding experiments were begun at the Iowa Station in 1922 and it is felt that the results so far obtained indicate what may be expected at the end of seven or eight years of experimenting, which are needed for a breeding project of this kind.

More extensive corn breeding experiments were carried on at Ames last year than ever before. The wo k is performed by the United States Department of Agriculture in cooperation with the Iowa Agricultural Experiment Station

Inbreeding and then crossing the inbred strains as a means of producing high yielding varieties was started at the station six years ago under the direction of M T. Jenkins, associate agronomist with the United States Department of Agriculture. In 1922 500 open pollinated ears were planted, one ear to a row. The number has been increased until this year the station has 2,213 ear rows of self-pollinaetd corn which has been "selfed" since 1922.

First crosses of inbred strains were made in 1925 and the yielding power of these strains determined in 1926. By inbreeding it is hoped to eliminate defects and fix the type. After the variety has been definitely fixed, the corn breeder is then ready to begin crossing. Results obtained with the hybrids may be used as a definite guide in future "selfing" and crossing.

EGG TRAVELS OVER THOUSAND MILES FROM IOWA

Brings Three Times Original Price At End Of Journey

An Iowa egg sold in June at the rate of 19 cents a dozen. One month later it passed over the counter in Brooklyn, New York, at the rate of 60 cents a dozen, after having gained a month of age and after a trip of more than a thousand miles. The Iowa producer got 41 cents a dozen less for the eggs than the city consumer paid.

This was the story brought out recently by two 12-year old igrls, Miriam Fairbank, an Iowa farm girl living near Monticello, and Elizabeth Ganis, a Greek girl in Brooklyn.

It came about in this way. In preparing a case of eggs to go to town last June, Miriam wrote her name, address and date on an egg, with a note asking the buyer to correspond with her. More than a month later, she got a letter from the little Greek girl in Brooklyn.

The girls exchanged pictures and, incidently, thru their correspondence learned of the difference in price which their respective parents had paid and received for the consignment of eggs which contained the one with the address.

This consignment of eggs had not been in cold storage. The increased costs mounted up as a result of passing thru many hands and of the extensive handlings and shipping charges, according to Ira W. Arthur, agricul ural economics extension specialist at Iowa State College. Probably too, prices on eggs had increased somewhat in the meantime be ween the sale and consumption of the egg, but the egg during that period had been deteriorating in quality.

The Smiths

Montague Norman, governor of the bank of England, was praising American labor conditions at a dinner in New York.

"Labor and communism over here, he ended, "are on as bad terms, thank goodness, as Mr. and Mrs. Smith

"'What is your husband's income?' Mrs. Smith was asked in the separation suit.

"'Between 4 and 5 a. m.,' she answered, with a toss of the head.

"Mr. Smith in his examination was asked if his wife believed in clubs for women.

"'Rather!' he answered. 'Clubs, sandbags, any old thing.'"

Golden State Route to California

On your winter trip to California go via Golden State Route. It's the low altitude way—and "low altitude" means "perfect comfort."

"And what a variety of things to see—Ranch life, Indians, Mexicans, Missions, Apache Trail, and practically every winter resort in the Southwest!"

Rock Island-Southern Pacific California service includes the de luxe *Golden State Limited* from Chicago —Kansas City—none finer; the popular *Apache*—thru Pullmans daily from Chicago, Minneapolis, St. Paul, Des Moines and Kansas City and the *Californian* from Kansas City.

Meals—"Best on Wheels" at most reasonable prices.

PIONEER LAID TO REST WEDNESDAY

HENRY GRIEWE DIED AT HOME OF DAUGHTER SUNDAY EVE

Had Lived In Hancock County For Over Fifty Five Years

OBITUARY OF MR. HENRY GRIEWE

Little did this community realize a few short weeks ago when we met in this capacity and in this place to pay a last tribute to the companion of the subject of this sketch, that we would be called upon so soon to render a like tribute in memory of him. As a sheaf of golden grain he too was soon garnered in and was again united with her to whom he was so tenderly devoted during their long and happy earthly sojourn.

Mr Henry Griewe was born Nov. 7, 1849, in Eldena, Germany, where he spent his boyhood days.

His parents being devout members of the Lutheran Church saw to it that he received proper religious instruction during this boyhood period. He was confirmed at the age of 15 years.

The year following, he with his parents, migrated to America and settled on a farm near Colesburg, Delaware County, Iowa.

It was soon after coming there that he was thoroughly converted and thereupon united with the German branch of the Methodist Episcopal Church.

About 55 years ago, because of agricultural disadvantages that they found where they had settled, he came westward with his parents and settled on a farm about 3 miles north of Klemme, known as the Wm. Greiman farm. Several years later his father purchased a farm in German, now Liberty, township.

During the breaking up of this virgin soil Mr. Griewe had many thrilling experiences with wolves and Indians, that he was wont to relate in after years.

October 13, 1874 he was united in marriage with Miss Mary Anna Ell, who preceded him in death on December 6, 1927.

They immediately settled on a farm in Liberty township and set up housekeeping. Together Mr. and Mrs. Griewe shared the joys and sorrows, hardships and privations of those earlier days of pioneer life—happy in the thought that they were kingdom builders in more than one sense.

Thru hard labor, thrift and economy paired with good judgment they were successful in life, not only in a financial way but in the rearing of their family. Theirs was a Christian home of which Jesus Christ was the Head. It was in this country home that their six children were born and reared in the ways of the Lord.

Mr. Griewe was an active member in the Church of his choice. For about 20 years he was Sunday school superintendent in the Liberty Sunday school. For a time he functioned as classleader.

He was not only a loyal citizen of the country of his adoption, but he was also most loyal to his God and the church of Jesus Christ.

Twenty-two years ago Mr. and Mrs. Griewe retired from the farm and moved to Klemme. Here they enjoyed the respect and esteem of their neighbors and friends, and their home was ever open to those in need.

About 2 months ago Father Griewe took ill with a complication of troubles. The shock of this affected his dear wife and hastened on her death. This in turn affected him for the worse and no doubt brought on his going so soon.

He died last Sunday evening, Jan. 15, 1928, in Clarion, Iowa, in the home of his youngest daughter, Mrs. F. W. Ortmeyer, where he was tenderly cared for during the few weeks that he was with them.

He is survived by all of his children. They are: the Rev. F. C. Griewe, member of the Upper Iowa Conference; Mrs. A. H. Yahnke, Garden City, Minn.; Mrs. Arthur Wellemeyer, of Klemme; Miss Anna, of Garden City, Minn.; John of Minneapolis, Minn.; and Mrs. F. W. Ortmeyer of Clarion where Rev. Ortmeyer is pastor of the Methodist Church.

Deceased is likewise survived by twelve grandchildren, by one sister, Mrs. Wm. Bredlow, of Garner and by numerous other relatives.

Funeral services were held in the Klemme Methodist Church on Wednesday afternoon, conducted by Rev. A. W. Gauger who preached the sermon Rev. Van Metre of Garner took part in the services and spoke briefly. A mixed quartette from the Clarion M. E. Church was present and sang at the funeral services.

As was the case at Mother Griewe's funeral the sons, sons-in-law and grandsons acted as pallbearers.

Many from a distance were in attendance at the funeral from Mason City, Clarion, Garner, and Liberty Township was largely represented.

Interment was made in the Klemme Cemetery.

By Rev. A W. Gauger.)

DENVER GROUP BUYS SUGAR PLANT AT BELMOND

Will Start Contracting For 8,000 Acres Of Beet Land

A group of Denver capitalist have purchased the former Iowa Valley Sugar Company plant at Belmond and have started preparations to contract for about 8,000 acres of sugar beets for a campaign next fall.

The purchase was made from the Dyer company of Ohio, which had the mortgage on the factory and gained possession by foreclosure. The new company will be called the Mid-Western Sugar company and Mr Christiansen, formerly with the Amalgamated Sugar Co. of Colorado, will be the agricultural manager, it was stated by persons closely connected with the factory. Mr. Christiansen has arrived and is starting to put the factory in shape for the coming season, as well as making contracts for the necessary beet crop.

The sugar factory here, which was started in 1920 and has operated every year with exception of 1921 and 1927, employs from 250 to 300 men when running full capacity. Residents of Belmond consequently are rejoicing over the prospect of resumed operation of the sugar plant.

In resuming operations the beet sugar plant is also expected to take over the 22 dumps in this vicinity that were leased to the American Sugar Corporation of Mason City. Just what adjustment will take place between these two plants has not been decided.

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

10:00 A M. German service
11:00 A. M. Sunday School
8:00 P. M. Wednesday, Young People's Bible Class.
3:00 P M. Saturday, Junior choir.
1:00 P. M. Tuesday and Saturday, Confirmation Class.

The Junior Choir elected the following officers for the year:
President Verner Priebe.
Vice-Pres.: Edwin Thiemann.
Sec -Treas.: Raymond Barz.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

The pastor received a fine hearing last Sunday as he spoke on "the Effectiveness of the 18th Amendment." The message was well received in both churches.

A goodly number of our people have taken up the reading of The Mathew Gospel during January as suggested by the Federal Council of Churches. Let's make it unanimous. During February we will read St. John's Gospel.

The 100 Penny Gospels distributed with the compliments of the pastor on condition that every recipient would read his, have all been taken. 150 St. John's Gospels are at hand and await distribution.

This announcement is of especial interest to our boys and girls up to High School age: On Saturday The King's Herald Society will be reorganized. This society functioned most splendidly some time ago but did not carry on for a time. Splendid leadership has been secured and we are looking for great results.

The meeting will be held in the Parish House at two o'clock and an interesting program and lunch await the boys and girls. Let all parents co-operate by sending or bringing their boys and girls.

MORE CANDIDATES IN RACE FOR OFFICE

KNUTSON, CLEAR LAKE ENTERS DISTRICT SENATE RACE

Has Served As Representative For Six Years From Cerro Gordo

C. A. Knutson of Clear Lake, representative from Cerro Gordo county in the fortieth, forty-first and the forty-second sessions of the Iowa assembly has announced his candidacy for the republican nomination of senator from the forty-third senatorial district of Iowa, which comprises Cerro Gordo, Hancock and Franklin counties.

Last year Mr. Knutson served as chairman of the ways and means committee of the house as well as being active in eight other house committees, including those on agriculture, roads and highways, banks and banking, and fish and game.

He was representative of the fourth congressional district as well as chairman of the retrenchment and reform committee of the house. Later he was appointed by the speak of the house on the joint retrenchment and reform committee of the house and senate. This committee drafted the state conrol bill, passed by the forty-second assembly and the $100,000,000 highway bond issue bill now being considered and recently endorsed by the Iowa Farm Bureau.

Mr. Knutson's announcement appears in this issue of the Times

E. W. CLARK, MASON CITY, IN SENATORIAL RACE

Has Been A Resident Of This District All His Life

E. W. Clark, of Mason City, is a candidate for the office of State Senator from this district, which comprises three counties: Hancock, Cerro Gordo and Franklin.

As everyone should known, the senate race is entirely confined to candidates from Cerro Gordo this year, according to a "gentlemen's agreement" established years ago, that each county should have it's turn Hancock was represented by Hon. J. E. Wichmau, later Mr. Johnson represented Franklin and now it is up to Cerro Gordo to furnish a man in that office.

Mr. Clark was born in Iowa fifty-one years ago, a son of Judge and Mrs. J. J. Clark, and has spent all of his life in Mason City.

To sum up matters Mr. Clark provided the Times with the following information:

"Have been a life long Republican. Was Clerk of the Dist. Court, Cerro Gordo, six years. Was cashier Security National Bank, Mason City, Iowa, thirteen years. Am at present in Farm & City Loan business. Am at present Supreme Treasurer of the Modern Brotherhood of America. Served as Sergeant in Spanish-American War in Co. A, 52nd Iowa. Served as a Captain in the World War for twenty months in this Country and France. Am a member of the American Legion and Spanish War Veterans. I am a member of the Methodist church. Am married."

PRESENT OFFICER CANDIDATE FOR RE-ELECTION

Fern Peck Katter Seeks Office For Second Term

Fern Peck Katter, present County Recorder places her announcement this week as a candidate for re-election to the office of Recorder.

Mrs. Katter is serving her first term and makes a good officer. It is the usual custom to give an official a second term and we do not predict Mrs. Katter will have any opposition.

JOHN SUURBALLE A CANDIDATE FOR RE-ELECTION

Has Been Treasurer Of County For A Number Of Years

John Suurballe this week places his announcement in The Times, as a candidate for the office of County Treasurer, the office which he now holds.

John has been a good officer and is a favorite with the voters, as his past campaigns will show. John has been in this office for a number of years and certainly knows "the ropes" He does not have to make any promises, but can run on his past record.

GARNER MAN IS A CANDIDATE FOR SHERIFF

Spanish War Veteran Has Lived In County Since 1900

Mr ff H. Wahlert, of Garner, is a candidate for the office of Sheriff of Hancock County.

Mr Wahlert has resided in this county since 1900. He was with the Interstate Drainage Co. of Britt for twenty years He then joined the Greiman Ditcher Co. of Garner and recently opened a blacksmith and implement business at Garner, at which he now works. Mr. Wahlert is a Spanish War Veteran and saw service in Porto Rico.

CHRIS NELSON A CANDIDATE TO SUCCEED HIMSELF

Is Serving His First Term As Representative From This County

C. H Nelson of Garner this week announces he will be a candidate to succeed himself to the office of representative from Hancock County.

Mr. Nelson is serving his first term and has made a good record. The custom is to give a satisfactory officer a second term and no doubt the voters will extend Mr. Nelson this courtesy.

JOE KNADLER DIED SUDDENLY AT GARNER MONDAY

Former Signal Owner And Well Known Over The County

J. W Knadler, deputy Clerk of Courts died suddenly Monday afternoon, while sitting in the law office of Ramsay & Blackstone while there on business. The cause of his death was undoubtedly heart trouble, as he had complained earlier in the day of pains below the heart.

Mr Knadler was sitting in a chair in apparent normal condition and had entered into the conversation. After Mr. Knadler had been silent a few minutes his companions noticed he appeared to have gone to sleep and when they attempted to arouse him found that he was dead.

Mr. Knadler is well known all over the county. Years ago he was in the newspaper business and owner of the Garner Signal He has held county offices and in recent years has been deputy in the Clerk's office.

ELECT NEW OFFICERS IN LOCAL LEGION POST

Ben Coobs Will Head Organization For The Coming Year

The Adam-Schaefer Post No. 625, Klemme, held their annual election of officers January 10th, and the following men will have charge of the affairs of the post for 1928:

Ben Coobs, Commander; Ed. Jacobs, Vice-Commander, Wm. J. Bell, Adjutant; J. C. Thomas, Finance; D. P Anderson, Chaplain; P. W. Johnson, Historian; Albert Carolus, Sergeant-at-arms.

A Legionaire says: "Our quota for 1928 is 32. Come on Buddies, kick in. Come to the next meeting and get the dope on the Hospital Bill Refund to Legion members in good standing."

Masonic Installation At Garner

Last Thursday evening the following officers, elective and appointive, were installed in Bethel Lodge, No. 319, A. F. & A. M., Garner: Master, D. P. Anderson; Senior Warden, N. E. Brear, Junior Warden, Frank L. Miller; H. V. Reed, Secretary; Isaac Sweigard, Treasurer; P. S. Tompkins, S. D.; F. R. Lackore, J. D.; C. G. Waterman, S. S.; Victor Waldeck, J. S.; E. F. Wetterling, T.; H. P. Strandberg, M. E. J. Wilson, retiring Master acted as installing officer, assisted by R. A. Jorgenson, as Marshall for installing officer.

It does not do much good to offer bargains in a store, if people are not induced by advertising to come and look at those values.

MRS. H. THIEMANN FUNERAL HELD SUN.

MRS. HENRY THIEMAN PASSED AWAY FRIDAY

Had Been In Poor Health For Some Months Following Stroke

Mrs. Elisa Thiemann, nee Duhme, was born on the 5th of June, 1853 in Osnabrueck, Hanover, Germany She was brought to Holy Bapitsm by her parents, in infancy. She attended the public and Lutheran parochial schools of Osnabrueck, being confirmed in the Lutheran Church at the age of 14.

She was united in marriage to Mr. Henry Thiemann on the 14th day of December, 1876. Two sons, William and Herman were born to the young couple before they came to America in the year 1882. New Knoxville, Ohio, was their home during the first nine years. From there they moved to Klemme, Iowa, where they lived on a farm for 6 years. Then they moved to Missouri where they had the misfortune of losing three of their children, who died of diphtheria. After a stay of almost two years the Thiemann family returned to Klemme, settling on a farm almost 4 miles east of town. About thirteen years ago Mr. and Mrs. Thiemann retired, and moved to Klemme. Mr. Thiemann was an active member and faithful worker in the Reformed Church, serving his congregation as Sunday School Superintendent, as Deacon and Elder On account of ill health he finally resigned as Elder He died after an illness of four years, July 26, 1926

On the very same date one year later Mrs. Thiemann suffered a paralytic stroke, from which she recovered slowly. Last Wednesday, Jan 11, she suffered another stroke which left her unconscious She died 5:30 a. m. Friday morning at the age of 74 years, 7 months and 8 days.

Surviving her are mourning her death are, three sons, Herman, Henry and George, all residing on farms east of Klemme. Three daughters, Mrs Henry Yahnke, Mrs Gottlob Goll and Mrs. Cornelius Wille, and 22 grandchildren.

Funeral services were held at the Reformed Church Sunday afternoon and interment was made at the Klemme Cemetery.

Card Of Thanks

We want to thank all for their kind acts, floral offerings and expresions of sympathy in our bereavement, and thanking the choir for their part in the services. Herman Thiemann and family, Henry Thiemann and family, George Thiemann and family, Henry Yahnke and family, Gottlob Goll and family, Cornelius Wille and family.

SCHOOL NOTES

Our next game of basket ball on our own floor will be here on Tuesday night of next week when we play Garner. They defeated us by five points there on Jan. 6. Our lads hope to turn the tables here. With Stokesbary now inelligible because of the eight-semester rule of our State Athletic Association, we have left but one regular man of last year team. Our new men are developing wonderfully well and, since but one will be out next year because of graduation, Klemme can afford to take their few defeats gracefully this year and rest assured their record can be redeemed next year with this year's experience and knowledge of the game to their credit.

We go to Crystal Lake on Friday night of next week and expect to win there.

Our Declamatory Contest was well attended despite the inclemency of the weather and over $43 was taken in at the door.

This week ends he first half of the school year or the initial semester and term examinations have been the order the last few days of the week. Most of our students have shown an eagerness to pass and we shall regret any failures that may occur

Mrs. P. M. Wilson and daughter, Miss Gladys, and the Misses Wilma Trumbell and Lena McGinis were at Mason City Saturday.

GREENE-PHILLIPS NUPTIALS

(Boscobel, Wisconsin, Dial)

Miss Esther Greene, daughter of Mr and Mrs. Wm. T. Greene of this city became the bride of Chester J. Phillips, son of Mr. and Mrs. Geo. Phillips of town of Scott at a quiet but beautiful wedding at the Greene home Saurday, at 1 o'clock, with only the immediate relatives and friends of the bride and groom in attendance. The house was prettily decorated in pink and white.

The bride was gowned in white satin with silver point lace and orange blossoms and carried an arm bouquet of pink and white carnations. She was attended by Miss Wilda Greene, sister of the bride, who wore sand pink backed satin and carried an arm bouquet of pink and white carnations. The groom was attired in the conventional black and was attended by Neil Greene of the Platteville normal, brother of bride. The ceremony was performed by Rev. Ernest Jeffrey, of Lodi, Wis. Music for the procession was played by Keith Kincannon at the piano Master Merlin and little Miss Greene carried baskets of pink and white roses. Vilas and Alice Greene were the ring bearers with Paul Ludeke, Audrey and Clair Greene carried the bridal veil.

An interesting connection to the event was the fact that the day was also the wedding anniversary of the groom's parents, Mr. and Mrs. Geo. Phillips.

After the ceremony a bounteous dinner was served to about 40 guests; the out of town guests were Mrs. Agnes Ludeke, sister of the bride and son Paul and Miss Freda Schuldt, all of Klemme, Ia., Mr. and Mrs. Geo. Phillips, Mr. and Mrs. Leroy McDaniel and son Cecil, Mr. and Mrs. Lisle Greene and family, Mr. and Mrs. Ray Greene and family, Doris and Ruth Greene and Keith Kincannon, Miss Edna Dowling of Haney, Rev. and Mrs. Ernest Jeffery of Lodi, Wis Those from this city were Mrs. Ottmar Ruka, Mrs. Geo. F. Ableiter and daughter, Agnes.

RIDDER-BEATTY MARRIAGE

Miss Neota Ridder and Mr. Walter G. Beatty were married at the parsonage of Rev. Sunderlin at Emmetsburg, Friday afternoon, January 13, at 4:00 o'clock, in the presence of the immediate relatives of the young couple. The bride was attired in a dress of navy blue georgette, while the groom was attired in the convenional dark suit. Miss Mildred Beaty, sister of the groom sang a couple of songs at the wedding. The ceremony was witnessed by Mr. and Mrs. George Beatty and Miss Mildred, Mr. and Mrs F. H. Ridder, Mrs. S. A. Harvey and daughter, Enid, and Mr. and Mrs. Harvey Beatty.

Following the ceremony a wedding dinner was served at the Beaty home.

The wedding party returned to Klemme in the evening, and the following morning Mr. ad Mrs. Walter Beatty left on a trip to Milwaukee, Wisconsin.

Mrs. Beatty is the youngest daughter of Mr. and Mrs. F. H. Ridder. She was born here and attended the Klemme Schools, graduating in the Class of 1925. Later she took a course in beauty parlor work and conducted a shop of her own the past two years, enjoying a fine business.

Mr. Beatty is with a construction company at Chicago where they will go in the spring. During the winter he superintends the over-hauling of his company's machinery at the factory.

The Times joins with the many friends of this young couple in extending best wishes.

SIX MORE GAMES ON K. H. S. BASKET BALL SCHEDULE

There are six more games on the K. H. S. basket ball schedule before the county and district tournaments The games ahead for the "Shamrock" quintet are:

Jan. 24. Garner here.
Jan. 27. Crystal Lake, there.
Feb. 3. Rowan there.
Feb. 11. Britt there.
Feb. 17. Hayfield here.
Feb. 21. Swaledale here.

Beware of the man whose story sounds too good.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is fifteen minutes late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his "class." Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin.

CHAPTER II

—3—

Meely Schwenckton, hurrying back breathlessly through the October twilight to the farm house, lest the autocratic head of the house get in from the fields ahead of her and become suspicious of her goings-on, seemed to have undergone a transformation since she had left her lover. Not only had she managed, on the way home, to shed her cheap, gaudy frock of blue voile for a trim tailored suit, but also that veil of bovine dullness which her pretty face had worn had been replaced by a soft, bright amusement; her timid bearing, so abjectly expressing a sense of inferiority, was changed to a look of suppressed excitement, an air of intense vitality, which made her recent humility unimaginable.

Reaching the kitchen porch of the farm house, she was brought up short as her hand touched the latch of the door, by the sound of a whining nasal voice within, reproaching and threatening, to the accompaniment of a child's crying.

Meely's hand dropped from the latch and she stood listening, a look in her eyes of mingled distress and disgust.

"When your Pop hears how you done me dirt this after," whined the nasal voice, "oh, but you'll get the good whippin', Lizzie Schwenckton! Oncet I tell him how you run out after school and let me with all the work, mebby you won't ketch it with that there switch he keeps handy! Lettin' me alone here with all the diapers and all the cleanin' and cookin' and his sick wife and baby to tend! Well!—of!—all!—things! Yes, if he don't give you the worst switchin' you ever had, then I don't know the man"

"Ach, Aunt Rosy, don't tell him!" the child's voice begged in gasping sobs. "I'll help you now—I'll do this here whole tub full of washin'—and I'll wash all the supper dishes for you—you can just set and rest yourself—"

"Well, I guess anyhow you'll wash the supper dishes after the smart switchin' you're gettin'! That'll make you spry for a couple days, I guess, if my talkin' at you don't! You needn't to beg me—"

The nasal whine stopped short as the speaker became aware of a third person in the room, though she had not heard the opening of the door. There stood Meely, her back against the kitchen door, looking at Aunt Rosy with those bright, clear eyes of hers that somehow always cowed the woman, giving her, unreasonably, a sense of guilt which she resented. Always she was resolving that she would not let herself be "downed" by this "high-minded hussy" who had no rights in this house anyway.

"I'll show her who's got rights here!" she daily determined.

Yet she found herself just now, as always when confronted by the silent criticism of this girl's confusing regard, trying apologetically to justify herself.

"Mind you what Lizzie done yet! I give her the diapers to wash after school and she run out to play and let 'em. And me with all the cleanin' and the supper to get and my sick sister's broth to make and all—my lands! How kin I get through all when Lizzie runs out after school and won't help?"

The big, warm, cozy kitchen which, like most farm kitchens of Pennsylvania, was also the family living room, was covered by a bright rag carpet and furnished with a roomy settee against the wall, several big, gayly painted rocking-chairs, a large decorated calendar labeled "Sweet Smiles" hanging from a cuckoo clock, a table spread for supper, a cooking stove on which sausage and potatoes were sizzling.

The Schwenckton family, as well as all the neighboring farm families, had seen this kitchen become transformed in three weeks, under the temporary reign of Aunt Rosy during the confinement of Schwenckton's young wife, from a spotless cleanliness to a messy untidiness and disorder which, in the eyes of the immaculate Pennsylvania Dutch housekeepers, was a scandal next only to immorality and more unheard of. Aunt Rosy's incompetent housekeeping, combined with her autocratic and unamiable attitude towards her sister's stepchildren (from which there was no escape nor appeal, since it was backed up by the Head of the House) had driven the elder son and daughter to rebel and run away; Nettie, the fifteen-year-old girl, having found refuge in the home of her grandmother and Jakey, seventeen years old, having disappeared entirely—to the genuine distress as well as inconvenience of their father to whom Jakey especially had been a great help on the farm. But the other two, Lizzie and Sammy, were too young to escape.

The one soft spot about Aunt Rosy, apparently, was her devotion to her young sister, Susie, Mr. Schwenckton's girl wife, whom she had "raised" from a baby. But although she idolized Susie, she completely dominated her. In all things Susie followed her elder sister's advice and judgment and obeyed her, when she was with her, as much now as when, before her marriage, she had lived in Rosy's home. Susie was the only person in the world who did not find Rosy repulsive.

Ten-year-old Lizzie, a thin, delicate-looking child, was working frantically at a wash-tub at the far end of the cluttered, dirty kitchen, crying hysterically while she worked, terrified of the punishment hanging over her.

Meely, going across the room to hang her jacket on a rack on the wall, spoke over her shoulder in reply to Aunt Rosy's complaints, her pleasant tone and manner betraying none of the loathing she felt towards the woman. "But since you didn't do the cleaning, Aunt Rosy (look at this kitchen!) nor the diapers, and kept Sammy home from school to wait on Susie, what have you done all day? And Mr. Schwenckton won't like it, you know, that you're having the diapers washed here in the kitchen where we have to eat—"

It is to be noted that Meely's accent and diction were not now so studiously Pennsylvania Dutch as when she had talked with St. Croix Creighton a half hour ago. The hint of foreignness in her speech was not that of the Pennsylvania Dutch at all.

A heavy step on the porch at this instant was followed by the opening of the kitchen door and the entrance of the farmer in overalls.

Lizzie's crying was instantly choked back while she bent to her work more frantically than ever; and Aunt Rosy acquired suddenly a great air of industry about the stove and table.

Mr. Schwenckton, closing the door behind him, stood surveying with disgust the disorder and dirt of the kitchen.

A big, red-faced man of mild, though obstinate, countenance, he looked so good-natured that one might have wondered why his children were so afraid of him. But family discipline among the Pennsylvania Dutch is a religion; "spare the rod and spoil the child," a dogma. Mr. Schwenckton had ever tried to perform his whole duty by the children God had given him to rear for His honor and glory in a heavenly home, the Scriptural prescription for accomplishing this being the only means he knew, disagreeable as he often found it—for he was withal an affectionate father; not naturally severe; only very conscientious; obstinate in the performance of what he saw to be his duty, however difficult.

"Yi, yi, yi!" he shook his head and frowned at the dirty kitchen, "but you're the dopple of a housekeeper, Aunt Rosy! You ain't the nice housekeeper your little sister Susie is. Well, I guess anyhow not! Yi, yi, if the neighbors seen our kitchen so throughother yet!"

"Yes, well, but when I tell you oncet how Lizzie won't help along when I tell her to," his sister-in-law complained as she began to dish up sausage and fried potatoes, while Mr. Schwenckton went to the sink to wash his hands, "you'll see for yourself, Mister, how I can't get through all by myself. Lizzie she run—"

"Lizzie!" the farmer broke in, raising his voice above the running water, "stop that splashin' at the tub and come now to your supper!

"Ye-yes, sir," the child stammered, her teeth almost chattering. As she dried her hands on her apron and came to the table, Aunt Rosy gave her a look as who should say, "You just wait! Don't think because he cut me short that I ain't tellin' on you! You just wait!"

"Where's Sammy?" asked Mr. Schwenckton.

"Upstairs settin'," his sister-in-law told him as she carried the food from the stove to the table. "With Susie. Susie she's too poorly to be let alone, whiles I gotta be down here."

Mr. Schwenckton shook his head dolefully, his face, as it emerged from the roller-towel, looking deeply troubled.

"Well, come everybody now and set. I want to get eat and hurry up to Susie."

During the long "blessing" invoked by the head of the house, after they were all seated, Meely's was the only head unbowed. The expression of her face (while fulsome words of gratitude were directed to the throne of God) suggested anything but thankfulness as she surveyed the platter of sausage floating in a lake of grease, the burnt potatoes, the pale, heavy pie.

At the "Amen" she rose at once, went to a cupboard and brought back to the table a fresh napkin for herself.

The temporary housekeeper spoke up in self-defense against the implied criticism of this gesture on Meely's part. "Well, if I did forget your napkin again, I must say I wasn't raised to eat so hoggish myself that I need a napkin to my meals!"

"You've got no need, Aunt Rosy," her brother-in-law mildly admonished her, "to speak so unpolite. Us we all know," he added as they all began to help themselves, each one for himself, as was their custom, "that Meely was raised more refined than us."

"Well, I wouldn't go so far as to say that, Mister," Aunt Rosy resentfully objected. "To call myself common yet toward what she is! I ain't belittlin' myself that much! I cert'nly consider myself as good as other ones; and so I likewise consider your poor, sweet, little wife, Sam Schwenckton! If she'd heerd you'd compared her to this here stranger and sayed she was common toward what this here stranger is—"

"Ach, Aunt Rosy, be peaceable," Mr. Schwenckton checked this whining tirade. "Meely ain't ezackly a stranger to us, even if we didn't get acquainted with her till here this fall. You can't call a cousin a stranger yet!"

"You ain't got no proof she's your cousin. She don't look like as if she's your cousin. Nor act or speak like none of your cousins I ever met up with."

"Yes, well, you never met up with none of the Berks County Schwencktons. They're different, too, again from us Schwencktons here in Dauphin county. They're better educated that way and more refined. Meely," he addressed their boarder, his tone anxious, his eyes worried, "how do you think my Susie is today?"

"She can't get better so long as you keep her room dark and don't air it, Mr. Schwenckton. Air and light are all she needs to get well."

"Yes, well, but I don't hold with them doctors that says it's unsanitarium to keep the windahs shut and the room dark when you're sick," Mr. Schwenckton pronounced conclusively—and from a conclusion once reached, a position once taken, the power did not exist that could move Sam Schwenckton.

He drew a deep sigh. "I did hope Susie was gettin' better for me after her lookin' so bright yesterday."

"The reason she was so much brighter and better yesterday," said Meely, "was because when Aunt Rosy was taking a nap, I covered Susie and the baby with blankets and aired the room! Threw open all the doors and windows and left them open for an hour! Then I washed Susie and changed her nightgown and the bed linen. She and the baby slept after that for four hours! That's why she was better yesterday."

(TO BE CONTINUED.)

Cheapside First Home of Great British Bank

How came the bank of England to be built? And why the appellation "The Old Lady of Threadneedle Street?" Mr. H. Rooksby Steele, a well-known London architect, supplies the answers in an article on the architectural history of Britain's bullion house. Many think that Sir John Soane, the wizard of Lincoln's Inn-fields, built the bank. His are the girding walls, but in the raising of the fabric three other names—those of Sampson, Taylor and Cockerell—have to be joined. Mercer's hall, Cheapside, was the bank's first home; but a quick move was made to the Grocer's hall, in Poultry, and it was not until 1752 that the foundation stone of the present bank was laid. George Sampson was the first architect, and it is curious that no building, other than the bank, can be attributed to his hand, a writer in the Cleveland Plain Dealer comments. In the cornice extending the full length of the building, Taylor sculptured an excellent figure of Britannia, some years after the completion of the building. "This carving, the 'trade mark' of the bank," writes Mr. Steele, "was probably the inspiration for that trite appellation, the 'Old Lady of Threadneedle Street.'" Taylor added to Sampson's building, and in 1870 the Gordon riots led the directors to fear that the adjoining church of St. Christopher-le-Stocks might lend itself as a dangerous vantage point for a mob, so pow ers were obtained, the fabric was pulled down, and more extensions were made.

No man's good intentions ever boosted him into the hero class.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is fifteen minutes late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his "class." Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely, and her speech has little of the Pennsylvania Dutch accent.

CHAPTER II—Continued

—4—

Mr. Schwenckton looked sternly disapproving. "You hadn't ought to heist windahs where a person's layin' sick!" he reaffirmed, and Aunt Rosy added her horrified prophecy: "Yes, soon you'll have another wife dead on you, Mister, with such goings-on as soon as my back is turned around behind me oncet!"

"Susie would be up and about in a week if you kept her room aired and clean," Meely imperturbably affirmed, "and the baby, too, would pick up. There's nothing the matter with the baby except that it's not properly taken care of, Mr. Schwenckton."

"Yes, well, but when a body's sick, or for babies," Mr. Schwenckton repeated, "we don't hold to openin' windahs on 'em."

"Susie's bed was plenty clean as it was!" declared Rosy. "It didn't need changin' till another week yet. It makes me too much work, such behaviors does! And Susie's too sick fur Meely to take and wash her! Of—all—things! Washin' a person when they're sick yet!"

Meely's reception of this criticism was as impersonal as though it were being directed toward anyone but herself. Her whole attitude to this family, her very presence here, seemed tentative, experimental. When she was not regarding them with wide-eyed wonder and curiosity, her face was expressing suppressed amusement, or pity, or impatience; sometimes bewilderment; sometimes the interested suspense one might feel at a "movie" or a play.

Their attitude to her, however, was entirely matter-of-fact. Evidently they took her quite for granted, as she certainly did not take them.

Just now her alert observation took in the fact that Mr. Schwenckton's anxious glance was resting with affectionate concern on Lizzie's red eyes; that he was aware of her desperate effort to repress the little gasping catching of her breath which betrayed her recent violent crying; that he saw she was not eating any supper.

Reaching across the table, he took her plate, piled it with food and handed it back to her. "Eat your supper, Lizzie," he ordered in a tone that for him was a caress. "We can't have no more sick folks here."

"Ye-yes, sir." Though the food strangled her, she would have to obey and eat it to the last crumb when her father so ordered.

Aunt Rosy never missed a chance to disparage Meely in Sam Schwenckton's eyes; for she felt that if she could get rid of this objectionable girl, as she had gotten rid of Nettie and Jakey, the two older children of the family, she would hold the situation in hand, here in her young sister's home, with much more confidence.

"So you took another of them long walks of yourn again today, Meely, ain't?" she just now remarked insinuatingly. "Seems so funny walkin' just fur the sake of walkin'! Ain't, Sam? I guess," Aunt Rosy nodded knowingly, "she goes to meet her fellah!"

This bait elicited no reply from Meely, though it manifestly touched Mr. Schwenckton's curiosity a bit and even Lizzie's sickly interest.

"But why," continued Aunt Rosy, "are you so secret about it if you're got a fellah? You're welcome, I'm sure, to keep comp'ny here in the front room. Ain't, Sam? You're got no need to meet him secret that way. It don't look nice. Looks like as if you had somepin to hide yet! Ain't, Sam?"

"I can't think," responded Mr. Schwenckton reflectively, "of any fellah 'round here that wouldn't be too common for Meely."

"Ach, I don't know. She ain't so much, so far forth as I can see," Aunt Rosy frankly stated, "even if she is high-educated that way."

"The only educated young men round here is the two Creightons, and to be sure," said Mr. Schwenckton, "they only run with swells."

"Creightons?" repeated Meely inquiringly.

"Yes. They're away-up folks, them Creightons. They're 'ristocratics, they are. Grand folks. None better. Even the swells that lives in town ain't nothin' much to the Creightons—they're got so much, the Creightons has."

"'So much'? Money, you mean, of course?"

"To be sure. What else?"

"Well, I thought you might mean education or brains or even character—interesting things."

"Yes, well, they're got all them things too."

"Have they?"

"Ach, yes, they're wery grand college-educated that way, them two Creightons. And the younger one, St. Croix, he's wery proud and high-minded; wonderful high-minded! Marvin, the older one, he ain't so proud. He's different to what St. Croix is."

"How is he different?" asked Meely, disguising under an elaborate indifference her excited interest. Much as she had longed to ask questions about the Creightons, she had never dared risk it, so she was elated that, without any maneuvering on her part, the talk should be taking this interesting turn.

"Well," answered Mr. Schwenckton, "Marvin makes hisself nice and common with us folks when we meet up with him; and with his Pop's miners, too."

Aunt Rosy Never Missed a Chance to Disparage Meely in Sam Schwenckton's Eyes.

"But that ain't sayin', Meely," spoke in Aunt Rosy, "that he'd stoop to you. He ain't that common!"

"Isn't he?"

"Yes, well, but he might stoop even to such as Meely," Mr. Schwenckton speculated, "since his Pop turned him out to earn his own livin'."

"Oh! Why?" asked Meely breathlessly, off her guard for an instant in her surprise and curiosity.

"Well, he don't hold with his Pop about the way their miners is treated. He puts out that he thinks it's like Roosha under the czar. He's fur treatin' 'em like Roosha under the Bolsheviks. So him and his Pop they don't hit it off so wery good. He tol' his Pop (so it's put out) that he couldn't live on money so earnt. So then his Pop tol' him to get out and earn his own livin' and see how he'd like it."

"Then the other son, St. Croix, will inherit all his father's wealth, will he?" asked Meely. "Or are there other heirs?"

"Them's all. But the estate is entailed, that way, and Marvin must get his share, too, till his Pop's deceased a'ready. That's what gets old Creighton so peeved, that he can't disinherit his son; for he says that Marvin, with his Bolshevist vee-yous, will ruin their business—his own share and St. Croix' too, seein' it's all together. Yes, Marvin he's an awful worry to his Pop!"

"And to his brother, St. Croix, too, I should think?" Meely suggested.

"Ach, yes, it's put out that the brothers don't get on good together at all. Then there's other troubles, too, between Marvin and his Pop—about a second cousin in England with such a title—a duke-ess or what—that Marvin was to marry and he got balky and wouldn't do it. It seems he tol' his Pop he wouldn't buy his wife nor he wouldn't sell hisself fur no titled lady in the world, nor he wouldn't marry no girl that would sell herself for his money."

"And was he sure," Meely asked after an instant's pause, "that the English cousin wanted to sell herself?"

"Well, that's the talk. The two families had fixed up the match and Marvin he got balky. And his Pop was awful peeved, he'd been so set on this here match. Marvin bein' the oldest was gave the first chance at this here grand lady, you see, and wouldn't take it. So now it's St. Croix that's to marry her, they say."

"Is he?"

"So they say. And I guess it's better so, for he's more suited to such a duke-ess, or what. Marvin's too plain a dresser for such a high lady."

"And how," asked Meely after another moment's silence, "does the Marvin earn his living since he's been thrown out by his father?"

"Yes, you better ask, Meely! Here your boss! He's got hisself elected county superintendent of our public schools!"

"What!"

"Yes, mind if he didn't! So he'll be wisitin' at your school one of these here days to see how you teach oncet!"

"Does he know anything about teaching, himself?" asked Meely skeptically.

"Well, he's got a college diarploma or what."

"And the younger son—St. Croix—he agrees with his father, I suppose, about the treatment of the miners?"

"Ach, yes, him and his Pop agreen fine. He's the lawyer for the estate and his Pop thinks he's fine and sharp. Lizzie," he spoke to his little daughter, "eat your supper."

"It don't wonder me she don't eat," said Aunt Rosy; "her conscience won't leave her enjoy her wittles, so bad—"

"Be peaceable, Aunt Rosy. You can tell me after supper what you're got to say."

The child looked terrified at these ominous words and Meely glanced at her pityingly. For a moment no one spoke and the silence seemed heavy and menacing.

"Well," Mr. Schwenckton presently broke it, "I'm done." He pushed away his plate, drew the back of his hand across his mouth, shoved back his chair and rose. "I'll go up and see Susie."

Aunt Rosy, who was a greedy eater, at once concluded her own supper with a few hasty mouthfuls and rose to go with him. "Lizzie!" she spoke over her shoulder from the stairway opening out from the kitchen, "you get at and clear off the table and do the dishes and then finish up them diapers."

"Yes'm," answered Lizzie, rising at once and beginning to scrape and collect the plates.

A moment later Sammy, a cowed and sullen boy of twelve, skulked into the kitchen, sat down at the table and began hungrily devouring his belated supper.

Meely strolled to the foot of the stairs and stood listening to the voices in the room above; and Lizzie, her eyes wide and strained, left the sink and tiptoed across the room to stand at her side.

"Lizzie she won't obey to me," Aunt Rosy's complaining voice came down from the sick room. "I can't do nothin' with her. After school this after she run out and stayed till near supper time a'ready! If you don't learn your children to obey to me, Mister, I can't housekeep for you, and then where'd you be, with a sick wife and a boarder that's that pertikkler'—wantin' a napkin to every meal yet!—and interferin' and makin' Susie worse with lettin' in the cool air where she's layin' here sick! Well—of—all—things!"

"And, Sam," Susie's weak voice backed up her sister, "Meely she encourages Lizzie to disobey to my sister Rosy. I misoverheard her sayin' to Lizzie, 'It's a pity you ain't old enough to do like your sister and brother done—run off!' Yes, mind you, Sam, if she didn't tell Lizzie that!"

"Yi, yi, yi!" Mr. Schwenckton's deep voice responded in strongest disapproval.

"Yes, and if you don't get rid of your fancy boarder, Mister, you will have another of your children runnin' off, now mind I'm warnin' you!" said Aunt Rosy.

"Ach, no, no!" Mr. Schwenckton returned in a tone of mingled distress and resolve.

"Well, then, you gotta switch it out of Lizzie, Mister, the way you done out of Sammy. If you give her the good switchin' you give Sammy last week fur not mindin' to me, then I guess I won't have no more trouble with her. Sammy you bet he minds to me now when I speak to him! Well, I guess anyhow then! He jumps when I speak since he got that there good whippin' off of you! And Lizzie she needs it worse'n Sammy yet."

(TO BE CONTINUED.)

Desert Animals That Scorpions Can't Harm

One of the most fascinating chapters in animal poisons is the subject of natural immunity, the fact that some animals are immune to the poisons of others and remain unhurt if stung or bitten by the poisonous animal, whereas all other sorts of beasts succumb.

A case in point is that of desert animals which are unharmed by a scorpion's sting. The desert fox, the kangaroo rat and other inhabitants of deserts where scorpions abound are in this happy position. Their cousins, living far away from the desert, would at once be seriously injured by a scorpion's sting, whereas the desert breeds remain unhurt. It is to be supposed that in the far distant past before the desert animals had this complete immunity to scorpion venom, those which were stung and could not resist died, leaving no offspring. Their luckier brothers, who happened to have a hardier constitution, survived and left behind them a resistant race of descendants.—Prof. H. Munro Fox in the Forum.

Lengthy Railroad Tunnel

The longest railroad tunnel in the world is the one between Brig and Isella, Switzerland, which is 12¼ miles long, according to an answered question in Liberty.

Money that a man burns seldom helps him to enlighten the world.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Gloomy Outlook

A friend persuaded William Lord Wright, the serial king, to visit a popular cafe. Following the usual custom, he paid a big cover charge and a stiff price for a pitcher of lemonade. The waiter, inclined to be affable and make conversation, remarked that it looked like rain.

"Do you mean the weather or the lemonade?" Bill wanted to know.

Always the Same

"What, another row with your wife! What's the trouble this time?"

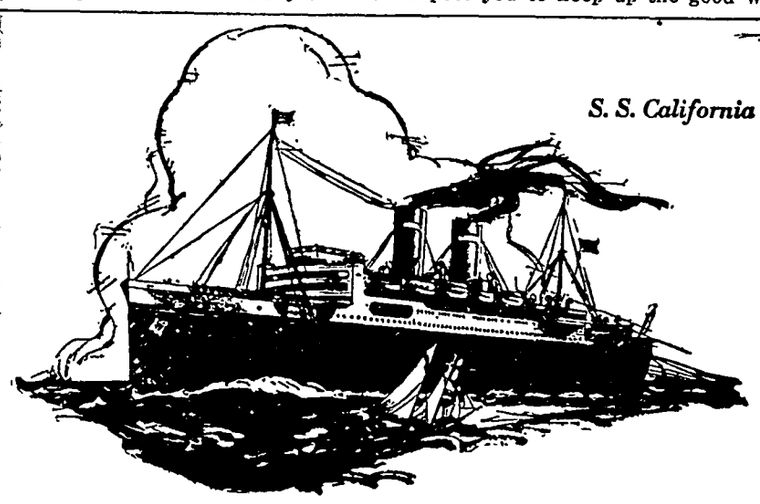
"The same old thing—she's right and I don't agree with her."—Stray Stories.

1927 Classics

Excerpts from the conversation of a modern girl:

I'd simply love a cigarette—I'd simply love a cocktail—Thank you for the lovely flowers—What an adorable gown—I'd simply adore to go, my dear—It's the most adorable place—Honestly, my dear, he's simply adorable—The whole evening was simply hectic—Honestly, it was hectic—The whole drive was too hectic for words—You can't imagine what a hectic time we had.

Do some people a favor and they expect you to keep up the good work.



Largest and Finest American Built Steamship Serves

MONARCH COFFEE

This Panama Pacific Liner is the world's largest electrically propelled commercial steamship. Her turbo-electrical driving machinery is the same as in the latest U. S. battleships. Everything about the S. S. California is the finest that can be secured. In keeping with this, it was but natural that her owners should select the world's best coffee—MONARCH. When the California sails from New York for San Diego, Los Angeles and San Francisco, her kitchens will be stocked with MONARCH Coffee fresh from the *Monarch* roasters in New York; and a new stock will be supplied from the *Monarch* roasting plant in Los Angeles for the return trip.

REID, MURDOCH & CO. (*Established 1853*)
General Offices: Chicago, Ill.

saves money

because it outwears all other all-rubber arctics

TOP NOTCH Corn Belts are the most economical all-rubber arctics you can buy. They will protect your feet long after frail, flimsy arctics have worn out. Corn Belts are so much more substantial because made of the toughest rubber—*and plenty of it.* We put into it the sturdy strength that enables it to withstand the roughest going for months and months. Fleece-lined, 4 or 5 buckle, red or black.

For dependable, distinctive boots, arctics and rubbers always look for the Top Notch Cross. The most reliable stores carry the complete Top Notch line for men, women and children. The Beacon Falls Rubber Shoe Co., Beacon Falls, Conn.

PRUNE PEACHES DURING WINTER

Thorough winter pruning of mature bearing peach trees will save some summer thinning of fruit, states A. Freeman Mason, specialist in fruit growing, New Jersey State College of Agriculture. Furthermore, a good growth of vigorous new wood, which bears the buds for the following year's crop, will be stimulated. Both topping back and severe thinning out are essential in maintaining vigor of tree growth and high quality of fruit on old peach trees.

A low-headed, vase-shaped, or open-center peach tree is always desirable. This permits ample light to reach the lower portions of the tree, causing a growth of new wood on all branches. The low head makes harvesting operations easier. The peach crop should be harvested in not less than three or four pickings, especially when the fruit is sold in near-by markets, and much expense is saved if most of the harvesting can be done without the use of ladders.

To keep the head of the tree open and low, all heavy branches growing into the center of the tree should be removed, and the upright vigorous growth, so often present in the upper portions of peach trees, should be cut back to a convenient height. Rangy side branches should also be headed back.

After these heavier cuts are made, the smaller wood should be thoroughly thinned out. New twigs over two feet long may be cut back to a point where strong fruit buds are borne, but shorter new twigs are not cut back. A well-pruned peach tree has a rather sparse look. Varieties which customarily set heavily, such as Carman, Hiley and Iron Mountain, may be more heavily pruned than Elberta or Hale.

Taste and Appearance of Apples Compared

Roger B. Corbett of the Rhode Island State college took four varieties of apples, peeled them and cut them into cubes which he placed before 11 men consisting of bankers, professional men, farmers and mechanics. The apple that was rated first in appearance ranked last in taste. In the taste test, the McIntosh was placed first, Baldwin second, Rhode Island Greening third, and the Rome Beauty last. The Rome Beauty, which is a favorite in stores and on fruit stands, was found least tasty.

Four thousand questionnaires were mailed to Providence families for the purpose of gathering information on the distribution and consumption of apples. The replies indicated that 46.7 per cent of the apples are eaten raw in that city, that 48.5 per cent are eaten in the form of pies, sauce or baked apples, and that 4.8 per cent are eaten in salads.

Transplant Grapevines During Dormant Season

Probably the best time to transplant grapevines is during the dormant season, preferably in late winter or very early spring, and when the soil is frozen so that a ball of earth will cling to the roots. However, it is not advisable to transplant large vines, since several years are required before they adjust themselves to their new surroundings. If it is desired to perpetuate these particular varieties it can be done with more certainty through cuttings from them. It is not advisable to separate the stalks, as every wound thus made opens the way for fungus troubles.

If the growth of the vine be too dense, the pruning during the dormant period should be longer so that more fruit will be borne. And again, all nitrogen fertilizers and stable manure should be withheld.

Horticulture Squibs

Cumberland is a good blackcap, but so is Plum Farmer and better in some sections.

* * *

Nitrogen and sulphuric acid seem to be most important in the fertilization of strawberries.

* * *

The Dunlap strawberry is a standard kind but the Premier is worth considering in its place.

* * *

Are there any signs of mouse injury in your orchard? If so clean the sod away from about the trees and replace with cinders. It may be well also to prepare poison bait and place it in bait traps throughout the orchard.

* * *

Windbreaks are essential in fruit work on some of our prairie farms and sun scald as well as stiff winds are apt to injure newly planted stock severely in the absence of protection.

* * *

The young trees may be set in the orchard after one season's growth or they may be allowed to grow two seasons before transplanting.

* * *

An open center tree is commonly preferred for the peach and there should be not more than three or four scaffold branches.

Heavy Oat Yield Costs Few Cents

At Least Five Additional Bushels to Acre May Be Had by Testing Seed.

Two and a half cents' worth of formaldehyde may add at least five additional bushels to the acre oat yields on many farms.

This is the average cost of treating for smut enough seed oats to sow an acre. This disease causes a large annual damage to the crops, taking a toll on some farms of as much as 10 out of every 100 bushels of grain, according to R. E. Vaughan, plant disease specialist at the Wisconsin College of Agriculture.

Treat Barley for Smut.

Barley may also be treated with formaldehyde for smut. A pint or pound of the formaldehyde, obtainable at most drug stores, is added to 35 gallons of water. This solution may be sprinkled on the seed or the seed may be soaked in it for five minutes. Both methods give satisfactory results, Vaughan reports.

When preparing the seed for treatment, it should be thoroughly fanned in order to remove the light-blighted kernels, smut spores and dirt. After treating, the grain should be covered for two hours and then dried by spreading in on a clean strip of canvas. While the seed is damp, Vaughan cautions that care should be taken that it does not freeze nor heat, as either one of these conditions injure its germination power.

Seed Ready to Sow.

The seed is ready to sow in 12 to 24 hours after treatment. If freshly treated seed is sown, Vaughan says the seeder should be opened so that three-fourths bushel more oats and one-half bushel more barley are sown to an acre than usual, this due to the fact that the seed has swollen during the treating process.

Feed Fowls Yellow Corn for Production of Eggs

Yellow corn is proving superior to white corn in rations for egg production. It is also much better for growing chicks. The beneficial effects of yellow corn are thought to be due to the fact that it is richer than white corn in vitamine A, a substance essential for normal growth of chickens.

When the hen's ration is deficient in vitamine A she is likely to develop eye trouble similar to roup, and lay fewer eggs which would hatch poorly if incubated.

If white corn is fed, the vitamine A deficiency may be corrected in a ration for hens by feeding green feed at the rate of one cubic inch per hen per day. Baby chicks cannot eat enough green feed to completely correct the vitamine A deficiency if white corn is fed. The deficiency can be supplied to chicks by adding cod-liver oil to the mash at the rate of 2 per cent by weight.

Narrow Type of Shed Is Useful for Implements

At this time of year every farm machine or piece of equipment not needed should be under shelter with a card showing what adjustments and repairs are needed. Even a well-roofed straw shed is better than none, but often a shed does not give full protection.

Consider annual cost over a period of years rather than first cost, and use the materials at hand which will give the longest life and least upkeep at the lowest first cost. Reinforced concrete, concrete blocks, hollow clay tile, galvanized iron, lumber, and so on, should all be considered.

The long narrow type of shed is most usable and convenient about moving machines in and out. Square sheds waste space, especially if a driveway must be kept open. Round sheds are even less desirable. Long narrow sheds can be started small and added to as needed.

Agricultural Squibs

Clean the grain before you use it for seed.

* * *

The cardinal principle in the dairyman's creed is cleanliness.

* * *

The farm workshop should be the popular place to work these days.

* * *

Winter egg production is often cut short by a limited supply of water.

* * *

To insure a good flow of milk, a cow should be in good condition at freshening.

* * *

Tremendous losses are incurred by planting poor seed. Test before seeding is the best rule to follow.

* * *

Winter onions come up just after the snow disappears and perhaps are the first vegetable that will come from the garden.

* * *

Milk which is not immediately removed from the barn is very apt to absorb the characteristic odors, no matter how sanitary the barn may be.

* * *

Potatoes which are stored in bins should be watched for rot. It pays to examine the stored tubers from time to time and remove all rotten potatoes.

JAMES CRUZE

Director of Feature Photoplays, *writes:*

"During the filming of The Covered Wagon, the constant use of my voice demanded that I find a cigarette which I could smoke without any chance of throat irritation or cough. After trying them all, I decided on Luckies. They are mild and mellow." James Cruze

The Cream of the Tobacco Crop

"The growth of LUCKY STRIKE Cigarettes is a wonderful thing but there is a reason. I know, because I buy the Tobacco for LUCKY STRIKE. I buy 'The Cream of the Crop,' that mellow, sweet smoking Tobacco that the Farmer justly describes as I have described it above. The quality of LUCKY STRIKE Cigarettes is telling. It is natural that the brand should show the tremendous growth that it is showing today."

Buyer of Tobacco
Louisville, Ky.

"It's toasted"

No Throat Irritation—No Cough.

ATWATER KENT RADIO

Always first
—now more than ever

ONE person hears it in another's home. That's the way the reputation of Atwater Kent Radio has spread. So, on the farms and in the towns as well as in the cities, it is far and away the leading make.

The consistent, trouble-free performance of Atwater Kent Radio has caused more than a million families to buy it. This universal buying makes possible the economies of careful mass production. Now these economies come back to you in the form of lower prices for 1928.

It's the story of the automobile over again. Now you can have a good car without paying a fortune for it. Now you can have the radio that everybody wants—the radio others are compared with—reliable, durable, beautiful, Atwater Kent Radio—every model again improved—at a price that would seem incredible if you didn't know the reason.

ATWATER KENT MANUFACTURING COMPANY

Howe About—

By ED HOWE

© Bell Syndicate. WNU Service.

Helen of Troy ran away from her husband, and lived with another man.

After years of fighting, in which thousands were killed, the husband captured Helen, and brought her back home.

The neighbors supposed his purpose was to boil her in oil. Instead, he forgave her, and again put her in charge of his home.

Did Helen appreciate the mercy?

She certainly did not; she bossed her husband more cruelly than ever before, and made a fool of him on every possible occasion.

Some are like that: they regard forgiveness as license for still worse offending.

* * *

Our favorite meanness is to praise some things more than they deserve. Of every particularly successful man, it is said by his special enemies that his wife, or his head clerk "made him."

* * *

There is lots of nonsense in the world, but it is all plainly labeled. When a man tries to sell you a book he makes a large profit on and which will be a dead loss to you, there is a label on him as large as a barn door. There is also plenty of sense in the world, and it is plainly labeled, too. People talk sense quietly; nonsense is nearly always heralded in loud voice or large type. The next time you are in a crowd, try the experiment and see how easy it is to pick out nonsense.

* * *

The question has been raised what two men would do, who lived a solitary life in the wilds, and met each other for the first time. Pufendorf believed they would approach each other as friends; Hobbes, on the contrary, as enemies; Rosseau, that they would pass each other by in silence. . . . Pufendorf, of course, is right. Did not Robinson Crusoe welcome even Friday, a poor native who could not speak his language?

* * *

The critics are right; the people are an abused lot; and the critics are not any better than the rest of us.

* * *

There is no woman who gives us the radiant dreams that lurk beneath the word Woman; there is no wine that realizes the intoxication imagined by the word Wine; there is no perfume that our deceived nostrils find equal to the word Perfume: all is too little for the word All, and no nothingness is an empty enough vanity as to be that arch-terrorist word Nothing.—Emile Tennequin.

* * *

It was the late A. C. Benson who told the story of a soul who arrived in the next world and, there finding all the more pleasant features of his earthly life reproduced without their accompanying responsibilities, observed from the cozy depths of a supersensual armchair, "I had no idea that heaven was so comfortable!" —Whereto another shade tersely replied: "It isn't!"

* * *

I sometimes think there is nothing a crazy man dreams might be done that cannot be done. I am half convinced that fiction is only a record of things we do not yet know about.

* * *

If cowardice had not been a strong characteristic of mankind, history would have recorded the existence of tyrants only to give grateful particulars of their execution. There is no excuse for an individual or majority submitting to tyranny; a remedy may usually be found.

The great disgrace in Nero's history is that the people submitted to him. That one man should go wrong is not surprising, but that millions should patiently submit to his tyranny and brutality for years, is surprising.

When his subjects finally revolted, Nero ran away like a whipped cur; a single man easily disposed of him.

* * *

I have never attracted the favor of any man to the extent that he was willing to divide his money with me. But everyone I meet is willing to divide his valuable ideas with me.

* * *

"Don't preach at a fire," H. L. Mencken lately said.

Still, when a house is burning because of some one's carelessness, and women and children standing barefoot in the snow, quite a sermon is being preached.

And if a neighbor appears who devises an efficient method of getting water on the fire, and the furniture out, he will preach a sermon that will not only do good at the time, but be long remembered for future usefulness.

* * *

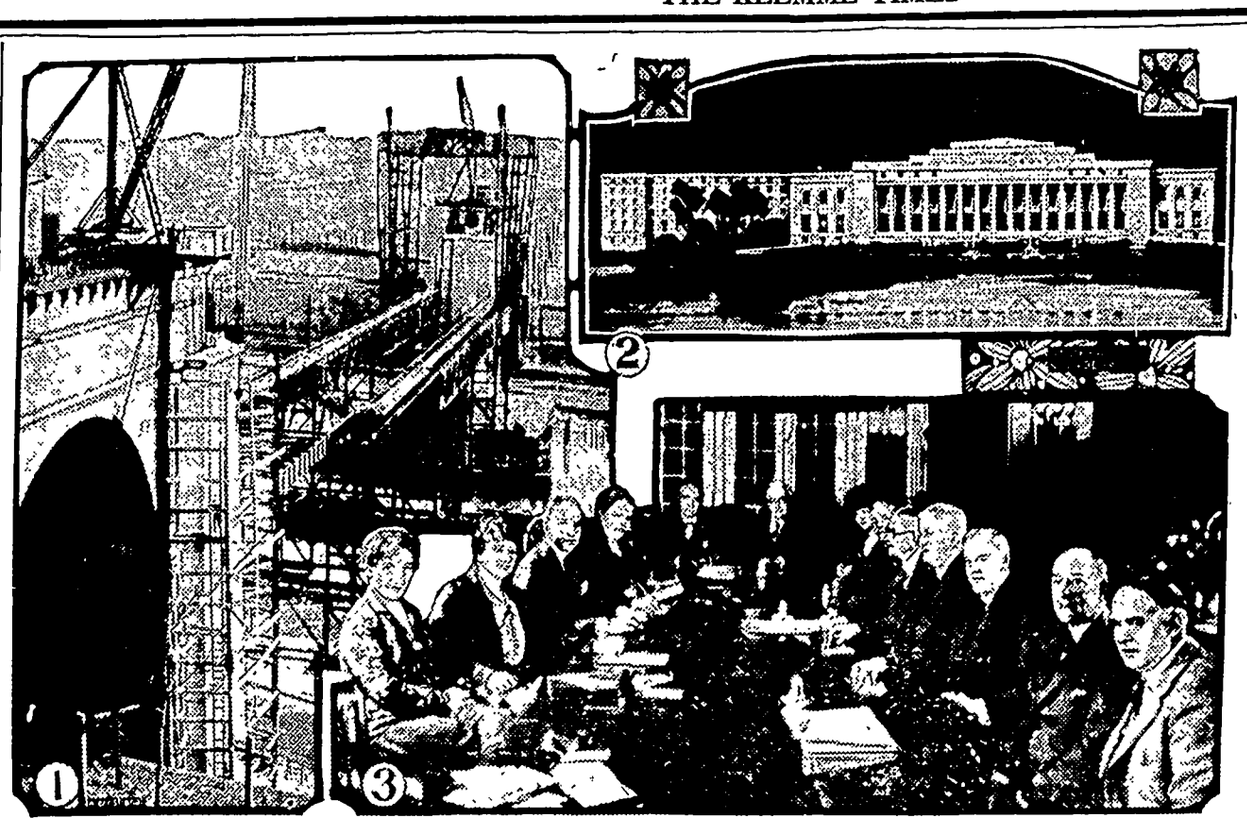
Never deal with a rogue. On the appearance of trouble, he always turns state's evidence and makes your part of the transaction worse than it is.

* * *

Be very careful what you ask for in youth, lest you receive too much of it in your old age.—Goethe.

* * *

Ben Franklin used to say it is the disposition of men to tire of a woman, a guest, and rainy weather, in three days.



1—Rebuilding the famous High bridge over the Harlem river in New York. 2—Design selected for the future home of the League of Nations, to stand on the shore of Lake Geneva, Switzerland. 3—William M. Butler, chairman of Republican national committee, and his aids meeting in Kansas City to arrange for the national convention.

NEWS REVIEW OF CURRENT EVENTS

President Goes to Cuba and American Marines Bomb Nicaraguans.

By EDWARD W. PICKARD

PRESIDENT COOLIDGE left Washington Friday by train for Key West, Fla., where he boarded the battleship Texas and steamed across to Havana, Cuba, thus leaving the United States for the first time in his incumbency of the Presidential office. With him were Mrs. Coolidge and the distinguished gentlemen comprising the American delegation to the Pan-American congress. It was to participate in the opening of that assemblage that Mr. Coolidge made the journey, and his stay on the island was to be brief.

There were unmistakable signs that the leadership of the United States in the affairs of the continent was to be contested by the delegations of some of the Latin American nations, this being precipitated by resentment against American intervention in Nicaragua. In order that the President and his delegation might not be embarrassed by criticism at home, the senate committee on foreign relations decided to postpone its investigation of the Nicaraguan situation until after his return. Such an inquiry was called for by a resolution introduced by Senator Wheeler of Montana and a majority of the committee seemed to favor it but deferred action for the reason stated. Protests against our course in Nicaragua have been rather frequent, the latest being in the form of a cablegram to President Coolidge from the editors of papers in Bogota, Colombia.

Meanwhile American marines numbering 1,000 were being hurried down to Nicaragua from both the Atlantic and the Pacific stations and General Lejeune, commander of the corps, also went down there to look over the situation. The announced intention to break up the rebel band led by General Sandino and give the country complete peace has not been altered. The bandits, who are said to be trained by a former German officer named Muller, are active and enterprising and have made several attempts to ambush detachments of marines. In one instance, at Somotillo, a number of native troops deserted their allies and helped the rebels in an attack on a patrol commanded by Capt. Paul W. Payne of the marines. Outnumbered, Payne retreated to Villa Nueva, obtained reinforcements and returned to Somotilla, but was again driven off. A larger body of troops was rushed there from Chinandega, but the bandits and deserters had fled to the mountains. Lieut. F. C. Schilt, marine aviator, discovered about 200 bandits lying in ambush awaiting a column of marines which was marching from Quilali to Jicaro. With bombs and machine gun the lieutenant put the band to rout, killing fourteen and wounding others. Bombs dropped from another marine plane north of Quilali killed nine rebels, breaking up a concentration.

SENATOR DAVID A. REED'S committee that has been investigating the alleged Mexican documents that were published in the Hearst papers made a partial report in which were these findings:

1. There is not a scintilla of evidence that any United States senator has accepted, or was promised, or was offered, directly or indirectly, any money or other valuable thing, by any officer or representative of the government of Mexico.

2. The pretended document showing that $1,215,000 was withdrawn from the Mexican treasury and sent to the Mexican consul general in New York to be paid to United States senators, is not genuine, but is spurious and fraudulent, and, in so far as it purports to be signed by the President of Mexico or the secretary of the treasury of Mexico, it is forged.

The committee said it had not yet been able to determine the identity of the manufacturer of the spurious documents. Senator Reed told the senate he believed Miguel Avila, who obtained the papers for Hearst, and John Page, who acted for the publisher, had testified falsely, and he criticized Hearst severely.

COLONEL LINDBERGH'S successful flights are becoming almost monotonous, and some one has said that if he did not land safely somewhere, that would be news. However, his tour still makes interesting reading and the Latin-Americans do not weary of receiving him tumultuously and heaping honors upon him. Monday of last week the lone eagle dropped down on the flying field at Panama that was built and named for him, after a four hours' flight from Costa Rica. The huge crowd almost mobbed him, and President Chiari received him warmly. For two days there were fetes, banquets, reviews and other functions, and Lindbergh took President Chiari and Vice President Duque up in an army observation plane. Then the flyer had several days, busy but more restful, in the Canal Zone. He announced that he would fly to Venezuela next, alighting at the army air field near Maracay, where President Gomez lives. Then he planned to proceed to St. Thomas, one of the Virgin islands, next to San Juan, Porto Rico, where there is an excellent army field; thence to Santo Domingo, where there also is a good marine-constructed field; then to Port au Prince, Haiti, which has the best field in the Caribbean, and then to Havana.

PROBABLY Pope Pius XI will be known in history as the author of the encyclical rejecting movements favoring the unity of the Christian churches regardless of form or creed. It was declared in Rome to be the most important Vatican document issued since the World war, and there can be no doubt that its effect will be great and widespread. It was considered specifically as a rejection of the efforts of the Anglo-Catholics of the Church of England to bring about an entente with the Catholic church, but its terms are general.

The pope declares the sole religion was revealed to the Catholic church, which has maintained itself one and identical throughout the centuries.

Of religious conferences and congresses for unity to which all are invited the encyclical says: "Such attempts cannot obtain the approval of Catholics. These movements are founded on the false theory presupposing that all religions are good and meritorious; therefore all, although in a different way, manifest and signify equally that sentiment, inborn in us, to be carried to God for reverent recognition of His dominion.

"Followers of such a theory not alone deceive and err, but repudiate true religion, distorting concepts, tending little by little to naturalism and atheism, whence clearly those adhering to such theories detach themselves from the religion revealed by God. Under the appearance of good they more easily hide deception when they try to promote the unity of all Christians."

SECRETARY OF THE NAVY WILBUR and Admiral Hughes, chief of naval operations, appearing before the house naval affairs committee in behalf of the new $725,000,000 construction program, told the congressmen flatly that the American fleet is now inadequate to the defense of the country. They asserted that the building of 72 vessels, including cruisers, submarines, destroyer leaders and aircraft carriers, would fulfill the sea defense needs of the United States.

While denying that the program can be considered as placing the United States in competition with other nations, Secretary Wilbur admitted that in working out American needs the size of other navies was taken into consideration. He said the program would put the United States well within the 5-5-3 ratio as far as Britain is concerned and slightly above the ratio with Japan.

Admiral Hughes said the completion of the program would give the country "reasonable security," but would not give the United States command of the sea.

SURPRISINGLY, the Democratic national committee in session in Washington selected Houston, Texas, for the national convention and set the opening date for June 26. The contest was between Houston and San Francisco and the fifth and deciding ballot was 54 to 48 in favor of the Texas city. Houston offered $200,000 for the convention and promised to build a new hall if the city auditorium, which seats 5,000, were considered too small. The place has hotel accommodations for 10,000 to 12,000 persons.

The Jackson day banquet was attended by most of the party leaders and harmony prevailed, at least on the surface. Gov. Al Smith of New York was not present, but a letter from him was read and evoked long and loud applause. To observers in Washington it begins to look as if Smith might get the Democratic nomination almost without a contest.

On the Republican side it was announced that Frank O. Lowden would enter the North Dakota Presidential primaries to be held March 20, the first to be held in the Middle West. In the East the Hoover boom was growing steadily and his cause was helped by the fact that Thomas A. Edison and Henry Ford both declared for him. Senator Jim Watson of Indiana said he had not yet decided whether to be a contender, but that if he entered the race it would be in earnest and not as a stalking horse.

REORGANIZATION of the Chicago, Milwaukee & St. Paul railroad having been approved by the interstate commerce commission, Federal Judge Wilkerson in Chicago issued orders for the receiver to transfer the company to the new organization, and at midnight Sunday the old company passed out of existence, its place being taken by the Chicago, Milwaukee, St. Paul & Pacific railroad. Henry A. Scandrett of Omaha is president and H. E. Byram, former president, becomes chairman of the board of directors. The reorganization was carried through by Kuhn, Loeb & Co. During the receivership of nearly three years the property has steadily improved, according to Mr. Byram.

REPLYING to Secretary Kellogg's suggestion of a multilateral treaty renouncing war, the French government proposes that the ban shall be restricted to "aggressive war." This is not agreeable to our government and in a second note Mr. Kellogg shows it clings to its original stand that the treaty's declaration be against war without any qualifying or modifying definition attached, and also that other world powers be asked to unite in signing it. The new turn in the discussion is not considered by the State department to bar the way to ultimate negotiation of a treaty between France and America, and ultimately with all powers, declaring against war as a weapon in international relations.

THOMAS HARDY, dean of English literature and the last of the great Victorian writers, died Wednesday at his home near Dorchester at the age of eighty-seven, after a month's illness. Of late years the famous novelist of Wessex had devoted himself to writing poetry, but whether any of these poems will be put into print is doubtful.

Among other deaths of the week were those of Louis F. Post of Washington, author, editor and adherent of George's single tax theories; Marvin Hughitt of Chicago, pioneer railroad builder and executive; Sara A. Conboy of New York, labor leader, and Dr. Julius Grinker of Chicago, eminent neurologist.

ALBERT D. LASKER, former chairman of the United States shipping board, and Mrs. Lasker have given $1,000,000 to the University of Chicago for medical research directed toward establishing the nature, causes, prevention and cure of degenerative diseases. In other words, the aim is to increase the life expectancy of men and women who have reached middle age.

DEATH in the electric chair in Sing Sing brought to a close the tragedy of Ruth Snyder and Henry Judd Gray, murderers of the woman's husband. Resourceful lawyers tried up to the last minute to prevent or delay the execution, but all their efforts were futile.

(©, 1928, Western Newspaper Union.)

Lesson for January 22

JESUS AND THE LAW

LESSON TEXT—Mark 2:18-3:6.

GOLDEN TEXT—Think not that I am come to destroy the law, or the prophets. I am not come to destroy but to fulfill.

PRIMARY TOPIC—Doing Good on the Lord's Day.

JUNIOR TOPIC—How to Use the Lord's Day.

INTERMEDIATE AND SENIOR TOPIC— How Jesus Obeyed the Law.

YOUNG PEOPLE AND ADULT TOPIC—Jesus Declares the Higher Law.

I. Jesus and Fasting (vv. 18-22).

1. The questions asked (v. 18).

The scribes and pharisees seeing Jesus eating with the publicans and sinners, raised the question as to why He did so. When Jesus heard their question He declared, "They that are whole have no need of the physician, but they that are sick." Another question was then asked as to why Christ's disciples did not fast when the disciples of John and of the pharisees did fast? John the Baptist was now in prison, therefore his disciples were mourning for him.

2. Christ's answer (vv. 19, 20).

In explanation He raised the question, "Can the children of the bridechamber fast while the bridegroom is with them?" He then declared that as long as they have the bridegroom with them they cannot fast. The time will come, however, when they would fast. He is now away. Fasting, therefore, is appropriate.

3. New wine in old bottles (vv. 21, 22).

The bottles mentioned here were made of skins of animals. In the fermentation of the wine there was expansion which stretched the skin. To put new wine in the bottle after it was stretched would cause it to be rent asunder when fermentation took place. The same thing in principle would be realized if new cloth were used on old garments. The teaching designed was to show the foolishness of imposing old customs on the new age.

II. The Disciples Plucking Ears of Corn on the Sabbath (Mark 2:23-28).

1. The charge made against the disciples (vv. 23, 24).

Perhaps they were on their way to the synagogue to worship when they plucked the ears of corn. For this act the pharisees accused them of lawlessness.

2. Jesus defends them against the charge (vv. 25-28).

(1) He cites a precedent (vv. 25, 26).

He showed them that the very law which they charged the disciples with breaking recorded the fact that David the great king of Israel had gone into the house of God and eaten the bread which should be eaten only by the priests.

(2) He shows the nature of a Sabbath law (v. 27).

The Sabbath was made for man, therefore its right use is to be determined by the good of man. The laws of honesty, truth, purity and love differ from the law of the Sabbath and there is no circumstance or condition under which they may be departed from.

(3) Jesus is the Lord of the Sabbath (v. 28).

It was He who instituted it when creation was finished, therefore He had a right to use it as it pleased Him for man's good.

III. Jesus Healing a Man's Withered Hand on the Sabbath (3:1-6).

1. The place—the synagogue (v. 1).

Jesus' example shows what He did on the Sabbath. He went to the place of worship. The presence of the man with a withered hand gave Jesus an opportunity to administer a rebuke to the pharisees.

2. The pharisees watching (v. 2.)

They knew that Jesus would be interested in this helpless man. They surmised that some work would have to be performed to heal him.

3. The man made an example (v. 3).

Jesus wanted the case to be open to all, so He commanded the man to stand forth where all could see him.

4. The question asked (v. 4).

"Is it lawful to do good on the Sabbath day, or to do evil, to save life, or to kill?" He made the issue clear; He plainly showed them that to fail to do good, to show works of mercy, to save life, is to be guilty of wrongdoing, even of murder.

5. The man healed (v. 5).

Christ healed him by speaking the Word, so they could not accuse Him.

6. The result (vv. 4, 6).

The pharisees were silenced. There was no ground upon which to accuse Him. But since their hearts were bent upon His destruction they sought how they might put Him to death.

Effect of One Sin

Where one sin has entered, legions will force their way through the same breach.—Rogers.

Obedience

Obedience means marching right on whether we feel like it or not.—D. L. Moody.

Christian Religion

The Christian religion is not taught; it is caught from some one who has it.—Inge.

Have Kidneys Examined By Your Doctor

Take Salts to Wash Kidneys If Back Pains You or Bladder Bothers

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their effort to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to help cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful effervescent lithia-water drink.

Liquor Today Is Deadly!

Blindness—Insanity—Death, Now Frequently the Result of Drink. Stop Gambling With Life.

Users of alcohol and drugs need not suffer from these destructive diseases. They can regain health, restore will power, ambition, return to normal life free from all desire for liquor or drugs. In a few short comfortable weeks at The Keeley Institute, they can find complete and certain relief. There is no restraint, no nauseau, no bad after effects. This statement is based on a record of more than fifty years' specialized treatment of men and women for liquor and drug addiction, and is backed by successful results in the cases of upon thousands of cases.

Should you have a friend or loved one afflicted with either the liquor or drug habit, you owe it to investigate The Keeley Treatment at once. It costs nothing to find out how this world famous treatment obtains such remarkable results.

The opportunity to prevent another's descent from continuing on the path to position and destruction is yours. Write at once. The longer more time has elapsed and the addiction has become worse. All correspondence treated confidentially.

Write V. G. Nelson, Secretary.

The Keeley Institute
Dwight, Illinois

For Wounds and Sores

Hanford's Balsam of Myrrh

Money back for first bottle if not suited. All dealers.

Carp Broke Window

When two policemen of Wilmington, Del., heard the crash of plate glass they expected to find an intruder in a fish store there, but when they arrived on the scene they saw nothing but shattered plate glass and a nine-pound carp lying on the pavement. Ben Weintraut, the owner of the store, explained the mishap by saying that he had taken the carp from a tank and was awaiting the arrival of a rabbi to kill the fish when the carp, frantic in its struggles to seek water, gave a mighty flap of its tail and broke the window.

Last, but Not Least

He had been praising his sweetheart's features.

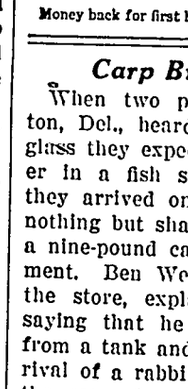
"And your mouth," he concluded, enthusiastically, "is absolutely great."

When You Feel a Cold Coming On, Take Laxative BROMO QUININE Tablets to work off the Cold and to fortify the system against an attack of Grip or Influenza. 30c.—Adv.

One hardly knows what trouble is unless it is the kind that makes him lose his appetite.

Young folks have too many exciting things to think about, to notice whether they're cold or comfortable.

For That Weakness After Flu or Grip



Clinton, Iowa. —"After I had the 'flu' I was very weak and nervous. I was also tortured with headaches. My blood seemed to be thin and I could not regain my strength. I was advised to take Dr. Pierce's Golden Medical Discovery, which I did, and before I had finished the third bottle I was feeling like a different person. My health improved so rapidly that I was astonished. I think it saved my life and I consider it a wonderful remedy."— Mrs. Louisa Redfield, 230 DeWitt St.

Tablets or Liquid. All dealers.

Write Dr. Pierce, Pres. Invalids' Hotel, Buffalo, N. Y., if you desire free medical advice.

PISO'S for Coughs

Quick Relief! A pleasant, effective syrup—35c and 60c sizes. And *externally*, use PISO'S Throat and Chest Salve, 35c.

WOMEN OF MIDDLE AGE

Praise Lydia E. Pinkham's Vegetable Compound

Mrs. Annie Kwinski of 526 1st Avenue, Milwaukee, Wis., writes that she became so weak and run-down that she was not able to do her housework. She saw the name Lydia E. Pinkham's Vegetable Compound in the paper and said to her husband, "I will try that medicine and see if it will help me." She says she took six bottles and is feeling much better.

Mrs. Mattie Adams, who lives in Downing Street, Brewton, Ala., writes as follows: "A friend recommended Lydia E. Pinkham's Vegetable Compound and since taking it I feel like a different woman."

With her children grown up, the middle-aged woman finds time to do the things she never had time to do before—read the new books, see the new plays, enjoy her grand-children, take an active part in church and civic affairs. Far from being pushed aside by the younger set, she finds a full, rich life of her own. That is, if her health is good.

Thousands of women past fifty, say they owe their vigor and health to Lydia E. Pinkham's Vegetable Compound, and are recommending it to their friends and neighbors.

Relief from Kidney and Bladder Trouble. Don't let these organs make a martyr of you. Heed the first warning that "things are not right." Drink freely of water and take Gold Medal Haarlem Oil Capsules. A world famous remedy for kidney, liver, bladder and uric acid troubles since 1696.

GOLD MEDAL HAARLEM OIL CAPSULES

At all druggists. In three sizes. Look for the name on the blue and gold box.

Coughs and Colds

are not only annoying, but dangerous. If not attended to at once they may develop into serious ailment.

Boschee's Syrup

is soothing and healing in such cases, and has been used for sixty-one years. 50c and 90c bottles. Buy it at your druggist or G. G. Green, Inc., Woodbury, N. J.

Change of Viewpoint

"You used to be an altruistic idealist."

"Life looks all different. I have been serving on the grand jury for a couple of weeks."—Washington Star.

With a triangular top and three feet a camp stool has been invented that folds compactly enough to be carried in a coat pocket.

A man who detests dinner parties doesn't have the courage to turn them down until after forty.

The BABY

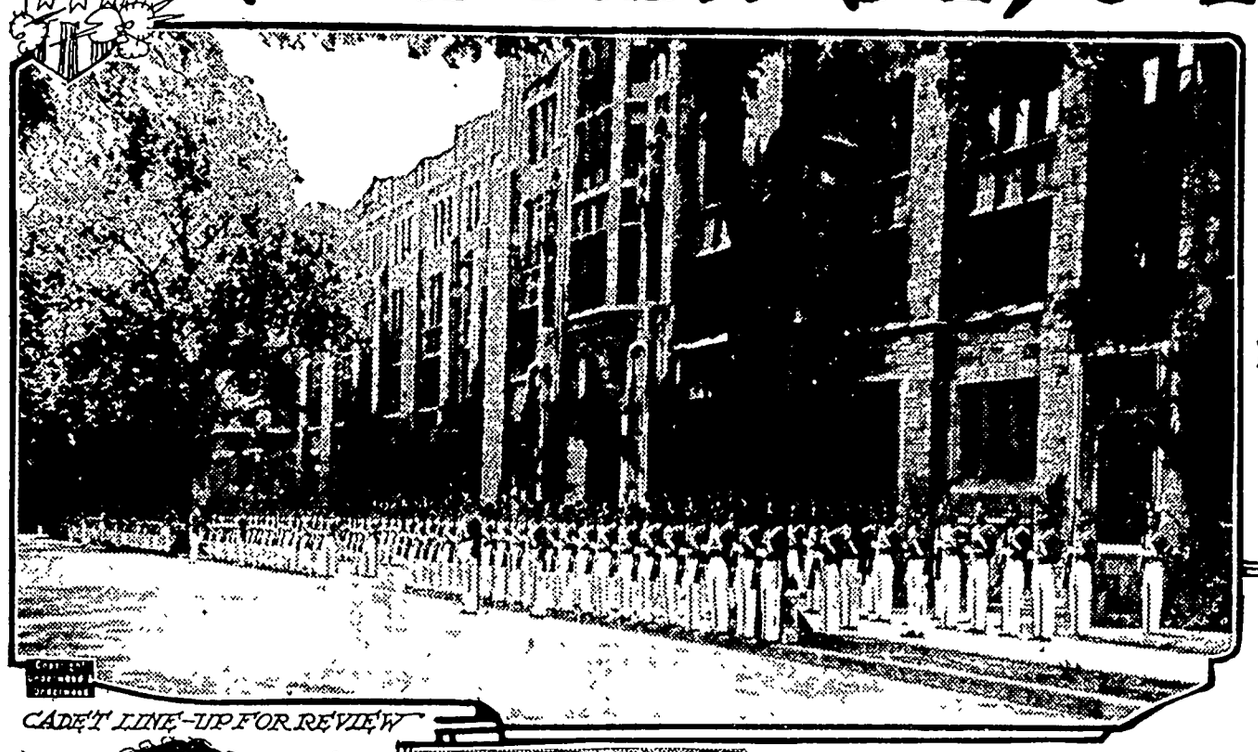
No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its price in gold.

Children Cry for Fletcher's CASTORIA

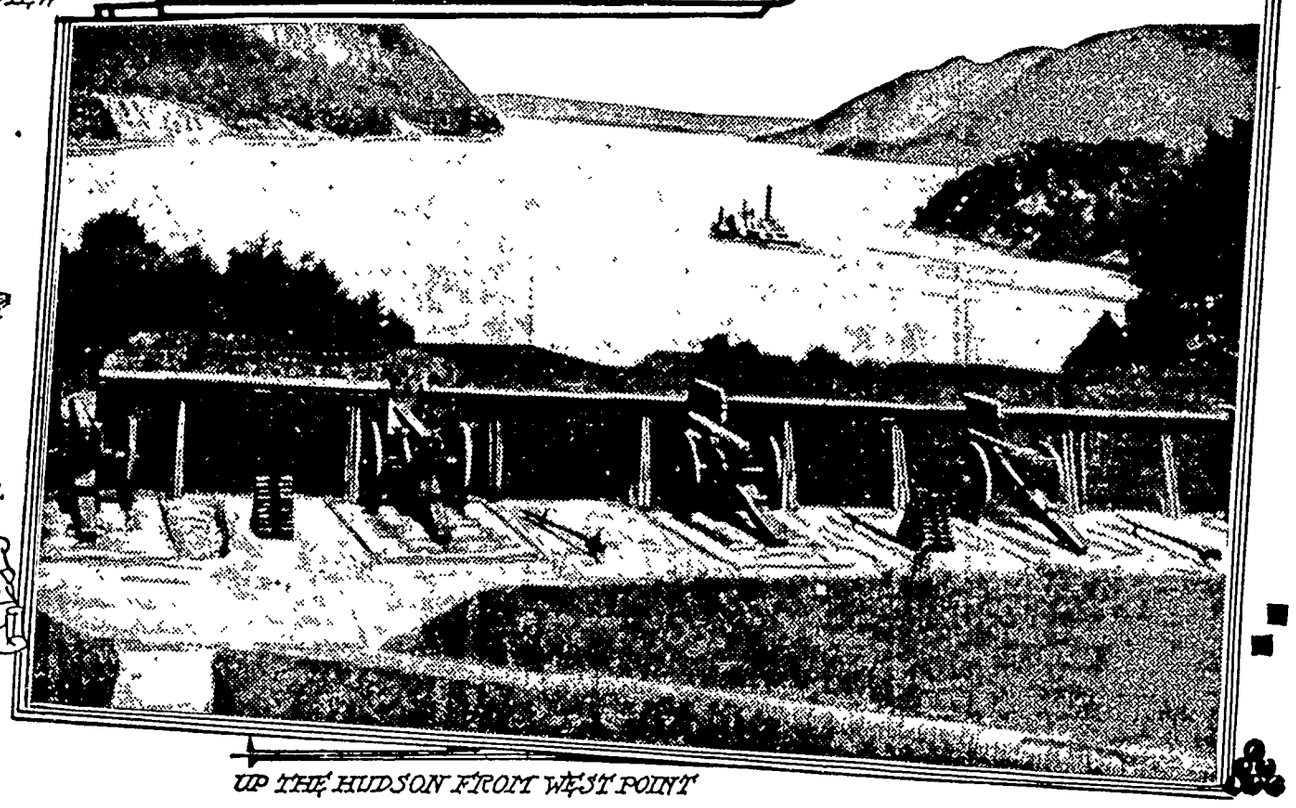
West Point's 150 Years



CADET LINE-UP FOR REVIEW

Knox

T. Kosciuszko.



UP THE HUDSON FROM WEST POINT

By ELMO SCOTT WATSON

IF YOU have never yet seen it, it's a "thrill that comes once in a lifetime," that you have yet before you, this march of the West Point cadets. Just why it should be such a soul-stirring spectacle is difficult to explain. America is not essentially a militaristic nation, so love for military pomp and display is not an adequate explanation. Perhaps it's because the sight of these future captains and colonels and generals recalls to us the history of the wars of the past in which West Pointers had been our successful military leaders and in these future leaders we see a guarantee of future military successes but more especially future national security.

We call them "the West Point cadets," because the United States Military academy happens to be located at West Point, New York, and this year marks the hundred and fiftieth anniversary of the appearance of the name "West Point" in the national consciousness. It was singularly appropriate that the training school for America's defenders should have been founded during the struggle which established this nation. The earliest proposal for a military school for the United States was that made by Brig. Gen. Henry Knox, the Boston book seller who became one of Washington's most trusted subordinates, served as his chief of artillery and was later the first American secretary of war. Knox's proposal was made in May, 1776, and his plans were seconded by a young colonel named Alexander Hamilton, destined to be a brother cabinet officer of Knox's and the first secretary of the treasury. The plans of these two officers were approved by General Washington but were not adopted in the form suggested immediately.

On October 1, 1776, congress passed a resolution appointing a committee to prepare a plan for "A Military Academy at the Army." Another resolution on June 20, 1777, provided for a Corps of Invalids "to serve as a military school for young gentlemen previous to their being appointed to marching regiments."

So far there had been only the preliminary legislation looking toward the establishment of a military academy but nothing had been done towards the highly important matter of finding a location for such a school. After the capture of Forts Montgomery and Clinton on the Hudson in September, 1777, both General Washington and congress saw the necessity of having a strong fort farther up the river, which would interfere with the projected junction of Burgoyne's army coming from the north and Clinton's army coming from the south, and which would also protect the ferrying of troops and supplies between New England and the other colonies. Fortunately nature has provided just such a place about forty-eight miles above New York city. There, on a little plateau overlooking the Hudson and commanding that river, was an ideal place to build a fortress which the whole British army would have difficulty in capturing. Accordingly, West Point was occupied January 20, 1778. Since it has been occupied continuously since that date, January 20 of this year may be regarded as a sesquicentennial anniversary of the founding of our national military academy and for that reason is worthy of more than passing notice.

Associated with the history of West Point is the name of a brilliant young Polish officer whose passion for human liberty, strengthened by his experience in his native country, had brought him to the aid of the American colonists. Thaddeus Kosciuszko, a graduate of the Royal Military academy at Warsaw, Poland, and later a student of military engineering in France, had arrived in this country in 1776, and upon recommendation of the military committee, congress appointed him colonel of engineers. He soon showed his worth in directing the fortification of Philadelphia and later in planning the fortifications on Bemis Heights, at Saratoga, which had such an important part in Burgoyne's defeat. So when a skilled engineer was needed to lay out the defenses of the new fortress, the young Pole was called upon.

Kosciuszko began work on March 20, 1778, staking out the lines and setting a large force of soldiers at work erecting the walls of the fort which were of earth and logs, 14 feet high and 21 feet wide at the base. The main work was 1,800 feet in circumference with bastions, ditches and many angles. The fort could be approached from only one side—toward the river—and that was protected by a strong oak palisade, made by driving logs in the ground and bolting them together at the top. A hundred guns of all kinds were mounted in the main fort and the surrounding work. To prevent the British ships passing the fort at night a great iron chain was stretched across the river just above the fort. Composed of huge links, the chain weighed more than 180 tons. (A part of this chain is still preserved and may be seen by the visitor to Trophy Point at the academy.) In fact, so strong was this post that Washington had the main supplies of munitions for the Continental army stored there.

In the meantime the project for establishing a military academy had gone forward. On March 30, 1779, the Board of War adopted regulations for a "Corps of Engineers and for the Sappers and Miners," and these regulations were promulgated in orders issued by Washington on July 30, 1779, providing for a plan of instruction to be carried into effect after the commander and the board had approved of it. This plan included lectures by engineer officers on fortification, mining, reconnaissance and encampments. As early as February, 1780, practical experiments in gunnery were conducted at West Point and an engineer school, a laboratory and a library had already been established in three separate buildings. In 1781 the Invalid Corps, which had been organized in July, 1777, was marched from Philadelphia at the request of Washington to form a part of the garrison at West Point and to continue their instruction as "young gentlemen previous to their being appointed to marching regiments."

When the Revolution ended in 1783, Washington, when called upon for his views as to what peace-time army establishment the new nation should have, included in the recommendations, which he laid before his officers at Newburgh, the matter of a military academy. When he had been made President, he referred to it again in his message of December 3, 1793. The first action taken toward the organization of a cadet corps, however, was the law passed May 9, 1794, which authorized the organization of a "Corps of Artillerists and Engineers" with two cadets to a company, thus creating the new officer grade of "cadet" in the American army. Accordingly a school for artillerists and engineers and for cadets attached to the corps was, on Washington's recommendation, and by order of congress, established at West Point in 1794. But this small beginning toward a military academy suffered a severe setback two years later when the buildings at West Point were destroyed by fire and the school was suspended.

It was not resumed until 1801. In July of that year the secretary of war directed that all cadets of the corps of artillerists should report at West Point for instructions and in September a school was opened with four army officers and a civilian as administrators and instructors. The real beginning of a military academy and the first use of that name for it dates from the following year. By an act of congress, approved March 16, 1802, the President was authorized to organize and establish a corps of engineers to consist of five officers and ten cadets to be stationed at West Point and to constitute a military academy. Accordingly on Independence day, July 4, 1802, the United States Military academy opened at West Point with ten cadets present.

From that time on an attempt was made to have the development of the military academy keep pace with the needs of our national military establishment, but for years the effort lagged. Acts of congress passed in 1802 and 1808 authorized the establishment of a cadet corps of forty from the artillery, one hundred from the infantry, sixteen from the dragoons and twenty from the riflemen. Few of these were appointed, however, and no provision was made for them at the academy. In fact, in 1810, the academy was deprived of nearly all means of instruction and officers and cadets had the greatest difficulty in obtaining their pay. During 1811 and a part of 1812, even though war with England was imminent, instruction at West Point was practically abandoned. In March, 1812, the school was without a single instructor.

The result of this short-sighted policy in training officers for our armies was soon apparent during the second war with England. In no other war in which we have ever engaged have we suffered such disgraceful reverses, due mainly to poor leadership. As one historian has put it "Every nation has some bad generals. . . . but as the War of 1812 dragged to its dismal end, Americans were apparently faced with the intensely humiliating necessity of having to admit that their generals were all bad." Jackson's victory at New Orleans was about all that saved our national self respect, but the humiliations of that war had one good effect, at least. It showed the necessity for a systematic training of future army leaders and a hasty effort was made to supply that need.

By an act of congress on April 29, 1812, the academy was reorganized and the provisions of that act have furnished the general principles upon which the military academy has been builded since that time. By this act a more adequate staff of teachers was authorized, a maximum of 250 cadets was fixed and the age and mental and physical requisites for admission were prescribed. Under the provisions of the act and the able direction of Maj. Sylvanus Thayer of the corps of engineers, who was appointed commandant in 1817, the new era in the history of West Point opened.

Its results were soon apparent, for the Mexican war, the various Indian campaigns and the Civil war proved conclusively that the time when "all its generals were bad" was over for this country, and perhaps it is not too much to say that the Civil war was the terrific struggle that it was because so many West Pointers, who regarded their allegiance to their native states paramount over their allegiance to the nation and accordingly cast their lot with the confederacy, more than made up for the inferiority in numbers with which the South entered the war.

By an act of congress, approved May 4, 1916, on the eve of America's latest and greatest war, the corps of cadets, as now constituted, consists of two from each congressional district, two from each territory, four from the District of Columbia, two from Porto Rico, four from each state at large and eighty from the United States at large, twenty of whom shall be selected from among the honor graduates of educational institutions having officers of the regular army detailed as professors of military science and tactics under existing laws. They are appointed by the President, who is also authorized to appoint cadets from among enlisted men in number as nearly equal as practicable, of the regular army and the national guard, between the ages of nineteen and twenty-two years who have served as enlisted men not less than a year. The total number so selected may not exceed 180 at one time and there are other regulations governing their appointment. Under the act of 1916, and the apportionment of members of congress, according to the last sentence, the maximum number of cadets is now 1,332.

Winter's Colds and Chills

Throw Heavy Burdens on the Kidneys.

COLDS put extra burdens on our kidneys. When the kidneys slow up, impurities remain in the blood and are apt to make one tired and achy with headaches, dizziness and often nagging backache. A common warning is scanty or burning secretions. *Doan's Pills*, a stimulant diuretic, increase the secretion of the kidneys and aid in the elimination of waste impurities. Are endorsed by users everywhere. *Ask your neighbor!*

The piano recital given by the music pupils of Mrs. Harvey at the school house Monday night was very well attended. A number of the pupils displayed real ability at the

Bert Mathews, who works for the Central States Electric Company and who has been rooming in Klemme, has moved his belongings to Garner where he now rooms.

All four of Rev. and Mrs. Grosshuesch's children came down with the chicken pox Monday. They are getting along alright and seem to have it light. This is the only case we know of in the community.

Mrs. A. D. Gimer called a committee meeting of the Ladies Aid Monday afternoon to make waitress' caps, for which she donated the material to the Aid. Mrs. Gimer served a dainty lunch to the ladies.

Mr. and Mrs. J. Jorgenson, of Garner, and Mr and Mrs. J. C. Jorgenson and son of Winner, South Dakota, were etertained at the home of Mr. and Mrs. R. A. Jorgenson, Sunday.

"Kelly" Lauden and family have moved to the Elmer Ludeke farm. Elmer Ludeke and family moved to Garner last week where Elmer has a position of salesman for the Willys Knight and Overland cars in this territory.

Henry (Butch) Schroeder drove in from Chicago Saturday evening for a short visit with his mother and sister, Mrs. Schroeder and Mrs. M. Croner, and with other Klemme relatives and friends. "Butch" manages to get in a visit here once or twice a year. He is a live stock commission merchant in Chicago and head of the Schroeder-Benton Co. F. A. Arnold returned to Chicago yesterday with Mr. Schroeder on business.

Harvey Stille is having his restaurant on west Main Street re-papered and all fixed up fine. Harvey believes in having everything spic and span, and the clean-up campaign adds greatly to the neat appearance of his place of business. George Lawhorn is the decorator on the job.

The following guests gathered at the A. D. Gimer home for dinner Sunday: Mr. and Mrs. Joe Johnson and daughters, Mildred, Gertrude, and Irene; L. G. Gimer, and Mr. and Mrs. C. E. Johnson and son Robert. The occasion was in honor of Mr. Gimer who had a birthday on Jan. 14th.

Mrs. C. F. Keraus gave the teachers a variety in their meals Friday evening by having a waffle supper for them. Mesdames C. G. Waterman and R. A. Jorgenson presided over the "irons" turning out the delicacies. "Dad" Keraus, C. G. Waterman and R. A. Jorgenson came in on the second "sitting." We understand Prof. Penrod broke the record for the number of waffles consumed that evening.

Wm. X. Smith celebrated a birthday Sunday and his good wife had prepared a big dinner for him and invited the John Day family in for the day. Mrs. J. N. Day baked a big birthday cake, all nicely decorated, and home made sherbet to go with it for Mr. Smith. "Bill" is no longer a young boy, but he does not seem to grow any older as the years roll by and he still likes his birthday cakes and parties. Ye Editor and family were given a generous sample of the cake Mrs. Day made, and it was so good we are inclined to have a birthday ourself in the near future. (Now this is not a hint, but we do like Mrs. Day's cakes.)

Again we are peacefully seated in the old office chair, feet elevated at the most comfortable angle on top of our desk, blowing smoke rings at the electric light bulb above, and it's a good cigar: too, given us by one Henry Lewis, of Hancock County, State of Iowa, resident of Klemme. And be it remembered that on the 16th day of January, Monday, a fine specimen of a baby boy was born to said Henry Lewis and wife "Duard Henry" is the young man's official name and he weighs in at exactly six pounds. All concerned are doing well, except "Heine." However, we expect him to recover in due time and come back down to earth.

KLEMME SHIPPERS GAVE BIG BANQUET

OVER TWO HUNDRED ATTEND SHIPPER'S BANQUET

Klemme High School Orchestra And Mildred Johnson Entertained

The biggest social affair of the season in Klemme was the banquet given by the Klemme Live Stock Shipping Association at the Idle Hour Theatre last Thursday noon, when approximately two hundred and fifty farmers, their families and friends, Klemme business men and invited guests from out of town, sat donw to long tables and enjoyed the delicious dinner prepared by the M. E. Ladies Aid for the Shipping Association.

The Shippers are genuine good fellows and good sports to thus put on a big community dinner, at no small cost. They secured the High School Orchestra and Miss Mildred Johnson, violinist, to furnish music during the dinner hour, and this entertainment was greatly enjoyed

Following the dinner hour the regular business and reading of reports was taken up. The report is published in this issue and shows a fine volume of business the past year. Mr Nutty, the county agent, then put on free moving pictures for the entertainment of the crowd

The get together of farmers and business men in this manner is a real treat for both, adn a wonderful spirit of friendliness was displayed at this meeting. More such affairs should be staged to further co-operation.

We might add that the ladies aid were well pleased and thank the farmers for the compliments bestowed on them for the dinner they served. The ladies are striving to get $1,000 accumulated toward the construction of a new church in Klemme and now have well over $800 in the bank They appreciate the help and support of the community in helping them raise the money.

Farmers, we will say you are sure good fellows!

The business men of Klemme certainly appreciated your invitation to this fine dinner.

AVERY TOWNSHIP HAS MONEY TO BUILD SCHOOL HOUSES

Will Hold Special Election Monday, March 12th

At a special election to be held at the Avery Township Center School House on Monday, aMrch 12th, the voters wil be asked to give their permission to allow the board to build a new school house in District No. 4 and one in No 5, wiht funds now on hand.

The buildig of these schools will not raise the taxes as the money has "been saved up" for years and now enough is on hand. The voters will undoubtedly look with favor on this proposition.

Earl Josten's Band Making Good

The Harris school band, under the direction of Mr. Earl Josten, Principal of the high school, presented a well played and effective concert last night in the school auditorium.

It was the initial appearance of the organization, which consists of 29 young musicians, most of whom are pupils in the junior and senior high school. Organized less than four months ago, the band has developed rapidly from a group of mere beginners to a creditable musical organization. The band reflects much credit upon Mr. Josten, the director, and reveals the high standard of the musical instructions given in the school.

Features of the concert were a trumpet duet, a saxophone solo and a xylophone solo.—Sioux City, Ia., Tribune, Dec. 24.

The way to make a town grow, is to make it so attractive and full of advantages that people want to live here.

LITTLE TWO YEAR OLD BOY DIED TUESDAY

Son Of Mr. and Mrs. Arthur Brouwer Died At Rochester, Minn.

(By Rev. A. W. Gauger)

Master Ivan Arthur Brouwer, son of Mr. and Mrs Arthur Brouwer, was born October 5, 1925 near Klemme, Iowa, and came to an untimely and tragic death early morning, Jan. 24th, 1928, in the Kahler Hospital at Rochester, Minn., at the age of 2 years, 3 months and 19 days.

His death may properly be termed a tragis death for a little more than a week prior to his death he met with an accident by swallowing with his food a small bone which entered the trachea and thus caused trouble and irritation. Proper medical attention was given at once but after a thorough examination nothing foreign was discovered. Thinking that all would be well in due time and giving him every necessary attention they awaited the outcome. However as the week wore on conditions did not improve but on the contrary grew worse so that on last Saturday morning and Sunday medical aid was sought in the Mason City hospital where after a consultation by a number of doctors the parents were advised to go to Rochester in quest of help. This was done and there everything possible was done to save the life of little Ivan Arthur. All, however, proved of no avail for on early morning of Tuesday his earthly life came to an end when his soul departed and returned unto Him who said, "Suffer the little children to come unto me and forbid them not for of such is the Kingdom of Heaven." Ivan Arthur was dedicated in Holy Baptism on Easter Sunday, April 4, 1926.

This entire community is grief stricken with the parents because of the loss of their first born.

Funeral services were conducted on Thursday afternoon at the Methodist Church by Rev. A. W. Gauger, assisted by Rev. Calvin Grosshuesch.

Interment was made in the Klemme Cemetery

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

All services are regular next Sunday An increased attendance in both Sunday schools was gratifying. Let all young people come in on the Epworth League on Sunday evening Things of interest await you.

A sharp pointed nut pick is handy for breaking paper around baking powder cans and cornmeal cartons and for prying off milk bottle tops.

WEATHER BUREAU TELLS WHY WAS SO MILD

January, 1912, Was Coldest First Month Yet Recorded

Temperatures for below zero over most of Iowa on New Year's Day, 1928, were followed by a steady change to warmer, reaching record breaking high readings by the 10th, says the Weather and Crop Bureau of the Iowa Department of Agriculture.

Gives Cause For January Mildness

These high temperatures were caused by an immense and persistent area of low barometer extending from the northern United States to the Artic region, and from Alaska to Labrador, together with a high barometer area in the Plateau Region west of the Rocky Mountains. This pressure distribution caused southwest to northwest winds from the Rocky Mountains eastward over the Missouri Valley The air descending the slope from the mountains was warmed by compression, and the warming was aided by an unusual amount of sunshine. It is rare that temperatures rise in Iowa in January with a west to northwest wind. This could only occur under what is known as "Chinook" or "foehn" conditions.

Coldest January Was In 1912

After a cold December, people were resigned to the expectation of a cold winter, but overcoats were laid aside when temperatures reached the 60's. January, 1912, with a mean temperature of 4.2 degrees is believed to be the coldest in Iowa in the last 108 years. Early records are of course scattered and not entirely comparable with modern records, but if there ever was a colder January, it was probably in 1857 when the average temperature was about 4.0 degrees above zero The lowest authentic temperature reading in Iowa is 47 below zero, at Washta, Cherokee County, January 12, 1912. The lowest known reading in January 1857, was 33 below at Farmersburg, Clayton County.

Other notably cold Januarys are 1888, with a state average of 5.4 degrees; 1875, 4.8 degrees; and in 1920, about 5.0 degrees.

Mr. and Mrs. C. G. Waterman and Marian, and Mr. and Mrs. C F. Keraus drove to Traer, Sunday to visit Wm. C. Keraus and family, whom they found well and happy. "Bill" has his grocery store all re-modeled and neatly arranged, with a den partitioned off where he has a cozy corner with his radio installed, reading lamps, desk, etc. He is "all set" now for his Klemme friends to drive in any day he says.

DECLAM. CONTEST TUESDAY NIGHT

SECOND PLACE HOLDER WILL COMPETE IN CONTEST

Hayfield, Goodell, Garner And Local School In Line-up

Our Seconds from our local declamatory contest here on Jan. 13, will on next Tuesday night ompete in the Sub-County Declamatory Contest against Hayfield, Goodell and Garner. This contest will be in our own gymnasium and will begin a 7:45 p. m. Our representatives, the public may remember are Raymond Barz in oratory, Florence Stokesbary in dramatic and Marie Carson in the humorous class. Millard Brooks, Mabel Lackore and Raymond Stiniker will speak in these respective classes for Hayfield. Goodell and Garner have not at this writing reported.

The price of admission has been fixed at 35c and 25c. There will be special music, and out of town judges. Mr. and Mrs. Reams of Crystal Lake have been engaged as two of the judges. A third judge also will be procured.

First Go To Belmond

Our Firsts will compete at a later date the last of February at Belmond. They must meet rival speakers from Kanawha, Belmond and Goodell.

Faculty Entertained At Day's

Our faculty anticipate an enjoyable hour at the John Day home where htey have been invited to a 6 o'clock dinner on Thursday evening of this week. We know we shall relish Mrs. Day's cooking and Mr Day's genial conversation. None of us have been known to reject an invitation of this kind which means more than many imagine to those who must spend most of the year away from home.

Garner Defeated 18 to 13

Our boys in basketball avenge their defeat at Garner by taking the long end of the score here on Tuesday night. They defeated Garner by the same margin Garner defeated them there on Jan. 6. Our grade boys lost again to Garner grades. They were not so heavy and tall as most of the Garner lads but put up a good fight.

At Crystal Lake Friday Night

Our next game will be played at Crystal Lake on next Friday night We usually defeat Crystal Lake but surprises happen as happened to Garner and our lads must not grow over confident. We hope many can accompany the team to Crystal Lake and give them some loyal support.

CAMP FIRE NEWS NOTES

The Camp Fire Girls held a meeting last Monday night at Blanche Gimer's home. After the meeting refreshments were served. The next meeting will be held Sunday, Jan. 29 at the Legion Rooms.

The Camp Fire Girls will give the play, "How Beth Won Her Camp Fire Honor," on Feb. 14th. The cast of characters takes in the complete Camp. Camp Fire Girls songs will be sung between acts. Admission is 20c and 40c.

The tickets for the Firemen's ball will be sold Saturday afternoon. The Camp Fire Girls get a percentage for selling these tickets.

Card of Thanks

We wish to extend our sincere thanks to all for their words and acts of sympathy, for the floral offerings and help in our recnet bereavement. We want to thank the Clarion Choir for their part in the services. Rev. F. C. Griewe and family; Mrs. A. H. Yahnke and family; Mrs. Arthur Wellemeyer and family; Miss Anna Griewe; John Griewe and family; Mrs. F. Ortmeyor and family.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is fifteen minutes late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his class. Despite her apparent innocence and "sweetness," she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, is altogether unlike the girls who meets St. Croix at frosthoney, and her speech has hints of the Pennsylvania Dutch accent.

CHAPTER II—Continued

—5—

The noise of Mr. Schwenckton's sudden rising and walking to the door at the end of the stairs sent Lizzie, who had been quivering, back to her dishwashing.

Meely slowly following, took a towel and began to dry the dishes already washed, both of them waiting in tense anxiety for the entrance of "the Mister."

But Mr. Schwenckton did not at once come down. Meely and Lizzie, from where they worked, could still hear, faintly, the noises in the room above.

"I have awful afraid," Lizzie whispered, her ears hurting as she strained in the damper. "Pop is mighty set hurt. It's awful good of you, Meely, to help me. Maybe if I have a time I can get Pop comes down he won't whip me so hard."

"You poor little thing," Meely exclaimed, working as fast as Lizzie herself. "I won't let him touch you. I'll—"

"But I have afraid that would make him do it all the harder, Meely—your takin' up for me after what his Susie just tol' him!—how you tol' me it was a pity I wasn't old enough to run off! If you took up for me now, after her tellin' him that, he'd think I was gettin' spoilt by you and that he'd have to learn me!"

"But you've done nothing! That horrible woman lies! I'll tell him how she lies! And how she imposes on you two children and overworks you. He's too fond of you, Lizzie, to allow it, once he understands. He seems so especially fond of you, Lizzie. Did he ever whip you?"

"Not yet. I'm the only one he didn't whip. Each one, as soon as they got big enough, got one awful hard whippin' and then never no more. Oncet was enough. After that one they never disobeyed to Pop no more. Oncet was enough to learn 'em. Except Sammy. On account of Aunt Rosy's bein' here, Sammy's had his second one. The reason Nettie and Jakey run off was that Pop was a-goin' to whip 'em if they didn't mind to Aunt Rosy, and as big-growed as what they are yet, they didn't want to take it off of him, so they run off."

"But how have you escaped, Lizzie?"

"I don't know—I never seemed to do nothin' to get a whippin' for. But I know Aunt Rosy'll make him whip me tonight! I have so afraid, Meely! I'd run off to Gramma's like Nettie done if it wasn't dark night and ten miles away!"

"It's a wonder your father doesn't force Nettie to come home. He did try to, didn't he?"

"Yes, but Gramma she told Pop he darsen't make Nettie come home till Aunt Rosy's away a'ready. Till Susie's well and Aunt Rosy goes, then Nettie she'll come home. But mind you what she tol' Pop yet!"

"What?"

"She tol' Pop if he tried to whip her fur runnin' off, she'd run off where he couldn't find her, like Jakey done. Pop he's awful downhearted about Jakey. He don't show it much; but he is."

It was not until after Sammy had finished his supper and the table was cleared and the last dish washed and put away in the cupboard, that Mr. Schwenckton, followed by Aunt Rosy, returned to the kitchen.

Lizzie, with a faint hope of saving herself, spoke to him ingratiatingly, though she was white with fear of him. "See, Pop, how I got all the work done—all the dishes and pans—"

"Yes, well, but," Aunt Rosy broke in, "look at your diapers still layin—" Mr. Schwenckton laid his arm around Lizzie's thin shoulders, which shrank away from his touch, for she did not know whether it meant a caress or whether he was about to lead her away for punishment.

Meely, fearing the latter (for she had been a witness to Sammy's chastisement a week ago) could not restrain herself, unwise as she felt her interference might be. "Mr. Schwenckton, this woman doesn't tell you the truth!" she said breathlessly. "Lizzie's an obedient, willing, hard-working child!—and if Aunt Rosy can't get on with her, that's her fault and not Lizzie's. And, Mr. Schwenckton, it's a crime to put a little frail girl like Lizzie to auch heavy work as washing sheets and diapers! You don't know, do you, that this little girl stands at the washtub several hours every day? Her back will be strained! I ought to have told you before, but I hated to interfere. Now, Mr. Schwenckton, you've got to put a stop to it! You must, you must!—this woman's a devil—"

"Tut, tut!" Mr. Schwenckton raised his hand in protest against such unseemly language on the lips of a girl; and Aunt Rosy's look of deadly spite at Meely's accusation turned into a broad smirk of satisfaction. "Didn't I tell you Sam, how she's gettin' Lizzie spoilt fur you? Learnin' her to swear and curse (you heard her call me a devil yet!) and to disrespec' me and you—"

"Aunt Rosy," Mr. Schwenckton spoke in quietly, "I didn't speak nothin' to you upstairs, for the reason I didn't want to get my Susie stirred up. But I'm sayin' to you now that I pay you to do the work here and you don't do it. You try to put it off on my little childern. And when they don't do don't get done. You drove off my Nettie and Jakey and now you abuse Sammy and Lizzie. If it wasn't that Susie wants you here I'd get an-

Then, Very Carefully, So as Not to Waken Her, He Carried Her Upstairs and Put Her to Bed.

other housekeeper; for no perfeck stranger could do worse'n what you do! So if there's any more trouble and if things ain't kept cleaner 'round here, I will send you packin', now mind I'm tellin' you!"

Aunt Rosy, with a look of cold, concentrated resentment at Meely, turned to go instantly upstairs to her sister—but Mr. Schwenckton checked her by the simple, but effective means of barring her way with his brawny outstretched arm. "Not up there. I won't have Susie worried no more tonight." He pointed to the door opening from the kitchen into a small bedroom. "To your own room, Aunt Rosy."

She looked at him reproachfully. "So this here's the thanks a body gets for leavin' my own home and comin' here to work myself to the bone for yous—"

"Yes, well, if you did work for us—but you don't. You make my little childern do all. Puttin' a little girl like Lizzie yet to the wash-tub! Yi, yi, yi! Don't you leave me hear of such a thing again!"

"It's her," Aunt Rosy pointed vindictively at Meely, "that makes you so contrary! Takin' your childern's part agin your wife's sister! And standin' by a stranger that's tryin' to keep your wife sick by washin' her and openin' windahs on her—"

"That'll do, that'll do, Aunt Rosy. It didn't need Meely to open my eyes—enough for a while, there, I was awful dumb about you. But I only gotta take a look at this here crusty, through-other kitchen—and your puttin' Lizzie at the wash-tub, a child like that!—well, le' me tell you that when I come in here this evenin' and seen Lizzie at that there tub standin', I felt dangerous! I didn't show it none, but for a minute there I felt dangerous! So," he concluded, "don't leave it happen again. And don't go near Susie no more tonight."

For an instant Aunt Rosy wavered, as though weighing the possibility of defying her brother-in-law. But she knew the futility of such an attempt. He'd simply pack her in his car and run her back to her own home; that's how he'd settle it.

So, with a parting glance of malice at Meely, she turned away and went to her bedroom.

Mr. Schwenckton stooped and, picking Lizzie up in his arms as though she were a baby, carried her across the room to a big rocking-chair, where, folded to his breast, he rocked her until she fell asleep.

Then, very carefully so as not to waken her, he carried her upstairs and put her to bed.

CHAPTER III

It was at the heavy noon meal of the next day that Meely for the first time heard Mr. Schwenckton break his own rule against complaining at the table. "Aen Aunt Rosy, these here flies is someth awful. Susie she never has no flies when she housekeeps. An this here's October yet! My first wife, he'r' she didn't have no flies. Leastways not in October yet! Why do you so leave the flies in? Couldn't you manag with less flies?"

"It ain't my fault that there's flies. It's that there fat farm-hand of yourn that gives flies in fur me, still; fur when he goes out the door, he's so fat he can't get out quick and that lets the flies in."

"You're always got a good excuse, aint, Aunt Rosy?"

"But I don't see, Mister, why you ever got such a fat farm-hand that he gives flies in fur me and that he's too fat to set in your car and drive it for you." She diverted the conversation from flies.

"Yes, it is some onhandy that me and Absalom's both too big to drive our car easy. Us," smiled the farmer, who liked his little joke, "we gotta set in the back seat and have such a chiffonneer! But, Aunt Rosy, blamin' Absalom for these here flies—no. That's goin' too far. I don't give you right. You better get after these here flies—"

"Did Absalom tell you," Aunt Rosy diplomatically interrupted, "who his comp'ny is that's wisitin' at their place?"

This question proved effective in diverting attention from the flies.

"Why, no, he didn't speak nothin' to me that they had comp'ny wisitin' 'em," said Mr. Schwenckton. "What makes you conceit that?—that they have comp'ny?"

"I seen a strange shirt on their wash-line this morning that I reknized wasn't Absalom's. I didn't get time to run down and ast Missus whose the strange shirt was—what with all I had to do and Lizzie not helpin' any," she whined in a tone of deep injury. "But this after, mebby, I'll get time to run down."

"That's funny, too, again—that they got a strange shirt hangin' out and Absalom not sayin' nothin' to me about comp'ny," remarked Mr. Schwenckton reflectively.

"But couldn't the 'strange shirt' be a new one of Absalom's?" Meely asked.

"No, it ain't Absalom's size or color," Aunt Rosy pointed out.

"Do you know," said Mr. Schwenckton thoughtfully, "what I suspicion about that there strange shirt? I suspicion they're got a boarder at Absalom's, like us. I guess Marvin Creighton's boardin' with 'em since his Pop turned him out! For, you see, this here township's very handy in the center of all the schools he has to wisit. Yes, I bet you that's whose the strange shirt is! It's Marvin Creighton's! So then, Meely," he jocularly added, "you better watch your step, with the school superintendent livin' right handy here in sight of us! On our own farm yet!"

Meely stared blankly for a moment, without comment; then, pulling herself together, dropped her eyes to her plate.

As Meely remained silent, Aunt Rosy prodded her for an expression of her sensations at the great news.

"I suppose," Meely at last became articulate, "my teaching, when he beholds it, will give him a shock! It's not," she sighed, "according to rule. I don't know the rules! I don't know anything about teaching! I do have some ideas of my own, though—"

The sudden realization that she was talking to one of the school trustees brought her to with a jolt.

(TO BE CONTINUED.)

Surgeon Well Placed Among Nation's Great

Selection of Dr. Ephriam McDowell as one of Kentucky's two representatives in the Hall of Fame—the other is Henry Clay—is a reminder of the great service this surgeon rendered to humanity. He blazed the way of his profession in abdominal surgery when, in 1809, he performed a difficult operation that never had been tried before, saved the patient's life and enabled his profession to save countless other lives afterward. Doctor McDowell was literally a "doctor of the old school," the type that thought nothing of the monetary return from his practice. He was an adviser of the people, often in financial matters as well as being the custodian of their health and that of their children. He was born in Rockbridge county, Virginia, and had ample opportunity to study the science in which he early decided to spend his life. After obtaining what medical education was available in America, he attended the University of Edinburgh and on his return from Europe located in Danville, Ky., in 1795 to practice. It was there that he performed the operation that made him famous.—Kansas City Star.

Never Alone

The man who lives under an habitual sense of the divine presence keeps up a perpetual cheerfulness of temper, enjoys every moment the satisfaction of thinking himself in company with his dearest and best of friends. The time never lies heavy upon him: it is impossible for him to be alone.—Joseph Addison.

Disinfection Is Best for Scab

Kills Organisms on Tuber and Prevents Introduction Into Soil.

The importance of seed disinfection in the growing of a clean crop of potatoes is much greater than the average grower realizes. Potato specialists at the college of agriculture in New Brunswich point out that in tests conducted in 1920 disinfected seed showed an increase of 33.9 bushels per acre over untreated seed. In addition to the increase in yield there was a considerable reduction in the number of scabby potatoes.

Kills Organisms.

Not only will disinfection kill organisms on the tuber, but it prevents their introduction into the soil as well. This is especially true of scab organisms. Unquestionably, if seed treatment had been more generally adopted in the past, more growers would not now be growing scabby potatoes.

There are two chemicals commonly recommended for seed treatment, formaldehyde and corrosive sublimate. Formaldehyde does not give as efficient control of scab, so the use of corrosive sublimate is advised. This material is a poison and must be kept away from animals; furthermore, it corrodes metal and must be made up and used in wooden containers.

Mix Corrosive Sublimate.

Mix corrosive sublimate at the rate of 4 ounces to 30 gallons of water. The potatoes should be soaked in this solution for at least one-half hour, but if heavily infected with scab or rhizoctonia, continue the treatment one hour. As soon as potatoes are treated they should be removed from the solution and dried. Corrosive sublimate is removed from the solution by the potatoes, so measures must be adopted to keep it up to original strength. This may be done by adding one-half ounce of dissolved corrosive sublimate after treating every four bushels. Seed can be treated for from four to five cents a bushel.

Swine Flu Exceedingly Expensive to Breeders

Since the introduction of preventive measures for hog cholera, greater loss is sustained by hog producers from flu than from cholera. Flu undoubtedly causes greater financial loss to the producer of hogs than any other single disease. While many hogs actually die from flu the main damage occasioned by this disease is the result of loss in condition of the herd. When a herd is infected with the flu, even though recovery is secured without loss from death, there is a tremendous waste of feed, for the porkers not only fail to gain in weight while affected with the disease, but generally they also lose weight. When brood sows become affected with the flu, the problem is still more serious because it very often causes abortion and if not, many of the pigs will be born dead, so that the average number of pigs raised per sow, even though no sows are lost, may be reduced by 100 per cent, which makes the pigs very expensive. The thing to do is to institute preventive measures against this disease by supplying good, well ventilated sleeping quarters, kept well bedded.

Take Vigorous Measures Against Pest of Rodents

With rats and mice in evidence in large numbers, farmers will do well to begin vigorous control measures against these filthy, destructive pests.

Powdered barium carbonate, mixed with various types of food on a basis of one part of the poison to four parts of the selected food, has proved very effective.

In the control of large rats, which are especially destructive to young poultry, a rabbit carcass with the poison worked into knife cuts, has given unusually good results. The poison should be worked into the cuts in the proportion of one part to four of the flesh, and the carcass placed where rats will have ready access, but poultry and other domestic animals will not be endangered. Securing the carcass firmly with wire will prevent large rats from dragging it away.

Short Farm Notes

Scrub seed should not be allowed to reproduce themselves.

* * *

Look up last year's garden plan and study it for improvements.

* * *

Plan your plantings so all your work won't come at the same time.

* * *

Sweet clover seed should not be sown too late in the spring or it may not give a good stand.

* * *

Look over the lists of new garden tools. They turn out new and more efficient tools every year.

* * *

Time spent selecting and testing seed corn will pay the farmer many dollars per hour for his labor

* * *

Early potatoes may be secured by early planting of early varieties in deep, rich, warm soil followed by thorough cultivation or mulching with straw.

LEE MEADOWS

Famous Pitcher of the Pittsburgh Pirates, writes:

"It requires splendid physical condition and steady nerves to take your regular turn on the mound season after season and in looking for my cigarette I was anxious to find one which could be smoked without taxing my wind or irritating my throat. I decided upon Luckies and I can safely say that I am never troubled with a cough and my wind is in splendid shape."

Lee Meadows

The Cream of the Tobacco Crop

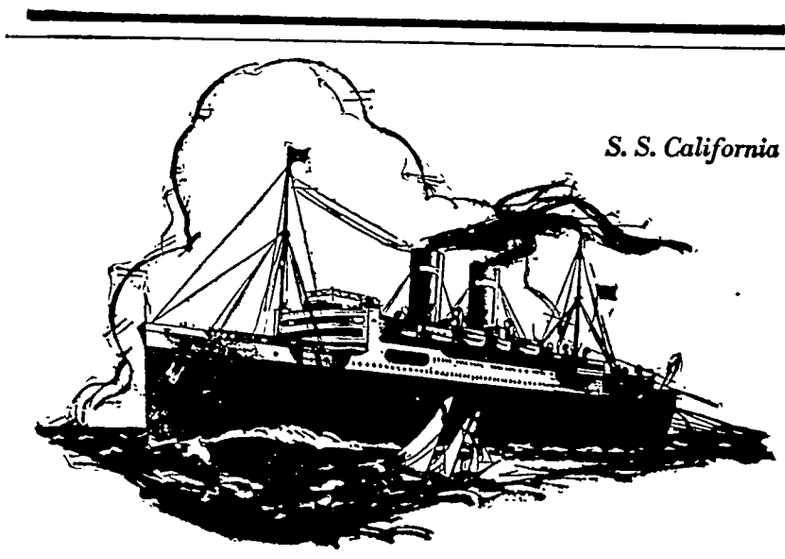
"Here in the Southland we know good Tobacco. It is born in us and it is the livelihood of most of us. 'The Cream of the Crop' is bought for LUCKY STRIKE. I know for it has been my duty to purchase it on the markets for years for this brand."

A. W. Glasser

Buyer of Tobacco at Covington, Ky.

"It's toasted"

No Throat Irritation—No Cough.



S. S. California

Largest and Finest American Built Steamship Serves

MONARCH COFFEE

This Panama Pacific Liner is the world's largest electrically propelled commercial steamship. Her turbo-electrical driving machinery is the same as in the latest U. S. battleships. Everything about the S. S. California is the finest that can be secured. In keeping with this, it was but natural that her owners should select the world's best coffee—MONARCH. When the California sails from New York for San Diego, Los Angeles and San Francisco, her kitchens will be stocked with MONARCH Coffee fresh from the *Monarch* roasters in New York; and a new stock will be supplied from the *Monarch* roasting plant in Los Angeles for the return trip.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his "class." Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Due to family differences, Marvin Creighton boards in town, near Meely. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl.

CHAPTER III—Continued

—6—

"But," said Mr. Schwenckton, puzzled, "you must know how to schoolteach when you're a grad-yate of Kutztown Normal yet! Well, I guess anyhow! Us we don't elec' no teacher to our William Penn that ain't got her Normal school diarploma."

"Oh, yes—well, but—yes, of course," Meely concluded in some confusion. She glanced surreptitiously at Aunt Rosy—and found, to her discomfort, that she was being regarded with a look of cunning suspicion.

"Say!" suddenly spoke up Rosy. "Have you got such a Kutztown Normal school diarploma?"

"Why—why, of course—why, of course I have."

"Mister," she demanded of her brother-in-law, "did you ever see her diarploma?"

"Ach, Rosy, what's over you? To be sure, she had to send her diarploma along with her application and her photygraft when she wrote for the job here at our William Penn. Your photygraft," he said to Meely, "don't favor you much. You're a lot prettier than that there photygraft."

"It's funny," answered Meely, "how my photographs never look like—never do me justice," she amended her remark.

Again she found Aunt Rosy's little cunning eyes boring like gimlets into hers.

* * * * * * *

Meely Schwenckton seemed to herself, these days, to be ever walking in fear. Yet never in all her young life had she found existence so exhilarating, so tense with interesting suspense. It was not really fear, she decided, only a thrilling apprehension that hung over her every minute of the day and night; an apprehension which even if realized could not really bring harm to her, only awkward embarrassment.

"But somebody else would feel more awkward and embarrassed!" she smiled to herself.

However, this apprehension, following her ceaselessly, was a bit nerve-racking; and the startling knowledge just acquired that Marvin Creighton (her "Steady Date's" brother!) stood over her as the school superintendent and was therefore bound to make her acquaintance very soon, greatly augmented her sense of the danger of her situation—a situation brought about less by her own plotting than by a succession of fortuitous and unforeseen circumstances. Never would she have had either the audacity or the ingenuity to have arranged such an extraordinary chain of circumstances.

"Up to now, I've always held fiction to be stranger than truth—but never again! If I were a novelist I'd never have the cheek to make up such a lurid and improbable yarn as I'm living!" she amazedly told herself. "If I offered it to the movies I'm sure they'd consider it too true to life to be convincing."

If either of the Creighton brothers should ever see her in the other's company! Or if St. Croix discovered she was the district teacher, instead of the ignorant cow she feigned to be! Or if any of the Schwenckton family discovered her meeting with St. Croix or any of the other things about her which they were congenitally incapable of suspecting!

It was just three days after her last rendezvous with St. Croix that one afternoon at a quarter past four, school having been dismissed and her plain tailored school dress having been changed right here in her empty schoolroom for the fancy, cheap finery in which she always disguised herself to meet her "Date," that she came out of the schoolhouse and after locking the door and hiding the key under a stone, glanced cautiously up and down the road before starting for the distant hilltop where St. Croix would be waiting for her. For she intended again today to keep him waiting.

Last Monday she really had been at their meeting place long ahead of the appointed time and, having been curious as to how he would treat her tardiness, she had, on his appearing in the distance, hidden in a clump of bushes and watched him; his restless impatience, the eager light in his eyes when once he thought he heard her coming; and then his childish maneuvers to deceive her—his descending the hill, skirting the base and climbing up again on the other side in all that mud! How she had enjoyed herself watching him!

Evidently Marvin was not such an ass as St. Croix. "From all accounts he sounds like the Noble Army-of-Martyrs-Praise-Thee! Which is worse, I wonder—to be a bounder or to be so uncomfortably noble?" It certainly did sound uncomfortably noble to be willing to live at Absalom Puntz' when you could live in the much more comfortable home of the Creightons.

For Aunt Rosy's investigations had proven Mr. Schwenckton's surmise correct—Marvin Creighton was boarding, for the time being, at Absalom's cottage on the Schwenckton's farm, which fact added considerably to Meely's uneasy apprehensions.

As she strolled on her way to her meeting with St. Croix, in the lovely October sunlight, she wondered whether she should amuse herself with "luring" Marvin as she was "working" St. Croix (for other reasons than her amusement). Marvin might not be such easy game; they said he despised girls—

"Probably he's afraid of them! Or he doesn't know any nice ones of the Noble-Army-of-Martyrs style. Could I work the noble stunt, I wonder? Risky! Might get my two roles mixed up! Better keep off Marvin!"

It was just as she came to this conclusion that suddenly, with a jump of her heart, she saw him emerge from a lane on the road ahead of her and, turning in her direction, come straight toward her on the highway in a long swinging stride. She recognized him by that stride, for she had seen him that morning going across the Schwenkton's orchard to Absalom's cottage. That strong, free gait of his would have arrested attention anywhere. How different from St. Croix' dapple prancing.

Suddenly she realized that she dared not let him recognize her in this ridiculously festive frock she was wearing, for as he was bound to meet her soon in her school room dressed in her own character, the contrast would make him suspicious. But how to elude him? The highway offered no escape. She wore no hat that she could pull down over her face. And he was almost up with her!

In desperation, as they were about to pass, she raised both her arms to fuss at her hair and thus conceal her face.

But through the crook of her left arm she saw that she might have spared herself the trouble, for he never so much as glanced at her; apparently so engrossed in his own thoughts that he remained quite unaware of the passing of a pretty girl!

"Well!" she breathed in mingled surprise and pique, for she was used to young men's looking at her as they passed. "Never batted an eyelash at me!"

She had caught a glimpse of his face and the rest of her walk to the hilltop seemed all too short for the interesting reflections aroused thereby. For she had perceived the remarkable fact that Marvin and St. Croix Creighton looked extremely alike, yet totally unlike; alike in feature and coloring and unlike in countenance. St. Croix' smugness was here replaced by a rather wistful melancholy; St. Croix' cynicism by an expression of grave kindliness; St. Croix' scornful pride by a look of genial humor; St. Croix' keenness by a reflective, inquiring expression touched by bewilderment. Of course, all this was not revealed in a passing glimpse. But a great deal of it unfolded to her consciousness as, while she walked, she continued to gaze on the mental image she had caught, of a face so arresting as to make that of his brother, whom she was going to meet, seem by comparison insignificant.

So absorbed had she been, as she loitered along, that she forgot all about St. Croix' annoyance if he were kept waiting for her. So that, when turning a curve in the path up the hill, she suddenly saw him standing there above her, looking coldly offended at her tardiness, it brought her up with a sharp start. The expression of his face made her feel more like turning tail and going back than going on to the top.

"Just imagine," she thought as she toiled up the rest of the slope, "being married to such a disposition!—to a man who'd take it out of you so whenever things didn't suit him exactly!"

She smiled inwardly as she thought that if she were a girl whom he wanted to marry, he would surely never so reveal himself to her.

"He'd surely have the sense to hide, not flaunt, his selfishness and egotism and show me a better side of himself; for of course he must have a better side." Probably with his own class of people, his own family, he was quite different; she had surmised from things he had unconsciously betrayed that he adored his mother and would die before he would hurt her; that he greatly honored his father; and that though he almost hated his elder brother, he respected him.

"So you're actually here, are you?" he ironically greeted her as she stood before him, looking like Magdalene, the Penitent.

"Oh, but, Mr. Creighton," she pleaded, "my stepmom's so bad, she can't set and she can't lay! This here wasn't no gay-low day for me, now mind I'm tellin' you, with Susie so poorly and all! I near broke my neck gettin' here!"

"I suppose you mean gala day? Don't, my child, use words you're not sure of. Well," he added, grinning appreciatively, "if Susie can't even cackle, maybe she'll soon be croaking."

She did not laugh this time, but gazed at him blankly. "And I was up so late last night," she continued her excuses, "that I was near too tired to come this here three miles this after."

"You poor child! You mean you were sitting up with your sick stepmother?"

"No. Widower Holzapple he's settin' up with me Thursdays."

"What? Holzapple? Who's he?"

"Ach, such a old man, as old as Pop yet, with three full-growed childern. Pop's awful pleased, for Hi Holzapple he's well fixed and owns his own place clear. But, you see," said Meely in an injured tone, her eyes anxious, "he never says straight out he wants to marry me, he just insinyates that way. He'll set for an hour without passin' a remark—just set—and me tryin' to keep awake. And then all of a suddint he'll shoot off a remark—'My childern says, now Pop'll never be lonesome no more.' Or he'll hitch his chair closer to me and say, 'My childern are pleased.' Or if he sees my head noddin', I'm that sleepy, he'll wake me with the remark, 'Charlie will give us a weddin' dinner over at his place.' But, you see, Mr. Creighton," she complained, "it never leads up ' nothin'! He never gets furder'n insin-yations. He never yet held my hand oncet nor even tol' me my eyes were pretty."

"But how could you marry an old man with grown children?" asked St. Croix disgustedly, taking his usual seat on the broad, flat stone and motioning her to hers a few feet away.

"Look here, you're not seriously thinking of marrying that old man—what's his name? Holzapple? Are you?" he demanded.

"I gotta marry somebody. What difference is it?—seein' I can't marry the one I like!" she mourned.

He hastened to divert her from this dangerous snag. "Come here to me."

She obeyed him eagerly.

"See what I've brought you." He produced two packages from behind the stone.

With childish acquisitiveness and a touch of Pennsylvania Dutch acquisitiveness, she opened the box of a dozen ornate handkerchiefs (so ornate she had to check a laugh at sight of them; he had evidently judged her taste from her blue voile frock trimmed with artificial flowers; she would keep one for a souvenir and give the rest to Lizzie—how Lizzie would adore them!). But her pleasure in his other offering, a five-pound box of candied fruits, was not assumed.

(TO BE CONTINUED.)

Napoleon and Lincoln Among the Henpecked

The henpecked man can scarcely be classed as a product of modern times. Historians relate that many of the world's most famous men, including Napoleon, Lincoln and Socrates, were henpecked. One of the letters written by Napoleon to his wife, Josephine, ends with the postscript:

"A thousand kisses—as burning as yours are frosty."

Lincoln, it is said, was henpecked because he was too shy. Count Montgeles, the German biographer of Lincoln, declares that Lincoln's wife loved him superficially, her own selfish ambitions predominating, adding that she constantly pecked at him and almost drove him mad.

The duke of Marlborough, one of Winston Churchill's ancestors, and acclaimed as one of the greatest warriors of his day, was madly in love with his wife, who, however, nagged him all the time. In 1704 he wrote to his wife on the eve of a battle:

"I'm not nearly as much afraid of my 60,000 foes as I am of you when you are mad at me." Next day, with Prince Eugene of Savoy, he won a big victory over the forces of Louis XIV of France.—New York Evening World.

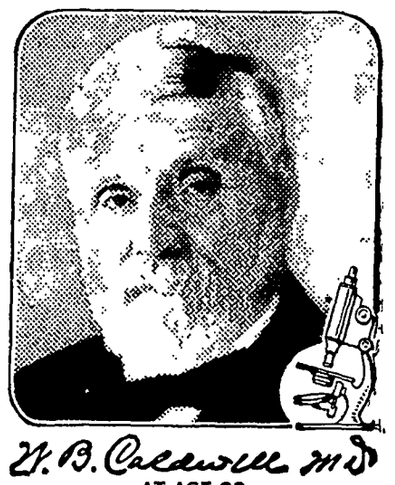
Doctor Found What is Best for Thin, Constipated People



W. B. Caldwell M.D. AT AGE 83

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated.

In the course of his 47 years' practice (he was graduated from Rush Medical College back in 1875), he found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it previously had in his private practice. Now, the third generation is using it. Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Dr. Caldwell's Syrup Pepsin, and we have gotten many hundreds of letters from grateful people telling us that it helped them when everything else failed.

Every drug store sells Dr. Caldwell's Syrup Pepsin. Keep a bottle in your home,—where many live someone is sure to need it quickly.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

Youth and Love

Keep youth and love by keeping a beautiful skin!

Nearly every woman's skin would be lovely and attractive if it weren't for one of these six easily-corrected faults:

Blemishes *Blackheads* *Sallowness*
Conspicuous nose pores *Excessive oiliness*
Dryness

DON'T let one of these conditions disfigure that skin of yours, which *can* be so smooth and lovely!

The famous Woodbury skin treatments will help you to overcome any of these troubles. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple, clear directions for each of these treatments and the treatment for normal skins are in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and soon you will begin to see a wonderful improvement in your complexion!

A 25-cent cake lasts a month or six weeks;—every day you use it, it is helping to give you "a skin you love to touch."—The Andrew Jergens Co.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is fifteen minutes late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his "class." Despite her apparent innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, is altogether unlike the girl who meets St. Croix clandestinely, and her speech has little of the Pennsylvania Dutch accent.

CHAPTER II—Continued

—5—

The noise of Mr. Schwenckton's suddenly rising and walking to the door at the head of the stairs sent Lizzie, white and quivering, back to her dishwashing.

Meely, slowly following, took a towel and began to dry the dishes already washed, both of them waiting in tense anxiety for the entrance of "the Mister."

But Mr. Schwenckton did not at once come down. Meely and Lizzie, from where they worked, could still hear, faintly, the voices in the room above.

"I have awful afraid!" Lizzie whispered, her teeth chattering as she splashed in the dishpan. "Pop he whips so hard! It's awful good of you, Meely, to help me! Mebby if I have all done nice and clean till Pop comes down, he won't whip me so hard!"

"You poor little thing!" Meely exclaimed, working as fast as Lizzie herself. "I won't let him touch you! I'll—"

"But I have afraid that would make him do it all the harder, Meely—your takin' up for me after what his Susie just tol' him!—how you tol' me it was a pity I wasn't old enough to run off! If you took up for me now, after her tellin' him that, he'd think I was gettin' spoilt by you and that he'd have to learn me!"

"But you've done nothing! That horrible woman lies! I'll tell him how she lies! And how she imposes on you two children and overworks you. He's too fond of you, Lizzie, to allow it, once he understands. He seems so especially fond of you, Lizzie. Did he ever whip you?"

"Not yet. I'm the only one he didn't whip. Each one, as soon as they got big enough, got one awful hard whippin' and then never no more. Oncet was enough. After that one they never disobeyed to Pop no more. Oncet was enough to learn 'em. Except Sammy. On account of Aunt Rosy's bein' here, Sammy's had his second one. The reason Nettie and Jakey run off was that Pop was a-goin' to whip 'em if they didn't mind to Aunt Rosy, and as big-growed as what they are yet, they didn't want to take it off of him, so they run off."

"But how have you escaped, Lizzie?"

"I don't know—I never seemed to do noth'n' to get a whippin' for. But I know Aunt Rosy'll make him whip me tonight! I have so afraid, Meely! I'd run off to Gramma's like Nettie done if it wasn't dark night and ten miles away!"

"It's a wonder your father doesn't force Nettie to come home. He did try to, didn't he?"

"Yes, but Gramma she told Pop he darsen't make Nettie come home till Aunt Rosy's away a'ready. Till Susie's well and Aunt Rosy goes, then Nettie she'll come home. But mind you what she tol' Pop yet!"

"What?"

"She tol' Pop if he tried to whip her fur runnin' off, she'd run off where he couldn't find her, like Jakey done. Pop he's awful downhearted about Jakey. He don't show it much; but he is."

It was not until after Sammy had finished his supper and the table was cleared and the last dish washed and put away in the cupboard, that Mr. Schwenckton, followed by Aunt Rosy, returned to the kitchen.

Lizzie, with a faint hope of saving herself, spoke to him ingratiatingly, though she was white with fear of him. "See, Pop, how I got all the work done—all the dishes and pans—"

"Yes, well, but," Aunt Rosy broke in, "look at your diapers still layin—" Mr. Schwenckton laid his arm around Lizzie's thin shoulders, which shrank away from his touch, for she did not know whether it meant a caress or whether he was about to lead her away for punishment.

Meely, fearing the latter (for she had been a witness to Sammy's chastisement a week ago) could not restrain herself, unwise as she felt her interference might be. "Mr. Schwenckton, this woman doesn't tell you the truth!" she said breathlessly. "Lizzie's an obedient, willing, hard-working child!—and if Aunt Rosy can't get on with her, that's her fault and not Lizzie's. And, Mr. Schwenckton, it's a crime to put a little frail girl like Lizzie to such heavy work as washing sheets and diapers! You don't know, do you, that this little girl stands at the washtub several hours every day? Her back will be strained! I ought to have told you before, but I hated to interfere. Now, Mr. Schwenckton, you've got to put a stop to it! You must, you must!—this woman's a devil—"

"Tut, tut!" Mr. Schwenckton raised his hand in protest against such unseemly language on the lips of a girl; and Aunt Rosy's look of deadly spite at Meely's accusation turned into a broad smirk of satisfaction. "Didn't I tell you Sam, how she's gettin' Lizzie spoilt fur you? Learnin' her to swear and curse (you heard her call me a devil yet!) and to disrespec' me and you—"

"Aunt Rosy," Mr. Schwenckton spoke in quietly, "I didn't speak nothin' to you upstairs, for the reason I didn't want to get my Susie stirred up. But I'm sayin' to you now that I pay you to do the work here and you don't do it. You try to put it off on my little childern. And what they don't do don't get done. You drove off my Nettie and Jakey and now you abuse Sammy and Lizzie. If it wasn't that Susie wants you here, I'd get an-

Then, Very Carefully, So as Not to Waken Her, He Carried Her Upstairs and Put Her to Bed.

other housekeeper; for no perfeck stranger could do worse'n what you do! So if there's any more trouble and if things ain't kept cleaner 'round here, I will send you packin', now mind I'm tellin' you!"

Aunt Rosy, with a look of cold, concentrated resentment at Meely, turned to go instantly upstairs to her sister—but Mr. Schwenckton checked her by the simple, but effective means of barring her way with his brawny outstretched arm. "Not up there. I won't have Susie worried no more tonight." He pointed to the door opening from the kitchen into a small bedroom. "To your own room, Aunt Rosy."

She looked at him reproachfully. "So this here's the thanks a body gets for leavin' my own home and comin' here to work myself to the bone for yous—"

"Yes, well, if you did work for us—but you don't. You make my little childern do all. Puttin' a little girl like Lizzie yet to the wash-tub! Yi, yi, yi! Don't you leave me hear of such a thing again!"

"It's her," Aunt Rosy pointed vindictively at Meely, "that makes you so contrary! Takin' your childern's part agin your wife's sister! And standin' by a stranger that's tryin' to keep your wife sick by washin' her and openin' windahs on her—"

"That'll do, that'll do, Aunt Rosy. It didn't need Meely to open my eyes—enough for a while, there, I was awful dumb about you. But I only gotta take a look at this here crusty, through-other kitchen—and your puttin' Lizzie at the wash-tub, a child like that!—well, le' me tell you that when I come in here this evenin' and seen Lizzie at that there tub standin', I felt dangerous! I didn't show it none, but for a minute there I felt dangerous! So," he concluded, "don't leave it happen again. And don't go near Susie no more tonight."

For an instant Aunt Rosy wavered, as though weighing the possibility of defying her brother-in-law. But she knew the futility of such an attempt. He'd simply pack her in his car and run her back to her own home; that's how he'd settle it.

So, with a parting glance of malice at Meely, she turned away and went to her bedroom.

Mr. Schwenckton stooped and, picking Lizzie up in his arms as though she were a baby, carried her across the room to a big rocking-chair, where, folded to his breast, he rocked her until she fell asleep.

Then, very carefully so as not to waken her, he carried her upstairs and put her to bed.

CHAPTER III

It was at the heavy noon meal of the next day that Meely for the first time heard Mr. Schwenckton break his own rule against complaining at the table. "Ach, Aunt Rosy, these here flies is somepin awful! Susie she never has no flies when she housekeeps. And this here's October yet! My first wife, neither, she didn't have no flies. Leastways not in October yet! Why do you so leave the flies in? Couldn't you manage with less flies?"

"It ain't my fault that there's flies. It's that there fat farm-hand of yourn that gives flies in fur me, still; fur when he goes out the door, he's so fat he can't get out quick and that lets the flies in."

"You're always got a good excuse, aint, Aunt Rosy?"

"But I don't see, Mister, why you ever got such a fat farm-hand that he gives flies in fur me and that he's too fat to set in your car and drive it for you." She diverted the conversation from flies.

"Yes, it is some onhandy that me and Absalom's both too big to drive our car easy. Us," smiled the farmer, who liked his little joke, "we gotta set in the back seat and have such a chiffonneer! But, Aunt Rosy, blamin' Absalom for these here flies—no. That's goin' too far. I don't give you right. You better get after these here flies—"

"Did Absalom tell you," Aunt Rosy diplomatically interrupted, "who his comp'ny is that's wisitin' at their place?"

This question proved effective in diverting attention from the flies.

"Why, no, he didn't speak nothin' to me that they had comp'ny wisitin' 'em," said Mr. Schwenckton. "What makes you conceit that?—that they have comp'ny?"

"I seen a strange shirt on their wash-line this morning that I reknized wasn't Absalom's. I didn't get time to run down and ast Missus whose the strange shirt was—what with all I had to do and Lizzie not helpin' any," she whined in a tone of deep injury. "But this after, mebby, I'll get time to run down."

"That's funny, too, again—that they got a strange shirt hangin' out and Absalom not sayin' nothin' to me about comp'ny," remarked Mr. Schwenckton reflectively.

"But couldn't the 'strange shirt' be a new one of Absalom's?" Meely asked.

"No, it ain't Absalom's size or color," Aunt Rosy pointed out.

"Do you know," said Mr. Schwenckton thoughtfully, "what I suspicion about that there strange shirt? I suspicion they're got a boarder at Absalom's, like us. I guess Marvin Creighton's boardin' with 'em since his Pop turned him out! For, you see, this here township's very handy in the center of all the schools he has to wisit. Yes, I bet you that's whose the strange shirt is! It's Marvin Creighton's! So then, Meely," he jocularly added, "you better watch your step, with the school superintendent livin' right handy here in sight of us! On our own farm yet!"

Meely stared blankly for a moment, without comment; then, pulling herself together, dropped her eyes to her plate.

As Meely remained silent, Aunt Rosy prodded her for an expression of her sensations at the great news.

"I suppose," Meely at last became articulate, "my teaching, when he beholds it, will give him a shock! It's not," she sighed, "according to rule. I don't know the rules! I don't know anything about teaching! I do have some ideas of my own, though—"

The sudden realization that she was talking to one of the school trustees brought her to with a jolt.

(TO BE CONTINUED.)

Surgeon Well Placed Among Nation's Great

Selection of Dr. Ephriam McDowell as one of Kentucky's two representatives in the Hall of Fame—the other is Henry Clay—is a reminder of the great service this surgeon rendered to humanity. He blazed the way of his profession in abdominal surgery when, in 1809, he performed a difficult operation that never had been tried before, saved the patient's life and enabled his profession to save countless other lives afterward. Doctor McDowell was literally a "doctor of the old school," the type that thought nothing of the monetary return from his practice. He was an adviser of the people, often in financial matters as well as being the custodian of their health and that of their children. He was born in Rockbridge county, Virginia, and had ample opportunity to study the science in which he early decided to spend his life. After obtaining what medical education was available in America, he attended the University of Edinburgh and on his return from Europe located in Danville, Ky., in 1795 to practice. It was there that he performed the operation that made him famous.—Kansas City Star.

Never Alone

The man who lives under an habitual sense of the divine presence keeps up a perpetual cheerfulness of temper, enjoys every moment the satisfaction of thinking himself in company with his dearest and best of friends. The time never lies heavy upon him: it is impossible for him to be alone.—Joseph Addison.

Disinfection Is Best for Scab

Kills Organisms on Tuber and Prevents Introduction Into Soil.

The importance of seed disinfection in the growing of a clean crop of potatoes is much greater than the average grower realizes. Potato specialists at the college of agriculture in New Brunswich point out that in tests conducted in 1920 disinfected seed showed an increase of 33.9 bushels per acre over untreated seed. In addition to the increase in yield there was a considerable reduction in the number of scabby potatoes.

Kills Organisms.

Not only will disinfection kill organisms on the tuber, but it prevents their introduction into the soil as well. This is especially true of scab organisms. Unquestionably, if seed treatment had been more generally adopted in the past, more growers would not now be growing scabby potatoes.

There are two chemicals commonly recommended for seed treatment, formaldehyde and corrosive sublimate. Formaldehyde does not give as efficient control of scab, so the use of corrosive sublimate is advised. This material is a poison and must be kept away from animals; furthermore, it corrodes metal and must be made up and used in wooden containers.

Mix Corrosive Sublimate.

Mix corrosive sublimate at the rate of 4 ounces to 30 gallons of water. The potatoes should be soaked in this solution for at least one-half hour, but if heavily infected with scab or rhizoctonia, continue the treatment one hour. As soon as potatoes are treated they should be removed from the solution and dried. Corrosive sublimate is removed from the solution by the potatoes, so measures must be adopted to keep it up to original strength. This may be done by adding one-half ounce of dissolved corrosive sublimate after treating every four bushels. Seed can be treated for from four to five cents a bushel.

Swine Flu Exceedingly Expensive to Breeders

Since the introduction of preventive measures for hog cholera, greater loss is sustained by hog producers from flu than from cholera. Flu undoubtedly causes greater financial loss to the producer of hogs than any other single disease. While many hogs actually die from flu the main damage occasioned by this disease is the result of loss in condition of the herd. When a herd is infected with the flu, even though recovery is secured without loss from death, there is a tremendous waste of feed, for the porkers not only fail to gain in weight while affected with the disease, but generally they also lose weight. When brood sows become affected with the flu, the problem is still more serious because it very often causes abortion and if not, many of the pigs will be born dead, so that the average number of pigs raised per sow, even though no sows are lost, may be reduced by 100 per cent, which makes the pigs very expensive. The thing to do is to institute preventive measures against this disease by supplying good, well ventilated sleeping quarters, kept well bedded.

Take Vigorous Measures Against Pest of Rodents

With rats and mice in evidence in large numbers, farmers will do well to begin vigorous control measures against these filthy, destructive pests.

Powdered barium carbonate, mixed with various types of food on a basis of one part of the poison to four parts of the selected food, has proved very effective.

In the control of large rats, which are especially destructive to young poultry, a rabbit carcass with the poison worked into knife cuts, has given unusually good results. The poison should be worked into the cuts in the proportion of one part to four of the flesh, and the carcass placed where rats will have ready access, but poultry and other domestic animals will not be endangered. Securing the carcass firmly with wire will prevent large rats from dragging it away.

Short Farm Notes

Scrub seed should not be allowed to reproduce themselves.

* * *

Look up last year's garden plan and study it for improvements.

* * *

Plan your plantings so all your work won't come at the same time.

* * *

Sweet clover seed should not be sown too late in the spring or it may not give a good stand.

* * *

Look over the lists of new garden tools. They turn out new and more efficient tools every year.

* * *

Time spent selecting and testing seed corn will pay the farmer many dollars per hour for his labor

* * *

Early potatoes may be secured by early planting of early varieties in deep, rich, warm soil followed by thorough cultivation or mulching with straw.

LEE MEADOWS

Famous Pitcher of the Pittsburgh Pirates, *writes:*

"It requires splendid physical condition and steady nerves to take your regular turn on the mound season after season and in looking for my cigarette I was anxious to find one which could be smoked without taxing my wind or irritating my throat. I decided upon Luckies and I can safely say that I am never troubled with a cough and my wind is in splendid shape."

Lee Meadows

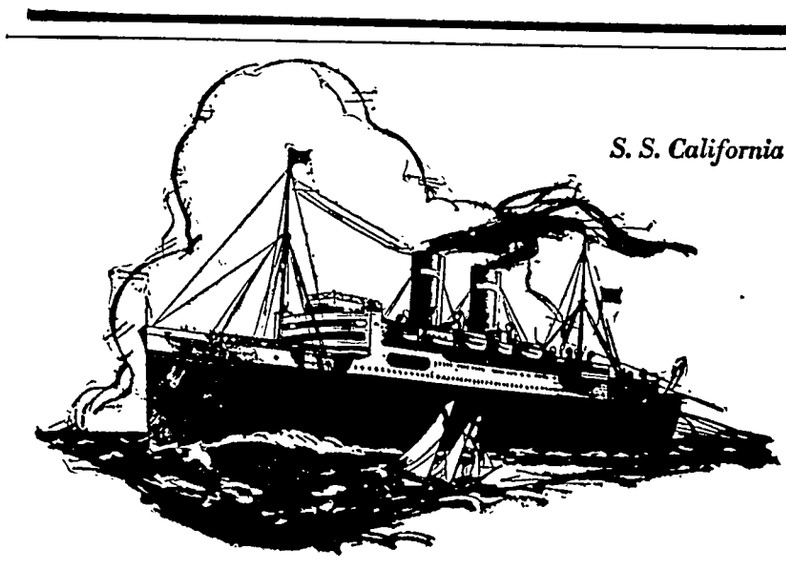
The Cream of the Tobacco Crop

"Here in the Southland we know good Tobacco. It is born in us and it is the livelihood of most of us. 'The Cream of the Crop' is bought for LUCKY STRIKE. I know for it has been my duty to purchase it on the markets for years for this brand."

A. P. Glass
Buyer of Tobacco
at Covington, Ky.

"It's toasted"

No Throat Irritation—No Cough.



S. S. California

Largest and Finest American Built Steamship Serves

MONARCH COFFEE

This Panama Pacific Liner is the world's largest electrically propelled commercial steamship. Her turbo-electrical driving machinery is the same as in the latest U. S. battleships. Everything about the S. S. California is the finest that can be secured. In keeping with this, it was but natural that her owners should select the world's best coffee—MONARCH. When the California sails from New York for San Diego, Los Angeles and San Francisco, her kitchens will be stocked with MONARCH Coffee fresh from the *Monarch* roasters in New York; and a new stock will be supplied from the *Monarch* roasting plant in Los Angeles for the return trip.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton, but he awaits her eagerly. She is so demurely beautiful, he thinks, but so out of his "class." Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Due to family differences, Marvin Creighton boards in town, near Meely. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl.

CHAPTER III—Continued

—6—

"But," said Mr. Schwenckton, puzzled, "you must know how to schoolteach when you're a grad-yate of Kutztown Normal yet! Well, I guess nyhow! Us we don't elec' no teacher so our William Penn that ain't got her Normal school diarploma."

"Oh, yes—well, but—yes, of course," Meely concluded in some confusion. She glanced surreptitiously at Aunt Rosy—and found, to her discomfort, that she was being regarded with a look of cunning suspicion.

"Say!" suddenly spoke up Rosy. "Have you got such a Kutztown Normal school diarploma?"

"Why—why, of course—why, of course I have."

"Mister," she demanded of her brother-in-law, "did you ever see her diarploma?"

"Ach, Rosy, what's over you? To be sure, she had to send her diarploma along with her application and her photygraft when she wrote for the job here at our William Penn. Your photygraft," he said to Meely, "don't favor you much. You're a lot prettier than that there photygraft."

"It's funny," answered Meely, "how my photographs never look like—never do me justice," she amended her remark.

Again she found Aunt Rosy's little cunning eyes boring like gimlets into hers.

* * * * * * *

Meely Schwenckton seemed to herself, these days, to be ever walking in fear. Yet never in all her young life had she found existence so exhilarating, so tense with interesting suspense. It was not really fear, she decided, only a thrilling apprehension that hung over her every minute of the day and night; an apprehension which even if realized could not really bring harm to her, only awkward embarrassment.

"But somebody else would feel more awkward and embarrassed!" she smiled to herself.

However, this apprehension, following her ceaselessly, was a bit nerve-racking; and the startling knowledge just acquired that Marvin Creighton (her "Steady Date's" brother!) stood over her as the school superintendent and was therefore bound to make her acquaintance very soon, greatly augmented her sense of the danger of her situation—a situation brought about less by her own plotting than by a succession of fortuitous and unforeseen circumstances. Never would she have had either the audacity or the ingenuity to have arranged such an extraordinary chain of circumstances.

"Up to now, I've always held fiction to be stranger than truth—but never again! If I were a novelist I'd never have the cheek to make up such a lurid and improbable yarn as I'm living!" she amazedly told herself. "If I offered it to the movies I'm sure they'd consider it too true to life to be convincing."

If either of the Creighton brothers should ever see her in the other's company! Or if St. Croix discovered she was the district teacher, instead of the ignorant cow she feigned to be! Or if any of the Schwenckton family discovered her meeting with St. Croix or any of the other things about her which they were congenitally incapable of suspecting!

It was just three days after her last rendezvous with St. Croix that one afternoon at a quarter past four, school having been dismissed and her plain tailored school dress having been changed right here in her empty schoolroom for the fancy, cheap finery in which she always disguised herself to meet her "Date," that she came out of the schoolhouse and after locking the door and hiding the key under a stone, glanced cautiously up and down the road before starting for the distant hilltop where St. Croix would be waiting for her. For she intended again today to keep him waiting.

Last Monday she really had been at their meeting place long ahead of the appointed time and, having been curious as to how he would treat her tardiness, she had, on his appearing in the distance, hidden in a clump of bushes and watched him; his restless impatience, the eager light in his eyes when once he thought he heard her coming; and then his childish maneuvers to deceive her—his descending the hill, skirting the base and climbing up again on the other side in all that mud! How she had enjoyed herself watching him!

Evidently Marvin was not such an ass as St. Croix. "From all accounts he sounds like the Noble Army-of-Martyrs-Praise-Thee! Which is worse, I wonder—to be a bounder or to be so uncomfortably noble?" It certainly did sound uncomfortably noble to be willing to live at Absalom Puntz' when you could live in the much more comfortable home of the Creightons.

For Aunt Rosy's investigations had proven Mr. Schwenckton's surmise correct—Marvin Creighton was boarding, for the time being, at Absalom's cottage on the Schwenckton's farm, which fact added considerably to Meely's uneasy apprehensions.

As she strolled on her way to her meeting with St. Croix, in the lovely October sunlight, she wondered whether she should amuse herself with "luring" Marvin as she was "working" St. Croix (for other reasons than her amusement). Marvin might not be such easy game; they said he despised girls—

"Probably he's afraid of them! Or he doesn't know any nice ones of the Noble-Army-of-Martyrs style. Could I work the noble stunt, I wonder? Risky! Might get my two roles mixed up! Better keep off Marvin!"

It was just as she came to this conclusion that suddenly, with a jump of her heart, she saw him emerge from a lane on the road ahead of her and, turning in her direction, come straight toward her on the highway in a long swinging stride. She recognized him by that stride, for she had seen him that morning going across the Schwenkton's orchard to Absalom's cottage. That strong, free gait of his would have arrested attention anywhere. How different from St. Croix' dapple prancing.

Suddenly she realized that she dared not let him recognize her in this ridiculously festive frock she was wearing, for as he was bound to meet her soon in her school room dressed in her own character, the contrast would make him suspicious. But how to elude him? The highway offered no escape. She wore no hat that she could pull down over her face. And he was almost up with her!

In desperation, as they were about to pass, she raised both her arms to fuss at her hair and thus conceal her face.

But through the crook of her left arm she saw that she might have spared herself the trouble, for he never so much as glanced at her; apparently so engrossed in his own thoughts that he remained quite unaware of the passing of a pretty girl!

"Well!" she breathed in mingled surprise and pique, for she was used to young men's looking at her as they passed. "Never batted an eyelash at me!"

She had caught a glimpse of his face and the rest of her walk to the hilltop seemed all too short for the interesting reflections aroused thereby. For she had perceived the remarkable fact that Marvin and St. Croix Creighton looked extremely alike, yet totally unlike; alike in feature and coloring and unlike in countenance. St. Croix' smugness was here replaced by a rather wistful melancholy; St. Croix' cynicism by an expression of grave kindliness; St. Croix' scornful pride by a look of genial humor; St. Croix' keenness by a reflective, inquiring expression touched by bewilderment. Of course, all this was not revealed in a passing glimpse. But a great deal of it unfolded to her consciousness as, while she walked, she continued to gaze on the mental image she had caught, of a face so arresting as to make that of his brother, whom she was going to meet, seem by comparison insignificant.

So absorbed had she been, as she loitered along, that she forgot all about St. Croix' annoyance if he were kept waiting for her. So that, when turning a curve in the path up the hill, she suddenly saw him standing there above her, looking coldly offended at her tardiness, it brought her up with a sharp start. The expression of his face made her feel more like turning tail and going back than going on to the top.

"Just imagine," she thought as she toiled up the rest of the slope, "being married to such a disposition!—to a man who'd take it out of you so whenever things didn't suit him exactly!"

She smiled inwardly as she thought that if she were a girl whom he wanted to marry, he would surely never so reveal himself to her.

"He'd surely have the sense to hide, not flaunt, his selfishness and egotism and show me a better side of himself; for of course he must have a better side." Probably with his own class of people, his own family, he was quite different; she had surmised from things he had unconsciously betrayed that he adored his mother and would die before he would hurt her; that he greatly honored his father; and that though he almost hated his elder brother, he respected him.

"So you're actually here, are you?" he ironically greeted her as she stood before him, looking like Magdalene, the Penitent.

"Oh, but, Mr. Creighton," she pleaded, "my stepmom's so bad, she can't set and she can't lay! This here wasn't no gay-low day for me, now mind I'm tellin' you, with Susie so poorly and all! I near broke my neck gettin' here!"

"I suppose you mean gala day? Don't, my child, use words you're not sure of. Well," he added, grinning appreciatively, "if Susie can't even cackle, maybe she'll soon be croaking."

She did not laugh this time, but gazed at him blankly. "And I was up so late last night," she continued her excuses, "that I was near too tired to come this here three miles this atter."

"You poor child! You mean you were sitting up with your sick stepmother?"

"No. Widower Holzapple he's settin' up with me Thursdays."

"What? Holzapple? Who's he?"

"Ach, such a old man, as old as Pop yet, with three full-growed childern. Pop's awful pleased, for Hi Holzapple he's well fixed and owns his own place clear. But, you see," said Meely in an injured tone, her eyes anxious, "he never says straight out he wants to marry me, he just insinyates that way. He'll set for an hour without passin' a remark—just set—and me tryin' to keep awake. And then all of a suddint he'll shoot off a remark—'My childern says, now Pop'll never be lonesome no more.' Or he'll hitch his chair closer to me and say, 'My childern are pleased.' Or if he sees my head noddin', I'm that sleepy, he'll wake me with the remark, 'Charlie will give us a weddin' dinner over at his place.' But, you see, Mr. Creighton," she complained, "it never leads up ' nothin'! He never gets furder'n insin-yations. He never yet held my hand oncet nor even tol' me my eyes were pretty."

"But how could you marry an old man with grown children?" asked St. Croix disgustedly, taking his usual seat on the broad, flat stone and motioning her to hers a few feet away.

"Look here, you're not seriously thinking of marrying that old man—what's his name? Holzapple? Are you?" he demanded.

"I gotta marry somebody. What difference is it?—seein' I can't marry the one I like!" she mourned.

He hastened to divert her from this dangerous snag. "Come here to me."

She obeyed him eagerly.

"See what I've brought you." He produced two packages from behind the stone.

With childish acquisitiveness and a touch of Pennsylvania Dutch acquisitiveness, she opened the box of a dozen ornate handkerchiefs (so ornate she had to check a laugh at sight of them; he had evidently judged her taste from her blue voile frock trimmed with artificial flowers; she would keep one for a souvenir and give the rest to Lizzie—how Lizzie would adore them!). But her pleasure in his other offering, a five-pound box of candied fruits, was not assumed.

(TO BE CONTINUED.)

Napoleon and Lincoln Among the Henpecked

The henpecked man can scarcely be classed as a product of modern times. Historians relate that many of the world's most famous men, including Napoleon, Lincoln and Socrates, were henpecked. One of the letters written by Napoleon to his wife, Josephine, ends with the postscript:

"A thousand kisses—as burning as yours are frosty."

Lincoln, it is said, was henpecked because he was too shy. Count Montgeles, the German biographer of Lincoln, declares that Lincoln's wife loved him superficially, her own selfish ambitions predominating, adding that she constantly pecked at him and almost drove him mad.

The duke of Marlborough, one of Winston Churchill's ancestors, and acclaimed as one of the greatest warriors of his day, was madly in love with his wife, who, however, nagged him all the time. In 1704 he wrote to his wife on the eve of a battle:

"I'm not nearly as much afraid of my 60,000 foes as I am of you when you are mad at me." Next day, with Prince Eugene of Savoy, he won a big victory over the forces of Louis XIV of France.—New York Evening World.

The Dashed-Off Effect

Nothing that sounds dashed off is, if it is any good.—Ohio State Journal

Want War on Rattlesnakes

A rattlesnake with 29 rattles and a button, one of the largest found in west Texas in recent years, was captured by Howard Sellan of the Doran ranch, on the San Saba river recently. Rattlesnakes annually take a heavy toll of live stock, and residents of west Texas are asking that a bounty be placed on them.

If You Need a Tonic, Get the Best!

Sedalia, Mo.—"I can recommend Dr. Pierce's Favorite Prescription all right, although I took only a small amount of it, what I did take relieved me. I could hardly walk and just hurt all over. The doctors I had could do nothing for me it seemed. But as soon as I learned about the 'Favorite Prescription' I began taking it and I was soon all right. It certainly is a great medicine for women."—Mrs. Amy L. Paxton, 1003 E. Third St. In Liquid or Tablets, at all Drug or General Stores.

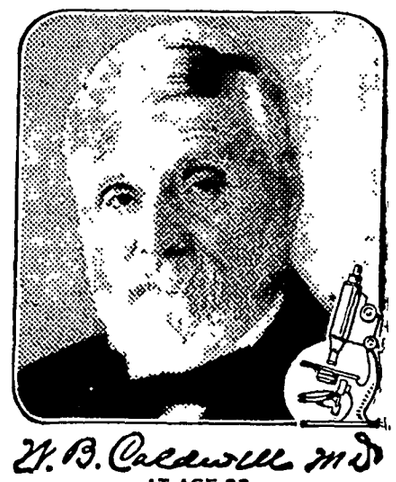
Doctor Found What is Best for Thin, Constipated People



W. B. Caldwell M.D. AT AGE 83

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated.

In the course of his 47 years' practice (he was graduated from Rush Medical College back in 1875), he found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it previously had in his private practice. Now, the third generation is using it. Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Dr. Caldwell's Syrup Pepsin, and we have gotten many hundreds of letters from grateful people telling us that it helped them when everything else failed.

Every drug store sells Dr. Caldwell's Syrup Pepsin. Keep a bottle in your home,—where many live someone is sure to need it quickly.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

Youth and Love

Keep youth and love by keeping a beautiful skin!

Nearly every woman's skin would be lovely and attractive if it weren't for one of these six easily-corrected faults:

Blemishes *Blackheads* *Sallowness*
Conspicuous nose pores *Excessive oiliness*
Dryness

DON'T let one of these conditions disfigure that skin of yours, which *can* be so smooth and lovely!

The famous Woodbury skin treatments will help you to overcome any of these troubles. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple, clear directions for each of these treatments and the treatment for normal skins are in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and soon you will begin to see a wonderful improvement in your complexion!

A 25-cent cake lasts a month or six weeks;—every day you use it, it is helping to give you "a skin you love to touch."—The Andrew Jergens Co.

A. Goll.

CHICKEN "DOPE" PEDDLARS CRITICIZED

Shady methods of salesmanship which are employed by many men who are selling poultry remedics over the state are criticized by farmers in various parts of the state, in complaints registered with the Iowa Department of Agriculture.

Investigations of the methods employed by these men show that they claim that they are registered by the State of Iowa. When they secure the confidence of he farmer, they go and look at the chickens, find many that are supposed to be sick, and then offer to cull the flock for a certain fee. After they supposedly cull the flock, they offer to take orders for certain remedies at high prices.

"Men of this kind are not registered by the state of Iowa," states M. G. Thornburg, Secretary of Agriculture. "Remedies offered for sale must be registered, but such registration does not guarantee their effectiveness We would suggest that reliable agents or home town stores do not need to employ humbug methods to do an honest business. It is usually best to buy supplies where you have a chance to come back at the seller, if the products are not satisfactory."

Weighing The Earth

By means of some compicated instruments in Washington the earth can be weighed. The long accepted figure for the weight of the earth has been 6,660,000,000,000,000,000,000 tons. Weighed more recently it is discovered that the earth is lighter than had been supposed. It tips the scales at only 6,653,000,000,000,000,000,000 tons Does that mean anything to you? At least you can rest your mind on it when you have been worrying about our income or other small figures. It is also interesting to sit down and reduce the above tons to pounds, or even ounces, if you enjoy juggling with figures.

SUGAR BEETS

Produce SIX TIMES the Gross Income produced by Iowa's principle farm crops. Besides producing the income, they improve the quality of the soil,

BECAUSE---

They induce better farming
They are a deep rooted crop
They put plant food material
back into the soil from their tops and decaying rootlets
Their by-products induce feeding
of livestock
They provibe an additional crop
in rotation, so needful for Iowa farms

Sugar, the Principle Product of Sugar Beets
is a manufactured article for human food.
In the manufacture, much coal, coke, limerock and other materials are used.
The source of these materials covers a large scope of country.
A large payroll is maintained at the factory.
A community is measurered by its payroll.

Rob Roths has been assisting Han Willer to get ready for his sale that was held Tuesday.

Flapper's Clock

"We have all heard of the old-fashioned woman who sang one or more verses of 'Nearer, My God to Thee,' to determine the exact moment when the boiled eggs were properly done," writes Pansy of Urbana, "but it remained for a modern flapper to give us a brand-new and practical idea on the subject.

"Recently married, she was being 'razzed' about her inability to cook, and her brother remarked: 'Why, she can't even boil eggs!'

"'I can, too,' she said. 'I smoke one cigarette for soft, two for medium and three for hard-boiled!'"—Cleveland Plain Dealer

Surely in Hard Luck

The prize example of hard luck we think is illustrated in the following episode: August Winkler was burned out in Wisconsin recently and started south to regain his fortune On his way there his wife died. He started in business, and the Mississippi flood wiped him out He went to Kansas, arriving at Rossville with his flivver and $165 in cash. He put the cash in the Rossville bank, and the bank failed the following day.—The Outlook.

Thrives on Hard Work

"Hard work never killed anybody," says Mrs. Charles Gould, eighty-three, of Hillsborough, N. H., and points to herself and the seven cords of rock maple and birch wood that she split and piled in the shed last summer to prove her statement. Furthermore, Mrs. Gould expects to reach the century mark by dint of hard work alone and challenges any woman of her age to duplicate the splitting and piling of seven cords of wood.

Nothing More

Perksby—Well, they say money talks, you know.

Ziggsby—Yep, it certainly does—it always says good-by to me.—New Bedford Standard.

POLITICAL ANNOUNCEMENTS

I hereby announce myself a candidate for the nomination to the office of County Auditor of Hancock county, subject to the decision of the Republican voters at the June, 1928 Primary Election. H. C. Meyer.

I hereby announce myself a candidate for hte nomination to the office of County Auditor of Hancock County, subject to the decision of the Republican voters at the June 1928 Primaries. Chris Jacobs.

Clerk Of The District Court

NEWS REVIEW OF CURRENT EVENTS

Schemes Against U. S. Leadership Are Likely to Fail in Havana.

By EDWARD W. PICKARD

LATIN-AMERICAN statesmen who planned to undermine the leadership of the United States on the Western hemisphere during the Pan-American conference in Havana are not likely to accomplish much in that way, and may even abandon the attempt for the present. Their cause was greatly weakened by President Coolidge's visit to Hanava and his diplomatic though firm address, and by the strength of the United States delegation headed by Charles Evans Hughes. During their two days in Cuba Mr. and Mrs. Coolidge quite won the hearts of the people of that republic and the President's speech at the formal opening of the conference was admittedly effective in bringing closer together the United States and the smaller republics of the New world. The address was broadcast throughout this country by radio.

Mr. Hughes and the other American delegates were discreet and tactful when the conference was organized for work on Wednesday, but it was evident they were watching every move and that they were ready to head off any action condemnatory of the policies of the United States and to justify our government's course in Nicaragua and elsewhere if the necessity arose. Mr. Hughes made one move which seemed significant. At his suggestion Dr. Antonio de Bustamente of Cuba, president of the conference, was made an ex-officio member of all committees. He is in full sympathy with American policies in the Caribbean and agrees with Mr. Hughes on questions of international law that will come under discussion.

In Italy the Coolidge address and the firm attitude of the American delegates aroused much bitter comment in the newspapers, for Mussolini has been planning a union of all Latin countries to be headed by Italy, and the failure of this scheme is seen if the United States maintains and extends its hegemony on the Western continent.

President Coolidge and his party returned to Washington Thursday after a swift rail trip from Key West that was broken only by a stop of an hour in Jacksonville, Fla.

DOWN in Nicaragua the marines under direct command of General Lejeune seemed to be making marked progress in the dispersal of the Sandino band of rebels. On Wednesday there were reports in Managua, unconfirmed but credible, that Sandino himself had been killed or seriously wounded during the bombing operations of the marine aviators under Maj. R. F. Rowell, who attacked El Chipote, the mountain stronghold of the rebels. Aviators who flew over San Rafael Tuesday saw what was evidently a large funeral procession. Next day the marine air patrols reported that El Chipote had been abandoned.

TWO days of speechmaking was needed before the senate got around to declaring vacant the seat of Senator-elect Frank L. Smith of Illinois. The outcome was never in doubt, but various senators wanted to be heard, some in favor of the Reed committee's resolution and others in opposition. The language of the resolution as reported was changed so that the measure read that Smith's credentials were tainted with fraud and corruption and that as a consequence he was not entitled to membership in the senate and that a vacancy exists in the Illinois representation. The statement eliminated by the alteration was that Smith was not entitled to the oath of office because of the nature of the contributions to his campaign fund.

SENATOR HEFLIN of Alabama is convinced that the Roman Catholic church is determined to destroy him because of his attacks on the Knights of Columbus, and on Wednesday he broke out in one of his customary tirades against the Catholics. He attributed the publication of the discredited Hearst Mexican documents to a Catholic conspiracy against him, bringing in the name of Mrs. Hearst as a member of that church. When Senator Robinson of Arkansas, a member of the committee that investigated the documents, denied that the Catholic church had anything to do with them, Heflin in a rage demanded that Robinson be deposed as minority leader. The debate between these two Democrats then became extremely bitter and personal and was listened to by the Republicans with deep interest. Heflin took occasion to warn his fellow Democrats against nominating Gov. Al Smith for the Presidency, asserting they should "hang their heads in shame" at the Smith candidacy. "If the Democrats should nominate Smith for the Presidency," he shouted, "the Republicans can defeat him with anybody by from 15,000,000 to 20,000,000 votes. The American people, knowing what the Roman Catholic political machine is doing, are not going to put him in the White House just now. Any leader in the South who supports Al Smith will never come back to this capitol."

Robinson said he had heard Heflin's anti-Catholic speech a dozen times during the last year and was sick and tired of it. He went on: "It is illustrative how a good man can go wrong and how far wrong he can go and what a fool he can make of himself when he does go wrong. The senator from Alabama takes himself so seriously that he thinks he can dictate to the whole Democratic party."

The Democratic senators in caucus later gave Robinson a vote of confidence and support.

APPEARING before the house naval committee, Admiral Hughes, chief of naval operations, said that if the United States is to have a really adequate fleet it will have to spend a billion dollars, rather than the $740,000,000 called for by the present construction program. He held it would be necessary to add at least 25 per cent more ships to the present program, which calls for the completion within the next eight years of 25 cruisers, 35 submarines, 9 destroyer leaders and 5 aircraft carriers.

Our battleships, the admiral asserted, are "woefully behind" those of Great Britain in gun power, range, speed and effectiveness, and in reply to questions he disputed the theory of Admiral Sims that the battleship would be displaced by the aircraft carrier as the backbone of the fleet in the next war and that aircraft and submarines would be dominant factors.

Word comes from London that the British government has further reduced its naval building program, abandoning another cruiser, which makes a total of three dropped since the Geneva naval conference. The saving will be about $27,500,000.

GREAT BRITAIN is extremely cautious in the matter of security agreements. In a note to the subcommittee on security of the preparatory committee on disarmament which meets in Geneva in February, the government emphatically reasserts its belief in localized agreements as opposed to generalized schemes.

The note points out that the strength of an arbitration treaty depends entirely on the willingness of the people to support decisions unfavorable to themselves, which creates limits "beyond which a state cannot go in accepting binding obligations to arbitrate."

It observes that the time is not ripe for any general system of sanctions for the enforcement of arbitration treaties, and doubts that any nation which is strong enough to use force effectively would at present undertake any such general obligations to use force against a party to a dispute which refused to submit to arbitration.

FOR several weeks a Japanese delegation headed by Viscount Goto has been in Moscow trying to negotiate with the soviet government for large colonization concessions in the Amur valley of Siberia. Also, Baron Tanaka, the Japanese premier, has been moving for a Russo-Japanese alliance. Both these plans may fall through, the former because the Russian government is determined the Japanese shall not get a strong foothold in Siberia, and the latter because of the marked disapproval of Great Britain. As a sign of this disapproval the British government suddenly decided to send five 10,000-ton cruisers to China.

Conditions throughout China are becoming more chaotic daily, if that is possible, and brigandage and piracy are increasing. The Peking and Hunan factions are fighting near Tungling lake, three army corps being involved, and the forces of Gen. Feng Yu-hsiang and Marshal Chang Tso-lin are at it again in southern Chihli and northern Honan.

TROTZKY, former Russian war commissar, has been exiled to a village on the border between Turkestan and China, and his fellow leaders of the opposition have been sent to remote posts to repent. In published letters Trotzky explains that his quarrel with Dictator Stalin is due to Stalin's determination that the Communist party shall dictate the policies of communism and the communist international, while the former war commissar says the international, the more important body of the two, should control the Russian Communist party.

The split in the Russian Communist party has had an echo in France, where many communists who adhered to Trotzky have been removed from the party pay roll and forbidden to enter the meetings.

THAT lovely peace dove that hovered over Pilsudski and Waldemaras at Geneva hasn't found a place to light yet. Poland opened negotiations for a settlement but Lithuania in her reply outlined conditions so unacceptable to the Poles that a stern protest was sent from Warsaw to Kovno. The Lithuanians are further annoying the Poles by tearing up the Lithuanian portion of the railroad which formerly connected Kovno with Vilna.

TWELVE radical Republicans joined with the Democrats in the senate early in the week and brought about the adoption of a resolution recommending a downward revision of the tariff on industrial products. The vote was 54 to 34. The resolution read:

"Resolved, that many of the rates in the existing tariff schedules are excessive, that the senate favors immediate revision downward of such excessive rates, establishing a closer parity between agriculture and industry, believing it will result to the general benefit of all;

"Resolved, further, that such tariff revision should be considered and enacted during the present session of congress;

"Resolved, further, that a copy of this resolution be transmitted to the house of representatives."

That was fine as far as it went, but next day the house, by a vote of 183 to 164 tabled the resolution, after an attempt to have it referred to the ways and means committee. As in the senate, the radical Republicans of the house voted with the Democrats, against shelving the measure.

COMPLYING with the wishes of the administration, the senate finance committee postponed consideration of the tax bill passed by the house until March 15, when, according to Senator Smoot, it will be possible to determine more accurately the amount of revenues and expenditures during the coming year. Democratic members vainly insisted on immediate action.

MERELY to clear up the question of Herbert Hoover's regularity as a Republican, former Senator Calder, president of the National Republican club, issued a statement that Mr. Hoover has been a member of that club since 1909 and that a condition of membership is membership in the Republican party. Members of the treasury staff in Washington already are actively at work in the interests of the Hoover boom, though Secretary Mellon remains noncommittal on his own preference. In the senate Senator Shortridge predicted that Hoover would be the next President, and being questioned by Democrats, he added: "He will continue the policies of this administration."

POULTRY

EARLY HATCHING BEST FOR EGGS

For several years the department of poultry husbandry at the New Jersey agricultural experiment station has been hatching part of its Leghorn chicks about mid-February. This was done, first, as an experiment and in later years because it paid to do so.

It was found that February hatching of Leghorns for the following early fall egg production lengthens the season of incubation by beginning it earlier, thus making better use of incubation and brooder equipment. It also makes use of more eggs for incubation purposes, which is conceded to be better practice for poultrymen.

The early hatched Leghorn cockerels, most of which are surplus, are ready for sale as broilers in early April when prices are at their best. These early broilers help to offset lower prices which usually must be accepted for the same type of broilers that are hatched in April and are not ready for the market until June or thereabouts. In view of these advantages it is believed that poultrymen should make money on their February-hatched surplus of Leghorn cockerels.

The February-hatched pullets grow almost to laying maturity before hot weather sets in, or are at least beyond the stage in which hot weather materially affects them. They are usually ready to lay in August and lay well during that month, September, and part of October anyway. Eggs are worth money in that summer period, and as the older hens are falling off in egg production at that time the pullet production helps materially to balance the income on the poultry plant.

These early pullets are likely to molt in late fall, and the rest they get during that process will render them useful as breeders in the following spring, their first spring as adults. The department suggests that about one-quarter of the Leghorn flocks might be February hatched. The rest can come along in mid-April.

Changing Feed to Hens Lowers Egg Production

Many poultry keepers become dissatisfied with the way their hens are laying and immediately, without trying to figure out the cause, decide to change to a different kind of feed. They may be getting a fair egg production but think they can get a much better one, and therefore they change the feed.

There is only one time when it is safe to make a change in feed, that is, a radical one and this is in the spring when all chickens, if they amount to anything at all, will lay eggs. A change at this time will not have the serious effects that a change during the fall, winter or summer will have.

In the first place, choose a good feed, one that has been tried and has given good results. Then stick to this feed. If something goes wrong, look to the way in which this feed is being fed. Don't make any radical change, however, as birds are very susceptible to any such changes at this stage of their lives. Such changes are apt to cause a molt with a consequent drop in egg production.

Providing Winter Dust Bath Quite Important

During one of the periods of dry, clear weather, a supply of dry, fine-grained soil should be stored in a place where it will neither get wet nor freeze severely during the colder months. Nothing has been found that quite takes the place of a dust bath for hens. Of course, we can rid them of lice by treatment with sodium flouride, blue ointment or a commercial louse powder, but these do not replace the enjoyment that a hen gets in dusting herself in a box of dust or mixture of dust and ashes. And the chance to dust herself is particularly enjoyed during the winter months. Thoroughly dry, well-pulverized dirt stored in a dry building in boxes or barrels or even bags will add greatly to the comfort and contentment of the flock throughout the winter.

Cut Down Profits

Overcrowding and lack of sanitation in a poultry house will cut down the profits in a short time regardless of the quality of the stock. No matter how good the quality of your pullets, it will pay better to sell part of them rather than overcrowd the houses in an attempt to keep them all over winter. Overcrowding pullets usually results in slow growth and lack of weight in the flock and this means a high mortality rate and low egg production.

Useful Cake Pans

For holding gravel, oyster shells, starch and charcoal, use tube cake pans such as are sold at variety stores for baking angel food cakes. Drive a sharpened two-foot stake through the center of the pan and into the ground. Then fill the pan and the fowls cannot tip it over and but little is wasted. The pan can be slipped off the stake for cleaning and refilling. If you are giving a tonic there is less waste if it is given in this way than by mixing with the grain.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

A too-polished apple loses its pomological savor.

Love of money also makes many of the big enterprises go.

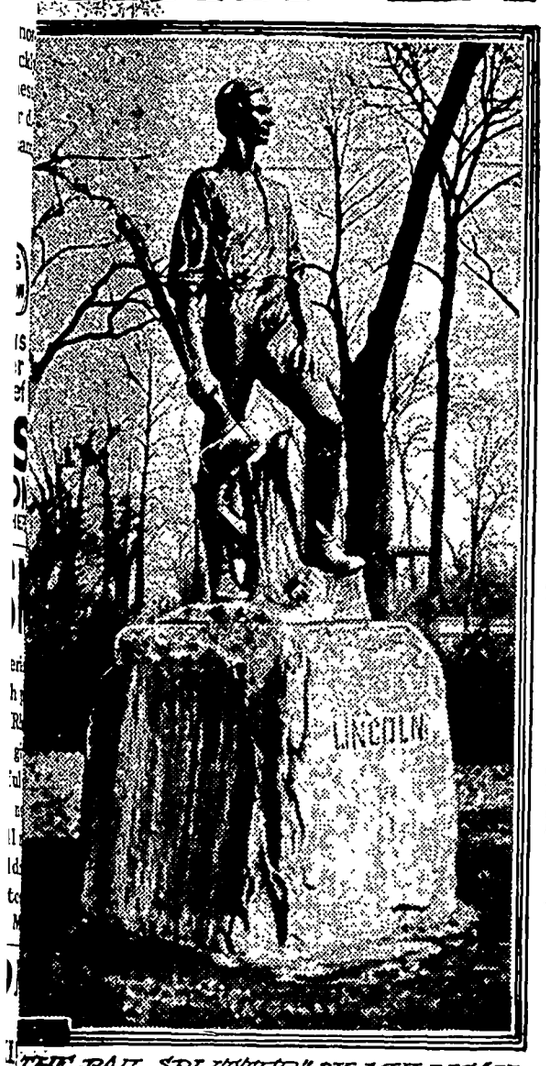
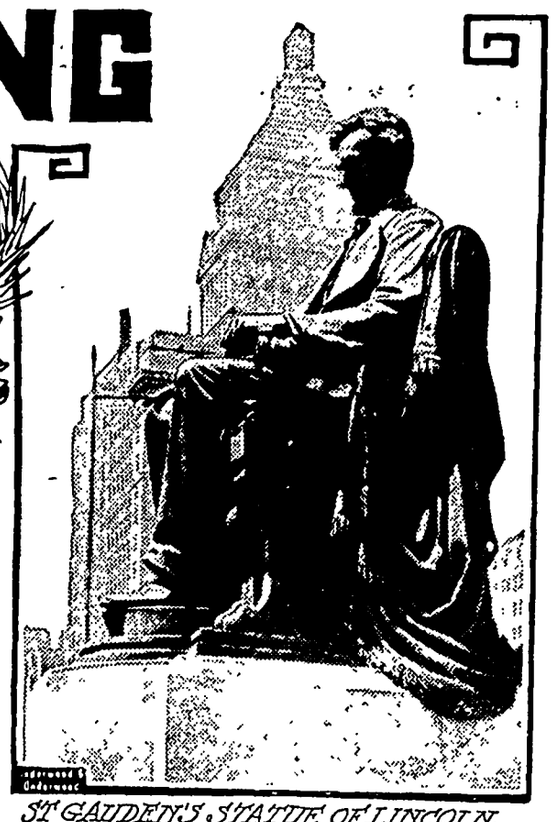
LINCOLN in SONG and STORY



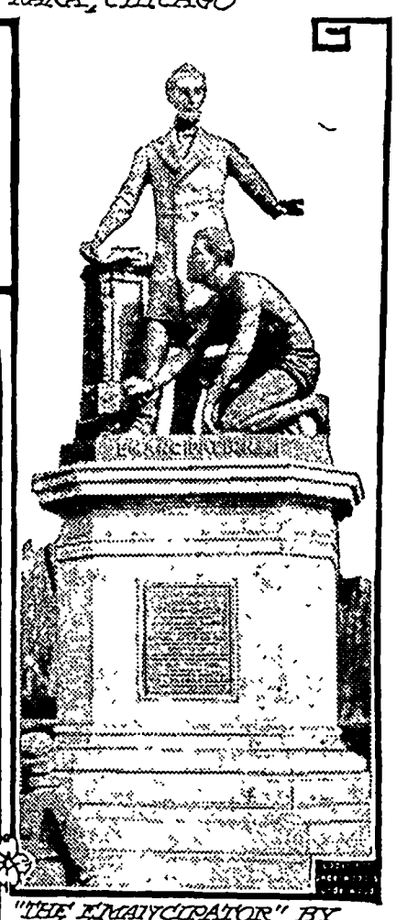
"THE RAIL SPLITTER" BY MULLIGAN IN GARFIELD PARK, CHICAGO

STATUE BY BERNARD IN LOUISVILLE, KY.



ST GAUDEN'S STATUE OF LINCOLN, GRANT PARK, CHICAGO

STATUE BY FRENCH IN LINCOLN MEMORIAL, WASHINGTON, D.C.



"THE EMANCIPATOR" BY BALL, IN LINCOLN PARK, WASHINGTON, D.C.

By ELMO SCOTT WATSON

IT IS doubtful if any other American—not even excepting George Washington—ever has been or ever will be made the theme of song and story as has been (and seems certain to continue to be) Abraham Lincoln. And when the expression "song" is used it does not mean a poetic composition set to music, nor does "story" mean a repetition of any of the innumerable anecdotes which have clustered around the name of Lincoln and to ich, surprising as the fact is, new ones are stantly being added after all these years since last walked the earth.

nstead the "songs" are the outpourings of trib- to Lincoln by some of America's best-known ts, who have been inspired by the greatness their theme to utterances which have become art of our national literary tradition. As for "story"—men may repeat anecdotes of Lin- and then in a little while forget them. But story which is told by enduring bronze or ne is one which cannot be forgotten. So each the great number of statues which have been cted to Lincoln in many parts of the country its story to tell—of the "Rail Splitter," the nancipator," the "Man of Sorrows," and of great statesman "who belongs to the ages." o long as men will speak of Lincoln so long l they be impressed by the marvel of his eer, accentuated as it is by the contrast be- en his beginning in life and the place he now ds in world history. As for that beginning, ture the scene on

FEBRUARY TWELFTH, 1809

squalid village set in wintry mud.
ub-deep ox-cart slowly groans and squeaks.
horseman hails and halts. He shifts his cud
And speaks—

'ell, did you hear? Tom Lincoln's wife; today.
e devil's luck for folks as poor as they!
Poor Tom! Poor Nance!
Poor young one! born without a chance!

baby in that God-forsaken den,
at worse than cattle pen!
ll, what are they but cattle? Cattle? Tut!
critter is beef, hide and tallow, but
ho'd swap one for the creatures of that hut?
White trash! small fry,
hose only instinct is to multiply!

"They're good at that,
d so today, God wot, another brat!
puking, squalling, red-faced good-for-naught
illed on the world, heaven only knows for what.
Better if he were black,
r then he'd have a shirt upon his back
d something in his belly, as he grows—
re than he's like to have, as I suppose.

Yet there be those
ho claim 'equality' for this new brat,
And that damned Democrat
No squats today where Washington once sat,
d have it that this Lincoln cub might be
even value in the world with you and me!

es, Jefferson, Tom Jefferson. Who but he?
ho even hints that black men should be free.
at feather-headed fool would tell you, maybe,
President might lie in this new baby!
this new squawker, born without a rag
hide himself! Good God, it makes me gag!
This beggar spawn
rn for a world to wipe its feet upon
A few years hence, but now
re helpless than the litter of a sow!
d—oh, well! Send the women folks to Nance.
* * * * * *
or little devil! born without a chance!"
—Edmund Vance Cooke in the Chicago Evening

Humble the beginning and humble the later
ars in Illinois where there is an everlasting
to him in

THE LINCOLN CIRCUIT

Springfield, where his ashes lie,
A granite column rises high;
Springfield, year on year, there wends
A pilgrimage, that never ends,
Of pilgrims, eager, come to pay
Their homage to his sacred clay;
And yet methinks the true estate
Of Lincoln, humble, simple, great,
Is better sensed in village street,
Where once he loved to walk and greet
His heartiness his fellows all,
In mart, in courthouse, tavern hall.
Methinks his spirit lingers where
He lived and wrought. No sepulcher
Of stately grandeur, cold and dim,
Can hold the human heart of him.

The little towns, the county seats,
The dreaming squares and idling streets,
The homes of plainer pioneers,
Long, yet hallowed through the years
Since in distant times they saw

Him come and go to practice law,
Tell homely tales, crack homely jokes
And neighbor with the common folks—
The little towns, the country roads,
The woods, the prairies, the abodes
Of humble men where malice fails
And charity for all avails—
These are the shrines that still enfold
The heart of Lincoln as of old,
Whose living legend runneth thus:
We loved him; he was one of us.
—E. O. Laughlin in the Ladies Home Journal.

And it was these people who gave him to the nation for its leader in the greatest struggle it had ever known, and those four years of anguish made Abraham Lincoln

A MAN OF SORROWS

They thought him but a clown, a tactless boor
Who filled his days and nights with quips and jests;
His hours were heedless as his purse was poor;
Without ambition, blind to worthy quests,
He dragged along his days; a human clod
Who scorned religion, mocked and flouted God.

How far they erred! A man of sorrows he,
Who bore within his heart a fatal wound.
Bereft of those he loved, the sympathy
He craved and hungered for could not be found;
The men with whom he walked from day to day
Knew not he trod a dark and lonely way.

A man of sorrows, born to pain and grief,
Yet would he not inflict his woes on men.
In jests and jokes he sought to find relief;
Thus gaining strength, he walked erect again.
Such was the man they called a wag and clown,
The byword—and the glory—of his town.
—Thomas Curtis Clark.

It was in the midst of that struggle that the nation realized the greatness of the man when they listened to the words which came from the lips of

LINCOLN AT GETTYSBURG

(From the "Gettysburg Ode.")

After the eyes that looked, the lips that spake
Here, from the shadows of impending death,
Those words of solemn breath,
What voice may fitly break
The silence, doubly hallowed, left by him?
We can but bow the head, with eyes grown dim,
And, as a nation's litany, repeat
The phrase his martyrdom hath made complete,
Noble as then, but now more sadly sweet;
"Let us, the living, rather dedicate
Ourselves to the unfinished work, which they
Thus far advanced so nobly on its way,
And save the periled state!
Let us, upon this field where they, the brave,
Their last full measure of devotion gave,
Highly resolve they had not died in vain!—
That, under God, the nation's later birth
Of freedom, and the people's gain
Of their own sovereignty, shall never wane
And perish from the circle of the earth!"
From such a perfect text, shall song aspire
To light her faded fire,
And into wandering music turn
Its virtue, simple, sorrowful, and stern?
His voice all elegies anticipated;
For, whatsoe'er the strain,
We hear that one refrain:
"We consecrate ourselves to them, the consecrated!"
—Bayard Taylor.

But before his great work could be finished, an assassin's bullet plunged a whole nation into mourning for

O CAPTAIN! MY CAPTAIN!

O Captain! my Captain! our fearful trip is done;
The ship has weathered every rack, the prize we sought is won;
The port is near, the bells I hear, the people are exulting,
While follow eyes the steady keel, the vessel grim and daring.

But O heart! heart! heart!
O the bleeding drops of red
Where on the deck my Captain lies,
Fallen cold and dead.

O Captain! my Captain! rise up and hear the bells;
Rise up—for you the flag is flung—for you the bugle trills,
For you bouquets and ribboned wreaths—for you the shores a-crowding;
For you they call, the swaying mass, their eager faces turning.

Here, Captain! dear father!
This arm beneath your head!
It is some dream that on the deck
You've fallen cold and dead!

My Captain does not answer, his lips are pale and still,
My father does not feel my arm, he has nor pulse nor will;
The ship is anchored safe and sound, its voyage closed and done.
From fearful trip the victor ship comes in with object won!

Exult, O shores and ring, O bells!
But I with mournful tread
Walk the deck my Captain lies,
Fallen cold and dead.
—Walt Whitman.

And although history records that Abraham Lincoln died on April 15, 1865, he lives in the hearts of his countrymen as

THE FIRST AMERICAN

Such was he, our Martyr-Chief,
Whom late the Nation he had led,
With ashes on her head,
Wept with the passion of an angry grief;
Forgive me, if from present things I turn
To speak what in my heart will beat and burn,
And hang my wreath on his world-honored urn.
Nature, they say, doth dote,
And cannot make a man
Save on some worn-out plan,
Repeating us by rote:
For him her Old World molds aside she threw,
And, choosing sweet clay from the breast
Of the unexhausted West,
With stuff untainted shaped a hero new,
Wise, steadfast in the strength of God, and true
How beautiful to see
Once more a shepherd of mankind indeed,
Who loved his charge, but never loved to lead;
One whose meek flock the people joyed to be,
Not lured by any cheat of birth,
But by his clear-grained human worth,
And brave old wisdom of sincerity!
They knew that outward grace is dust;
They could not choose but trust
In that sure-footed mind's unfaltering skill,
And supple-tempered will
That bent like perfect steel to spring again and thrust.
His was no lonely mountain-peak of mind,
Thrusting to thin air o'er our cloudy bars,
A sea-mark, now, now lost in vapors blind;
Broad prairie rather, genial, level-lined,
Fruitful and friendly for all human kind,
Yet also nigh to heaven and loved of loftiest stars.
Nothing of Europe here,
Or, then, of Europe fronting mornward still,
Ere any names of Serf and Peer
Could Nature's equal scheme deface;
Here was a type of the true elder race,
And one of Plutarch's men talked with us face to face.
I praise him not; it were too late;
And some innative weakness there must be
In him who condescends to victory
Such as the Present gives, and cannot wait,
Safe in himself as in a fate.
So always firmly he:
He knew to bide his time,
And can his fame abide,
Still patient in his simple faith sublime,
Till the wise years decide.
Great captains, with their guns and drums,
Disturb our judgment for the hour,
But at last silence comes;
These all are gone, and, standing like a tower,
Our children shall behold his fame,
The kindly-earnest, brave, foreseeing man,
Sagacious, patient, dreading praise, not blame,
New birth of our new soil, the first American.
—James Russell Lowell.

FARM STOCK

SCRUB BULL IS CAUSE OF LOSS

The loss to the farmers through the use of scrub sires is enormous. Here is one instance. In 1918 two bull calves were born on adjoining farms; both were from good grade cows. One was from a pure bred bull with a long line of pure bred ancestors; the other calf was from a line of scrub sires. These calves grew up on adjoining farms, the one as a choice steer, the other as a scrub bull. When two years old they were both sent to the stockyard. The scrub weighed 900 pounds and sold at 7 cents; it dressed 48 per cent and brought $63.00. The pure bred weighed 1,200 pounds and sold at 17c; it dressed 61 per cent and brought $204.00, a difference of $141.00. With a breeding cost of $5.00, it left an increased profit of $136.00. Surely this investment of $5.00 was well worth while, and indicates why the scrub bull should be banished.

The above is only one instance of the value of a pure bred sire. In August, 1925, the Ontario Agricultural college at Guelph published the record of an experiment in the feeding of six steers, three from scrub bulls. They were all put on the same rations for two winters and one summer. The pure breds showed a profit of $14.70. The scrub stock showed a loss of $22.70, a difference of $37.40. This corresponds with the work done by an Ontario farmer, who made $26.00 per steer more from those sired by a pure bred than those sired by a grade bull.

A Manitoba farmer had two grade cows of similar type and breeding; one was bred to a pure bred sire through a bull loaning club. The other was bred by a scrub bull which was running at large and got into the herd. Both calves were developed as steers and had the same chances to put on flesh. They were sold in April, 1920, the one sired by the scrub bull showing a loss of 85 cents, whereas the one from the pure bred sire showed a profit of $19.00. This is conclusive evidence that good breeding pays.

Linseed, Alfalfa Meal Good Corn Supplements

Tankage and skim milk are highly efficient protein supplements to corn for hogs, points out Grady Sellards, an extension field agent for the Kentucky College of Agriculture.

"Unfortunately," he continues, "the production of these two good supplements is insufficient to balance all the corn fed to hogs, necessitating the use of other supplementary feeds.

"Although tests show that protein supplements from animal sources are more efficient than those from vegetable sources, it has been found that combinations of animal and vegetable supplements are more effective than either type used singly.

"Of the best of these combinations is found tankage, 50 parts; linseed oilmeal, 25 parts, and alfalfa meal, 25 parts, all by weight.

"Alfalfa meal is not necessary when hogs are running on good pasture. Some hog men use the following proportions: Tankage, 50 parts; linseed oilmeal, 35 parts, and alfalfa meal, 15 parts.

"Alfalfa hay may be used instead of alfalfa meal. In practically all tests the two have given equally good results. In the event alfalfa hay is not available, clover or soy-bean hay may be used."

Use of Alfalfa Hay as Supplement in Winter

The use of a mixture of 50 pounds of tankage, 25 pounds oilmeal and 25 pounds of chopped alfalfa hay as a supplement for yellow corn in winter rations has been advocated for some time. Recently trials at South Dakota have proved that high quality whole hay gives almost as good results as the chopped hay if the pigs can be induced to consume enough of the uncut feed. These results have caused hundreds of Northwest farmers to adopt alfalfa as a means of improving the standard corn-tankage ration.

Data from the trials at the South Dakota station show that pigs fed a ration of corn and tankage made an average daily gain of 1.32 pounds. When chopped alfalfa hay and linseed meal were fed with the corn and tankage the average daily gain was 1.54 pounds. More significant than this, however, is a saving of 16 pounds of feed for each 100 pounds of grain in the pigs fed the ration containing chopped alfalfa hay and the fact that there was a difference of 17 days in favor of the alfalfa fed pigs in reaching a weight of 200 pounds.

Feeding Iodized Salt

It is probably not necessary to feed iodized salt throughout the whole year, but if fed to pregnant sows protection against hairless pigs will be secured. Pregnant cows should also have iodized salt; in this case the use of the salt should begin something like ninety days before calving time. Salt can be added to the grains, or concentrates, at the rate of 1 pound of salt to 100 pounds of concentrates. If additional common salt is needed give the animals an extra supply.

SICK WOMAN SOON RECOVERS

By Taking Lydia E. Pinkham's Vegetable Compound

"A neighbor advised me to try Lydia E. Pinkham's Vegetable Compound, which she said had helped her so much. So I bought a few bottles and tried it out. It sure helped me wonderfully. I felt much better. My work was no longer a dread to me. If I hear of any one who is troubled the way I was, I will gladly recommend the Vegetable Compound to them and I will answer any letters in regard to the same."—Mrs. Bertha Meachan, 1134 N. Penn. Ave., Lansing, Mich.

"I had been sickly ever since I was fifteen years old. After taking Lydia E. Pinkham's Vegetable Compound I got so I could do all my housework and I am in good health."—Mrs. Marie K. Williams, Ketchikan, Alaska.

From Michigan to Alaska, from Maine to Oregon and from Connecticut to California letters are continually being written by grateful women recommending Lydia E. Pinkham's Vegetable Compound.

The Compound is made from roots and herbs and for more than fifty years has been helping to restore run-down, over-worked women to health.

Cigar Clerk Can Tell If Girls Use Cigarettes

Lloyd Slee, Davenport cigar store clerk, claims to have the answer to the question of how to tell when a woman patron of tobacco shops is buying cigarettes for herself or for her husband, brother or other male relative or friend.

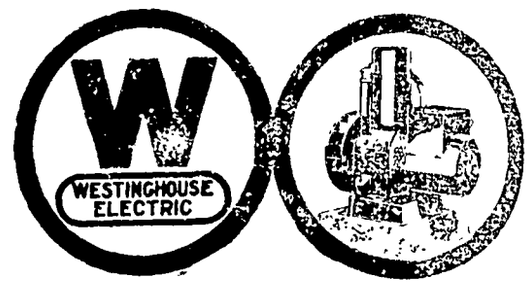
"We always put the cigarets in a sack," Slee explains. "But if the woman says: "Never mind, I'll just drop them in my bag," it's a pretty sure indication that she smokes them If she takes them in a sack it's a 100 to one shot she wants them for someone else, and is content to carry them in a sack.

"It's easy, if you have watched them long enough!"

This is called the richest country in the world, but you would never know it when passing around a subscription paper for some good community cause.

The Name Westinghouse

on your Farm LIGHT & POWER Plant



KEEP in mind that in choosing your *lighting plant* the *maker* must not be overlooked. The plant we sell is made by Westinghouse—headquarters for radio, KDKA, KYW, WBZ, and KFKX —one of the greatest electrical organizations in the world—a concern employing 50,000 people.

Westinghouse *knows* electricity, knows how to build *everything electrical*— and offers you a lighting plant that is absolutely dependable, easy to operate and easy to own.

KLEMME WON TWO FIRSTS IN CONTEST

LOCAL SCHOOL FARES WELL IN SUB-COUNTY CONTEST

Garner Took A First And A Second, And K. H. S. Takes Second

Klemme High School came thru the Sub-County Declamatory Contest in good order, winning two first places and one second. Raymond Barz was ranked second in the Oratorical Class; Florence Stokesbary and Marie Carson each took first in their respective classes, Dramatic and Humorous. All three will be entered in the Final County Contest at Garner next Tuesday evenig, Feb. 7th. We hope a large delegation from Klemme can accompany our speakers.

Garner won a first, also a second, while Goodell won a second in the Sub-County and will be entered at Garner. The winners from the four schools in the ewstern part of our county will also be entered in the Garner final, making twelve speakers in all as here Tuesday night.

Daphne Houghton of Goodell was the second place winner in the Dramatic cass, Kathryn Prouty of Garner second pace winner in the humorous cass, and Marie Duesenberg, also of Garner, first place winner in the oratorical class. These speak at Garner.

K. H. S. Won Game With Fishers

Our boys won another game with ease last Friday night at Crystal Lake. They limited the Crystal Lake boys to but 6 points, while they tallied 21 for Klemme.

We go to Rowan this Friday evening for a basket ball game there and hope to come back satisfied. We understand our town team will also play the same evening. The rest of Klemme may well go along and help win both games.

Next week on Saturday night our boys play at Britt. We shall need a lot of noise there also.

New Semester Has Started

The new semester has now been going more than a week and most of our students are well started in their new courses.

The last semester classes or subjects are as follows:-

Freshmen:-
English Composition
Algebra
General Science
Home Economics, Girls
Manual Arts, Boys

Sophomore:-
English
Plane Geometry
Animal Husbandry
Occupations

Junior Class:-
English Literature
Social Problems
Modern History
Physiology or Advanced Algebra

Seniors:-
English
Social Problems
Physics
Physiology or Advanced Algebra.

Grammar Room, 7th Grade:-
English
Geography
U. S. History
Arithmetic
Reading

Grammar Room, 8th Grade:-
English
Civics, Community
Reading
Arithmetic

Both grades are taught vocal music, penmanship, spelling, while the seventh grade also have citizenship, and a few minutes each week Physical Training is offered those not in athletics in both grades and the high school.

Lyceum Numbers

The next Lyceum number will be on Monday evening, Feb. 27th and following numbers on Thursday evening, March 15th ad the last one April 5th.

HANCOCK COUNTY REAL ESTATE TRANSFERS

A Weekly Review Of Sales And Trades In Property

Trade name. The Klemme Hatchery. Owner, Arley Blickendorfer, Klemme, Iowa.

John Suurballe, Treas. to C. A. Schoenwetter. Treas. Tax sale deed, date 1-17-28, lot 5 and N½ of lot 6 block 15 Garner.

METHODIST CHURCH NOTES
A. W. Gauger, Pastor

At the Sunday School Board meeting on Monday evening arrangement was made for addiitonal room to take care of increased attendance.

Better work hereafter by teachers and classes is thus assured.

At the board meeting S. S. Supt. Nelson and his good wife were hosts to the board when all present were treated to an oyster stew. They are assured of the gratitude of their loyal corps of workers.

Let all teachers as well as scholars be preent nesxt Sunday as rearrangements will be made.

The pastor's morning message will be along religious educational lines and will be of special interest to all parents and teachers.

An interesting meeting of the W. F. M. S. of Liberty church was held with Mrs. Herman Gast, on Wednesday afternoon.

The Klemme W. F. M. S. Auxiliary meets with Mrs. C. A. Arnold on Thursday afternoon.

Have you finished reading Mathews Gospel during January, and are you reading St. John Now?

REPORT POULTRY OUTLOOK BRIGHT

THIS YEAR TO BE PROFITABLE IN POULTRY RAISING

Report From Department Of Agriculture Shows What Hens Did

"Preliminary reports of the poultry and eggs produced by owa hens during 1927 show that poultry continues to be one of the important factors of income for Iowa farms," states the Iowa Department of Agriculture.

These reports indicate that the total production of eggs during 1927 was approximately 170,000,000 dozen. Practically three-fourths of this amount was shipped out of the state to eastern markets, thus representing an important article of trade. This is an increase of approximately 10,000,000 dozen over 1926 but the total value of the product is less on account of the low prices of last spring.

Approximately 100,000,000 lbs. of live and dressed poultry were also produced. This is a slight increase over the total production of 1926. The total value is also slightly lower than the previous year on account of lower prices during most of the year

Considerable decrease in storage holdings of dressed poultry, together with increased consumption of eggs, indicate that 1928 will be a better year for the poultrymen than 1927, according to the estimates of the department.

BE ON LOOKOUT FOR POULTRY GRAFTERS AGAIN

Iowa Department Of Agricuture Are Looking For Crooks

A good many Iowa peope are looking for two salesmen who have been operating under the name of the Iowa Poultry Laboratory, Des Moines, according to reports that have come to the Iowa Department of Agriculture from many sources.

An inspector of the department went to a Des Moines hotel where they were supposed to have had their headquarters and found the hotel clerk also looking for the two men, C. E. McCabe and M. GG Holton, as the clerk reported that they had departed without settling their hotel bill.

Recent reports from Ft. Dodge officials show that they were fined $50.00 each and costs when a farmer near Badger had them arrested and prosecuted for peddling drugs without a license, as required under the pharmacy laws.

Othe reports indicate that they have also been working in southern Iowa. Other men have also been reported as agents. The large number of complaints which have been received, should serve as a warning to other prospective purchasers who may be solicited by these men

KANAWHA TAKES ALL FIRSTS IN DECLAMATORY

Won Honors In Sub-County Contest At Britt Tuesday Evening

Kanawha high schoo declamatory speakers won three first places in the sub-county contest held at the Britt High School Tuesday night. Maxine Herdman took first in oratorical, Inez Thompson, dramatic, and Audrey Morris in the humorous. Britt too ktwo seconds: Wesley Olson in oratorical and Evelyn Wahlberg in dramatic. Corwith received second in humorous.

These speakers will compete with first and second place winners in the county contest at Garner Tuesday night, meeting the east side of the county.

Ames Abe says: If the man that thinks the rest of the world is conspirin' to tramp him down will jest look around a bit he'll probably find he's steppin' on his own corns.

FOX HUNTING GOOD HERE PAST DAYS

GREIMANN BOYS HAVE SHOT NINE FOXES THIS WINTER

Had Unusual Good Luck Past Week When Five Were Killed

Fox hunting has been unusually good this winter, according to Henry and Aaron Greimann who have bagged nine of the sly animals this winter

The light snow of the past few days made fox hunting extra good and the men have shot five already this week, and with another light fall of snow hope to get more.

Wednesday of this week they shot two and crippled another. This was the banner day in that they also shot the biggest fox they have ever seen. The fox was about as large as a wolf and was beautifully colored.

Besides the sport they get out of hunting foxes with high-power rifles the men receive from $20 to $30 for the pelts.

WILL HOLD SUNDAY SCHOOL IN OLD BANK BUILDING

Will Accomodate Four Large Classes In Up Stairs Rooms

The Sunday School Board of the Methodist Church have made arrangements whereby they have secured the rooms over the old State Savings Bank for the purpose of using them as Sunday School rooms to relieve the congestion of the Sunday school session at the Church. A number of the older classess will hold forth there when plans have been completed.

Old Time Fiddlers Contest Attended By Large Crowd

The oid time fiddling and other contests, as advertised in the Times last week was held at the Idle Hour heatre Saturday night and drew a packed house. The many stunts put on under the direction of "Fat" Moody, of Belmond, kept the crowd in good humor There were plenty of contestants on hand to compete for the various prizes Our Townsman, G. R. Stokesbary "shook the meanest pair of feet" and so walked away with first honors in the clog dance. F H Hoyt captured three prizes on fiddling, being the best, the best looking and the baldest, receiving a prize for each. Fred Nolte, of Goodell got fiddling prizes for being the laziest and the longest haired John Nolte was the best hog caller present and did so well that a half hog at the meat market next door started to walk away.

Having Serious Trouble Wth Eye

Miss Ethel Wellemeyer has been forced to turn her school over to Miss Dora Swanson temporarily. Miss Wellemeyer is suffering from an infection on one of the eyes and this condition demands daily treatment by a Mason City specialist. Mr. Wellemeyer took her to Mason City Sunday where she is remaining while being treated. At this time her eye trouble is improving.

FORMER COACH VISITED HERE SUNDAY WITH FRIENDS

Hockey's Basket Ball Team Has Clean Record This Year

Mr. L. E. Hockey, former coach of athletics in the Klemme Schools, and who now hods that position in the consolidated schools at Mallard, Iowa, was visiting in Klemme Sunday. Mr Hockey again has a good basket ball team which has won this season every game they payed, or twelve straight. He says he expects to take in the Hancock County tournament at Britt and hopes to see his Klemme friends there.

TEACHERS ENJOYED PARTY AT FREIE HOME SAT. EVE

Guests Were Required To Dress In Queer Styles

A party sponsored by Miss Wilma Trumbell was enjoyed at the Henry Freie home Saturday evening. All of the teachers were present and a number of other friends. The party was a sort of costume affair, and each person attending had to come attired in the most outlandish dress it was possible for them to find, and were admitted only thru the back door and were required to decipher their invitation as a pass before being duly admitted The entire party was conducted in a topsy-turvy manner and all were greatly amused by the queer situations which resulted. All report a wonderful time

CAMP FIRE GIRLS WILL PUT ON HOME TALENT PLAY

The Klemme Camp Fire Girls are rehearsing for a home talent play, "How Beth Won Her Camp Fire Honors," which they will put on at the Idle Hour theatre on Tuesday evening, February 14th. Camp Fire Songs will be sung between acts.

Miss Marie Blank is in charge of the Camp Fire Girls and their activities in Klemme.

Editor's Son Recovering From Diphtheria

"Buster" Jorgenson was quarantined Friday for diphtheria. However he had it in a light form which was hardly distinguishable from an ordinary sore throat and he made a rapid recovery. At this time he is feeling fine and should be able to be released from his home soon.

Will Take Over Cream Route

Alfred Merkle, who some time ago purchased the truck and cream route business of Cliff Swartz, came to town Monday morning to go out on the route with Cliff and get onto the business. Alfred and family expect to move to town soon, having purchased the Cliff Swartz property here Mr. Swartz and family will move to a farm near Ventura.

Klemme Girl Graduated At University of owa Yesterday

Mabel Waterman Cullinan was graduated from the State University at Iowa City Wednesday of this week She wil go to Chicago about February 15th where she has a postion. Her mother, Mrs. Mary Waterman expects to come to Klemme soon for an extended visit with relatives and friends.

F. J. URICH CANDIDATE FOR SUPERVISOR

Mr. F. J. Urich, of Garner, who is now serving his first term as a supervisor in Hancock County, paces his announcement in this issue of the Times and respecfuly asks the voters for a second term in that office.

Mr. Urich will undoubtedly be given a second term without opposition, being the custom in this county when an official is satisfactory.

The Sunday School Board and officers of the Methodist Sunday school had a business meeting and get-together at the Parish House Monday evening. After the business session had been completed Sunday school Superintendent and Mrs. Tom Nelson served a most delicious oyster stew to the crowd. All had a fine time and agreed Tom and his wife were royal entertainers.

Minerals, yellow corn and sunshine help the fall pig

GROUND HOG SAW SHADOW TODAY

GOOD MORNING, MR. GROUND-HOG, HOW ARE YOU?

Old Timers Say We Can Look For Six Weeks More Of Winter

Mr. Ground Hog, more or less reliable forecaster of weather for the past few centuries, awakened this morning from his long beauty and ventured forth to seek some bacon and eggs to satisfy his hunger. A look about and he became frightened when he saw a black image trailing him around—his shadow, so he scampered back to his hole in the side of the hill near the woods to sleep again for six weeks while we humans outside will shiver in the cold blasts of wind from the northwest.

Local coal dealers report a sudden rush in the coal business as the natives prepare for six more week of wintry weather.

Maybe ? ? ? ?

Ell Township News

(Special Times Reporter)

Mrs. John Bock and Miss Stella were Garner callers Saturday.

Miss Ruth Johnson was a Mason City caller Tuesday.

Alvin Schlicting visited at the Lydia and Willie Bock home Sunday

Mr. and Mrs. Benj. Mullin a family visited with Mr. Mullin's parents at Lu Verne Sunday.

Mr. and Mrs. John Johnson and family visited at the Oscar Swanson home Sunday evening.

Mr. and Mrs. Hans Wiler and family have been staying at the Werner Lewis home since their sale.

Mr. John Newberger and Ruth and John were Garner callers Saturday.

Miss Lydia Bock called at the John Bock home Thursday afternoon.

The Benj. Mullin family visited at the Herman Thieman home Monday evening.

The Fred Kothenbeutal and Herman Thiemann families enjoyed an oyster stew at the Fred Barz home Tuesday evening.

Mr. and Mrs. Henry Josten and Ewald were at George Thiemann's Monday. Ewald is staying there for a few days.

Mr. and Mrs. John Newberger and Ruth and John all visited at the Walter Blumer home Monday. Mr. and Mrs. Blumer are the proud parents of a fine baby boy.

The Hans Willer family visited at the Herman Thiemann home Sunday evening. Miss Mildred Willer spent a few days last week with Mildred Thiemann and visited school with her in Dist. No. 7.

Mr. and Mrs. Louis Katterhenry of Ventura, Mr. and Mrs. Walter Newberger, Mr. and Mrs. Fred Barz and children, Ronald and Doris, and Mr. and Mrs. Geo. Thiemann and family all visited at the Herman Thiemann home on Sunday afternoon.

The silo is a real enemy of the corn borer. When corn is put in the silo, any borers it contains never come out alive, it has been found in the borer infested regions.

Pruning time for the orchard is at hand. From now until the middle of March will be satisfactory.

AFTER THE EXPLOSION ©Underwood & Underwood

By ELMO SCOTT WATSON

ONE February morning just thirty years ago the news flashed over the country that the United States battleship Maine, commanded by Capt. Charles Dwight Sigsbee, had been blown up in the harbor of Havana, Cuba, and that two hundred and sixty-four men and two officers had been killed. Since that time disasters at sea have claimed many more American lives and after the first outburst of horrified amazement at them the public has quickly forgotten. But far different was the aftermath of the destruction of the Maine, for it came at a time when relations between two great nations were strained almost to the breaking point and it proved to be one of the factors which plunged America into a war from which she emerged as a different nation from that which the world had known before and inevitably committed to a role as a world power and a player in the game of international politics. Although historians of today do not usually point to this disaster in Havana harbor on February 15, 1898, as a turning point in history, historians of the future may do so.

To get a proper perspective on the importance of the Maine disaster, it is necessary to go back to the beginning of American history. For three centuries and a half Spain had held the island of Cuba, although she had lost most of her colonies in both North and South America. The Cubans, moved by the success of other Latin-Americans in throwing off the yoke of Spain, which had become a galling one, began to dream of the day when they, too, should be free. As early as 1822 sympathy with this desire was openly expressed in the United States, but no opportunity for showing sympathy in a more tangible form occurred until 1848 when the Cubans revolted against their Spanish rulers and succeeded in keeping up a guerrilla warfare for a number of years.

In 1851 Col. William L. Crittenden of Kentucky joined a filibustering expedition which set out from New Orleans under Narciso Lopez to aid the Cubans. The Spaniards captured the whole party and Lopez, Colonel Crittenden and some fifty others were shot at Havana. There was nothing that America could do about Crittenden's execution, for a nation cannot countenance a filibustering expedition against a presumably peaceful neighbor nation. But when Spain put Cuba under martial law American sympathy grew more outspoken. And then came the famous "Virginius affair." In 1873, the Virginius, an American-registered vessel, was captured by a Spanish gunboat, taken to a Cuban port and fifty of her crew, most of them Americans, were stood before a firing squad. At this outrage excitement in America ran high, but the American administration, after a long series of negotiations with Spain, allowed her to settle by paying an indemnity. Meanwhile the rebellion in Cuba was continuing and the horrors of the Spanish attempts to put it down continued with it. In 1875 the United States intimated to Spain that unless the war were stopped intervention might become necessary and Spain took the hint. She granted certain reforms and the struggle seemed to be ended.

But it proved to be only the beginning, so far as the United States was concerned for the Don failed to keep his promise to the Cuban patriot, and in 1895 another insurrection was under way. Under the leadership of such men as Gomez, Maceo and Garcia, the rebels put up such a valiant fight that they gained control of most of the provinces and their plucky resistance to the harshness of Spanish rule won for them the admiration and the active sympathy of the American people. As the struggle continued America was more closely involved by outrages against American citizens living in Cuba at the hands of General Weyler—"Butcher" Weyler, they called him—and early in 1897 the situation in Cuba became the subject of considerable debate in congress. Up to this time the question of intervention in Cuba was one upon which the American people probably were as much divided as were the members of congress.

All during that year the war in Cuba and the efforts of President McKinley to bring about a peaceful solution of the problem, that would be satisfactory to both Spain and the United States, was foremost in the minds of Americans. But as time went on the realization of that hope seemed more and more remote. Then the situation of Americans in Havana began to cause uneasiness and it was decided to send a warship to that port, not only to protect American interests in case the need for such protection should arise, but as a friendly gesture to the Spanish authorities and a symbol of good will between the two nations.

Accordingly the battleship Maine was ordered to Havana for that purpose. Compared to the battleships of today, the Maine would not be considered such a mighty engine of war, but thirty years ago she was one of our finest vessels and as a fighting machine she was as formidable as any of her class. The Maine was launched at the Brooklyn navy yard in November, 1890, at a cost of $2,500,000, and was first commissioned in September, 1895. She was a steel-armored battleship with two ten-inch barbette turrets, with a length of 318 feet, beam 57 feet, draft 21½ feet and displacement of 6,682 tons. The barbette armor was 12 inches thick and the plates of the turret armor were eight inches thick. The hull was encased in an armor belt 12 inches in thickness, tapering to seven inches below the water line. Like most of her class, her ends were unprotected by side armor, but at both ends there were transverse armored bulkheads of sufficient thickness to deflect projectiles. A steel deck covered the vital parts of the ship and afforded protection to the machinery and boilers.

The Maine's armament consisted of four ten-inch rifles, en barbette in turrets, in the main battery and six six-inch rifles on the battery deck for the auxiliary battery. Four six-pounders, eight three-pounders and two one-pounder rapid fire guns, four revolving cannon and four Gattlings made up the second battery and there were armored tops on each of the two masts. She was propelled by twin screws of manganese bronze, the power being furnished by two screw engines of 9,000 indicated horse power. Carrying 822 tons of coal, she could steam 2,770 knots at 14.8 knots an hour or 7,000 knots at 10 knots an hour. She had a double bottom and numerous water-tight compartments. A bulkhead divided the engine room, so that each set of the machinery was in a water-tight compartment by itself.

The story of the tragedy which caused the loss of this magnificent vessel and was a contributing factor to the Spanish-American war is told in the following excerpts from the message by President McKinley to congress late in March, 1898:

> The Maine entered the port of Havana on the 25th of January, her arrival being marked with no special incident besides the exchange of customary salutes and ceremonial visits. The Maine continued in the harbor of Havana during the three weeks following her arrival. No appreciable excitement attended her stay; on the contrary, a feeling of relief and confidence followed the resumption of the long interrupted friendly intercourse. So noticeable was this immediate effect of her visit that the consul general strongly urged that the presence of our ships in Cuban waters should be kept up by retaining the Maine at Havana or in event of her recall, by sending another vessel there to take her place.
>
> At 40 minutes past nine in the evening of the 15th of February the Maine was destroyed by an explosion, by which the entire part of the ship was utterly wrecked. In this catastrophe two officers and two hundred and sixty-four of her crew perished, those who were not killed outright by the explosion being penned between decks by the tangle of wreckage and drowned by the immediate sinking of the hull. . . .
>
> The usual procedure was followed, as in all cases of casualty or disaster to national vessels of any maritime state. A naval court of inquiry was at once organized, composed of officers well qualified by rank and practical experience to discharge the duty imposed upon them. Aided by a strong force of wreckers and divers, the court proceeded to make a thorough investigation on the spot, employing every available means for the impartial and exact determination of the causes of the explosion. . . . The finding of the court of inquiry was reached after 23 days of continuous labor. . .

The report of that court of inquiry, headed by Capt. W. T. Sampson, president, and Lieut. Com. A. Marix, judge advocate, was briefly this:

> That the loss of the Maine was not in any respect due to fault or negligence on the part of any of the officers or members of the crew.
>
> That the ship was destroyed by the explosion of a submarine mine, which caused the partial explosion of two or more of her forward magazines
>
> That no evidence has been obtainable fixing the responsibility for the destruction of the Maine upon any person or persons

Although the Spanish authorities in Havana gave all the aid possible to the Americans after the destruction of the Maine and paid the highest honors to the first recovered dead when they were buried by the municipality in the public cemetery in the city, this was offset by the attitude of Spain that the disaster had been caused by an explosion of her magazines, due to the carelessness of her officers. The first blaze of wrath which swept America the day after the explosion was calmed somewhat by the report of Captain Sigsbee, asking that judgment be suspended until the cause of the accident be investigated, and by President McKinley's plea for a calm consideration of the facts as established by the board of inquiry. But the conviction grew that Spain had struck in the dark and in a later message from the President to congress he summed up the feeling of America toward Spain in the words "The destruction of the Maine, by whatever exterior cause, is a patent and impressive proof of a state of things in Cuba that is intolerable. That condition is thus shown to be such that the Spanish government cannot assure safety and security to a vessel of the American navy in the harbor of Havana on a mission of peace and rightfully there."

In that message he asked congress for authority to establish an independent government in Cuba and on April 19 congress adopted a resolution declaring that Spanish rule in Cuba must cease, recognizing the independence of Cuba and empowering the President to use the entire land and naval forces of the United States to drive Spain from Cuba. That meant only one thing—war. When America went to war it was by a formal document passed by congress on April 25. But the American people went to war with no formal phrases. Their declaration was summed up in the new battle cry of "Remember the Maine!"

It was one of the shortest wars in American history. Beginning in April its end was foreshadowed in August when Spain made overtures for peace, a protocol was signed and hostilities ceased. The end came with the treaty of peace signed on December 10. By the terms of the treaty Spain gave up all claim to Cuba and ceded Porto Rico, Guam and the Philippines to the United States, receiving the sum of twenty million dollars for the latter. The decisive naval victories of Manila and Santiago definitely established the position of the United States as a naval power and her acquisition of territory in the Orient brought her out of the seclusion of concern with only domestic affairs to a new international relationship.

No doubt the Spanish-American war was inevitable and would have been fought whether the Maine had been destroyed or not. But that disaster was the one thing necessary to give the American people the will to fight and the determination to back up their leaders to the utmost in prosecuting the war. So it may fairly be regarded as a turning point in history, one of those unlooked-for incidents whose importance may not be appreciated at the time, but which grow in importance with the years.

The men who perished on the Maine were afterwards removed from the cemetery in Havana and the flag-draped coffins of these first victims of America's shortest and most brilliantly-won war were returned to the United States on American warships. They were buried in Arlington National cemetery and the marker for the place where they rest is the gigantic anchor of the battleship on which they perished, the name of which is still remembered by Americans whenever the battle cry of 1898 is repeated—"Remember the Maine."

Careful Cutting Helps Woodlot

New York Farmer Cut $100 Worth of Fuel From Each Acre, Aiding Stand.

In a woodlot on the farm of Henry Kellogg of Barnes Corners in Lewis county, $100 worth of fuel wood was recently removed from each acre and the woodlot was left in better condition than before cutting, according to J. A. Cope, forester at Cornell university, who had charge of selecting and cutting the trees.

Woodlot Improvement.

This was part of a woodlot improvement campaign conducted by the Lewis county farm bureau in which Mr. Kellogg agreed to use his woodlands to show what could be done. An area was laid out in a 20-acre woodlot, and the trees marked to be cut were only those that were defective, crooked or were what are commonly called "weed" species.

At a woods meeting, attended by farmers of the community, the marked trees which had been carefully cut and ranked were measured. It was found that 80 15-inch cords of wood had been cut from each acre. This fuel wood had a roadside value of $200. Mr. Kellogg kept a record of time required to cut, haul and rank this wood, and found the 80 cords could be delivered to the roadside for $100, including sawing it into 15-inch lengths, thereby netting him a clear stumpage value of $100 an acre.

Saved Crop Trees.

The group next visited the lot where the cutting was done to see that the main crop trees of thrifty ash, basswood and hard maple had not been touched. The cutting had improved the condition of the stand so that the crowns of the remaining trees will be able to expand and thus diameter-growth will be greatly increased. Mr. Kellogg's experience indicated that, as far as Lewis county woodlots go, "you can eat your cake and have it, too," Mr. Cope says.

Stinking Smut Is Most Widely Spread Disease

Stinking smut is the most widely spread disease of wheat and next to black stem rust is the most destructive. It has been estimated to cause an annual loss in the United States of 25,000,000 bushels. Stinking smut grows within the wheat plant and eventually forms smut balls in the place of the kernels. It causes a general shrinkage in the outline of the head but does not otherwise greatly change the outward appearance of the head and can be detected in the field only by close examination or by scenting its odor which is similar to that of decaying fish. When the smutted wheat is threshed many of the smut balls are broken and some of the smut dust or spores is lodged on the surfaces of sound grains. If the smutted grain is sown, the smut spores germinate with the seed wheat and again develop within the plant. In this way the disease is carried from one crop to the next.

State Game Laws Govern Hunting in the Forests

Can anyone hunt and kill game in the national forests? This question is frequently asked Department of Agriculture officials. Hunting and fishing in all national forests, says the forest service, are governed by the game laws of the state in which the national forest is located. Most forest officers are deputy state game wardens and it is their duty to enforce the state game laws at all times.

In some of the national forests, however, national game refuges have been set aside for the preservation of wild life. In these refuges hunting and fishing are not allowed, except under special circumstances and with the approval of the authorities in charge.

Agricultural Squibs

A farm implement in the shelter is worth two in the storms.

* * *

Concrete gate posts, covered with stucco, make attractive entrances to farms.

* * *

Cement-asbestos shingles may be placed directly over an old wooden shingle roof.

* * *

Poultry usually do not need such things as yeast, mineral or tonics if they receive adequate rations.

* * *

A grooved surface on a concrete approach to a raised driveway will assure a firm foothold.

* * *

Probably the most important of all the more recent tendencies in fruit growing is the use of sweet clover in the apple orchard.

* * *

"Price chasing" of farmers in order to catch the high price crops or live stock has on many occasions resulted in disappointment.

* * *

It costs more for each bushel or for each unit to market a large crop of an agricultural product than it costs to market a small crop.

* * *

Farmers who take an annual inventory should not forget to include the dog. He may be an asset or a liability for he has to be fed and an annual tax has to be paid for him.

The BABY

No mother in this enlightened would give her baby something did not know was perfectly harm especially when a few drops of Castoria will right a baby's stom and end almost any little ill. Fre ness and fever, too; it seems no until everything is serene.

That's the beauty of Castoria gentle influence seems just wha needed. It does all that castor might accomplish, without shock the system. Without the evil ta It's delicious! Being purely veg able, you can give it as often there's a sign of colic; constipati diarrhea; or need to aid sound, ural sleep.

Just one warning: it is gent Fletcher's Castoria that physici recommend. Other preparations be just as free from all doubtful dr but no child of this writer's is ga to test them! Besides, the book care and feeding of babies that co with Fletcher's Castoria is worth weight in gold.

SHE WENT FROM BAD TO WORSE

Down to 98 Pounds — Finally Restored to Health by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—"After having my first baby, I lost weight, no matter what I did. Then a doctor told me I would be better if I had another baby, which I did. But I got worse, was always sickly and went down to 98 pounds. My neighbor told me about Lydia E. Pinkham's Vegetable Compound, as it helped her very much, so I tried it. After taking four bottles, I weigh 116 pounds. It has just done wonders for me and I can do my housework now without one bit of trouble."—Mrs. M. Riessinger, 10004 Nelson Ave., Cleveland, Ohio.

If some good fairy should appear, and offer to grant your heart's desire, what would you choose? Wealth? Happiness?

Health? That's the best gift. Health is riches that gold cannot buy and surely health is cause enough for happiness.

Lydia E. Pinkham's Vegetable Compound may be the good fairy who offers you better health.

Drunkenness Is a Disease!

The Liquor or Drug User Should Be Pitied Rather Than Blamed.

Most persons misunderstand the real reason for alcoholic addiction. They say it is due to lack of will power on the part of the drink victim. Or to downright depravity. But they are wrong.

Alcoholism is as much a disease as any other human illness. It has to be treated as such. Today with the aid of trained medical experts and the World Famous Keeley Treatment total freedom from liquor and drug cravings is obtained.

Nowhere could a user of liquor or drugs obtain surer freedom from his cravings than at The Keeley Institute. Here he is able in a few short and pleasant weeks not only to shake off all desire or necessity for liquor or drugs, but to regain his health and strength of will. The Keeley Treatment has enabled thousands of men and women in all walks of life to do this. Its record of success dates back over a period of more than fifty years.

If you have a friend or relative afflicted with either curse—the use of drink or drugs—write The Keeley Institute today for full particulars. All correspondence strictly confidential.

Write V. G. Nelson, Secretary.

The Keeley Institute
Dwight, Illinois

Just Like a Man

A Martinsburg husband read in the Monitor that a woman had lost a scarf. This reminded him that he had found one several days before. He then took it to the Monitor office and learned that it belonged to his wife.—Martinsburg (Mo.) Monitor.

His Lucky Strike

Finnigan—And what did your new girl talk about last evening?

Hooligan—Oh, about the wonderful spenders she has met and the swell dinners she has had and all along that line, you know.—New Bedford Standard.

Knew His Science

Science Teacher—Name some liquid that won't freeze.

Bright Pupil—Hot water.

It is thought that some of Sebastian Cabot's navigating papers are lying in some obscure depository in Seville or Madrid.

If Back Hurts Begin on Salts

Flush Your Kidneys Occasionally by Drinking Quarts of Good Water

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Too much rich food creates acids which clog the kidney pores so that they sluggishly filter or strain only part of the waste and poisons from the blood. Then you get sick. Rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a sensation of scalding, begin to drink soft water in quantities; also get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush clogged kidneys and stimulate them to activity, also to help neutralize the acids in the system so they no longer cause irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, which everybody can take now and then to help keep the kidneys clean and the blood pure, thereby often preventing serious kidney complications.

LIVE STOCK

DRY BARNS URGED FOR SWINE HERD

More actual loss is caused to farmers during the winter from flu in their hogs than from cholera, according to Iowa State college. Flu not only kills many hogs outright, but it causes an even greater loss in a reduced pig crop where it affects brood sows.

By furnishing the right kind of sleeping quarters approximately nine-tenths of the losses from flu can be prevented. Hogs that sleep in drafty or unventilated buildings, or sleep in dusty, wet or unbedded pens are usually susceptible to flu. From now on through the winter they are liable to contract the sickness.

Hog barns should be cleaned and freshly bedded with clean straw. Hogs can be kept in an open front shed if it has a good roof and a good bed. Such a shed should allow plenty of fresh air but no drafts.

If the entire herd cannot be furnished with good sleeping quarters special attention should be given to the brood sows and gilts that are kept for the spring farrow. Many sows which contract flu will abort. Others will farrow weak and small pigs that are never thrifty.

Hogs should no longer be permitted to sleep out of doors. They should be provided with suitable quarters immediately so that a cold night will not be the forerunner of serious trouble in the herd.

Suffers No Ewe Losses in Past Eight Years

By properly balancing rations there have been no losses in eight years in the ewe flock kept at the Kentucky agricultural experiment station, according to the annual report of the station.

Last year the ewe flock was fed alfalfa hay, with the standard grain ration of oats and bran. This appeared to give better results than the feeding of soy bean hay the previous year. The report says:

"During the breeding season and preceding the lambing period, the station flock of breeding ewes was fed alfalfa hay in addition to the standard grain ration of equal parts by weight of oats and bran. In comparison with the preceding year, when all ewes were fed soy bean hay, it was noted that they cleaned up the alfalfa hay more completely than they did the soy bean hay and that the alfalfa hay was less constipating than soy bean hay.

"For the eighth consecutive year there were no losses in the station flock during pregnancy. This more firmly substantiates the statement made in last year's report that the freedom from loss may probably be attributed to the fact that the ration fed was properly balanced, contained sufficient protein and mineral matter for developing the unborn, and contained no constipating feeds."

Mineral Feed Cost

From $1.25 to $1.75 a hundred pounds is enough to pay for minerals to feed hogs, says Dr. W. E. Carroll of the University of Illinois. He recommends two parts ground limestone, two parts steamed bonemeal and one part common salt. In case pigs show a tendency to hairlessness or goiter, add one ounce of potassium iodide to each 100 pounds of minerals. The Indiana experiment station got good results from ten parts wood ashes, ten parts of 16 per cent acid phosphate and one part salt.

Live Stock Facts

A very good ration (from Purdue) for weaned pigs is 50 pounds tankage, 25 of linseed meal, 25 pounds of alfalfa meal, mixed with all the shelled corn they want.

* * *

Now that the beef grower and stockman can see a good profit in his business, he should be mindful that modern times require intelligent and progressive methods.

* * *

Milk loses some of its feed value when it sours. If real sour it's dangerous to young pigs. For older ones clabbered milk is a good feed, but if acid-sour, it may harm even these.

* * *

When the pigs have reached 75 or 100 pounds leave out the bran from their ration. Corn and tankage, or corn with soy beans, and either of the mineral mixtures will keep them thriving.

* * *

Rigorous culling of unfit breeding animals is one of the fundamental factors of success in live stock improvement and applies to swine in the same degree as to other classes of farm animals.

* * *

For fattening pigs a ration with a wider nutritive ration should be used. A ration of corn nine parts, plus a protein supplement made up of 50 per cent tankage, 25 per cent linseed oilmeal, and 25 per cent alfalfa meal, using one part of this mixture, makes a satisfactory ration.

MONARCH Cocoa and MONARCH Teenie Weenie Peanut Butter sandwiches are a most delicious and satisfying lunch for healthy appetites sharpened in keen wintry air. Two of the many pure, wholesome, delicious—

MONARCH QUALITY FOOD PRODUCTS

Fish Consume Mosquitoes

In a recent paper prepared for the Smithsonian institution, Dr. David Starr Jordan treats of the efficiency of the so-called mosquito fish as an exterminator of carriers of malaria and other less dangerous but equally irritating mosquitoes. In 1904 Doctor Jordan was instrumental in introducing this fish into the Hawaiian islands, where it has since become very abundant and has practically rid the islands of mosquitoes.

Point lace is one of the points any woman can appreciate.

You can always bank on finding a well-filled pocketbook interesting.

Look to Travelers' Comfort

The Panama Pacific line has just placed in commission the new steamship California, the largest electrically propelled commercial ship afloat. She carries 750 passengers and 8,000 tons of freight. She sails from New York with her kitchens provided with Monarch coffee, supplied fresh from the Monarch roaster in New York, and will be reprovided for the return trip from the Monarch roasters in Los Angeles. That is an evidence that passengers on this famous ship get only the best.

Wisdom of the Uncivilized

Why are women distressed century after century over the falseness of men? The men have always been as they are now, and girls marry after hearing all their lives that men are unreliable. Yet they weep and mourn when they turn out badly. I was told in the Samoa islands that no woman can make a Samoan man mad. The men know what women are, and are not astonished at anything they do It seems to me this is more wisdom than the civilized races have acquired. —E. W. Howe's Monthly.

Names on Ancient Books

Serving the same purpose as the lettering on the back or front cover of the modern book, the manuscript rolls of early Egypt and Greece had projecting labels of papyrus or vellum, on which the title of the work was written. These labels hung outward as the rolls lay on the library shelves or stood in the buckets which served as portable bookcases.—Gas Logic.

Forced From Seclusion

A protest that no man had entered her home for 20 years was made from behind a locked door by Mrs. F. A. Hamilton, wealthy and elderly resident of Ontario, Calif., when firemen came to rescue her from her burning home. They broke down the door and carried the woman to safety.

Term Almost Obsolete

The term "oblique sailing" refers to the movement of a vessel when she sails upon a course making an oblique angle with the meridian. The use of the term is rare.

One wonders what the rest of Athens thought of Socrates and his courthouse steps crowd.

People strive toward sophistication, yet it spoils half their enjoyment.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Somehow the neighbors always think the sad look on a married woman's face is due to her husband.

People you want to help most will hardly ever tell you their troubles.

A man thinks he's just as good as anybody when he goes to church in the rain.

A man is no addict who doesn't care whether the coffee is good or not.

Lovable! .. the girl with a beautiful skin ..

Youth and love—keep them by keeping a beautiful skin

Nearly every woman's skin would be lovely if it weren't for one of these six easily-corrected faults:

JUST by keeping your skin free from these conditions, you can have one of those clear, smooth, fine complexions that everyone admires and turns to look at!

The famous Woodbury skin treatments will help you to overcome any of these troubles. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful, health-giving treatments. Simple, clear directions for each of these treatments and the treatment for normal skins you will find in a booklet wrapped around each cake of Woodbury's.

Blemishes *Blackheads* *Sallowness*
Conspicuous nose pores *Excessive oiliness*
Dryness

A skin specialist created Woodbury's Facial Soap. Use it—and see what a wonderful improvement it will make in your complexion. A 25-cent cake lasts a month or six weeks.

For Supervisor

I hereby announce my candidacy to succeed myself to the office of supervisor of Hancock County, subject to a decision of the Republican voters at the June, 1928 primaries. F. J. Urich. c

PITY POOR FATHER, PLEA OF BACHELOR

Rutger Jewett, the New York publisher, said at a dinner of the Dutch Treat club, of which he is secretary:

"There ought to be an annual Father's day, and the movies ought to give us a couple of hundred father-love films, the same as they gave us all those mother-love films three or four years ago. Though a bachelor. I know whereof I speak.

"Paterfamilias! Poor paterfamilias!

"One afternoon I was sitting in a hot office talking to a fat, pale perspiring publisher of middle age when a sunburnt young fellow in pinkish oxford bags and a blue jacket with brass buttons hustled in. He was smoking a cigarette in a 10-inch amber tube.

"'Well, dad,' he said cheerily. 'I'm just up from the shore, and I thought I'd run in and say hello.'

"The fat, pale man mopped his wet forehead.

"'Sorry, boy,' he said, 'but your sister walked off with all my cash half an hour ago. On her way down to the shore she just ran in to say good-by.'"

PLANTS KEPT BUSY TURNING OUT RAYON

"The giant plants erected during the war to provide explosives, with which we attempted to make political democracy safe in Europe, are now producing rayon to make social democracy secure on American Main streets," points out Lucile Leech in an article in Liberty.

"It may be next to impossible to find admitted rayon stockings in the store," the writer explains, "but the deadly statistics disclose these facts—America leads the world in the consumption of both natural and artificial silk. The use of both is increasing by millions of pounds year by year, and the two products are running neck and neck in both production and consumption.

"American plants this year will produce 70,000,000 pounds of the silklike fabric, mostly from wood pulp; some from cotton linters and refuse. We import about 5,500,000 pounds a year for domestic consumption Twenty eight per cent of rayon is used in hosiery, 18 per cent mixed with natural silk goods, 15 per cent for underwear, and 10 per cent for sports sweaters.

Unwelcome Serenade

They were jolly good fellows, all seven of them—at least they felt that way at three o'clock in the morning following an old-fashioned soiree in New York. To wind up a perfect evening they decided to serenade the fair lady of one love-sick member With voices loud but not altogether clean the male septet parked below a window and raised their faces to heaven in their fervor After the impromptu concert the gentlemen found themselves in the custody of the law--they had serenaded under a window of the dormitory of a police station where a weary bachelor cop was trying to get some sleep.—Exchange.

Novel by Phonograph

Now a phonograph can "read aloud" to you a full length novel, if you wish Or it can give you an entire congressional debate. An English radio concern announces that one of its engineers has developed a process to record a whole novel on six double faced, twelve-inch phonograph records Each record "reads" to you for forty minutes, at normal speed. They are of greatest benefit to blind persons.—Popular Science Monthly.

Family Secret

Some one asked little Barbara Stern, daughter of the Big U's business manager, the meaning of the quotation, "For men must work and women must weep."

The little girl thought it over for a moment and replied: "It means that the poor man has to work all day and get the money and then his wife has to cry all night and get it away from him. "But," she added as an afterthought, "my daddy isn't like that."

Exterminating Coyotes

Nebraska farmers are raiding coyote dens with wolf hounds to kill off the puppies. The numerous spring crop if allowed to mature would result in a great loss of chickens, turkeys, and young stock. As many as 12 pups have been found in a den And the dens are not hard to find because of the presence of chicken and rabbit bones at the entrances.—Capper's Weekly.

High Finance

"I keep on reading about capital and labor, but I never understand about it."

"That's simple. You give me $10; that's the capital."

"And the labor?"

"That's what you have getting it back from me."—Madrid De Excelsior

Had Her There

"Willie," whispered his mother in church "how many times do I have to tell you one must keep one's eyes closed during the prayer?"

"Well, mother," replied Willie, "how do you know I don't?"—Boston Transcript.

NEWS REVIEW OF CURRENT EVENTS

Reed Headquarters Opened —Plain Facts for the Latin Americans.

By EDWARD W. PICKARD

JAMES A. REED, senior senator from Missouri, is now a fully developed candidate for the Democratic nomination for President. With his full knowledge and consent, campaign headquarters have been opened in the Washington hotel in which he resides, and Lee Meriwether of St. Louis, in charge, has issued a statement likening Reed to Andrew Jackson and setting forth some of the reasons why the Democrats should nominate him at the Houston convention. In telling how the senator stands on various issues Mr. Meriwether was silent concerning prohibition. Mr. Reed is known to be a wet, but he insists that prohibition is not properly a partisan question. His friends believe that, by keeping that issue in the background, he may be found to be a good compromise candidate in case Al Smith encounters as large and determined an opposition as he did in 1024.

With the exception of this Reed boom and the Heflin outbursts in the senate the progress of Al Smith toward the nomination seems not seriously impeded. His supporters grow more confident daily, and the Democratic drys have yet to find an available opponent. Many of them are apparently disposed to accept Smith's assurances that he is an upholder of the Constitution in its entirety. In New York they are debating whether or not it would be wise for the governor to attend the convention. Jesse Jones of Houston is being talked of as Smith's running mate.

Hoover and Lowden are racing hard for the Republican nomination, with Curtis, Willis and others trailing. The Illinoisan still depends largely on the farm relief issue, insisting that the McNary-Haugen measure must be passed and that the equalization fee feature must not be omitted. His critics think perhaps his platform is too narrow and its main plank too shaky.

Senator Borah of Idaho, who thinks the Republican platform should contain a strong plank on prohibition enforcement, announced some time ago that he would question every candidate on his stand on prohibition. The first to be quizzed and to reply was Senator Curtis of Kansas. In a letter to Borah he said:

"While I have no desire to dictate what shall be in the next national Republican platform, I, personally, favor a plank referring to the Eighteenth amendment and the laws enacted to carry it into effect and I favor the plank pledging the nomination to a fair, vigorous and faithful enforcement of them. In my opinion, it is the greatest moral issue of all ages and public sentiment demands that both of the political parties declare themselves unequivocally upon it.

"Should I be nominated and elected President, I favor meeting the issue squarely and believe in the strict and energetic enforcement of the laws to carry out the Constitutional amendment.

"I am opposed to a policy which will allow any state to determine for itself the alcoholic content of beverages to be manufactured, sold, and transported throughout the country."

In Wisconsin the La Follette radicals have indorsed Senator Norris of Nebraska for President and adopted a platform containing a plank calling for 2.75 per cent beer, despite the fact that Norris is a confirmed dry. Lowden's name also will be placed on the Republican preferential ballot in Wisconsin next April, and probably that of Hoover.

REPUBLICAN wets in the senate have made a practice of nagging the Democratic Southern drys concerning the nonenforcement in the South of the Fourteenth and Fifteenth amendments to the Constitution. Last week Senator Swanson of Virginia deemed the time had come to reply, and he delivered a long prepared speech defending the Southern states in this matter. He denied that they are violating the Fifteenth amendment prohibiting the states from denying or abridging the right of citizens to vote "on account of race, color, or previous condition of servitude." Admitting that many negroes have been eliminated as voters, he asserted that this has resulted from imposition of educational and property qualifications, requirements as to length of residence, and payment of poll taxes. All of these regulations have been sustained by the courts as within the provisions of the Fifteenth amendment, he declared.

Lively debate followed, Senator Bruce of Maryland, a Democratic wet leader, insisting that the Southern states have evaded the Fifteenth amendment, whether within or without the authority of the Constitution, and that the situation is comparable with that existing under the Eighteenth amendment applying to prohibition. "It seems to me," he said, "that we who are opposed to the Eighteenth amendment ought to be permitted to apply the same ingenuity, not to say chicanery, to evade its provisions."

Senator Glass of Virginia supported the position of Senator Swanson, and Senator Borah rose to state that careful study of the laws of the Southern states had convinced him none of them violated the Fifteenth amendment.

Heflin the irrepressible amused the packed senate galleries by another tirade against the Catholic church whose agents, he declared, had threatened to poison him. He also denounced some of the newspaper men in the press gallery as "squirrel-headed and cowardly pen pushers."

PRESIDENT COSGRAVE of the Irish Free State, after a swift trip to Chicago, spent several busy days in Washington as the guest of the government. Formal calls were exchanged with President Coolidge and other high officials, and on Wednesday Mr. Cosgrave was received with extraordinary honors on the floors of the house of representatives and the senate. Speaker Longworth and Vice President Dawes announced his coming in each house and all the members were introduced and shook his hand. Mr. Cosgrave said he considered this the greatest honor paid to Ireland in all the ages. Before going to the capitol, he laid a wreath on the tomb of the Unknown Soldier, and also visited Mount Vernon and spent hours inspecting the Washington relics. On the stone coffin of the first President he placed a handsome wreath tied with the Irish national colors.

CHARLES EVANS HUGHES, head of the United States delegation in Havana, has politely but flatly told the Pan-American conference the position of his government on matters that have aroused criticism. He said that the United States has no imperialistic aims anywhere in Latin America and intends to withdraw from Nicaragua and Haiti as soon as order and something like a stable government have been established. But he made it plain that we propose to continue to dominate the area about the Panama and Nicaragua canal routes; that we will not let the Pan-American union be made into a political institution, and that we will enter no international combination that claims a right to interfere in what the United States considers its personal affairs. Several moves contravening these principles already have been headed off by Mr. Hughes and his colleagues, and now it looks as if in the main they will be indorsed or let alone by the conference. To the committee on reorganization of the Pan-American union Doctor Pueyrredon of Argentina proposed that there be compulsory tariff reciprocity among the American countries, this being aimed mainly at our high tariff policy, and when the plan met strong opposition he declared he would not sign the reorganization convention without it. Mexico proposed that the chairmanship of the governing board be rotated so that the United States should hold the position only once in twenty-one years, but this idea had little support in the committee.

MAJOR GENERAL LEJEUNE, commandant of the marine corps, made an airplane inspection of the part of northern Nicaragua that has been infested with Sandino's rebels, and returned to Managua hopeful that there would be no further bloodshed. The bandits seemed to be dispersed, and Major Young's column of marines occupied their base at El Chipote from which they were dislodged recently by air attacks. The marines were still searching for Sandino himself but his whereabouts were unknown. The Nicaraguan government heard he had been reinforced by a considerable number of well armed men from the east coast. Brig. Gen. Frank McCoy, appointed to supervise the Nicaraguan elections, has arrived at Managua.

RESTED and refreshed by days of hunting and fishing, Col. Charles A. Lindbergh on Thursday resumed his good will tour of Latin America, hopping off from France field, Colon, for Cartagena, Colombia. He had intended to start Friday and fly direct to Bogata, but suddenly changed his plans. His route takes him from Bogata to Caracas, Venezuela, and thence to St. Thomas, Porto Rico, Santo Domingo, Haiti and Havana, reaching the Cuban city on February 8. The French flyers, Costes and Lebrix, who reached Panama while Lindbergh was there, made a quick flight to Venezuela and Barranquilla, Colombia, before starting for the United States.

Bert Acosta, transatlantic flyer, got into trouble last week. First a warrant for his arrest was issued at Hackensack, N. J., for taking away a plane which had been attached by the sheriff, and then in Naugatuck, Conn., he was sentenced to jail for flying too low over the town.

MAHLON T. EVERHART, son-in-law of Albert B. Fall, finally has told the senate public lands committee about the Liberty bonds in the Teapot Dome case. He testified that Harry F. Sinclair gave the then secretary of the interior the $230,500 in Liberty bonds found in Fall's bank account soon after Sinclair's Mammoth Oil company obtained from Fall a lease on the navy's oil reserve. He said they were ostensibly payment for a one-third interest in the reorganized Tres Ritos Cattle and Land company owned by Fall and Mrs. Everhart. Everhart's testimony flatly opposed the frequent assertions of Sinclair's counsel that the latter knew nothing of the bonds and received none of the profits of the famous Continental Trading company, Ltd., transaction. Everhart gave a lot of testimony that in the aggregate seemed damaging to Fall and Sinclair.

WAR alarmists among the officers of the army and navy are urged by President Coolidge to be more moderate in their statements, for he thinks their predictions of hostilities and their other propaganda in favor of larger defense appropriations are damaging to international relations. He sees no way of curbing such officers short of officially muzzling them, and this he believes would cause general protest throughout the nation. In putting forth these views the President alluded especially to a statement attributed to Rear Admiral Plunkett in New York to the effect that war between the United States and her commercial competitors was inevitable. Mr. Coolidge holds that there is no serious threat of attack from any foreign government and that of course the United States has no hostile attitude toward any other nation. Admiral Plunkett's statement was severely criticized abroad, especially in England. The Soviet Russians took it for granted that he meant Great Britain and rather think that an Anglo-American war is imminent, with a row over oil as the immediate cause.

There were indications that the house committee on naval affairs would not sanction the huge naval building program for which Secretary Wilbur and the admirals have been arguing.

MAJ. GEN. GEORGE W. GOETHALS, builder of the Panama canal and first governor of the Canal zone, died in New York after a long illness, deeply mourned by a host of friends and admirers. His body was interred at West Point, where he was graduated in 1880.

Lincoln's Last Public Address—

"We meet this evening not in sorrow, but in gladness of heart. The evacuation of Petersburg and Richmond, the surrender of the principal insurgent army, give hope of a righteous and speedy peace, whose joyous expression cannot be restrained. In the midst of this, however, He from whom all blessings flow must not be forgotten. Nor must those whose harder part give us the cause of rejoicing be overlooked; their honors must not be parceled out with others.

"I myself was near the front, and had the high pleasure of transmitting the good news to you; but no part of the honor, for plan or execution, is mine. To General Grant, his skillful officers and brave men, all belongs."

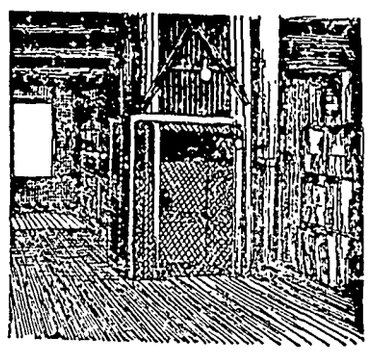
(Remarks on April 11, 1865, to a gathering at the White House on the fall of Richmond.)

Proof That Lincoln Weighed His Words

The boxes upon boxes of Abraham Lincoln's papers now safely stored away in the Congressional library at Washington are said to bear evidence that the emancipator sought solitude for his thoughts as he walked. Although these papers have been closed to further perusal for 20 years, a few men were privileged to view them just before the death of Robert Todd Lincoln, his son. The papers show Lincoln's method, the development of his ideas, and the fact that his most famous addresses were rephrased and rewritten sometimes four or five times.

The solitude on his hikes gave him the ideas for his famed addresses He would stop in his walk and reach in his coat pocket for note paper. If he found none, he would take an envelope from one of his letters, tear the ends open and turn it inside out. On this he would write his idea. If he continued walking, perhaps a second envelope and sometimes a third would be used. Then, back at his desk the notation was pasted at the top of a sheet of foolscap. Beneath it he developed his idea. Hundreds of foolscap notes with such pieces of envelopes attached are among his papers. Sometimes he made as high as five revisions of the original development of his idea.

Tragic Spot Hidden



Files hide the spot where Abraham Lincoln was fatally shot at Ford's theater on April 14, 1865. The old playhouse is now used as a government storeroom. The boxes and stage have long since disappeared.

Incident in Lincoln's Quest for Education

An instance of the indomitable determination of Abraham Lincoln to get the best education possible is told by Dr. William E. Barton in an article in Liberty in which he draws a comparison between Lincoln and George Washington. "Lincoln's eminence in the matter of his education grows upon us," Doctor Barton writes, "when we remember his subsequent attempts to make good, in part, the disadvantages of his early preparation. There is nothing in the career of George Washington that can be cited as a parallel for the way in which Lincoln studied law in Salem, nor for the way in which, after his term of congress, and at the age of forty, he mastered Euclid and the Elements of Logic.

"When John Locke Scripps wrote his campaign Life of Lincoln, in 1860," Doctor Barton continues, "he enumerated Plutarch's Lives among the books that Lincoln had read. Lincoln had not read that work, but, deeming the inclusion of the title in the list of his supposed accomplishments an indication that he ought to have read it, he did not correct the proof, but obtained the four volumes and read them."

POULTRY FACTS

GROUND WHEAT IS GOOD FOR LAYERS

Poultrymen with home-grown wheat can often use ground wheat in the laying mash with good results. It saves buying broth bran and middlings. The best results come from substituting 150 pounds of ground wheat and 50 pounds of bran for the 100 pounds of bran, plus 100 pounds of middlings. A good home-grown laying mash can be made of 100 pounds of ground corn, 100 pounds of ground oats, 150 pounds of ground wheat, 50 pounds of bran, and 100 pounds of meat scrap.

When plenty of skim milk or buttermilk is available, the amount of meat scrap in the mash can be reduced one-half. In that way the farmer raising wheat, corn, oats and milk, can make up 500 pounds of laying mash by purchasing 50 pounds of meat scrap and 50 pounds of bran.

The home-grown mash is greatly improved by adding minerals in the form of 2 per cent ground limestone, 2 per cent bone meal, and 1 per cent fine table salt. The use of minerals tends to improve the strength and quality of the egg shells, thus avoiding the egg-eating habit in the flock, as well as the production of soft-shelled eggs. Some poultrymen believe that more minerals and less meat scrap will be the tendency in making egg mashes within a few years. Their cost per pound is so small, considering their value, that they should not be omitted from the home-made mashes.

Blindness in Ducks Is Blamed on Impure Water

When ducks have access to a lake, pond or river there are no cases of sore festering eyes which later may develop into blindness. The birds dip their heads deep into the water and the eyes are cleansed of any dirt or sticky feed that has adhered to them.

Ducks without a natural supply of water should be given their drinking water in deep dishes or crocks so that they can rinse out their eyes whenever they drink. This also tends to rinse the nostrils and prevents the clogging with feed which is serious if the bird catches cold about the same time.

Ducklings sometimes have colds which cause a sticky discharge from the eyes. The mucus can be absorbed with small wads of tissue paper and the eyes washed with witch hazel or boric acid solution. Deep drinking dishes will help the bird to take care of its eyes and nostrils and probably prevent the necessity of treatment.

Soft-Shelled Eggs Are Caused by Wrong Feed

Probably one of the most annoying things in the poultry business is the frequent laying of soft-shelled eggs by a group of hens, or even only one hen It is a sign that something is unprofitably and radically wrong with the hens—something that should be righted immediately. And as for the eggs themselves, they are perfectly useless and merely represent a loss in good food.

In nine cases out of ten, a hen lays soft-shelled eggs because there is a lack of lime in her diet. This mineral is really pure egg-shell material. Therefore, its absence from the diet results in either thin-shelled eggs or eggs with no shell at all. Of course, calcium carbonate is generally present in the food and water given to the hen, but there is seldom enough to satisfy her needs.

Poultry Notes

The feeding of milk will help in the size and quality of egg.

* * *

Eggs should never be washed—washing spoils their keeping qualities.

* * *

Poultry meat has never been so low in price as to be unprofitable. Cull your flocks closely and cash in. Quit feeding the non-producers.

* * *

Poultry keepers who have used the all-mash method of feeding chicks and growing pullets may continue the method for laying pullets.

* * *

One of the advantages of the shed roof type of poultry house is that it is easier to keep warm. Any room with a high ceiling is likely to be drafty.

* * *

Tankage or sour milk must be fed if eggs are to be produced in satisfactory quantities. Too many hens are not laying simply because the farmer will not help them lay.

* * *

Electric lights may be used to advantage. A warm moist mash fed in the evening, especially in cold weather, may prove beneficial.

* * *

If chickens begin eating their eggs it is usually because they need starch Purchase bulk laundry starch and put it in a dish in the coop.

* * *

Some hens do not eat enough oyster shell. The 2 per cent limestone helps to prevent soft-shelled eggs and the leg weakness which sometimes bothers hens in the spring.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton. Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl. St. Croix' jealousy is aroused by Meely's report of an aged suitor for her hand.

CHAPTER III—Continued

—7—

"I'll hide 'em good away," she said shyly. "I'd like to leave 'em all taste for, at home, but it would look suspicious!"

"I want a reward!" he said.

She drew back a bit; but he suddenly snatched her face firmly between his two hands and brought his lips to hers—almost. With a wrench of her head she averted the contact, but his touch, as usual, met only her burning cheek instead of her rosy mouth.

"You always kiss me so onexpectedly!" she said breathlessly, looking relieved and almost frightened. "I wish you wouldn't always get me so upset!"

"Meely!" He took hold of her shoulders and turned her right about face. "You're going to hold perfectly still and let me kiss you right—on—your—lips!"

She tried to pull herself free, but he held her in a relentless grip. "Hold still!"

"I won't!" she snapped, holding her face averted. "Le' me be! Please let me be, Mr. Creighton!"

"Meely! Why don't you ever let me kiss you on the mouth?"

She hung her head and answered shyly, "My lips is for the man I marry!"

"But, Meely, my girl, you must know," he said in a low voice in which his suppressed passion quivered, "that I want much more than your lips! Or why, my dear, would I be spending so much time with you?"

"Ach!" She raised a radiant, sparkling face to his. "Do you want to marry me, Mr. Creighton?"

His hands fell from her shoulders; he turned from her and bent his eyes to the ground.

"Ach," she apologized humbly, "that time I guess I went too far! But, Mr. Creighton, what is it, then, you want?"

He turned again and looked at her. "Meely! I'm d—d if I know whether you're as innocent and ignorant as an angel or as deep as hell.

"You and I both know, my dear little girl, that we're not spending all these hours together, week after week, for the pleasure of each other's conversation!"

She shook her head hopelessly. "It's always wondered me why you want to get 'round talkin' to a dumb thing like me, so oneducated as what I am, and ignorant like you say angels is—"

"Why do you pretend not to know why it is?" His voice was a little thick and husky; his hand hot which clasped her cool one lying in her lap.

The innocence of a new-born babe was in the eyes she raised to his. "Deedn't I don't. Why do you?" But before the burning hunger of his eyes she recoiled; and drawing her hand from his clasp, she rose hastily and walked away.

"Meely!" he called.

Slowly she turned and came back to him; and with a childishly obvious effort to divert his attention from herself, she spoke to him ingratiatingly of what she felt sure would have that effect. "Ach, Mr. Creighton, did you know your brother is livin' right on our farm with our hard man and his wife?"

"With your hired man!" St. Croix exclaimed, an angry flush covering face and neck. "Living with him! He would!" he added bitterly. "That's the sort of society he seems to prefer—farm hands and miners!"

"And you, too," said Meely, with her ingratiating smile, "like low-down as I ain't? It must run in your family."

"If you're referring to yourself as 'low-down,' kindly don't do it again—it is unsuiting to my taste!" He drew her roughly to him and she nestled in his embrace.

"Now tell me," she coaxed, "about yonr brother. He ain't the swell gen'leman you are, is he?"

"He doesn't know you, does he?"

"Not yet."

"But," said St. Croix anxiously, "he's bound to meet you, of course?"

"I guess mebby."

"Don't give us away—our meeting up here!"

"Ach, no, for my Pop would kill me if he knowed—have knew. But it does wonder me, Mr. Creighton, that your brother would board at Absalom Puntz', as common as what they are yet! My land's sakes alive! Why does he do it? Why don't he live at his own home with yous?"

"None of your business, my dear!" She pouted. "I'll get it out of Absalom's missus, then. Or I'll meet up with your brother hisself at Absalom's and get it out of him."

"Oh, no, you won't ask him!" St. Croix shrugged. "People don't ask my brother Marvin impertinent questions!"

"Is he so proud, too, like you?"

"His pride," St. Croix sneered, "takes another form than that of the rest of the family! His 'pride' won't let him live, he says, on the 'charity of miners'!—won't let him take more than six per cent interest on our invested capital!—insisting that all the rest should be turned over to the miners and to the upkeep and safeguarding of the industry! Talks d—d rot like that! Bolshevism! That's what it is! D—d Bolsshevism!"

"Is it? Why, I didn't know Bolshevism was so nice and kind and generous like that! I thought they was a lot of cut-throats, them Bolshevists."

"So they are! The poor cutting the throats of the rich to make themselves rich!"

"But your brother ain't poor."

"He and all of us would be if we ran the mines as he thinks they should be run! If he ever does come

She Hung Her Head and Answered Shyly, "My Lips Is for the Man I Marry!"

into his share of the mines he'll ruin the whole business, his share and mine, too, d—n him! Oh, don't let's talk of him! My father and I see red at the sound of his name!"

"And your mother, too?"

"He's breaking her heart!" St. Croix said with sincere feeling. "Disgracing the family by living with common laborers! Turning school-teacher! Making us the talk of the whole state! It's almost killing my mother!"

"But," Meely protested, puzzled, "I can't see he's doin' anything bad! It's just that he wants to act kinder to other ones than any of yous wants to."

"It's his quarreling with my father and leaving home that hurts my mother so, and makes her suffer!"

"Why's he so different to what yous all are? Why ain't he greedy, too, to hog all for hisself?" she sweetly asked.

"We're not 'hogging all' for ourselves! Do you know what we pay annually to the people who work for us?" He named a hugely impressive sum. "And you talk about our 'hogging all' for ourselves!"

"But why does your brother talk that way, then, if it ain't? What makes him different to yous?" she persisted.

"Oh, from the time he was a kid he's argued with my father about the management of the mines and the way the miners' families have been housed and paid. And at times of strikes he'd howl 'round at sight of the women and children looking starved. And just recently, when a miner who'd worked for us for twenty years was killed and his widow and children had to vacate their cottage, Marvin raised h—l! Wanted her pensioned; wanted Father to give her the house she'd lived in for twenty years; wanted him to educate her children—all softs of things that would have established the worst sort of precedent." St. Croix paused, realizing he was using words beyond her range.

But she answered, "Do you call the Golden Rule in business the worst sort of—"

She, in her turn, stopped short—and hastily changed the subject. "But I guess your brother'll soon have to find another boarding place, for Absalom's soon moving to town. So, then, when Absalom moves, mebby the new farm hand Pop hars won't take your brother to board. And mebby," said Meely suddenly, "my Pop might take him! Say, wouldn't that be a scream, Mr. Creighton?"

St. Croix privately decided that in the face of such a contingency his only prudent course would be to put an end to these sweet secret meetings with Meely; for the Creighton family had learned to their cost that Marvin's eccentric conscience was a thing to be reckoned with.

But even as he came to this decision he realized that it could not be done. He could not give up this girl. At whatever cost short of marrying her (that, of course, an impossibility) he would have her; and the cost, in view of his present delicate position in relation to his English cousin, might prove high indeed! But he would pay it rather than give her up!

He was not used to giving up things. His self-control was flabby from lack of exercise.

It never occurred to him that when he was quite ready to take the girl she would not readily come to him. Had he all along supposed her to be a "virtuous" maiden, he would not, at this moment, be here in this spot with her. But although he was not a despoiler of virtue, a man without heart or conscience, he certainly was not above accepting such gifts of life as the gods vouchsafed to him.

St. Croix' conscience, though not troubled as to his relation with Meely, was by no means at peace when he thought of the cousin whom he hoped to marry. He sentimentally felt that to go to his bride straight from a love affair with a "common" girl like Meely would be to wrong her (not Meely, but the bride) and the struggle that went on in his soul between his ideal of what the bridegroom of a high-born and immaculate lady should be and his compelling infatuation for the farm girl was at times bitter and devastating.

But there was never any real doubt in his mind as to which side in that struggle would win.

CHAPTER IV

Meely knew just enough about the profession of teaching to know that she knew shockingly little about it; and her dread, therefore, of the county superintendent's impending visit to her school was a sword over her head.

"If I only knew what he expects (or hopes) to find me doing when he comes, I'd be doing it or making a bluff at doing it!"

She knew that to a professional teacher her methods must seem grotesquely unprofessional, being based on the same principle as that by which she lived most of her life—or tried to; that principle being the imperative need to extract all the entertainment possible from any situation in which you found yourself. So she worked really very hard to make her days in her schoolroom yield entertainment, first to herself, and secondly to forty rather bucolic children of all ages and sects (Amish, New and Old Mennonites, Dunkards) who filled her school. A few vigorous and tiresome hours were devoted to drilling in geography, multiplication tables, grammar, spelling (she suspected that the way she did that drilling would have made any real pedagogue shudder) and the rest of the time was delightfully spent in teaching what she, not the school trustees, thought children ought to know—fairy stories, poems, plays.

(TO BE CONTINUED.)

Early Cradle Formed From Hollowed Log

Cradles, in their earliest form, were merely logs, scooped out to form more or less comfortable resting places for babies. They were without rockers, since the natural shape of the logs made their use unnecessary. Cradles have varied with different modes of living and reflect in their diversity of form and adornment the progress of the cabinetmaker's art. The Romans are said to have used cradles of considerable refinement, but after the decline of the empire, accompanied as it was with the decay of living, the cradle, with other furniture forms, assumed a crude and humble aspect. One of the early forms of the cradle was the oaken chest without a lid. Baskets of osiers were sometimes used, in which the child, wrapped in swaddling clothes, was placed. The American cradle of oak in the Metropolitan museum in New York dates from the early Seventeenth century. Fabulous wealth and the skill of the greatest craftsmen have been lavished on the cradles of royal children throughout history. These important beds have been gilded and carved, intricately inlaid with gold and gems, upholstered in the choicest silks and fitted with the most sumptuous of coverings of velvet and fur.—Dorothy Bent, in Art and Decoration.

Appropriated Motto

"Ich dien" is a German phrase, meaning literally "I serve." It was originally the motto of John, the blind king of Bohemia, who served in the army of the king of France and was slain in the battle of Crecy, 1346. The victorious English army was led by Edward the Black Prince, who appropriated the motto, which since that time has been the motto of the prince of Wales.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton. Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl. St. Croix' jealousy is aroused by Meely's report of an aged suitor for her hand. The girl cleverly decoys him into admitting he has no intention of marrying her.

CHAPTER IV—Continued

—8—

Ever since Mr. Schwenckton had warned her that the superintendent would be visiting her school, she had gone cautiously; had been ready, at an instant's warning, to have the children suddenly busy at the blackboard "doing tables" or something like that. But as ill luck would have it, it was on the very afternoon of his visit that she had become so entrancingly engrossed in her wide departure from "prescribed branches" that she never heard his knock on the schoolroom door, never saw him enter!—and God only knew how long he had been standing there watching her wild performance, when suddenly the faces of the children warned her. Her back was toward the door at the moment, but she did not have to turn to know he was standing there! Horror of horrors! That he should have caught her at such a moment as this, after all her precautions! She was so stunned with embarrassment she could not have turned around if her life had been the forfeit for not doing so!

Pretending to be unaware of his presence, she moved stiffly to the edge of the platform and spoke faintly, directing the several grades to the orthodox blackboard or tablet work with which she had planned to propitiate him on his visit—though she knew she was just several minutes too late, now, to deceive him. She'd been caught red-handed—oh, oh!

Seating herself at her desk, her back still toward him, she awaited his approach. But he did not come. A hope leapt up in her heart that she had been mistaken. But she was still too terrified to look around.

A step on the platform just back of her chair—and she barely suppressed a shriek.

He stood before her, hat and gloves in one hand, the other held out to her.

Blindly she rose and gave him her own, not daring to look up and meet his eye.

As she did not invite him to be seated, he had to take care of himself. "With your permission?" he said as he drew a chair forward and, motioning her to be reseated, sat down at her side—and she realized with fresh embarrassment her remissness in schoolroom hospitality.

Laying his hat and gloves on the desk, he leaned back comfortably, as though settling himself to stay a while, folded his arms and—waited.

Heavens!—what was she expected to do? Perform pedagogically for his inspection, no doubt. Well, she couldn't; she wouldn't try! But just to sit here— Ought she converse with him, entertain him? She stole a swift side glance at him. His eyes were thoughtfully contemplating the schoolroom. She might pretend ignorance of who he was; take him for a parent visiting the school.

But her protracted silence seemed to give him an idea. "Perhaps I must introduce myself? Mr. Creighton, your superintendent."

"Well, I cannot tell a lie and say I'm glad to see you!" she hysterically brought out, "for I'm not!"

He grinned. They all hated his visits, the county teachers, but they did not, as a general thing, frankly shriek at him! On the contrary! Palavered over him, flattered him, pretended to be pleased to death to see him.

"Why?" he asked. "Got a guilty conscience?"

She repressed a start. A guilty conscience she certainly did have and with good reason, but he could not know that reason. What a cultivated voice he had—like St. Croix'—but with a grave thoughtfulness in his tone that interested her. She took a bit of comfort from the twinkle in his eyes. His difference from St. Croix was conspicuous enough—here was no air of superiority, no self-consciousness; but an offhand directness which took it for granted that he was on your level, rather than that he accepted you on his. He impressed her on sight as being genuine.

"I can't teach before you!" she exclaimed, as though accusing him of our famous American "moral turpitude." "I just can't and that's all there is about it!" (She made an effort to pronounce her a's as in air rather than as in art, as her natural speech, she knew, would seem highly unnatural for a Kutztown Normal school graduate and a teacher in this vicinity.)

"But—" He turned in his chair and faced her. Such an unprofessional mien as this he had not encountered in any schoolroom of the county. "I understand, Miss Schwenckton, that you are a graduate of Kutztown Normal school. Then you ought to know a lot more about this business of teaching than I do! I'm not a Kutztown Normal graduate."

She had nothing to answer. She almost hung her head, furious at her helpless stupidity; St. Croix had never put her to such confusion—

"You are a normal school graduate, aren't you?"

She slightly nodded. She had never in the least minded telling lies to St. Croix.

He regarded her doubtfully and if she could have read his mind, she would have had another cause for uneasiness; for his brief experience as

"I Can't Teach Before You!" She Exclaimed, as Though Accusing Him of Our Famous American "Moral Turpitude."

county superintendent had taught him that what normal school graduates did not know about pedagogy was negligible; their superiority and their awareness of it, their poise, their condescending pity toward the unfortunate teachers who were not normal school graduates, he had found a little oppressive. Meely did not know it, but she was behaving more like the frightened, uncertain nongraduates that were mere certificate holders who had managed to pass the county superintendent's examination than like the self-confident Kutztown graduates who were not required to take that examination.

He sat back again and folded his arms with an air of determination. "I'm here to hear you teach," he said firmly. "Please call a class and teach!"

"You teach them something," she brightly suggested. "Oh!" she exclaimed hopefully, "don't you want to make a speech to them?" (She knew how men loved making speeches; loved the sound of their own voices before an audience.)

"That's not what I'm here for," he returned. "I don't want to interrupt your program—what were you doing when I came in? Proceed with that."

"I—I can't!"

"But I only want to see you in your usual routine—"

"I—I was breaking the usual routine—"

"From what I observed as I entered, I must say I'm glad it was only a breaking of the usual routine! Now, will you call a class in—er—geography, we'll say?"

"You'd laugh at me."

"But look here! Will you tell me what you do here all day if you don't teach?"

"Oh, I do teach—of kaws—courrse I teach! But you see"—she suddenly picked up courage and launched forth—"I have my own original way of teaching—and if you're the conventional school man, originality would be highly offensive to you."

"Now you make me very curious! Let's have a sample of this originality!"

"You see, I hold that children should be taught," she discoursed airily, adopting somewhat the tone of a platform lecturer, "what is for their immediate use and pleasure, rather than for the future, for only so will they grow. You don't grow by what you store up, but by what you use and assimilate. So I—"

"Wait! Is this your own, or recited from some textbook of modern pedagogy?"

"Entirely my own that I've forged out for myself—though others may also have forged it out—that I can't say. The goal which I set before my pupils is not marks and grades, but knowledge."

"Excellent! Knowledge of what, for instance?"

"Of whatever interests them. They're not much interested in arithmetic and grammar and spelling. You can interest them in science, history, geography (geography only when taught entertainingly, as I teach it), poetry, stories, plays—"

"Sounds so good, I think I'll come to school to you! Do call up a geography class."

"I don't know so much about geography, really—do you know," she smiled, "until quite recently I thought the North and South of the Civil war here in the United States were divided by the Mississippi river! I—"

She stopped short in dismay—now she had given herself away! No American on earth had ever supposed such a thing as that!

"My sense of direction," she murmured with a nervous laugh, "was always weak! I—"

No use—you couldn't explain away such lunacy. Might as well keep quiet and let him draw what conclusions he would.

He made no comment. He had given her one swift, penetrating glance; but at her obviously painful embarrassment had mercifully looked away.

"Kindly call up a geography class," he urged after a moment, in a tone which, though courteous, was a command.

"I'd rather not, if you'll kindly excuse me. The one thing these children seem to need," she said, reverting to her lecture-platform tone in her effort to divert him from his yearning to hear her teach geography, "is to have their imaginations roused. Before I came they didn't know the commonest, most familiar stories—Cinderella, Jack, the Giant Killer, Arabian Nights. Imagine American children so benighted! Those children knew all the multiplication tables and all the capitals of the 37 states—"

"Forty-seven."

"I mean forty-seven, of kaws—courrse—though strict accuracy in unimportant details always did strike me as rather a fault than a virtue in a teacher, for a good teacher should have a mind above insignificant facts—"

"Ten of these United States is not an 'insignificant fact,' exactly. I'm afraid I must insist, Miss Schwenckton, upon your calling a geography class. Everything you say makes me more and more eager every minute to hear you teach a class in the geography of the United States."

"I'm sorry not to oblige you, Mr. Creighton. I'll be very glad to allow you to examine the blackboard work—you'll find it quite creditable—"

"But this, Miss Schwenckton, is insubordination! Remember I'm your superior officer!"

(TO BE CONTINUED.)

Took Roundabout Trip to Escape Pursuers

One of the unnamed heroes of the South in the Civil war staged an unusual exploit that is still one of the most interesting traditions of Mobile bay. While the federal fleet lay off Fort Morgan, this Southern sailor, out in a small sailboat, was chased by some of the enemy boats. Seeing them trying to intercept him he used all his sail power and nautical skill and headed eastward. For miles the chase continued and he left his pursuers behind. However, he knew they would be watching for him to return, so he kept on to the east, sailing to Appalachicola, Fla., where he loaded his craft on a river steamer and made a trip of several days up the Chattahoochee to Columbus, Ga. There he transferred to a train for Opelika, then to Montgomery, Ala. At that point he changed cars for Hurricane, Ala., taking his boat along, and at Hurricane he launched his craft in the Tensaw river. He sailed down the river to Mobile bay and then down the bay some 30 miles to Fort Morgan. His comrades were dumbfounded when they saw him arrive from a direction opposite to that in which he had left.—Detroit News.

Most Lasting Timber

It takes between 100 and 200 years for a teak tree to reach a height of 50 feet. But teakwood makes perhaps the most lasting lumber known. The teak tree is "the most important tree in the commerce of Siam."

In Mexico men and women in the same social circle call each other by their Christian names.

Some of the ex-high school basket ball players have gotten together and organized a town team. They are having their first practice this evening and will go to Rowan Friday night and play that town team as a preliminary to the Klemme and Rowan high school game.

Mr. and Mrs. Emil Patet and Kenneth have moved into the Henry Griewe residence in the south part of the town. They moved their house hold goods the latter part of the week. The Patet's have beene residing in the house on the corner east of the park.

Florence Stokesbary, winner in the dramatic class of the sub-county declamatory contest held here Tuesday evening, and Marie Carson, winner in the humorous class, will go to Garner next Tuesday night to compete in the county contest. The contest held here Tuesday night decided the winners in the east part of the county who are to meet the winners from the west part of the county for final honors. Raymond Barz took second place here in the oratorical. Klemme high school fared well by receiving two first and one second place.

WOMAN EATS ONLY BABY FOOD 3 YEARS

"For 3 years I ate only baby food, everything else formed gas. Now, thanks to Adlerika, I eat evertyhing and enjoy life."—Mrs. M. Gunn.

Even the FIRST spoonful of Adlerika relieves gas on the stomach and removes astonishing amounts of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. Wilson's Pharmacy. 1tc

KARL KRAUS REPORTS ON FINE RADIO RECEPTION

Here is my best record on one night tuning, Wednes. Jan. 30 from 9:30 to after mid-night. Got 50 or more stations clear and a few I could not get out clear that had low voltage. My storage A was over two-thirds discharged. Here are a few California stations:-

KFI	Los Angeles
KFWI	San Fransisco
KPO	San Fransisco
KJA	San Fransisco
KFSD	San Diego
KHJ	Los Angeles
KLX	Oakland
KMFR	Hollywood

Other Stations Heard

KOMO	Seattle, Wash.
	Portland, Ore.
KFRC	San Fransisco
KFBV	Loraine, Wyo.
WREN	Lawrence, Kans.
KFRV	Columbia, Mo.
KHG	Spokane, Wash.
KLX	Oakland, Calif.

I had a few more but I didn't get their call letters. I had two Canadian stations, CJGX Yorktown, Saskatchewan; and Winnepeg, Manitoba Had Edmunton and Calgary some time ago.

KARL KRAUS. 1tc.

ECHOES OF EXPERIENCE

Boys who resent the commencement are in danger.

Conversion always works better than compulsion.

Worst feature of lying is that the habit grows on one.

Don't think a lot of yourself; think a lot about yourself.

One way to make both ends meet is to tie them together.

A silly woman tries to drive a man; a wise one leads him.

You can't always judge the show by the price of admission.

You have buried the hatchet, but have you buried the spade?

If a man runs into debt he must either crawl out or stay in.

Fortune is sometimes fickle, but misfortune is always sincere.

A political party goes on long after its initiatory idea has become obsolete.

Are those who complain of jealousy, always sure they haven't given cause for it?

It takes hard work to make good poetry; but another requisite is inspiration.

Look on the bright side; it will seldom be so bright that it will dazzle your eyes.

A truly polite man always listens with interest to the story he has heard a dozen times.

Some of the most amiable people you know sometimes do some tall swearing in private.

Wait for others to advance your interests and you wait until they are not worth advancing.

Westinghouse

Farm LIGHT & POWER Plant

Light that Saves ~ Power that Serves

Easy to Own

One of the things that makes the Westinghouse Light and Power Plant so desirable is the deferred-payment plan. You save the plant installed for a small percentage of its cost, running the balance comfortably.

Easy to Operate

The Westinghouse Light and Power Plant is a simply designed that any one, with a few minutes instruction, can operate it. It can be installed in a corner of the cellar, or in a out building.

THE money you now spend for kerosene alone will operate a Westinghouse Light and Power Plant. And you get *light* anywhere you want it by merely pressing a button.

You get *power*, too. Power that makes running water possible for the bath room, the kitchen sink, or out in the barn. Power with which to do the chores, indoors and out, *saving* your time and strength, as it *serves* you faithfully year after year

Would you like to know more about the Westinghouse Plant? We have a new book that tells the whole story. Want a copy?

EMIL BEIER LEADS IN C. T. A. NO. 3

BEN GOLL HAS SECOND HIGHEST HERD AVERAGE

V. A. Cook's Cow "Grannie" Continues To Get High Honors

(By Lew Niederfrank)

Three hundred thirteen cows were on test in the Hancock No. 3 Cow Testing Association in January. The Association averages, based in the 313 cows on test, 259 in milk and 54 dry, were:

Average milk ..... 632.8 lbs.
Average Fat ..... 24.34 lbs.
Average feed cost per pound of fat..... 26.36 cents.
Separator loss: ..... $4.11.

Fifty-three cows produced over 40 pounds of fat and twenty-one over 50 pounds.

Eleven cows were sold for beef.

Anyone wishing to join the Cow Testing Association for the coming year should see the local tester or some of the members of the Association. The enw year starts April 1st. It is a poor cow which is not returning a fair profit above the cost of feed with the prevailing present prices, but if butter fat lowerde in price and the prices of feeds were higher, the dairyman who had his cows culled out and feeding intelligently would still be making a good profit. If you could lower your feed cost ten cents per pound of fat produced by culling out a few cows and better feeding methods, this would be the same as if butter fat raised ten cents in price.

It is commonly thougnt that the members of the Association having the higher producing herds are putting most of the returns into expensive feeds, therefore decreasing the profits. Compare the feed costs of the following herds with your own feed costs and the Associatiosn feed cost per pound of fat.

Emil Beier Has High Herd

The highest average for herds was made by the Pure Bred Holstein hrd owned by Emil Beier of Liberty Township. This herd of 10 cows, 11 in milk, averaged 1362 pounds of milk and 46.84 pounds of fat. Butterfat was produced at an average cost of 24.04 cents. Silage, Alfalfa, ground oats, ground barley and oil meal was fed.

Ben Goll Takes Second Place

The G. H. herd owned by Ben Goll was second. Ten cows all in milk averaged 1034 pounds of milk and 37.94 pounds of fat. Feed cost per pound of fat, 19.97 cents. Silage, clover, ground oats and L. O. M. was being fed.

Other Good Herd Averages

V. A. Cook of Goodell, with his 16 P. B. and G. H., 15 in milk and one dry, made an average of 981 pounds of milk and 36.87 pounds of fat. Feed cost per pound of fat: 29.57 cents. Silage, clover, corn and cob meal, L. O. M. was fed.

Chas. Haes, of Garner, with 12 P. B. and G. H., 10 being in milk and one dry, made an average of 982 pounds of milk and 36.45 lbs. of fat. Feed cost per pound of fat was 22.96 cents. Silage, clover, gr. oats, corn and cob meal and L. O. M. was fed.

The mixed P. B. and G. Herd owned by R. W. Elder, Klemme, made an average of 783 pounds of milk and 34.41 pounds of fat. Eight cows all in milk. Feed cost per lb. of fat, 19.42 cents.

M. T. Love with 16 P. B. and G. H. all of which were in milk, made an average of 527 pounds of milk and 21.48 pounds of fat. Feed cost per pound of fat was 26.50 cents.

L. Quintus, of Garner, with ten G. H. all in milk made an average of 833 pounds of milk and 30.44 lb. fat. Feed cost per pound of fat was 24.12 cents.

Grannie Is Again High Cow

Grannie, a G. H. owned by V. A. Cook was high cow, having produced 1,331 pounds of milk and 87.6 pounds of fat.

Queen, a P. B. H. owned by Emil Beier, was second, having produced 2,508 pounds of milk and 86.5 lbs. of fat.

Avery-Twin Lakes News

(Special Times Reporter)

Mr. and Mrs. Dick Swalve were at Mason City last Friday

Albert Priebe called at the Dick Swalve home Sunday evening.

Miss Annie Trampel spent last Friday with Miss Florence Swalve.

The Times correspondent for this vicinity was ill last week and was unable to send in news.

GIVEN PLEASANT SURPRISE ON FIFTEENTH ANNIVERSARY

Ell Union Threshing Ring And Many Friends Gather At Kothenbeutals

The Ell Union Threshing Ring members and their families, besides other friends and neighbors, planned an executed a genuine surprise party on Mr. and Mrs Fred Kothenbeutel and family Sunday evening, the occasion being the fifteenth wedding aniversary of Mr. and Mrs. Kothenbeutel.

Mr. and Mrs. Kothenbeutel are moving from the comunity to take up farming west of town, and the party was also in the form of a farewell gathering. The threshing ring presented them with a beautiful set of glass baking dishes, and others presented them with miscellaneous gifts At the appointed time all met and "stormed" the peaceful quietness of the Kothenbeutel residence with loud shouts of "Surprise! and Congratulations!"

Those who helped put over this big party, numbering sixty-nine persons, members of the threshing ring, friends and eighbors were: Mr. and Mrs. John Hanson and family; Mr. and Mrs. Charley Smith and family; Mr. and Mrs. Tim Waddingham and family; Mr. and Mrs. ohn Ball and family; Mr. and Mrs. Fred Barz and family; Mr and Mrs. Clarence Grosbeck and family; Mr. and Mrs. Ed. Christian and family; Mr. and Mrs. John Pamhoff and family; Mr. John Christians and daughters, Emma and Henrietta; Mis Stella Webner; Mr. and Mrs. Herman Thiemann and family; Mr. and Mrs. Ferry Tibbet; Mr. and Mrs. Carl Pearson and family; Mr. and Mrs. John Newberger and family; Mr. and Mrs. Geo. Thieman and family; Mr. and Mrs. Henry Thiemann and family.

All brought well filled baskets of good things to eat and after enjoying an evening of games and visiting ad at a late hour a delicious lunch was served.

Mr. and Mrs. Kothenbeutel expressed their thanks for the beautiful gifts from their friends and will long remember the ocasion.

Mrs. Harry Gibbs underwetn a major operation at the Mercy Hospital at Mason City last week Thursday. Reports rae that she is making a good recovery.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

Preaching service at 10 o'clock.
Sunday school at 11 o'clock.
Epworth League at 6:45 p. m.
Evening worship at 7:30 o'clock.
Our midweek Bible study and prayer meeting on Wednesday evening at a home to be announced later.

Ladies Aid meets today in the Parish House.

Our first meeting of the Methodist Men's Club will be this Thursday evening in the Parish House. Dr. Van Motre will be present to address the men. Special music and singing will be part of the program. "Eats," as men like 'em, will feature. All men are urged to be present at this meeting.

STOCK SHIPMENTS IN JANUARY MORE THAN CAR A DAY

A sumary of the live stock shipments from the Klemme yards show that thirty five carloads of stock were shipped out during the month of January, 1928.

Of the above total 22 cars were hogs, 11 cars were cattle and 2 cars were mixed hogs and cattle.

The weekyl shipments were divided as follows:

Jan. 7, 2 hogs and 3 cattle.
Jan. 14, 6 hogs, 1 cattle, 2 mixed.
Jan. 21, 7 hogs, 4 cattle.
Jan. 28, 7 hogs and 3 cattle.

PIE AND BASKET SOCIAL

There will be a pie and basket social Tuesday evening, February 21 at the Liberty Center School, Dist. No. 5, located 2 miles north and 3 miles west of Klemme. A orogram and good music will be furnished Ladies please bring either pies or baskets. Meta Lemke, Teacher, Fred Klinge, Jr., Director. 2wc

Card Of Thanks

We wish to thank our friends and neighbors for their help in our bereavement and for the floral offerings. Mr. and Mrs. A. B. Brouwer and family; Mr. and Mrs. N. G. Moberly and family. 1tc

The County Basket Ball Tournament will be held at Britt Feb. 24 and 25.

NEIGHBORS HAVE SURPRISE ON ANDREW NELSO NFAMILY

Family Wil Soon Move To Farm At Clear Lake

Last Friday evening a large group of neighbors and friends gathered to surprise Mr. and Mrs. Andrew Nelson and family as a farewell party on them, as they will move to a farm near Clear Lake soon.

After enjoying an evening of playing games and visiting and at about the midight hour, the well filled baskets of good thigs to eat which were brought by the neighbors, were opened and a delightful lunch was enjoyed.

All report they had a fine time but regret to see this fine family leave the neighborhood. Mr. and Mrs. Nelson say they will ong remember the happy occasion and invited their neighbors to come to see them often.

Mr. Nelson has purchased a farm 3½ miles south east of Clear Lake and will move there the first of the month.

A Mr. E. J. Nelson and family, of Dayton, Iowa, will move to the Nelson farm.

Gruetzmacher's Band To Broadcast Program Saturday P. M.

The Tekamah, Nebraska High School Band, under the direction of Harold Gruetzmacher, will broadcast a program of music over adio station WOW Omaha, Saturday, February 11th beginning at 3:30 P. M. and consisting of twelve numbers. Harold has a band of 100 pieces but is using only thirty-six players for this special concert. Klemme folks will be interested as Harold is a "home boy," and we venture to say that several hundred receiving sets in this comunity will be set for the program.

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

10:00 a. m. German service.
11:00 a. m. Sunday school.
The young peoples Bible class will meet at the parsonage Wednesday afternoon.
Confirmation class on Tuesday and Saturday.
Junior Choir Saturday at 3:00.

SEVEN CARS LIVE STOCK WERE SHIPPED SATURDAY EVE

Stock shipments from the local yards for Saturday, Feb. 4th were seven car loads. Of this number here were five car loads of hogs, and two cattle.

C. A. Larsen shipped a double-deck car (same as two car loads) to Iowa Falls and billed one car load of hogs and one car load of cattle to the U. S. Yards, Chicago.

The Klemme Live Stock Shipping Association shipped one car load of cattle and two car loads of hogs. These being biled to the U. S. Yards at Chicago.

FARM BUREAU MEETING WAS GREATLY ENJOYED

Last Friday the Ell Township Farm Bureau held their meeting at the Wm. Sclawin home, which was both interesting and instructive.

Various matters were takens up during the program such as discussions of farm matters, co-operative selling, etc. These topics were of great interest to the men, while the ladies took up intersting discussions relativet o their household problems and other matters.

Miss Mildred Johnson, violinist, accompanied by Ruth Johnson on the piano, provided some excellent music. A delightful lunch was served cafeteria style.

Mr. Cornelius Wile is the president of this organization and announces the next meeting will be held at the Fred Greimann, Jr. home.

Mr. and Mrs. Wm. Keraus and sons, Otho and Verle, of Traer, drove up early Sunday morning to spend the day visiting with their relatives an friens. They were kept busy being entertained at the Kluckhohn and Keraus homes, and looking up old friends. The day went entirely too fast for them. "Bill" reports that business is brisk.

DOINGS AT SCHOOL THE PAST WEEK

FLORENCE STOKESBARY TAKES SECOND IN CONTEST

Otho School Notes Of Interest To Pupils And Parents

Klemme did not win any of the firsts at the Final County Contest at Garner this week, altho our speakers did splendidly. Kanawha won two firsts and Britt one, while Garner garnered two seconds and Miss Florence Stokesbary took the other one for Klemme. The larger schools seem to have the advantage, altho Corwith, larger than Klemme, did not get so far. Since the judges varied widely in their decisions we have reason to believe that with other judges the results may have been more in our favor. However, we believe the judges were honest and impartial. They were Prin. Jas. Rae, Miss Eva Treman and Miss Tommy D. Priest, all of Mason City High School. The latter assistant principal and Miss Treman, an instructor of speech.

Rowan Licked Us Proper

Our basket ball team did not cover themselves with much glory at Rowan last Friday evening. Our boys were handicapped on Rowan's floor with its low ceiling and water or steam pipes as an obstruction. We believe they may be expected to show up to better advantage on a larger floor.

We Play Britt Saturday Night

We hope many may go with us to Britt next Saturday night and observe both the grade team and high school boys in action on a good floor.

Watch For P. T. A. Meeting

With our Declamatory Contets on Tuesday evening, basket ball games and the Camp Fire Girls program, it seems our February P. T. A. program must be postponed until Mar. We hope to have a very interesting program ready for the parents in early March.

Spelling Prizes To Be Given

The Spelling Committee apopinted by our P. T. A. president met some time ago and decided to offer a first and second and a third prize in each of the grades 2 to 8 inclusive, and also first, second and third prizes to the best three spellers in these seven grades as determined in a general spelling contest held publicly sometime in March.

The prizes will range from $1.50 to 25 cents. We hope children can be induced to concentrate on spelling now for about two months. Parents will do well to encourage their children in this work by pronouncing words to them and checking those missed for later study.

Brother Of Mrs. John Josten Died At Monona, Iowa.

Mr. and Mrs. John Josten left on Monday evening for Monona, Iowa, beig caled there by the death of Mrs. Joste's brother, Henry Renzie, who died Sunday evening following a stroke. About a year ago he suffered a like illnes which left him in a weakened condition.

The funeral services were held Wednesday afternoon.

PECK HANSON ANNOUNCES FOR SHERIFF

The Times this week carries the announcement of Peck Hanson, for Sheriff as a candidate for re-election to that office. Mr. Hanson has been in the office for several years and makes no "bones" about being there more than the "two term custom." He says he is running entirely on his record and asks his friends to lend their support if they feel so inclined.

Miss Annabelle Carlson spent the week end visiting at the Benn J. Coobs home.

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton. Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl. St. Croix' jealousy is aroused by Meely's report of an aged suitor for her hand. The girl cleverly decoys him into admitting he has no intention of marrying her. Marvin visits school in his official capacity as superintendent.

CHAPTER IV—Continued

—9—

"But, you see, we modern teachers, we normal school graduates, do not believe in co-uh-cion and fawce. In my government of this school, for instance, I try to have all co-urr-sion come from within, not from without."

"Fine; if you can work it; can you? And this idea of yours—teaching children 'what is for their immediate use' (and 'pleasure,' I believe you added?) is it for their physical or mental growth that you are striving?—for what I saw as I came in here appeared to be violent gymnastics or an execution of the charleston!"

"I was acting out a play for them—Barrie's 'A Kiss for Cinderella.' I was at the ball—"

"Um-mm," he murmured. "Acting?"

"Trying to."

"But you'll have these sectarian parents on your back! The 'plain' people, you know, are horrified at the word 'acting.'"

"But I act everything I teach—history, spelling, grammar—it's the only way I can teach."

"Now, do you know I would like to see you act spelling!"

"Well, you won't get a chance to!"

"Look here! Don't you know what a county superintendent is?"

"Oh, don't I? 'To you your superintendent should be as a god; one to whom you are but as form in wax, within his power to leave the figure or disfigure it,'" she dramatically recited a passage from "Midsummer Night's Dream," slightly adapted.

"Very well, then, how dare you cheek me and say you won't when I tell you to do a thing?"

"Because I'd rather lose my job than have you sit there and laugh at me!"

"It's not for a mere superintendent," he shook his head humbly, "to laugh at a normal school graduate!—though I'm sure, Miss Schwenckton, that the normal school course does not include histrionics! I do know that much about normal schools! However, I congratulate you."

"On my—intelligent ideas about teaching?"

"On your excellent acting."

She stiffened with alarm. "But—but you've not seen it!" she objected.

"You're sure? By the way—what role were you going to play when I passed you on the road the other day dolled up like a comic valentine?"

She caught her breath. "But—but you never looked at me! Do you see with your left ear?"

He laughed, rose abruptly, and held out his hand. "Good-by, Miss"—his eyes bored into hers like gimlets—"Schwenckton; I won't torture you any longer with my unwelcome presence!"

"Good-by," she sighed with deep relief.

"But—a few questions before I go, if you don't mind." He took out a pencil and notebook. "Your class at Kutztown normal?"

She could not answer that question offhand, apparently. "Wait a minute." She opened a drawer of her desk, took out her diploma and handed it to him. She had been prudently keeping this diploma at hand to be ready at need when he should call.

"Um-mm," he said thoughtfully, "two years ago. You didn't teach last year?"

"No-no."

"Why not?"

"Well—I was going to be married—but, strange as it may seem to you, I got jilted"

He caught his lower lip between his teeth and stared at her. Then, with an abrupt nod, turned away and left the schoolroom.

"My G—d!" she thought, her hand pressed to her heart, "how much does he suspect?"

It was, of course, her accent that betrayed her. She could perfectly disguise it when she adopted the extreme Pennsylvania Dutch dialect, but nothing short of that could hide the foreign touch of her speech.

She could only hope that her possession of this Kutztown normal diploma would throw him off the scent.

* * * * * * *

All the Schwencktons, except the ailing wife and baby, were very tired of Aunt Rosy and longed for Susie's recovery not only for her own sake, but because it would rid them of the older woman's unpleasant company. Meely and Mr. Schwenckton both loathed her uncleanliness; Meely feared her spying upon her; Sammy hated and resented her; Lizzie was afraid of her cold-blooded spite for the humiliating defeat the child had caused her; and Mr. Schwenckton was impatient to be rid of her so that he could bring home his daughter Nettie.

And at last, in spite of unsanitary conditions, and through the occasional conniving of Meely and the doctor to outwit Aunt Rosy and Mr. Schwenckton and air the house, Susie began to rally and the baby to pick up; and a week after they were brought down from the stuffy bedroom to the less confined atmosphere of the kitchen, Susie was almost as strong and blooming as she had ever been and the baby began to get fat.

Aunt Rosy was so reluctant to leave that Meely would have suspected her of having purposely prolonged Susie's

"But Nettie," Meely Felt Urged to Warn the Child, "a Man in Mr. Creighton's Position Would Never Marry a Girl in Your—in Our Place in Life."

convalescence by her bad care of her had it not been manifest that these two sisters were really very fond of each other.

It was a peculiar attachment, for Susie seemed phlegmatically indifferent to everyone else, even to her baby, and certainly to her elderly husband. Meely thought she had never met anyone so stolid; so incapable of being stirred by anything.

This stolidity seemed more marked than ever in contrast with the adolescent vividness of her stepdaughter, Nettie, who, on the very day of Aunt Rosy's departure, was brought home from her grandmother's by her father; a young girl in her early teens, with a pretty, though plebeian face, whose awakening nature was making her avidly curious about life. She worried Susie with questions to such an extent that the older woman, not accustomed to using her brains, found the girl's challenging curiosity exhausting to the point of pain.

One evening Mr. Schwenckton's absence from home (he had gone on a business trip to town) gave Nettie an unwonted opportunity, for her father's presence was a check upon the intimate questions she loved to ask. Lizzie and Sammy had gone to bed; Meely, in a bathrobe, with her hair in a heavy braid down her back, was sitting at the kitchen table writing letters; Susie was rocking her baby before the kitchen stove; and Nettie was stretched at full length on the settee facing her pretty and ridiculously young stepmother.

"Say Susie, why did you marry Pop?" asked Nettie.

"Ach—because."

"But why? Tell me! G'on."

"Ach, well, because I did."

"Ach, Susie, you must o' had some reason."

"Ach, well, a body has to marry somebody."

"Why must you marry somebody?"

"Well—if you don't want to be an old maid."

"Wouldn't you sooner be an old maid than married to Pop? I would! You couldn't o' been in love with Pop," said Nettie reflectively.

"Nettie Schwenckton, I do believe you think love is like in them movies! My sakes! That's only in them movies, Nettie. It ain't no such a thing for really!"

"But it is, too. I felt it myself a'ready!"

"Ach, you just think you felt it because you seen so many of them movies whiles you was in town there with your gramma. But it ain't no such a thing for really. You only gotta look around you a little to see for yourself it ain't no such a thing."

"I won't get married," exclaimed Nettie, "unless I can meet up with such a fellah like Rudolph Valentino or Tom Mix or whoever! I wisht," she sighed longingly, "I could run into Mr. St. Croix Creighton—"

Meely looked up from her letters and watched the girl's childish, pretty face whose commonness was almost obliterated by the soft, dreamy ecstasy that lit up her vivid youth. "I seen Mr. St. Croix Creighton oncet or twicet or so. Gee, he's some swell dresser! And ain't he a good looker! I wisht I could meet up with him!"

Though this longing of Nettie's seemed as far as possible from immediate realization, that very night was to see it fulfilled.

"Say, Meely," Nettie appealed to the teacher, "did you ever see Mr. St. Croix Creighton?"

"I—I think I did."

"You'd know it if you did! Gee, he's got the style to him! That," affirmed Nettie, "is the only kind of fellah can have me!"

Susie sniffed. "You hate yourself—I don't think! What makes you s'pose a high-stepper like him would take up with you yet? Good lands!"

"They do in the movies sometimes—when they fall good in love."

"Yes, in them movies," Susie scoffed.

"But, Nettie," Meely felt urged to warn the child, "a man in Mr. Creighton's position would never marry a girl in your—in our—place in life. So that your 'meeting up with him' would only mean unhappiness for you—especially if he fell in love with you."

"But in them movies—"

"Ach, them movies!" Susie interpolated.

"All right, then!" retorted Nettie with sudden passion, "I'd sooner live three weeks with a swell gen'leman that I could admar, than be respectable all my life with a old man like Pop! And I'd think more of myself for doin' it, too!"

"Well, Nettie Schwenckton, if you aint!" said Susie, only mildly scandalized; nothing could ever really rouse her to any show of feeling.

"Nettie," Meely experimentally remarked, "you know there's Mr. Marvin Creighton over at Absalom Puntz'—there'd be some chance of your meeting him—and none at all, I should think, of your running into St.—Mr. St. Croix Creighton—"

"Ach, that there county superintendent, he's a stiff! I often seen him a'ready and he didn't gimme no romantic feelings. He ain't nothin' like them movie actors—"

The sound of steps on the kitchen porch interrupted her.

"Pop's back a'ready," she said, with a glance at the clock whose hands pointed to ten. "He won't like it we're up so late."

She rose, yawned, and stretching wide her arms, revealed a beautifully developing young figure.

Meely, looking at her, wondered whether, in case the girl's longing to meet St. Croix were ever realized, he would not find her even more irresistible than he was finding "Meely Schwenckton."

(TO BE CONTINUED.)

First "Topical Song" Sung by Frenchman

What purports to have been the centennial of American vaudeville was celebrated recently, and although much was said about the origin of this form of amusement, Olivier, "the fuller," a Frenchman, was left out of the picture. When Olivier was born, nobody knows, but in 1418 his booming voice went to the choir celestial on the cherubim circuit. Olivier was a poet as well as a fuller, and composed songs which he sang at his work. His songs were just frivol, yet they caught the public fancy. They were filled with hits on the foibles of the day, topical songs we would call them now. These then new lyrics, named in derision from the hamlet where Olivier lived in the valley of the River Vire, in Normandy, were called Valdevires, or Vauxdevires, and later Vaudevilles. Just as one might say today, sing us a Hicksville ballad, so fastidious Paris branded the songs of Olivier Basselin, as of lowly provincial origin. Yet for 500 years the name has stuck, and is now considered more elegant than the American term, "variety."—John Walker Harrington, in the Smokers Companion Magazine.

Need Law's Restraint

What a cage is to the wild beast, law is to the selfish man. Restraint is for the savage, the rapacious, the violent; not for the just, the gentle, the benevolent. All necessity for external force implies a morbid state.—Herbert Spencer.

Toys Thought Wonders

Less than 200 years ago, three quite ordinary mechanical toys attracted great attention when they were exhibited. One was a figure that played the flute, another a tambourine player, and the third a swimming duck.

Lifelike canaries that sing naturally when they are wound up are commonplace toys nowadays. The first of this type of toy was shown at the great exhibition of 1851 in England.

When a man begins to reason he ceases to feel.

Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl. St. Croix' jealousy is aroused by Meely's report of an aged suitor for her hand. The girl cleverly decoys him into admitting he has no intention of marrying her. Marvin visits school in his official capacity as superintendent and discovers how shockingly little Meely knows about school teaching.

CHAPTER IV—Continued

—10—

"No," she decided, "for he is really fastidious and Nettie's a hopelessly common little thing. And yet, if he can stand me and the dope I hand out to him—"

She did not know, however, that St. Croix, to his own wonder, never felt that she was "common" or vulgar; not even when she manifested the intelligence of a sheep or twisted the English language until his nerves were rasped; not even when she sat sprawling ungracefully with her feet far apart, nor when, after tasting an apple, she drew the back of her hand across her mouth.

She was a good actress, but there was that something inherent that nothing could disguise—

* * * * * * *

It was just when, relieved of Aunt Rosy's espionage, Meely was beginning to feel, in spite of the dangerous proximity of Marvin Creighton, more at her ease, less insecure in her equivocal position, that, on that very evening when she sat in the warm, bright kitchen, peacefully writing letters, she was to find the complexity and precariousness of her situation greatly increased by the outcome of an episode which was, at that same hour, in its incipiency on a Sunbury street corner, eight miles distant.

Mr. Sam Schwenckton, having finished the business which had taken him to town, was about to enter his car parked on the edge of the town, and start for home, when a man standing on the corner, apparently waiting for a trolley car, approached him.

"Pardon me—how often do these cars run?" the man inquired in a tone of extreme irritation. "I've been waiting here twenty minutes!"

"It don't run no cars on this line after seven o'clock, Mister. This here trolley line ain't doin' much business anyhow, so it stops till seven a'ready. You must be a stranger here—ain't?—or you'd o' knowed that."

"No—but I seldom use the trolley. Today, however, I had to leave my automobile at the repair shop. Are you, by any chance, driving out this road?"

"Yes, eight mile out."

"Will you, then, for a consideration, let me go with you?"

Now as the night was raw and wet, it would, Mr. Schwenckton felt, be only a Christian act to offer this stranger a seat in his car. Also, he liked company, some one to talk to on an eight-mile drive. But the newspapers were so full of holdup stories—and he was carrying a good deal of money — wouldn't he be taking chances?

The man looked so decent, however (what could be seen of him in the dimness) and Mr. Schwenckton had, as always when he traveled at night, brought his revolver with him—

He felt in his pocket and surreptitiously moved his pistol from his right-hand pocket to his left.

"I wouldn't want no sich a 'consideration,' Mister. Just so's you ain't one of these here thugs you can read about in the papers—"

The man laughed. "You're twice my size. If I can trust you not to hold me up, I guess you're safe!"

"Yes, I guess that's so too. All right. Come on, then."

Mr. Schwenckton felt rather cheated when he found that the stranger, though sociable and agreeable enough, was not going to repay his hospitality by satisfying his curiosity as to who he was. All the leading questions with which the farmer plied him received evasive answers. This seemed to Mr. Schwenckton so suspicious that he frequently felt in his left-hand pocket to be ready in case of need.

However, he tried to put his apprehensions aside and to beguile the ride with friendly talk.

"So your car had to go to the shop, heh?"

"Yes, worse luck!"

"When I first got my car I drove her and drove her till I got the cold in my chest and it near give pneumonia yet! Yes, anyhow!"

The stranger made a sound expressive of his sympathy. For a while they drove in silence.

"Funny thing happened in the bank today," Mr. Schwenckton resumed conversationally. "When I went in to get a check cashed—" He stopped short in consternation—how tactless to mention having cashed a check!

"What was it?" asked his companion.

"Not much—a dollar or so. I spent it," said Mr. Schwenckton pointedly.

"I mean what was the funny thing that happened?"

"Oh, that! Well, a lady standin' alongside of me in the bank she handed in a check and the banker he said to her, 'What denomination?' and she says sort of snappy, 'Well,' she says. 'I'm a Presbyterian, but I don't see what business it is of yourn,' she says."

The laugh in which they joined over this yarn seemed to establish between them more confidence. Mr. Schwenckton, always warm-hearted, was sorry he had been feeling so suspicious of a fellow man and tried to atone by being as friendly as possible.

"Was you ever to New York, Mister?"

"Yes."

"That's a place I never seen. But my brother he was always set on seein' this here New York oncet, that you can read so much about in the papers. So at last his missus she says to him, she says, 'Pop,' she says, you're gettin' on in life and if you don't go soon to this here New York, you'll be too old to go.' So, then, he said he'd go oncet. So she helped him get ready and start off. 'Now, mind you, write,' she says to him, 'and tell me how you like it.' So after a couple of days she got such a pitcher post card from him and he'd wrote on it, 'Mom, Yi, yi, yi, yi! Pop.'"

Again their joint laughter seemed to bring them sympathetically close.

Since leaving the lighted town, the road had been very dark, for the night was cloudy and starless.

"Where do you want out, stranger?" Mr. Schwenckton presently inquired. As he spoke, he took his hand from the steering wheel to have a glance at his watch—and as he did so, the man beside him gave an uneasy start.

With a shock of some horror, Mr. Schwenckton's fingers found an empty pocket where his watch should have been! Instantly he stopped his car and jerked out his revolver. "Now, then, you hand out that there watch and then you run for your life!" he shouted.

The man obeyed with alacrity, thrusting the watch into the farmer's outstretched hand, leaping from the car and disappearing in the blackness of the road.

Mr. Schwenckton, greatly shaken by so narrowly escaping being manhandled by a thug, his soul heavy with sadness at the desperate wickedness of man, went on his solitary way, musing on his own folly in having let his kindness of heart get the better of his prudence.

"It ain't safe to take up strangers these days—that it ain't! And me, I was always too trusting that way! Well, this here's certainly a lesson to me! Be kind to your fellah-creatures, yes—up to the danger point. That's all the further a fellah darst be a Christian these days!"

His despair over the perfidy of our human nature deepened as he reflected upon the "gentility" of the thief: his "nice" voice, his "educated" speech, his "polite manners"—what with his "Beg pardon," "Thank you very much—"

"A slick one, he was! I can't never trust no one's appearances again!" thought Mr. Schwenckton with a sorrowful shake of his head. "That's the worst harm a crook does—he spreads abroad a mistrust of man made in the image of Gawd!"

Fifteen minutes later Mr. Schwenckton, usually the most placid of men, confronted his family in the kitchen, looking so white and agitated that Meely and Nettie sprang up, startled, and even Susie looked inquiringly.

"I was held up and robbed," he announced. "Not two miles from road yet!"

"Ach! Was you hurt?" cried Nettie in a fright, running to him.

"No, I ain't hurt. And I lost nothin' neither! I held the crook and got back what was stole from me! That's what I done!"

"Ach, Pop!" Nettie gasped, struggled terror and admiration.

"Good thing I took my gun with! It ain't safe, these roads to travel at night without along!"

He told them, then, as he took his hat, coat and gloves, just happened—giving his story a matic climax. "'Now, then,' I him, 'you hand out that there and then you run for your says. And he did! With the revolver of mine in his face, what I tol' him and pretty about it too! Yes, and I guess runnin' yet!"

"Yes, well, but," Susie spoke to him over her shoulder didn't take your watch along, let it at home. You forgot it, it lays." She thrust her thumb ward toward a small shelf whic a convenient comb and brush fo ily use.

Her husband stared at her lously as she calmly rocked her ing infant—then, desperately to prove her words false, he fe drew from his pocket the watch manded from the stranger, and reluctantly, he let his eyes fall

It was not his!

Such a watch it was as he never hope, nor even wish Gold, jeweled, initialed.

In a stride he stood before th and beheld his own accusing wa

"I was sayin' to Nettie," said "that you'd be awful put out without your watch along."

"And I never oncet missed it wretched man murmured.

"But—why, my lands!" Nettie, "this here's got an awfu —like as if you'd held that the up and stole his watch, Pop"

"And I don't know who it is it back!" Mr. Schwenckton was agonized. "If I never fin it'll make me feel awful consci to keep his watch! Yi, yi, y shook his head and began a to pace the length of the kitch

"Oh, you'll have no trouble him, Mr. Schwenckton," said encouragingly. "He'll of course to the police and they'll easily you up."

"Yes, and arrest me for yet!" exclaimed Mr. Schwenckto

"I'll tell you!" cried Meely. report to the police, Mr. Schw ton, and tell them of your mis and that you want them to fi man. That will s you."

Mr. Schwenckton stopped in tated walking to and fro, and at Meely admiringly. "You the head on you, Meely! I think that far myself. Educati a grand help to a body in this life! That's what I'll do this same minute!"

He went to the telephone, but the line "busy."

"Delay may be fatal'" said anxiously. "You must report it he does. He has had a good time already—all the time you home unloading your car and it in the garage—and the time been in the house—"

"Yes, well, but I don't think be reportin' it wery soon—I him on a good run and I guess still runnin'!"

It was at this instant that they all startled by a rap on the door, and before anyone could it, the door opened and a wo draggled and very tired-looking man almost staggered into the closing the door behind him and ing against it heavily.

(TO BE CONTINUED.)

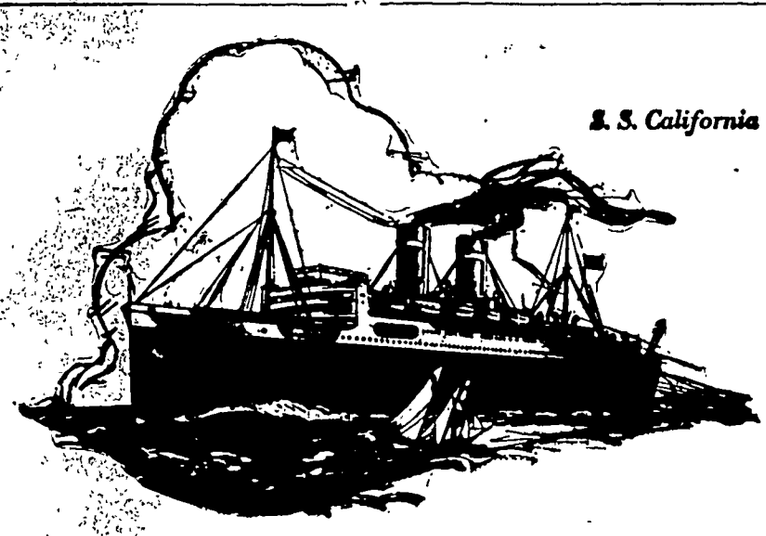
Rules That Govern Kinship of Cousins

In answering a correspondent's query, "What relation are the children of first cousins to each other? What relation to me is my first cousin's child?" the Pathfinder Magazine says:

"Reckoning cousin relationships is simple if you start out right. A cousin is one collaterally related by descent from a common ancestor, but not a brother or sister. Children of brothers and sisters are first cousins to one another: sometimes they are called cousins-german, own cousins, or full cousins. The children of first cousins are 'second cousins' to one another; children of second cousins are third cousins to one another, and so on. The child of one's first cousin is a first cousin once removed; the grandchild of one's first cousin is a first cousin twice removed, and so on. Confusion sometimes arises from the custom of some people who speak of the children and grandchildren their first cousins as second and cousins, respectively, but the pra is only local. The correct and universal rule for reckoning is as we have given it."

Taste and Invention

For generations past architec has been so overladen with em ous matter that many authoritie tually preach that in this branch art it is in bad taste to invent. rect architecture, they say, one merely in reassembling borr forms. All of which is palpably surd. If the Greeks had thou there never would have been Greek art. On the contrary, arc ture, now as ever, consists in so problems of utility as economi and appropriately as may be.—New York Sun.



Largest and Finest American Built Steamship Serves

MONARCH COFFEE

This Panama Pacific Liner is the world's largest electrically propelled commercial steamship. Her turbo-electrical driving machinery is the same as in the latest U. S. battleships. Everything about the S. S. California is the finest that can be secured. In keeping with this, it was but natural that her owners should select the world's best coffee—MONARCH. When the California sails from New York for San Diego, Los Angeles and San Francisco, her kitchens will be stocked with MONARCH Coffee fresh from the *Monarch* roasters in New York; and a new stock will be supplied from the *Monarch* roasting plant in Los Angeles for the return trip.

Balloon Stays in Air

A balloon that will stay in the air for weeks at a time has been invented by M. Lucien Bodin of France. Bodin claims that his new device precludes the necessity of having to release all the gas from the bag in order to regulate its altitude. Besides the balloon's ordinary gas bag filled with hydrogen, not sufficient to support it alone, the proposed craft will carry an auxiliary compartment filled with air to supply buoyancy. The pilot can regulate his altitude by heating or cooling the air, thus obviating the necessity of releasing any of the hydrogen.—Chicago Daily News.

The Reason

"You're moving again?"

"Yes; the neighbors have seen all my wife's hats."

Salt for Half the World

The salt deposits in western New York underlie an area of 2,000 square miles and will last for thousands of years, it is said, though they are now yielding some 2,000,000 tons annually, almost a third of the total production in the United States. About 30 miles south of Rochester are the largest rock salt mines in the country, each of two plants having a daily capacity of 3,000 tons. If all other sources of supply in the United States should fail, these two plants could meet the ordinary salt needs of all the people of this country and Canada.

Many a man's financial goose has been cooked in a jack-pot.

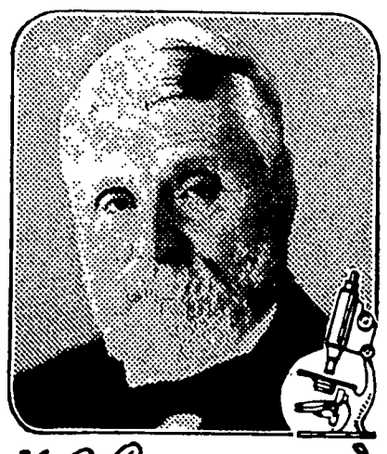
Ceremonies may differ, but true politeness is ever the same.

Dr. Caldwell's 3 Rules Keep You Healthy

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time regardless of how much one tries to avoid it. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation, known as Dr. Caldwell's Syrup Pepsin, is a mild vegetable compound. It cannot harm the most delicate system and is not a habit forming preparation. Syrup Pepsin is pleasant-tasting, and youngsters love it. It does not gripe. Thousands of mothers have written us to that effect.

Dr. Caldwell did not approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. In a practice of 47 years he never saw any reason for their use when a medicine like Syrup Pepsin will empty the bowels just as promptly, more cleanly and gently, without griping and harm to the system.

Keep free from constipation! It robs your strength, hardens your arteries and brings on premature old age. Do not let a day go by without a bowel movement. Do not sit and hope, but go to a druggist and get one of the generous bottles of Dr. Caldwell's Syrup Pepsin. Take the proper dose that night and by morning you



W. B. Caldwell M.D.
AT AGE 83

will feel like a different person. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds. Always have a bottle in the house, and observe these three rules of health: Keep the head cool, the feet warm, the bowels open.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

Reprimand for Bad Temper

Russian telephone operators are protected by law against being scolded. If a telephone user loses his temper and says what he feels into the transmitter, the offended operator merely reports his number and his telephone is promptly disconnected for a time.

Plants' Baths

If your ferns, Jerusalem cherry trees and other plants look peaked, put them in the bathtub and turn the shower on gently. Plants need baths as much as humans.

Marriage is sometimes an illusion—and sometimes it's a disillusion.

Don't Talk About Your Kidneys—ACT!

Why keep on being "sick"? Why drag along in misery when relief is yours for the asking? Take the world-famous GOLD MEDAL HAARLEM OIL CAPSULES remedy for liver, bladder and uric acid "ills." Known as the National Remedy of Holland for more than 200 years—all druggists in 3 sizes. Look for the name on every box and accept no substitute. In sealed boxes.

LIVE STOCK

SIFTED OAT CHOP FOR LITTLE PIGS

If oat chop is to be fed to little pigs it is a worth-while practice to sift out the hulls. The hulls are not only unpalatable to the young stock, but they are very difficult to digest. If time cannot be taken to remove the hulls, it is doubtful if oat chop can be fed profitably to pigs under three or four months of age unless one is growing the hulless oats which threshes out ready for grinding into oatmeal which is good for all classes of stock. In an experiment conducted at the Lacombe (Saskatchewan) experiment station to test the advantage of removing the hulls from oat chop for little pigs, it was shown that during a feeding period of 12 days the gains made by the lot fed the oat chop with the hulls removed cost a little less than $4 a hundred pounds, whereas it cost $5.70 per hundred pounds with the pigs given the oat chop complete. Furthermore the lot getting the unsifted chop had to be carried on for about six weeks on a ration of barley chop to bring them up to a finishing weight.

Bulletin No. 73 of the department of agriculture at Ottawa, entitled "Swine Husbandry in Central Alberta," expresses the view that the labor involved in sifting the oats by hand prohibits following the practice when large numbers of hogs are fed. Hulless oats, the authors of the bulletin claim, is the logical feed to use in the weaning ration where middlings and shorts are not available. The conclusion is reached that oat hulls as contained in oat chop are detrimental to young pigs during the weaning period of the market hog when the oat ration is continued throughout the entire feeding period.

Winter Litters Often Open Way to Profits

In an address on swine feeders' day at University farm, St. Paul, Minn., Andrew Boss, vice-director of the Minnesota experiment station, said that hog production could well be made to contribute about one-fifth of the income on the average Minnesota farm. Year in and year out the swine herd can be counted upon for revenue which lifts mortgages and pays other debts and is a reliable factor in the farm business plan.

"Farmers wishing to build a well balanced farm program, with revenue coming regularly, will find that hogs can be used to advantage in giving employment to labor not otherwise used," he said. "While it is true that hogs take relatively little labor in comparison with other stock, they do require some labor even in the summer time. In an intensive farm business the raising of winter litters may give considerable employment in a season of the year when the labor of the farmer or of his family is not fully employed. With equipment suited to winter production and with the advantage of cheaper feeds at that season of the year, the profits from the farm business can often be materially increased by reasonable production during the winter."

February Rough Month on Very Little Pigs

February is a rough month on little pigs unless they are properly cared for.

Elaborate quarters are not necessary. They must be free from drafts and dampness. A straw pile around which they can pile up is one of the poorest places to keep pigs.

Around a straw pile they usually become too warm. They will move away from the straw and chill. The steam and other moisture that collect around a straw pile is also detrimental to pigs. To thrive and stay in health they must have a dry bed and quarters that permit no drafts. Deep bedding is not as necessary as dry clean bedding changed frequently.

Weaning Fall Pigs With the Least Disturbance

Weaning pigs with the least disturbance to their continued growth is an art well worth learning. A very successful Indiana hog raiser provides a creep and suitable feeds for pigs while they are still nursing their dams. At eight weeks of age the sow's feed is gradually restricted which shuts down on milk production. When the time is right, the sows are taken away from the pigs and not the pigs from their dams. In this way by leaving the pigs in the quarters they are accustomed to they are weaned without knowing what has been done.

Clipping Horses

The work of clipping horses is inexpensive. The work can be done at home with the regular help or some one with experience can be employed for the purpose. However, experience is not necessary. Some farmers clip only the body of their horses, leaving the hair on the legs. While this does not make a very clean-looking job, it serves a very good purpose so far as the comfort of the horse is concerned. Some believe that it is better to have the protection on the legs.

Dog Saved Miners' Lives

The dog at the Mohawk mine camp near New Hazleton, recently saved the buildings there from destruction by fire. Tired after returning to camp through bitter cold, the men fell asleep after having kindled a fire. The stove became red hot and the floor began to burn. The pup jumped on one of the beds and aroused a man who extinguished the threatening conflagration.—Vancouver Province.

Headaches from Slight Colds

Laxative BROMO QUININE Tablets relieve the Headache by curing the Cold. Look for signature of E. W. Grove on the box. 30c.—Adv.

"Glass" Cloth Invented

Like cloth is a new glass substitute that is said to be weatherproof and translucent. It is sold in rolls, and also by the yard, to be used for garages, barns and temporary buildings of many sorts, according to Popular Science Monthly. The maker declares that it admits the healthful, invisible, ultra-violet rays of the sun; this feature would make it useful for sun porches, letting in the rays while insuring privacy.

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

Flood Brought "Gifts"

Many persons returning to their homes after the flood waters had receded in Vermont found unusual "gifts." In one house a cow was found alive and contentedly reposing on a sofa in a second-story room, and in the dilapidated library in another dwelling stood a small white marble statue of the Venus de Milo, unharmed and as beautiful as ever, but it had never been there before and no one knew where it came from.

New Life-Saving Suit

A new life-saving suit, weighing only 21 pounds, which will keep its wearer afloat for hours has been invented for ocean flyers. The suit, which can be donned in two minutes, has accommodations for storing sandwiches and drinking water.

The Groove

"I've suddenly realized that I am getting old."

"You don't look it."

"I am. When I was young I longed for things to happen—now I hope that they won't!"

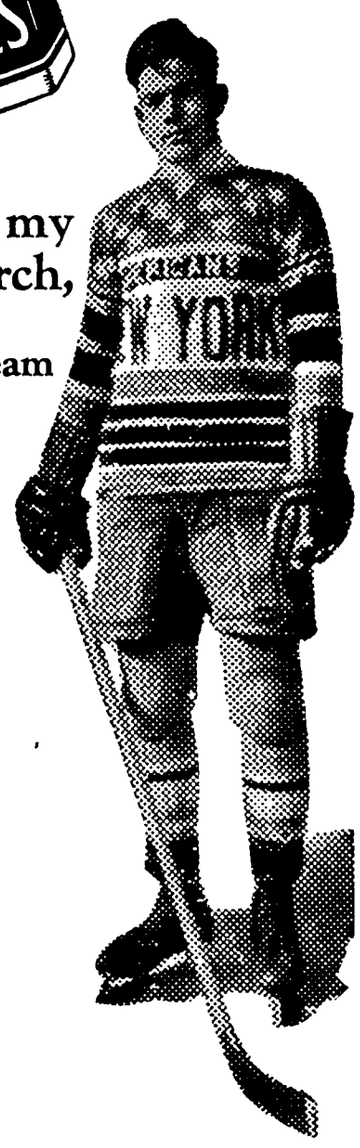
Both Uncertain

He—Was it you I kissed in the library last night?

She—About what time?

Ninety-two years in Burlington, Vt., without recollection of ever having left that city, is the record of Cassius P. Morse.

The Cream of the Tobacco Crop



"Luckies never cut my wind" says Billy Burch, Captain of N.Y. Americans' Hockey Team

"I can't afford to take any chances with my physical condition. That's why I stick to Luckies. In addition to the pleasure I get from their fine flavor, they have never cut my wind to any noticeable degree. Finally, I never suffer with sudden coughing which might be very dangerous for me when there's a scramble on the ice."

Billy Burch

"It's toasted"

No Throat Irritation—No Cough.

Radius Defined

Bill—"On what grounds does your father object to me?" Jenny—"On the grounds about the house."

Think It Over

Where there is plenty, charity is a duty, not a courtesy.

Important Point

Dill—"If you refuse I'll love another girl." Mae—"Does that also apply if I consent?"

Foul—or Veal

Customer—Chicken croquets, please. Waiter—Fowl ball!

a skin to dream of - -

Yours?

A skin with that brightness and radiance we call beauty—you can have it if you will!

Nearly every woman's skin would be lovely if it weren't for one of these six easily-corrected faults:

Blemishes *Blackheads* *Sallowness*
Conspicuous nose pores *Excessive oiliness*
Dryness

GIVE your skin a chance! Begin, today, to correct the faults that hide its natural attractiveness:—then see how lovely and smooth it will be!

The famous Woodbury skin treatments will help you to overcome any of the six common skin troubles given here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments.

Simple, clear directions for each of these treatments and the treatment for normal skins are given in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and see what a wonderful improvement it will make in *your* complexion!

A 25-cent cake lasts a month or six weeks.

WOODBURY'S FACIAL SOAP

The POLICY of PROGRESS

A STATEMENT by GENERAL MOTORS

IT is the policy of General Motors to maintain *continuous improvement*, in every one of its car divisions, with no interruption in production.

This means that you enjoy the benefits of new engineering developments promptly — just as soon as they have been thoroughly tested on the 1245-acre Proving Ground.

It means that you can *now* order the new Chevrolet, Pontiac, Oldsmobile, Oakland, Buick, LaSalle, Cadillac, or GMC Truck, and receive *immediate* delivery.

Behind this policy of continuous improvement is an organization so widespread and resourceful that it can make and sell quality automobiles more economically than any automobile manufacturer in the world.

In the north and south it logs and mills its own lumber. In the east it makes its own ball bearings and radiators. In the middle west it produces its own plate glass. Its plants are busy in 33 important American cities.

From almost 5,000 suppliers, its materials are obtained—steel by the hundreds of thousands of tons—wire by the tens of thousands of miles—upholstery by the acre—nuts, bolts and washers by the millions. Its sales and service take place through 33,000 dealers. More than 275,000 families look directly to General Motors for their livelihood—almost a million and a half men, women and children in every community in the land.

Meaning so much to so many, General Motors has felt a supreme obligation to look ahead.

Are there methods by which General Motors cars can be better built to better serve?

Are there new ideas which can increase the utility and pleasure and safety of motoring?

Are there new materials which can add to owner satisfaction?

Such are the questions that all General Motors engineers have always asked. The answers have made it possible, year after year, to offer an increasing measure of beauty in design, modern performance, riding comfort and distinct style. Thus in every price class, from Cadillac to Chevrolet, purchasers are constantly benefiting from the General Motors policy of progress.

Avery Twp. News

(Special Times Reporter)

Fred Albers and family spent Sunday evening at the Ed. Buss home.

Peter Trampel was a business caller at the Wm. Bell home Thursday.

Mr. and Mrs. Clarence Bachman enjoyed a visit from relatives of Ventura Sunday.

Quite a few in this locality have been bothered with a bad cold, due to the changeable weather.

Russel Bell and Frank Roths were business callers at the Peter Trampel home Saturday.

Wm. Bell took some hogs to Mason City Saturday. His son, Jeff also accompanied him.

Will and Clarence Bachman were business callers at the Peter Trampel home Tuesday.

Some from this comunity attended the Firemen's Ball that was held in Klemme Thursday evening.

Mrs. Will Waddingham has been asitinsg with the work at the Walter Blumer home for a week or so.

The Klemme W. F. M. S. Auxiliary met with Mrs. C. A. Arnold last Thursday afternoon.

Miss Anna Trampel spent Friday at the home of her friend, Miss Florence Swalve.

Mrs. Wil Lassahn assisted her mother, Mrs. Wm. Bell with work Thursday.

Peter Trampel and John were business calers at the Red Kenedy home Wednesday evening.

Peter Trampel and son John were callers at the Walter Reed home on Wednesday.

Mr. and Mrs. Wil Bachman spent Tuesday at their farm where their son Clarence and family reside.

Dwight Helps is assisting with the corn picking at the Mrs. Aug. Trampel place for a couple of days.

Raymond Watermilled was a business caller at Belmond and Goodell one day last week.

Mr and Mrs. Henry Josten and family were visitors at the Fred Albers home Sunday.

Mr. and Mrs. Frank Roths spent Sunday evening at the Clarence Bachman home

Mr and Mrs. Fred Bachman and family were visitors at the D. A Marshall home Sunday evening.

Will Bacaman and family spent Sunday evening at the Art Knoke home.

Mr. ad Mrs. Rob Roths and Bonnie Bachman were visitors at the Clarence Bachman home Friday evening.

Tom Roths will take the place of Fred Shuldt as Avery Township Assessor this year. Mr. Schuldt has been assessor for one year.

Louie Knoke trucked a load of hogs to Mason City for Fred Bachman Thursday. Mr. Bachman went with him.

Henry Helps and son, Harlow, and Johnnie Reed assisted with sawig wood at the Peter Trampel place Wednesday afternoon.

Mr. and Mrs. Clarence Bachamn and daughter, Maxine, were visitors at the Fred Bachman home Tuesday evening.

Mr. and Mrs. Verner Nelson and daughter, Ardella were visitors at the Peter Trampel home Sunday evening

Mr. ad Mrs. Tom Nelson Jr. and Mr and Mrs. Henry Busse and family were entertained for dinner at the Verner Nelson home Suday.

Mr and Mrs John Watermiller and sons, Jake and Raymond, were visitors at the Peter Trampel home Tuesday.

Miss Madeline Bachman, daughter of Mr. and Mrs. John Bachman, was a caller at the Will Bachman home Saturday.

Those who took the eigath grade examinations in Klemme from District No. 2 are Clarice Johnson, Erwin Ash, Marvin Anderson and Kenneth Bell

Dave Ross of Garner sold some of his corn to Charley Ax, which D. A. Marshal and sons delivered Wednesday. Mr. Ax also assisted with the hauling.

Quite a few neighbors and friends had a surprise on Mr. and Mrs. Andrew Nelson last week. Mr. and Mrs. Nelson will soon leave for their new home near Clear Lake.

The Iowa Union Telephon eCompany men were out in this community during the last week to fix some of the telephones that were out of working order.

Mrs. August Trampel and sons Elmer and Johnnie and daughters, Gertie and Esther were visiotrs at the Henry Helps home Sunday after noon.

Mrs. Fred Bachman and Mrs. D. A. Marshall attended the Missionary society of the U. B. Church of Goodell that was held at the home of Mrs. Graber at Belmond Thusrday. Mrs. O'Krueg gave a talk on Porto Rico.

Ell Township News

(Special Times Reporter)

Mrs. John Newberger, Ruth, William, Fay and Marlin all visited at the Walter Blumer home Sunday

Mrs. S. A. Thompson and children Marjorie and Donald, of Lu Verne visited at the Benj. Mullin home Saturday and Sunday.

Mr. and Mrs. Fred Kothenbeutel and family called at the Carl Pearson home Sunday afternoon.

Herman and Henry Thieman were in Garner on business Saturday.

Mr. and Mrs. John Bock were in Garner Thursday to have some dental work done. Mrs. Bock spent the afternoon visiting with her sister, Mrs. F. H. Griemann.

Mr. and Mrs. Carl Pearson were in Garner Friday morning. They took Lydia Pearson, Alazada Mullin, Viola Thiemann and Jennie Albers to Garner to write the eighth grade examinations in the Court House

Mr. and Mrs. Ed. Buentenbach and family and Mr. and Mrs. Wm. Rockow and family of Garner were entertained at the John Bock home Sunday.

Friends and neighbors of Mr. and Mrs. Fred Kothenbeutel surprised them Sunday evening and helped them celebrate their fifteenth wedding anniversary. Everyone brought a well filled basket and at a late hour delicious refreshments were served The evening was spent by playing games and visiting. Those present were: the Fred Barz family, Herman Henry and George Thieman families, Tim Waddingham family, John Newberger family, Carl Pearson family. Ferry Tibbets family, Clarence Groesbeck family, John Hanson family. John and Edd. Christian families, John Pamhoff family, John Paul family, and Stella Webner.

Mr and Mrs. Wm. Schlawin were in Garner on business Monday afternoon.

A Farm Bureau Meeting was held at the Wm. Schlawin home Friday. The meeting was well attended and everyone enjoyed a good dinner at noon.

——7th ANNUAL HOG SALE——

Bred Sow & Gilt Sale

Thursday, February 16

Located at my farm one-fourth mile west of Klemme. Sale starts at 1:00 P. M. Sharp

OFFERING 50 HEAD OF SOWS & GILTS——

Reports show there are 6 to 8 per cent less sows to farrow this Spring than a year ago. Furthermore the Government reports 50,000,000 pounds of pork products less on hand than the five year average.

Now is the time to start a pure bred herd. Never in the past history have pure bred sows sold so close to pork prices as at the present time. Now is the opportune time to establish a pure bred herd, and in the coming years participate in the pure bred prosperty which is certain to come.

Chester White Dispersion

At the Internatonal Live Stock Show Nov. 26 to Dec. 3 Chester Whites won more prizes than any other breed. Grand Champion Barrow, over 1,000 entrees. Champion Dressed Carcass; Grand Champion Pen of Barrows; best pen in the Collegiate Class

Am sorry to part with the Chester Whites, but due to the extra work and expense in mainaining two breeds am selling all Gilts and Sows, one of the tried sows farrowed last spring 12, in Sept. 16, raised of these 25. A few good tried sows are as valuable as tested and tried dairy cows.

OFFERING 30 GILTS AND 5 TRIED SOWS

The Gilts are sired by "Big Bud," "Big Prospect," and "White Hawk." They are mated to outstanding sons sired by "Big Prospect," and "White Hawk," the 1927 Grand Champion.

A Safe Investment is a Chester White Sow——"THE MOTHER OF THE HOG."

Poland Chinas

Offering 15 Good Gilts sired by "Sun Ray's Ideal," by "Sun Ray," the great double ton litter champion in 1925-1926. One litter of 17 pigs weighing at 6 months of age 5,117 lbs. He sires the prolific, smooth quick-maturing, easy feeding type necessary to profit making in pork production. Two gilts by "Wall Srteet," two by "Play Boy." The offering is mated to "Night Hawk Jr.," a phenominal son of the Grand Champion "Night Hawk."

TERMS:—Cash, or make arrangements with the Clerk before the sale.
Try to attend this sale. If impossible send bids in our care to Auctioneer or Clerk

NEWS REVIEW OF CURRENT EVENTS

President Hints at Veto if Moderation Isn't Shown in Tax Reduction.

By EDWARD W. PICKARD

MODERATION in tax reduction is still insisted on by President Coolidge, and unless the revenue bill passed by the house is so amended that the total cut shall be not far from the $225,000,000 recommended by the administration it may be vetoed. That was the construction placed on the President's remarks at the semi-annual budget meeting of government officials. In part he said:

"I have expressed myself in favor of further moderate tax reduction. I have indicated the maximum reduction we can now afford. There was no partisan thought in that recommendation. I hope there will be none in its final consideration by the congress.

"We should not depart from the wise policy established, and thus far rigidly followed, of keeping our expenses within our receipts. That I had in mind in making my recommendation. It has made a rich contribution to the splendid financial status of the country. It has enabled us to hire money at a lower rate than any other business in the world. It has been effective in the maintenance of prosperity. It has the hearty indorsement of the taxpayers.

"That policy of a balanced budget—expenditures within receipts—must not be molested. It must not be endangered."

FOLLOWING closely the recommendations of the President, the army appropriation bill was reported favorably by the house appropriations committee. The measure carries a total of nearly $400,000,000, the largest since the war-time expansion period, and is more liberal than last year's bill in providing funds for the purchase and testing of new weapons and for motorized equipment. It does not, however, provide much for the building up of the depleted ammunition reserves. The air corps gets $4,432,968, the National Guard $1,729,144, and the organized reserves and R. O. T. C. about $900,000.

GOVERNMENT ownership and operation of the merchant marine will be continued if the senate has its way. That body, by a vote of 53 to 31, passed the Jones bill despite the opposition of the President. Nineteen Republicans joined with Democrats and the Farmer-Labor senator in support of the measure, while 24 Republicans and eight Democrats voted against it. The Republicans favoring the bill included not only the radicals but a number of senators ordinarily classed as regulars, such as Jones, Willis, Robinson, Gooding and Schall.

The feature of the bill which is regarded as the most objectionable to President Coolidge is a clause which prohibits the sale of ships except by a unanimous vote of the shipping board. Another provision which goes counter to the Coolidge policies recognizes the necessity for the replacement of present vessels and the construction of additional up-to-date cargo, combination cargo and passenger, and passenger ships and authorizes the shipping board to submit estimates to congress for this purpose. The President is against the expenditure of any government funds in the construction of any new ships.

Though the bill will have strong support in the house, its passage there is regarded as doubtful. Should it get through in its present form it is likely to be vetoed by the President.

TWO projected loans to Soviet Russia, totaling $70,000,000, were hard hit by the State department when this statement was issued:

"The department objects to financial arrangements involving the flotation of a loan in the United States or of the empolyment of credit for the purpose of making an advance to the Soviet regime. The department does not approve in any way the sale of Soviet bonds here."

Percival Farquhar already had negotiated a six-year credit of $40,000,000 for the construction and equipment of immense steel works; and the Chase National bank of New York and the Amalgamated bank of Chicago had planned to act as agents for payments of interest and retirement charges on a bond issue of $30,000,000 which was to be disposed of by the Soviet government by private sale to Americans.

WILLIAM G. McADOO projected himself into the political situation again with a rousing attack on the Presidential candidacy of Gov. Al Smith—or, indeed, of any wet. Addressing a law enforcement meeting in Richmond, Va., Smith's old rival for the Democratic nomination flatly contradicted some of the governor's recent statements, declared the "liquor interests" had captured political power both in New York and in Maryland, and argued that to expect prohibition enforcement from a President hostile to prohibition was "upon its face an absurdity." He said the issue was one that must be fought "to a conclusion" in the campaign of 1928.

The speaker suggested, among other things, that the federal government give financial aid to the states in prohibition enforcement, somewhat after the manner of the federal aid system by which states now are assisted in road building.

Senator Jim Reed's headquarters in Washington and New York are becoming very busy places, and the senator is to make a speaking tour of the South and West. The Smith boosters hope Reed will gather in a lot of delegates, for they expect all his votes will be turned over to Al before the contest is decided in the convention.

Managers of Lowden and Hoover, still the leading possibilities for the Republican nomination, are displaying immense activity in the states that have no favorite sons. Senator Curtis is developing considerable strength and it seems likely he will have quite a block of votes when the Kansas City convention opens.

REPRESENTATIVE J. B. ASWELL of Louisiana, ranking Democratic member of the house committee on agriculture, may have solved the troubles of congress in the matter of farm relief legislation, for the surplus control bill he introduced recently is looked on with favor as a compromise that might be agreed upon by the administration leaders and the supporters of the McNary-Haugen bill. Of course in that case it would be redrafted and introduced by some Republican. While it accepts the structure and general machinery of the McNary-Haugen bill, the Aswell plan eliminates the equalization fee, held by the administration to be unconstitutional.

"In lieu of this federal tax on the producers," the author explains, "we provide for the payment from the treasury through a revolving fund of losses, costs and charges arising under marketing agreements; the revolving fund to receive the profits from the sale of commodities. A total appropriation of $400,000,000 is authorized for the revolving fund, but only $250,000,000 of this sum is made available for such payments. The remaining $150,000,000 is for loans to co-operative marketing associations, whereas in the McNary-Haugen bill the entire $400,000,000 is available for loans and the producers are liable to assessments for handling their crops."

The only other material variation in the Aswell bill gives the proposed farm board power to control production by refusing to commence a marketing period or by terminating any existing period for a commodity that has been substantially increased against the advice and program of the board or above the immediately preceding five-year average.

ON FEBRUARY 6, the sesquicentennial anniversary of the first treaty between the United States and France, the new treaty of arbitration was signed by those nations. It is a substitute for the Root arbitration treaty, and its preamble contains a declaration against war as an instrument of national policy. Under the pact, should a controversy arise between France and the United States that falls of diplomatic treatment, the arbitration formula must be subject to the approval of the American senate. In addition, the agreement bars from arbitration any disputes concerning purely domestic affairs, those involving the interests of a third party, or the Monroe doctrine.

FOREIGN MINISTER STRESEMANN of Germany, whose recent illness led to predictions of his retirement, has recovered enough to deliver two rousing speeches before the reichstag. In the first he set forth all that Germany has done for the solution of the security problem, declaring no other state has done more or as much, and branded the French fears as hypocrisy. He said the German army was too small even to defend the country's own borders and demanded the evacuation of the Rhineland because its military occupation "is one of the greatest obstacles to a real Franco-German rapprochement." Next day Herr Stresemann, replying to Nationalist critics, reasserted his resolve to adhere to the Locarno policy, and then again appealed to France to "raise the iron curtain in the Rhineland" in order that Germany and France may work together for world peace.

Foreign Minister Briand of France replied by saying that if Germany wished to hurry up the evacuation she must pay the reparations more swiftly.

OSCAR UNDERWOOD, member of the United States delegation in the Pan-American conference in Havana, says the doings of that conference will greatly improve the relations of this country with Latin America. One of its chief achievements, he thinks, will be the adoption of the Pan-American aviation treaty.

The committee on Pan-American union affairs adopted the Mexican plan permitting each nation to name anyone it wished as its representative on the governing board, but decisively rejected Mexico's suggestion that the chairmanship of that board be given each republic in turn.

FLYING about 750 miles, much of the time over unexplored mountain and jungle country, Colonel Lindbergh in the Spirit of St. Louis made the trip from Bogota to Maracay field, near Caracas, in a little more than ten hours and was warmly welcomed by President Gomez of Venezuela and a great crowd. The ambassador of good will was delayed by losing his way in a fog, but as always he arrived safely. In Caracas the customary honors were heaped on the young man and then, on Wednesday he hopped off again for a thousand-mile flight to the Virgin islands. He followed the great curve of the Antilles, passing over those beautiful islands one after another, and in 10 hours and 15 minutes made a beautiful landing on Lindbergh field, St. Thomas. Capt. Waldo Evans, governor of the islands, met him and they led a great procession through the city of Charlotte Amalie, the entire population taking part. Thursday Colonel Lindbergh flew to Porto Rico.

EARL DOUGLAS HAIG, Great Britain's most famous soldier in the World war, died quite suddenly at his sister's home in London, and the nation was plunged in mourning for the mighty warrior who, all his life a soldier, had risen to be field marshal, commander in chief of the British armies in France, Knight of the Thistle and peer of the realm. There was a state funeral for Sir Douglas in St. Paul's and his body was burled at Bemersyde.

Vicente Blasco Ibanez, the eminent Spanish novelist who died in exile in France, left instructions in his will that he be not buried in Spain, so he was interred at Mentone; but earth brought from Valencia, Spain, was sprinkled in his coffin and his body was wrapped in a copy of the banner carried by El Cid Campeador, Spain's national hero.

FLAMES swept through the business and industrial districts of Fall River, Mass., Thursday night, and before the conflagration was checked an area of five blocks had been devastated. More than twenty-five buildings were destroyed and the property loss was estimated as high as $35,000,000.

POULTRY

EGGS IN WINTER ARE PROFITABLE

Winter is the very time when eggs are worth the most, when hens want to lay as much or more than they do at any other time, and when they are not allowed to do so by most poultry-keepers. Folks think there is a great mystery about making hens lay in winter. There is none; anybody can do it; that is, the hens will lay if you let them. They bear a good deal of cold in the sunshine, and even freeze their combs and toes, and yet will not stop laying altogether if they can sleep warm.

They are warm themselves, and usually only need to be crowded on their roosts, with the roosts all on one level. The ceiling of the roosting room should be only a few feet above the fowls' heads, and provided with ventilation from the floor if possible. Give them very close quarters, with no draughts of cold air, and clean out under the roosts every morning. The combs will then redden up, and eggs will be plenty on less feed than usual. It must not be corn, however, or only a small percentage of it, for this will make them too fat to lay well if they sleep warm.

A good way to arrange a hen house for winter is to make a ceiling of rails about six feet above the floor, covering the rails with hay, or coarse swamp hay of any kind. The roosts should be about three feet high above the floor, and movable, so that they may be kept perfectly clean. For small flocks of 30 to 50 hens, it is little trouble to take the roosts down every morning when the floor is cleaned, and replace them at night. It removes from lazy fowls the temptation to sit in idleness on the roost for half the day.

Keep Chickens in Good Health by Giving Oats

One of the best ways to keep chickens in good health is to feed green food. It acts as a regulator, keeping the bowels open. Sprouted oats are as good a source of green food as anything, when fed, roots and all, to the layers once a day as much as the birds will clean up in about half an hour.

The oats are soaked for 24 hours in warm water, that is, slightly warmer than room temperature. They are then spread in trays of any convenient size to a depth of about one and one-half inches and allowed to sprout until the green sprouts are about three inches long, at which time they are fed. If the oats can be kept at a temperature of about 70 degrees, the sprouting will be more satisfactory than if the room is cool. To prevent the oats from becoming moldy, wash and disinfect the trays when they are emptied after each sprouting. Three or four drops of formalin may be put in each pail of water used for soaking the oats before they are spread on the trays.

Sometimes the oats are allowed only to germinate, that is, they are soaked in water as for sprouting and are spread on the trays but are not permitted to sprout to the extent described above. They are fed when the sprouts show a length of only one-fourth inch. They are not green. These germinated oats are frequently mixed in the mash and fed.

Metal Bands Are Useful in Culling Hen Flock

In order to systematically cull the poultry flock, one should know how old the hens are. All two-year hens ought to be sold, with the exception of those to be used for breeders. This is especially true of the general purpose and heavier breeds. If the pullets are marked with some kind of a metal band, one will have no chance for guesswork.

Special sealed bands may be secured for the purpose or ordinary round hog rings may be used. The advantage of the regular bands lies in the fact that each hen can be identified. If the bands are put on the left leg one year and on the right leg the next year, one has an accurate mark by which he can tell the age of the hens.

Sand Is Essential

Sand is essential for hens to supply grit, but not for dusting material. Even fine sand would not be dusty enough to do any good from the standpoint of a dust bath. Hens dust themselves in order to keep lice under control and their feathers in good condition. The fine dust gets into the breathing pores of the lice, thereby exterminating them. Supply the hens with a good-quality dust and then give them sharp sand so that they can pick up the grit.

Hen to Keep

The kind of a hen to keep is one that is strong and vigorous with a short, neat head and a strong beak. She has a long, deep, rectangular body, the top and bottom lines of which are parallel. She has large bright eyes, is active and has short, well-worn toe nails. She isn't much for appearance, but has a bright, healthy look. She molts late and rapidly; is noisy, happy and friendly. She retires late and is off the roost with the break of day.

Keep Fit This Winter

Your Kidneys Must Function Properly For You to Be Well.

WINTER is hard on the kidneys. All too often colds and chills upset the action of the kidneys and allow poisons to remain in the system. That's why winter finds so many folks achy and tired; with backache, headache, dizzy spells and scanty, burning kidney secretions.

Doan's Pills, a stimulant diuretic, increase the secretion of the kidneys and aid in the elimination of waste impurities. Are endorsed by users everywhere. *Ask your neighbor!*

Doan's Pills

A Stimulant Diuretic to the Kidneys

Her Day Off

When Evelyn Edwards was a little girl, her Aunt Florence sent her to the store one Saturday afternoon, to buy some lace. After wrapping it up, the clerk said:

"There is one and a half yards of lace at 10 cents a yard; how much does that come to?"

To which little Evelyn pertly replied:

"Well, I'm not going to tell. I have to study arithmetic all the rest of the week, and I'm not going to bother my head with it on Saturday."

How's Your Stomach? Do You Need a Tonic?

Bellevue, Nebr.—"About one year ago I went down in health, my food did not digest, I lost flesh and was very weak. I thought I would try Dr. Pierce's Golden Medical Discovery and the 'Pleasant Pellets' and they have done me a great deal of good I have gained in health and strength. I can and will recommend Dr. Pierce's Discovery to anybody; in fact I have recommended it to quite a few."—Mrs. Mary Jane Krentz, Box 274. Sold by dealers.

Send 10c to Dr. Pierce, Buffalo, N. Y., for a trial package of Discovery Tablets (a tonic) or Pellets (a laxative).

American Spirit

President Green of the American Federation of Labor was condemning Soviet Russia and labor's proposed affiliation with it.

"I hate," he ended, "the Soviet spirit of envy and destruction. Give me its direct opposite, the American spirit, that says:

"'Hats off to the past, coats off to the future.'"

When a Man Marries

"So you want to marry my daughter? Are you able to support a family?"

"I think so."

"Now think again, young man. There are seven of us."—Pittsburgh Sunday Telegraph.

Her Fingers Crossed

He (during the spat)—But you promised to obey at the altar.

She—Of course. I didn't want to make a scene.

One need not heed the blusterer; but beware of the silent man.

TWO HOMES MADE HAPPY

By Women Who Used Lydia E. Pinkham's Vegetable Compound

"I have taken Lydia E. Pinkham's Vegetable Compound and I think it is the most wonderful medicine I ever tried," is the statement made by Mrs. Goldie Shoup of St. Joseph, Illinois. She declares that after taking the Compound she is in better health than before.

Mrs. J. Storms of 29 Lane Street, Paterson, N. J., writes: "I can not speak too highly of your medicine and I recommend it to all my friends."

These statements were taken from two enthusiastic letters which tell of the help that has been received from using the Vegetable Compound. Both Mrs. Shoup and Mrs. Storms were in a run-down condition which caused them much unhappiness. When women are suffering from lack of strength and from weakness, their own life and that of their family is affected. When they feel well and strong and are able to do their housework easily, happy homes are the result.

Thousands of testimonial letters have been received from women in different walks of life, stating that the Compound has helped them.

MANY SCHOOL CHILDREN ARE SICKLY

Mothers, for your own comfort and the welfare of your children, you should never be without a box of **Mother Gray's Sweet Powders** for children for use throughout the season. George Washington, Human Being

WASHINGTON IN 1779
Painting by C.W. Peale

PORTRAIT PAINTED ON BED TICKING AT VALLEY FORGE BY C.W. PEALE

By ELMO SCOTT WATSON

THE approach of February 22 recalls not only the great figure whom all Americans honor upon this date but also the material relating to his life which has come to light during the past year to make even better our understanding and our appreciation of him even greater. As usual an amount of new Washingtoniana, vast in quantity, considering the years that have intervened since he walked the stage of American history, has been unearthed and an even greater amount, heretofore known only to professional historians, has been made available to the general public.

And as usual the most important Washingtoniana items are the new books which have been written about him, interpreting anew the life of this man who has been the theme of so many biographers. Undoubtedly the outstanding Washington biography of the year is the second volume of Rupert Hughes' study of him, published by William Morrow and company of New York, which takes up the narrative where his first volume left off and tells the story of "George Washington, the Rebel and the Patriot, 1762-1777." The Hughes interpretation of Washington is important for more than one reason, the principal one being that he, more than any other Washington biographer, has been the storm center of public discussion and as a result many people who would not otherwise be likely to read a biography of Washington have rushed to do so to see for themselves whether or not Hughes has maligned the memory of the Father of His Country. Of course, this is unfortunate for a man who is seeking honestly to tell the truth—and no one can read the Hughes' volumes without being impressed by the fact that he IS. But in the long run it is a fortunate circumstance, because it is making more Americans better acquainted than ever before with the facts about Washington, not just the dim school book legends. Though to some persons some of these facts may be unpleasant, they cannot help seeing that the favorable aspects of Washington's character far outweigh the unfavorable and they will find that it is only by a consideration of both that they have reached some adequate understanding of the real Washington.

In his first volume Mr. Hughes stated his purpose as follows:

> To find out as far as possible and to repeat as faithfully as possible just what George Washington was, did, said, wrote, thought, and why and how. . . .
>
> The main effort has been to let Washington tell his own story as fully as possible in his own words. This is, indeed, as nearly an autobiography as I can make it.
>
> My incessant effort in this biography has been to see his life as he saw it. All other biographers have tacitly assumed that he knew the future and builded himself grandly for it. They have looked backward upon him through the dazzling aureole of his apotheosis. But that was not the way he saw the world. He had to grope for his faith and he missed few of the pitfalls, the thorns and the torments of the way. No more did he miss the primroses, the festivals, the dances and sports and romances.

That purpose is repeated in his second volume in which he says:

> Again as in the first volume my incessant endeavor has been to let Washington tell his own story in his own words, and to try to see his world and his times as they must have looked to him, not as they appear to a backward gaze across a landscape filled with tall oaks, that were once acorns and monuments that were once men.
>
> Washington, like every other animal, vegetable and mineral, was an evolution in body and character. With him as with all other earthly beings environment played a vital part and changed him while he changed it. It is no sacrilege to represent him as a boy before he became a man, and a man before, and while he became a god.
>
> And there is no kindness to him in suppressing the facts for the more fully the truth about him is told the greater his achievement becomes. . . .
>
> It is the most tragic of farces that so many Americans should insist both that Washington could not tell a lie and that his chroniclers may not tell the truth.

Although the first volume of the Hughes' biography is called "The Human Being and the Hero," the second volume, if anything, more than the first, gives us an insight into George Washington, the human being. For it is in the period which this volume covers, 1762 to 1777, that we see Washington, the Virginia planter who gambled, drank wine and rum, hunted, danced, and farmed as did the other country gentlemen of his time. Nor do we have to rely upon the words of a Twentieth century biographer that he did these things. Washington himself is our authority and he set down the whole record with painstaking accuracy in his diaries and ledgers.

A careful and a methodical man this Virginia planter. Married to the wealthiest woman in America, possessed of thousands of acres of land surrounding Mount Vernon, he had, with his own extensive interests, a big job on his hands and he went about handling it in a careful and methodical manner. So he kept a close record of all of his activities, his winnings and losses at cards, game killed, crops raised and sold, slaves bought and bartered, dances and dinners attended and all of the other details of the complex life of that period. If he often set down such entries as "By play tickets at Sundry Times £1.17.3," or "By Lost on the Race 3.s," or "By Cards (loss) 10.s.", he also recorded frequently his generous impulses thus: "By Gave a Beggar," or "By Treating the Ladies 4.s."

"At the end of every year he totaled up on one page all the sums taken, whether from tobacco, Burgess wages, house or farm rentals, and other sources of income, not neglecting an occasional winning at cards—for he was not even perfect as a gambler; he sometimes won," writes Hughes.

"On the opposite page he summed up the outgo of all sorts and then struck a balance. It is delightful to find that his books never came out right." Some of his explanations are ingenuous—"By mistake in Count of the English Silver last year," "By Cash lost, stolen, or paid away without charging."

That the necessity for "farm relief" was sometimes as acute in his day as it is today and that keeping a country estate was a great luxury then even as now is shown by the following quotation from his journal: "It is almost beyond belief that from 101 cows actually reported of a late enumeration of the Cattle that I am obliged to buy butter for the use of my family." Another indication that Washington faced the same problems as Americans of today is shown by the doctor bills for his family—Martha and her two children, Jack and Patsy Custis—which were a large item, amounting in one year to more than eighty pounds, not including a physician who was kept on salary for the servants and slaves.

He kept his diaries as faithfully as he did his ledgers. Here he gives in his own matter-of-fact way the record of the teeming activities of Mount Vernon, his fight with the stubborn Virginia soil, his struggle for more wealth through the cultivation of tobacco, his efforts to secure for himself and the soldiers who had been under his command large tracts of western land and, occasionally, in the latter years, of the drift toward revolution.

"Of introspection he betrayed never a hint," Hughes says. "A more emotionless diary was probably never written. His only warmth was shown in the pages over which he wrote at the top, "Acct of the Weather—in Feby" or whatever the month might be. Here it singularly pleased him to be minute, enthusiastic and as near to poetic as he ever came. Except for the sufferings of his soldiers, his highest eloquence was reserved for the weather. . . .

"Remove from Washington's life his careers as a soldier and a statesman, and there remains little to distinguish him from the average successful business man of his day and ours," Hughes writes. But he was a scientist as well. He had the scientific spirit and was always experimenting with manures and fertilizers, new methods of planting and plowing.

Such was the Washington at Mount Vernon and if we find it necessary to bring forward any more evidence of the humanness of the man it can be found in the record of Washington as commander-in-chief of the Continental army. Of his career in this role Hughes has written:

> Pathos is the most endearing of all qualities and it has been impossible to love or feel sorry for the Washington of the textbooks. Yet he himself was an infinitely pathetic lonely figure. He was in no sense a god struck from the brow of Providence in full uniform. He was a poor struggler with infinite difficulties at a time when chaos groaned in a swoon of torment from whose travail a nation was born and shaped amid the cries of pain and writhings of uncertainty.
>
> Nobody knew just what the right or the helpful thing to do, or what the outcome would be and Washington was as profoundly bewildered as anybody. Everybody who knew him spoke of his shyness, his embarassment. He inspired awe and reverence also, but for the purity of his patriotism and the loftiness of his ideas. Yet he was wretchedly afraid of himself and he had no ambitions except to grow rich, be free, cultivate his farm and his friends, his charities, and the other charms of this world and leave behind him an honorable name.
>
> He was forever being appealed to to save friends, relatives, regiments, colonies, or the nation from their own mistakes and jealousies, and he did his best for them, going into debt to lend money, taking on trusteeships to the neglect of his own affairs, forever writing letters and keeping books, though he lov d to dance and follow the hounds and shuffle the cards and let the theater display before him the woes and entanglements of people who would not ask him to arrange their lives for them. . . .
>
> It is surprising to find how exceedingly emotional Washington was, how bewildered, how sensitive, and how frank in his criticisms. It is very touching to note his concern about the public opinion of his efforts, and the pain it gave him to be harshly criticized for inactivity that he could not help and dared not justify even to his own friends and fellow officers.
>
> He made no pretensions whatever to unusual wisdom or ability and protested incessantly that he was ignorant, inexperienced and incompetent to his problems, but that his motives were honorable, unselfish, and unmercenary.
>
> The man himself is infinitely more appealing, pitiful, heartbroken, tragic, gay, witty, tender, gracious, tactful, fearless, ferocious, heroic, and, at his loftiest, sublime than the dull gray bore manufactured by stupid dullards, stodgy politicians and mongers of untruism.

There is but one thing needed to complete the picture of Washington, the human being, and that is to show that this man, who has been so often painted as a towering demi-god incapable of the commonest of human emotions, was at times capable of towering rages. Cowardice always infuriated him and after one particularly disgraceful exhibition of panic on the part of his troops we have this picture compiled from contemporary accounts:

> Throwing his hat upon the ground in a transport of rage and indignation, he cried: "Are these the men I am to defend America with?"
>
> He drew his pistols and snapped them at his men—he always thought a coward better dead. But his pistols would not fire.
>
> It was said that he drew his sword and threatened to run the cowards through. It is known that he used the canewhip he carried and he beat his people over the shoulders, flogged not only the private soldiers but officers as well. He lashed the colonels across the shoulder blades, swinging his plunging horse this way and that in the torrent of men gone rat. He flailed a brigadier general.
>
> And at last, when the British approached very close, he was so bitten with despair that he would not move and an orderly had to lead his horse away.

In Daze on Wedding Day

Three days after his wedding day, David J. James, who disappeared on the eve of the event, arrived at the home of his parents in Bridgen, Ireland. His clothes were wet, and he appeared dazed and was unable to give an account of himself. He could recall nothing about the arrangements for the wedding, but remembered being hit on the head while at work the day previous to his disappearance. The bride-to-be, Miss Ste. Hicks, had returned to her duties as nurse in the south of England, and the wedding guests, who were from out of town, had gone back to their homes.

Free as air; air is free. Which may account for so much automobile horn-blowing.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what *is* the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Westinghouse

Farm LIGHT & POWER Plant

Light that Saves ~ Power that Serves

Easy to Own

One of the things that makes the Westinghouse Light and Power Plant so desirable is the deferred-payment plan. You can have the plant installed for a small percentage of its cost, meeting the balance conveniently.

Easy to Operate

The Westinghouse Light and Power Plant is so simply designed that anyone, with a few minutes instruction, can operate it. It can be installed in a corner of the cellar, or in an out-building.

THE money you now spend for kerosene alone will operate a Westinghouse Light and Power Plant. And you get *light* anywhere you want it by merely pressing a button.

You get *power*, too. Power that makes running water possible for the bath room, the kitchen sink, or out in the barn. Power with which to do the chores, indoors and out, *saving* your time and strength, as it *serves* you faithfully year after year.

Would you like to know more about the Westinghouse Plant? We have a new book that tells the whole story. Want a copy?

THE KLEMME TIMES

Fortieth Year—Number 37. KLEMME, IOWA, THURSDAY, FEBRUARY 16, 1928. $2.00 Per Year In Advance—Outside of Iowa $2.50

CREAMERY REPORT SHOWS BIG INCREASE

NEARLY $50,000.00 INCREASE IN BUSINESS OVER LAST YEAR

Gain Of Approximately One Hundred Seventy Five Per Cent 10 Years

Beginning business a number of years ago with a small equipment and a handful of patrons, the Klemme Co-Operative Creamery Company has grown by leaps and bounds until it is now ranked as one of the bigest and most successful farmers' organizations in Northern Iowa. The increase in business has been phenominal: increasing from $108,336.20 in 1916 to $285,236 33 this year, approximately and roughly estimating about one hundred and seventy-five per cent The records show that for the month of January just past the business increased exac ly 14 per cent over Januarp last year.

Business Outlook Good

Nearly every week more patrons are being added to the growing list of satisfied customers of the local creamery. With good weather, fair prices the volume of business for this year will easily hit the $300,000.00 mark.

The increase in dollors and cents this year over last amounted to $44,459 90 which is not a small item

The directors, officers and patrons can all feel proud of the showing which is being made by this concern All of Klemme and vicinity are very much concerned in keeping up the good work of the organization

Improvements Were Added

To keep stride with the increasing volume of business it has been necessary to add new machinery from time to time, in order to handle the business of making more butter

During the past year a new churn was installed a new tester and testing scale, a moisture testing outfit, new type bottles installed and the interior of the creamery re-painted.

At the present time a new refrigerating machine is being installed at the plant. This machine is the Vilter Self-Contained machine, electrically equipped and has a capacity of 6 tons. Not only will this new machine be used for refrigeration of the carload-size storage room, but it will be used for coling the cream vats, supplying ice-cold brine piped to the vats and circulated with a pump. A new vat will also be installed to increase the capacity of the plant Heretofore water has been used in cooling but this process is far too slow to take care of the big volume of cream now being handled. Had not this equipment been added the plant could not take care of the business and as a result many patrons would have to be turned away.

At the annual meeting new officers and directors were elected, but little change has been made in the present staff for yars. The names of the officers and directors are given in the statement on this page.

Mr. A. D. Gimer has been re-elected buttermaker now for the fifteenth consecutive year Val. Josten has been secretary now for about eleven years. Paul Mueller has been assistant now for several years. Mr. Gimer is recognized as one of the best buttermakers in the state and has won a number of medals and ribbon for making fine butter. Mr. Josten, besides keeping an accurate set of books and records, devotes a lot of his time to field work, procuring new business for the creamery and visiting with the farmers.

The board and officers are all fine fellows, good farmers and keen businessmen.

It may be somewhat early to make announcement, but at the annual meeting it was voted to put on a big dinner ext year for the patrons and friends of the creamery and the families. This will be the biggest thing of its knd ever staged in Klemme.

A study of the statement on this page will be of interest to all.

MURRAY IN PICTURE AT GARNER THIS WEEK

Charlie Murray has one type of comedy characterization in which, through years on stage and screen, he has proved himself the funniest man in pictures. He's coming to the Lyrich theatre at Garner Friday and Saturday this week in just that sort of role'

In "The Life of Riley," in which he is co-featured with Geo. Sidney, Murray is a small town fire chief, inventor of a fire extinguisher, and storekeeper Sidney is chief of police of the same village, and iceman on the side. Both the famous comics love the ame facinating widows, a role enacted by Myrtle Stedman.

The plot starts from there and never pauses for an instant to dish up laughs and thrills. Of course there is a villiain; a novel and interesting type of photographer, shell game operator and slicker, enacted by Sam Hardy The principal romance is distinctly comedic in nature, but there is a youthful affair between June Marlowe and Stephen Carr, that is full of heartthrobs and wistful sweetness

MISS CLARA LARSON AND MR. WALTER LAUDEN MARRIED

Ceremony Held Tuesday At The Reformed Parsonage

Tuesday, February 14th, Valentine Day was selected as a happy day for a marriage by Mr Walter Lauden and Miss Clara Lrson. The wedding was a quiet affair and was held at the Reformed Church parsonage at 2:00 o'clock, Rev. Calvin Grosshuesch reading the rites. The bride was attended by her sister, Lenora, and Alvin Lauden acted as best man, a brother of the groom.

The bride was attired in a gown of rose peach tau satin crepe, while the bridesmaid wore a dress of tan brown satin crepe The gentemen were attired in the conventional blue suits.

Following the ceremony a wedding dinner was served that evening at the John Larson home west of this place, ad later the happy couple departed for a short wedding trip.

Both of these young people are very fine young folks, of fine character and high ideals. They have a host of friends who wish them the best in their journey thru life

LOCALS WILL MEET HAYFIELD THIS FRIDAY EVENING

County Tournament At Britt Next Week End

The Klemme High School Cagers will play Hayfield on the local court Friday evening of this week. They hope to avenge the defeat suffered at Hayfield earlier in the season. Hayfield has a good team and our boys must be in good fettle to win.

We may have a grade game the same evening, depending on whether or not Hayfield brings their grade boys along.

The Hacock County tournament will b held at Britt next Friday and Saturday Noel Workmon, football coach a Ames, will have charge. He will be assisted by another man from Ames

Supt Penrod and Prin. Miss Trumbull went to Thornton Wednesday evening to judge a declamatory contest

Our winners of first place will speak at Belmond the week following our county tournament, against Belmond, Kanawha and Goodell.

CONDUCTS OPERETTA

From The Keswick News in the Sigourney Review, Feb. 1, 1928:

"The operetta, "In Old Louisiana" given by the high school pupils Tuesday evening was a real success. The stage was transformed into a beautiful flower garden, being decoratd with roses. Two musical numbers, a mellophone solo by Orville Underwood and a whistling solo by Edna Churchill were given between acts. Mis Adela Schroeder deserves much praise for the management of the operetta as each pupil did their part exceptionally well. Proceeds amounted to over $90.

REEMTSMA'S SALE DATES

Monday, February 20 Zimmerman and Park, 3½ miles north and 1¼ miles east of Woden.

Tuesday, February 21, H J. Stille, 2 miles west and ½ mile north of Klemme

Thursday, Feb. 23, Nels Anderson, 1½ miles north and 1¼ miles east of Goodell.

Friday, Feb. 24, Geo Groen, ½ mile north of Meservey.

SEVENTEEN CARS OF STOCK SHIPPED

SATURDAY BIGGEST RUN THIS SEASON LOCAL YARDS

Shipment Consisted Of Eleeven Cars Hogs And Six Cattle

The biggest shipment of live stock this season was handled at the local stock yards Saturday night when seventeen cars were loaded and shipped to the U. S Yards, Chicag

The Klemme Live Stock Ship Association led the procession with seven car loads of hogs and two car loads of cattle.

C. A. Larsen shipped three car loads of hogs and two car loads of cattle.

John Larson shipped one car load of hogs and one car load of cattle

C O Evans handled a car load of cattle

Stock shipments have been brisk here this winter and large shipments go out every week end.

Klemme has become famous as a live stock shipping point Local buyers pay good prices.

Ell Township Caucus

A Caucus of the Republican voters of Ell Township will be held at the Town Hall in Klemme, a., on Tuesday evening, Feb. 21st at 7:00 o'clock for the purpose of selecting eight delegates to the County Convention which will be held at Garner on Feb 25th F. A. ARNOLD, COMMITTEEMAN 1tc

ELMER LUDEKE IN AUTOMOBILE BUSINESS AT GARNER

Elmer Ludeke, former Klemme farmer, but now of Garner, was in town Wednesday on business.

Mr Ludeke is in the automobile business at Garner and is the pardner in the Houdek & Ludeke Co.

They cary a complete line of the Willys-Knight, Falcon and Whippet Motor cars, and as Elmer puts it, 'We have a car for every purpose and every pocket-book." They have an adv in this issue, calling your attention to a special feature they are putting on this week.

Liberty Township Caucus

A caucus of the Republican voters of Liberty Township will be held at the Center School House on Monday evening, Feb. 20th at seven o'clock. for the purpose of selecting delegates to the County Convention at Garner on Feb. 25th. L. W. GRIFFEN. 1tc

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

10 00 a m. English service.
Offering for foreign missions.
11:00 a. m. Sunday school.
Wednesday evening young peoples Bible class.
Confirmation class on Tuesdaps and Saturdays.
Junior Choir Sat. afternoon.

A number of fans took in the basket ball game between Klemme and Britt Saturday evening on the Britt floor. Klemme lost the game, but put up a real battle. Britt got a lead in the first and third quarters but Klemme played them even the other quarters. Gibson for Klemme got "hot" and piled up a number of field goals from long shots. Nelson was the star performer for Britt leading in points and was the outstanding player on fast floor work.

Mr. Edwad Schlei, Mrs. Ed. Weisbrod ad Mrs. Elmer Schei, of Fenton, came Wednesday for a visit with Kemme reatives and to see Mr. Emer Schei at the Mason City hospita. Mrs. Geo. Boillinger, of Fenton came with them and visited with her parents, Mr. and Mrs. Klinge

NEWS REVIEW OF CURRENT EVENTS

Pre-Convention Doings of Republicans—"Lindy" Reaches Havana.

By EDWARD W. PICKARD

REPUBLICAN interest in the pre-convention Presidential campaign centered on the question of what Herbert Hoover would do in the matter of entering the Ohio preferential primaries. Formal steps to induce him to contest with Senator Frank B. Willis for the state delegation were taken by a committee of prominent politicians formed at Columbus and a petition to the secretary of commerce was circulated for signatures. Mr. Willis, being a "favorite son," has indicated that he is ready for the fight and it is admitted that if Mr. Hoover does enter the primaries, and loses, his cause will have received a serious blow.

Some of the eastern party leaders who are opposed to the Hoover candidacy, notably Secretary of the Treasury Mellon and Charles Hilles, are reported to be alarmed by the growing strength of Hoover in the eastern states and to be laying plans to bring about a deadlock in the convention in the hope that this would be broken by the "drafting" of Mr. Coolidge. The Pennsylvania delegation will go to Kansas City solid for Mellon and ready to jump where he tells it to. Hilles and State Chairman Morris of New York have arranged that the New York delegates shall not commit themselves until something more definite is known as to the chance of renominating Coolidge. Governor Fuller of Massachusetts may be brought forward in order to check the Hoover campaign for delegates in the Bay state. It appears that these anti-Hoover leaders, if they could not have Coolidge, might line up their delegates for Dawes. Mellon and probably others of them would prefer even Hoover to Lowden because of the latter's stand in favor of the McNary-Haugen brand of farm relief legislation. In Ohio the Lowdenites are backing Willis and in Indiana they are supporting Senator Watson, believing Lowden will benefit by this when those gentlemen find their chances in the convention are nil.

Developments of the week in Illinois politics were exciting locally and promised to have some effect on the Presidential campaign. Gov. Len Small, desiring a third term, was forced to surrender to Mayor Thompson of Chicago, agreeing to make Big Bill his patronage dispenser in the metropolis in return for the support of the Thompson organization. The mayor has been strongly opposed to sending any Lowden delegates to Kansas City from Cook county and also is the political foe of Senator Deneen. So it is not unlikely that the friends of Lowden and Deneen will make an alliance with the supporters of Secretary of State Emmerson, who is out for the gubernatorial nomination. In this way they might elect a considerable number of Lowden delegates throughout the state. The matter of Frank L. Smith, senator-elect, who was denied his seat, also enters into the Illinois situation. Mr. Smith resigned his credentials, was reappointed by Small and announced his candidacy for re-election in November.

Among the Democrats of the country the campaign of Al Smith goes along fairly smoothly but with somewhat less impetus. McAdoo's Virginia speech chirked up the dry Democrats a lot and in several states the opposition to the New York governor was noticeably stronger. But it isn't strong enough yet to lead to revision of the prediction that he will be the party's nominee at Houston. The suggestion that Jesse Jones of Texas be named as Smith's running mate seems to meet with increasing favor.

CORRESPONDENCE made public by Senator Walsh, prosecutor for the senate's Teapot Dome investigating committee, reveals the fact that John D. Rockefeller, Jr., strongly urged Col. Robert W. Stewart, chairman of the Standard Oil Company of Indiana, to tell the committee who were the beneficiaries of the notorious $50,000,000 Continental Trading company, Ltd., deal—information which Stewart declined to give and in consequence was cited for contempt Senator Walsh wrote to Mr Rockefeller asking his aid in unraveling the Continental mystery and the letter promised to do all he could to clear it up. Later he wrote Stewart saying the chairman owed it to his associates and stockholders and to the public to bring the questionable transactions into the fullest light.

Mr. Rockefeller was summoned to appear before the committee Saturday.

COLONEL LINDBERGH ended his Latin American air tour Wednesday when the Spirit of St. Louis gracefully swooped down on the flying field at Havana after a 750 mile flight from Port au Prince, Haiti. Thousands of Cubans who had waited hours in the hot sun rushed forward with wild cheers and overwhelmed the soldiers and police. Not until calvalry men had cleared the field was the young aviator able to alight and receive the greetings of Charles Evans Hughes, Ambassador Judah and the high Cuban officials gathered to meet him. At the Presidential palace President Machado told him what he and his fellow Cubans think of him, and thereafter he was the guest of honor at the usual receptions, luncheons, banquets and balls. He announced that he would make his homeward flight direct from Havana to St. Louis, starting February 13.

The first air-mail service between the islands of the Antilles was inaugurated with Lindbergh's arrival Wednesday. Two sacks of mail from Santo Domingo and one from Port-au-Prince were delivered at Havana by the plane.

Costes and Lebrix, the Frenchmen who were the first to fly across the south Atlantic, made their way up from Mexico City and on Wednesday brought their big plane, the Nungesser-Coli, down on Bolling field, Washington. They were elaborately entertained in the national capital, and on Saturday flew to New York.

SANDINO, Nicaraguan rebel leader, was reported to have gathered about 500 calvarymen near Jinotega and detachments of this force were engaged in looting coffee estates in the vicinity. Several appeals from planters for protection were received by the British charge d'affaires at Managua and he informed American Minister Patterson that his government expected full protection for British lives and property in the affected area. There already were companies of American marines in Jinotega, San Rafael del Norte and Matagalpa and steps were taken to strengthen the garrison at the last named city, whose citizens were becoming decidedly nervous. Sandino left a note at one coffee farm saying:

"The marines are very cowardly. They did not care to fight me in the Segovias. When they come here I will meet them and blood will flow in these hills near Matagalpa."

In view of the congressional attacks on our policy in Nicaragua, it is interesting to read that an investigator for the New York Times has found that Wall street's direct financial interest in that country is only $185,000, which is scheduled to be paid off in three months. The total American investment in Nicaragua is estimated at $12,000,000.

TRANSATLANTIC television became a demonstrated reality last week when a group of persons in a darkened cellar at Hartsdale, N. Y., gathered about the televisor invented by John L. Baird and saw the moving figures of a man and woman who were seated before an electric eye in a London laboratory The transformed vision came through the ether in the form of a bumblebee's hum, a musical buzz of irregular cadence representing in sound the lights and shadows of their faces—all that was transmitted in the test. When the televisor, a black box compact enough to be carried around in a taxi, had done its work with this rhythmic rumble from across the sea the visions gradually built themselves up of tiny oblongs of light suspended in a whirling rectagle of brilliance in the machine's gaping mouth.

GOV. ED JACKSON of Indiana went to trial last week on a charge of conspiracy to conceal an alleged offer of a bribe of $10,000 to his predecessor, Warren T. McCray, who was sent to the penitentiary. Jackson and his two codefendants, George V. Coffin and Robert I. Marsh, waived arraignment and were granted separate trials, whereupon the governor pleaded not guilty and the examination of jurors was begun. Jackson is alleged to have conspired with Marsh and Coffin to bribe McCray to appoint the man they designated as county prosecutor at Indianapolis. McCray refused the alleged bribe offer of $10,000 and "protection from prosecution in any county Criminal court." Then he appointed W. H. Remy, as prosecutor.

FLOOD control legislation making the government responsible for the entire cost is favored by a majority of the house flood control committee and the senate commerce committee; but President Coolidge made it known last week that he still believes the states should share the burden of expense. Frear of Wisconsin, a member of the house committee, stands with the President in this. He declares that if congress approves a program by which the federal government bears the entire expense of flood control work on the lower Mississippi the action will serve as a precedent which will mean future "pork barrel" projects. It will be difficult, he says, to resist legislation dealing similarly with other rivers.

IN A report submitted to the house with the 1929 treasury appropriation bill it was admitted by the appropriations committee that the failure of more than two-thirds of the agents in the prohibition service in the recent merit system tests has demoralized prohibition enforcement throughout the country. The report says that "without any eligible register from which to select the successors to these men, the service is in the predicament of having many individuals regarded as their best enforcement officers under sentence of rejection, but permitted to stay in the service with dismissal impending."

Sebastian S. Kresge of Detroit was found guilty of adultery in his wife's suit for divorce in New York; thereupon there arose a cry that the $500,000 he had given the Anti-Saloon league recently should be returned. But it will not be, for Bishop Nicholson, president of the league, says the donation was not a philanthropy but a purely business proposition; that Kresge "saw that prohibition increased his own income, that it brought more nickels and dimes into his stores, and so he devoted $500,000 to aid this cause which directly affected him." In New York it was taken for granted that the league would use the Kresge money for the education of voters in its campaign against the nomination of Al Smith for President.

POWERS of the radio commission were extended for another year by the senate and it was believed this action would be followed by confirmation of the three members whose appointments have been held up. The extension bill provides that terms of present members of the commission shall expire at the end of the year's period and that new appointments of members of the appellate body to exist thereafter shall then be made by the President. Another provision of the bill limits licenses of broadcasting stations to six months and other classes of radio licenses to one year

---

CHINESE Nationalists expect the early recognition of their government, for the French and Norwegian ministers to Peking arrived in Shanghai last week to confer with officials there, and the British minister was expected this week. The French minister told the welcoming Nationalists that he expected their revolution would be successful and that they soon would control Peking.

Spain Handicapped by Old Farm Machinery

If the old Roman plow is not soon banished from Castile there will be danger of a grave economic crisis in Spain. The average value of the Spanish wheat crop is about $400,000,000 for an area of 10,000,000 acres, mostly sown and reaped by hand. Thousands of sun-blackened men, crouching low as they toil with sickles through vast fields, betoken the backward conditions and the starvation wages. As a result of these primitive methods Castilian wheat cannot compete in the world markets, though its quality is renowned through the ages. Wheat harvested thousands of miles away in America or Argentina can be sold in Spanish ports at less than the cost price of the domestically grown cereal. The government has had to restrict wheat imports, creating an unsound economic situation. The situation can and must be saved by the extensive use of tractors, deeper tilling and increased fertilization.

Burning Skin Diseases quickly relieved and healed by Cole's Carbolisalve. Leaves no scars. No medicine chest complete without it. 30c and 60c at druggists, or J. W. Cole Co., Rockford, Ill.—Advertisement.

The Interruption

Ruth Elder, the daring airwoman, is the heroine of a little story. It was at a dinner party in Birmingham, and an anti-feminist banker was laying down the law about woman's place.

"Woman's place is the home," he said. "That is all she's fit for. Women have never produced a Shakespeare or a Homer, an Edison or Ford, a Raphael or Michelangelo or Lincoln or—"

"Dear me!" she said. "I thought women produced them all."

Why He Succeeded

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. His pure herbal remedies which have stood the test for many years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a stomach alterative which makes the blood richer. It clears the skin, beautifies it, pimples and eruptions vanish quickly. This Discovery of Dr. Pierce's puts you in fine condition. All dealers have it in liquid or tablets.

Send 10 cents for trial pkg. of tablets to Dr. Pierce, Buffalo, N. Y., and write for free advice.

A man forgives the enemies he has worsted, but not those who have worsted him.

Reason is a man's guide, but principle is his safeguard.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it's not! Headaches are dispelled by Bayer Aspirin. So are colds and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any druggists with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

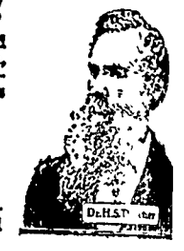
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Your Lovliness!

can only last as long as your health lasts. Pimples, sallowness and age wrinkles, (regardless of age) are the sure results of constipation, indigestion and biliousness. Good old *Dr. Thacher* made it possible for you to preserve your beauty when he gave to the world his famous prescription, known as

Dr. Thacher's
VEGETABLE SYRUP

Relieving the obstruction of constipation at once, the effect is reflected in a clear, healthy skin and a lovely complexion. 60c and $1.20 bottles are for sale and guaranteed by YOUR LOCAL DEALER



Lost Her Nerve

Visitor (to villager)—I'm surprised you never remarried, Mrs. Field.

Mrs. Field—No, sir. Some'ow I 'aven't got the pluck I 'ad when I was younger. I don't think I could ever bring myself to ask another man.—London Tit-Bits.

Language is the dress of thought.

Useless Baggage

The trouble with many people, a great scientist, is that they take too much time "packing trunks" they cannot take with them and which would contain few useful things when they did.—American Magazine.

A reasonable woman is one who isn't unreasonable all the time.

A lovely skin—how irresistibly it attracts!

Nearly every woman's skin would be lovely
if it weren't for one
of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

IT'S a wonderful feeling—to know that your skin is truly beautiful—without a flaw! Don't let any of the ugly little skin faults given here spoil the natural attractiveness of *your* skin!

The famous Woodbury skin treatments will help you to overcome any of these troubles. Hot and cold water—ice—and a cake of Woodbury's Facial Soap.

That is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple, clear directions for each of these treatments and the treatment for normal skins are given in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and see what a big improvement it will make in *your* complexion!

A 25-cent cake lasts a month or six weeks—and every day it is helping to give you "a skin you love to touch."

FARM POULTRY

EGG A DAY MORE THAN HENS LAY

That a hen crosses the road for reasons of her own, and lays an egg a day, is all the information about her possessed by some members of the public. As a matter of fact, there is no record of a hen laying an egg a day for a full year. The standard as laid down by the poultry department of Ohio State university is 160 eggs in 365 days. The state average is about 70 eggs. Of course some high-grade hens do better. More than one hen on the records of the Ohio Poultry Improvement association has beaten the 300 egg mark in 365 days. But they are not common hens.

Egg production for the average hen is at the lowest point in November, when five eggs for the month is the standard requirement. This standard rises month by month to 21 eggs in April, then falls again.

This information is included on the Ohio State Poultry Calendar, distributed through the agricultural agents by the Ohio State university, to more than 3,000 Ohio poultry growers, who have registered with their agricultural agents and agreed to keep an accurate record of the performance of their flocks for 365 days. The calendar contains seasonal information on housing, feeding, breeding and diseases, prepared by the university poultry department.

Floor Space Necessary for Different Breeds

The light breeds such as Leghorns, Anconas, Minorcas and others, should have three and one-half square feet of floor space per bird, while heavy breeds such as Plymouth Rocks, Rhode Island Reds, Wyandottes, Orpingtons and similar breeds should have at least four square feet per bird. If the present house is not large enough to provide this amount of space for the flock to be housed it is advisable to build more room, because a lack of space will make it increasingly difficult to keep the house sanitary and will lower the vitality of the birds, thus reducing the number and hatchability of the eggs produced.

Wire Mesh Bottoms for Nests Discourage Mites

Many poultrymen are now building nests in their laying houses with a fine wire mesh for the bottom instead of the usual board nests. There are two principal advantages which are set forth for this practice. The first is that such nests will be freer of mites on account of the fine dust from the straw or other litter dropping through, and the second is that there will be fewer broken eggs.

Nests which are constructed on this plan may be easily sprayed for mites, which is an advantage in their favor. When the straw gets low in the nests eggs will not be so easily broken as they would in board nests.

Hereditary Traits

Roosters furnish at least half of hereditary influences that determine the quality of chicks produced, and as relatively few males are required, the poultryman can afford to use considerable care in selecting the breeding males used in his different flocks. The ideal situation would be to have all flocks headed by males that combined good size, color and vitality with a pedigree of at least 200 eggs on the dam's side.

Poultry Notes

Poultry keepers who use cod liver oil for their flocks should feed it from the time the birds are put into winter quarters.

* * *

The poultry men are awakening to a short-sighted policy similar to that which has prevailed in the dairy industry. They have been breeding for production and forgetting form.

* * *

Hens that molt late can never be coaxed to lay winter eggs and it is better to put them in separate coops and feed for vitality and future profit. Corn, buckwheat, and mash are all excellent.

* * *

Because proper sanitation about the poultry yards will keep down coccidiosis and prevent the problem of controlling it from becoming acute, the disease is regarded with less alarm than a few years ago.

* * *

One of the most important essentials of a poultry house is that it be dry, free from drafts and well supplied with fresh air

* * *

Poorly colored birds and those with disqualifications, such as side sprigs on the comb and stubs on the legs, are undesirable as breeders.

* * *

Keep the pullets and early molters by themselves and give them the tonics, the green food and shells, starch mineral, etc., to stimulate egg pro-

LIVE STOCK NEWS

SWINE AILMENT WORRIES OWNERS

(Prepared by the United States Department of Agriculture.)

Reports from field stations of the United States Department of Agriculture show that much trouble is being experienced by swine owners through the rather wide-spread prevalence of necrotic enteritis in hogs, a condition sometimes referred to as necrobacillosis. The ailment is characterized by inflammation of the intestines, causing diarrhea, later an impairment in appetite, unthriftiness, weakness and emaciation. While it may be produced by a specific organism, a similar condition may be induced through the feeding of irritating material, such as caustic agents in stock food or medicine and in garbage, and the taking in of foreign matter when feeding on wet, dirty ground.

Necrotic enteritis frequently occurs as a complication of hog cholera. In many cases it is entirely overlooked in the diagnosing of the more serious disease, hog cholera. In some cases the ailment found uncomplicated is erroneously diagnosed as cholera itself and the simultaneous treatment applied when not indicated. The virus given in connection with serum in the simultaneous treatment for hog cholera, when necrotic enteritis is present, only serves to aggravate the existing conditions in the herd and is a waste of time and material. New centers of cholera infection have been created through such serious errors. Then, again, there may be instances when necrotic enteritis is present, but has not sufficiently developed to make a correct diagnosis possible. However, the result of giving virus is the same—unfavorable.

Necrotic enteritis originates in practically all cases from filthy conditions under which hogs are compelled to live, and so the disease is one that can easily be guarded against through the adoption of sanitary measures in swine raising. Once the ailment has advanced there is not much that can be done in the way of treatment. Rough feed and some so-called stock foods and tonics that may contain irritating ingredients should be avoided. The animals should be kept in clean pasture, if available. The feeding of hogs on muddy ground is a dangerous practice. Feeding platforms that can be thoroughly cleansed should be provided in the feed lot.

Pulverized copper sulphate (blue vitriol) added to the drinking water in the proportion of 1 ounce to 25 gallons, is recommended as being of some value.

Big Doses of Santonin Needed When Fed Hogs

Hog raisers who have been using santonin for controlling worms will be interested in the announcement of R. F. Bourne of Colorado Agricultural college that experimental work by the United States bureau of animal industry does not uphold the claims made for it.

If this drug is used at all, advises Doctor Bourne, it is highly recommended that it be given after a fast of 18 to 20 hours, and in larger than the usual doses, repeated on several consecutive days. When proper preventive measures are taken, he states, it is apparent that the necessity for treating infected pigs as well as serious losses in health and condition is minimized.

Live Stock Notes

An unhealthy hog is an unprofitable hog, for it will not consume enough feed to be profitable.

* * *

Here is a mineral mixture: Ten pounds wood ashes, ten of 16 per cent acid phosphate, one of common barrel salt.

* * *

"Alfalfa meal" means ground alfalfa leaves. It doesn't mean ground stems. If you buy it, see that the fiber percentage isn't too high.

* * *

Wether lambs sell for higher prices on the market than do ram lambs, and lambs which are docked bring more money than those which are not.

* * *

Mineral mixtures should not be mixed with the grain or mash for pigs. Let them have it free choice in a self-feeder.

* * *

The beef producer who can save $1 on the production of 100 pounds of beef by using modern methods is the one who will make the profit and survive.

* * *

Much of the loss in fall pigs is due to rickets caused by the absence of direct sunlight.

* * *

Feed cribs should be conveniently located in regard to the feed lot. This will mean a saving of time and labor

* * *

When buying ewes or when culling the ewe flock, particular attention should be given to their teeth "Broken-mouthed" ewes (old ewes that are losing their teeth) will not come through the winter in good condition

MONARCH
QUALITY FOOD PRODUCTS

set the standard. If you paid a dollar a pound you could not buy better food products than those you find packed under the *Monarch* label.

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

Hamlet's Home Restored

Only the canopy taken to Stockholm by the conquering King Charles X in 1658 will be absent when the Kronberg castle at Oeresund is opened as a museum.

Denmark's wonderful castle of the Renaissance—home of Hamlet—has been completely restored. Authorities are now ready with plans to refit it as a museum, with its old paintings, furniture and gobelins, these relics to be retrieved from the Danish museums.

When You Feel a Cold Coming On. Take Laxative BROMO QUININE Tablets to work off the Cold and to fortify the system against an attack of Grip or Influenza. 30c.—Adv.

Full Board

Yank—Say, Pat, do we get more than one mail a day here?

Pat—Sor, this is a first-class hotel, and it's three males yu do be gettin' every blessed day of your life. Breakfast, dinner and supper.

National Park Pets Losing Fear of Man

The fearlessness and tameness of the animals of Yellowstone National park, much remarked upon by visitors during the summer, becomes even more marked in the winter. E. J. Sawyer, park naturalist, writes of the uncaged zoo that ranges past the window of his office at Mammoth Hot Springs during the snow-bound mountain winter. "An interesting wild life article could be written on observations made from this office in the Museum building. Elk and deer are familiar everyday sights; bears, until they go into hibernation, pass within a few yards every morning on their regular rounds; a coyote and badger are on the list. And now mountain sheep have lately been seen on the low hill a few hundred feet back of the weather bureau. For sheep to appear quite so close to the actual government buildings of Mammoth is unusual and it exemplifies the tendency noted during the last two years for large mammals of various species—notably moose, antelope and sheep—to become decidedly more neighborly with us; that is, to take the initiative in closer acquaintance."

Blind Persons Sure to Travel in Circles

When a blindfolded person walks in what he thinks is a straight line, he is actually going in a more or less regular clock-spring spiral, Dr. A. A. Schaeffer of the University of Kansas reported in describing new experiments before zoologists of the American Association for the Advancement of Science. Doctor Schaeffer made more than 300 experiments with blindfolded persons on the open prairie of Kansas and Colorado, on the ice of a reservoir in Massachusetts, on a race track in Tennessee, and in a 160-acre field. The subjects walked, swam, rowed and drove automobiles blindfolded, and in each case they steered essentially the same kind of a curving path. Usually they started out with a straight stretch, and then began to turn in circles, and these circles usually became smaller in diameter.

Query

"Knowledge is power."

"What can I hitch mine to?" plaintively inquired the professor.

As much money is spent in the failure to learn a foreign language as in learning it.

By looking rich, one gets along better when he is away from home.

Kill Rats Without Poison

A New Exterminator that is Absolutely Safe to use Anywhere!

Will not injure human beings, livestock, dogs, cats, poultry, yet is deadly to rats and mice every time.

Poisons are too dangerous

"The most valuable car ever offered for so little money"

John N. Willys
President,
The Willys-Overland Company

So rapidly has demand mounted for the perfected Whippet, that four great plants—at Toledo, Elmira, Pontiac and Toronto—are taxed to capacity, and enlargement and expansion, to permit even greater production, are already under way. People continue to express amazement that cars of such remarkable quality and mechanical perfection can be offered at such low prices.

Here is true beauty—in color, lines, proportions and interiors. And here, too, are features which distinguish the finest American cars—low-swung full vision bodies, BIG 4-wheel brakes, gasoline tank at rear, full force-feed lubrication, silent timing chain, oversize balloon tires and snubbers and long semi-elliptic springs.

See this car—ride in it, and compare it with any other light car—for looks, for performance, for quality, for all-around desirability—in short, for *value*.

The Easy Way

"Did that firm fail to pay its debts?"

"No; it failed so that it wouldn't have to pay them."

Sex Question

Experienced Father (who has been calmly awaiting news)—Well, nurse will it use a razor or a lipstick?

See Possibility of Tapping Earth's Heat

The possibility of putting down boreholes four or five miles apart over most of the land areas of the glove to utilize the earth's internal heat for man's purposes was discussed in a paper read to the engineering section of the British association by J. L. Hodgson a civil engineer. Mr Hodgson said the heat stored in the hot rocks of the earth's interior was immense—at least 30,000,000 times the heat reserves in the world's coal supply. Only the heat available down to a depth of say 30 miles under the land areas was likely to be of interest to engineers during the next few hundred years, but even this was ten times the heat contained in the world's coal reserves, and, if it could be used, would provide the heat required by mankind for many thousands of years. He declared that exploitation of this heat seemed to be on the border line of practicability.

Wind

John Halkett, president of the building trades council, was discussing in New York the three-cornered wrangle between Italy, Yugo-Slavia and Albania.

"They talk a lot," he ended "but nothing will happen. Talk, talk, talk."

And then Mr Halkett smiled and said:

"Windy people never come to blows."

On a Bus Top

Although the story got around a lot last week—and two people say they heard it years ago anyhow—we will report that two business men of the garment industry were overheard in animated conversation on a bus top. Finally one of them paused and demanded: "Well, what do you think of my proposition?"

"I'll tell you in two words," said his associate. "Impossible."—The New Yorker.

Sculpin Had Traveled

When Joe Clukey, a Rockland (Maine) sailor, pulled a sculpin out of Rockland harbor, he found he had caught a fish with a history. Firmly embedded in the fish's tail was a piece of rusty wire and attached to the wire was a small water-soaked piece of wood on which was carved: "A. K. June 19, 1919, Northeast harbor, Me If the specimen in question followed the shore line from Northeast harbor to Rockland, it swam about 100 miles

Dangerous Risk

"Who will drive this car away for $59," read the sign on the dilapidated vehicle in the dealer's window.

A man passed the store, read the sign and entered. "I'll take a chance," he offered. "Where's the money?"—Answers.

Almanacs No More

Rural folk read the same books as people in the city, a report from the Wisconsin state librarian shows.—Farm and Fireside.

Liberty News Notes

(Special Times Reporter)

FAREWELL PARTY HELD FOR NEIGHBORS IN LIBERTY

Big Party Staged At Church Was Greatly Enjoyed

A social affair was successfully carried out in the Liberty Church basement Friday evening, when the members and neighbors of Mr and Mrs. Albert Borchers and John Miller and wife and Mr and Mrs. Frank Miller and son got together to give them a farewell party and to also welcome Mr. and Mrs. Chas. Bredlow and family back to the community. A social time was had and a short program enjoyed after which the ladies of the neighborhood set the big tables for a spread that was done justice to by all The good wishes of all go with the departing ones and all wish them success and happiness in their new homes.

Farm Bureau Meeting Enjoyed

A Farm Bureau Meeting was held at the Lew Griffen home Friday. It was an all day meeting and a picnic dinner was served to about twenty-five members who were present. As all the ones who were scheduled on the program were not able to be present the program was not as long as the committee hoped to have it but Mr. Nutty came to their aid as usual and gave a very interesting talk on the report of the State Federation Meeting held at Des Moines a short time ago, and Will Schlawin gave a talk on the Shipping Association problems, after which a general discussion was held The next meeting will be March 9 at the Center School and perhaps the roads will be in better shape by then and a larger crowd can attend

Mr and Mrs Lew Griffen and the children were visiting at the John Lemke home Sunday.

Mr and Mrs Roy Schaefer took in the Ben Hur show in Garner last Wednesday night.

Miss Bernice Tanner and Luther Tanner took in the Ben Hur show in Garner Wednesday night

Mr and Mrs Martin Jensen and children visited at the George Schoenwetter home Sunday and Eva May spent the night with Miss Mildred

Ben Ridder's little boy has been very sick and under the doctor's care for some time, but is some better now.

Miss Alice Carolus is visiting her sister and helping care for her and the fine girl who came to live at the home of Mr and Mrs. Jake Ter Hart of Lake Cornelia, one day last week

Mr. and Mrs Martin Jensen opened up their home to a number of their friends and neighbors Friday evening. The time was spent in dancing and in a social way. Refreshments were served by the hostess and everyone had a fine time

If you a... gry or re... steak.

If you are "all ..." for a good dinner or just want a "snack"—we're waiting for you—all set!

Mr. Chick Buyer

We cannot call on you personally as we would like to do, but we welcome a visit from you to our hatchery where we will be glad to explain and show you our system of hatching chicks. We maintain strict sanitation, do business on a business basis and try in every way to give value received for every dollar spent with us

We use only eggs from the best stock the breeds afford and from pure bred, disease free, flocks that have been culled for color, type, vitality and egg production. Remember it is the early hatched chicks that make the winter egg producers

We Offer For Your Approval:

	100	500
White & Brown Leghorns	$11 00	$52.00
Rhode Island Reds ..	13 00	62.50
White and Barred Rocks	13.00	62.50
S L. & White Wyandottes	14.00	67 50
Buff Orpingtons	14.00	67.50
Mixed heavy for broilers	11.00	52.50
Assorted	8 00	40 00

STORY FROM THE START

Handsome, fastidious and wealthy—young St. Croix Creighton awaits his sweetheart at their trysting place. She is late, this ordinary little Pennsylvania Dutch girl, Meely Schwenckton. Despite her seeming innocence and ignorance, she succeeds in keeping him at a distance, to his chagrin. Meely, in the Schwenckton home, where she is boarding, is altogether unlike the girl who meets St. Croix clandestinely. She is the teacher in the neighborhood school, of which Marvin Creighton, St. Croix' brother, is superintendent. Meely learns that Marvin was to have married his cousin, a titled English lady, but, believing she was attracted by the Creighton wealth, had refused the alliance. It is the rumor that St. Croix is to take Marvin's place and marry the English girl. St. Croix' jealousy is aroused by Meely's report of an aged suitor for her hand The girl cleverly decoys him into admitting he has no intention of marrying her Marvin visits school in his official capacity as superintendent and discovers how shockingly little Meely knows about school teaching. Mr. Schwenckton, coming home from town, picks up a stranger, and finding his watch gone, demands the stranger get out and turn over his watch.

CHAPTER IV—Continued

—11—

"I've been held up on the road and robbed!" he announced, his voice weak with fatigue. "May I use your phone to report to the police?"

A stunned silence on the part of the four occupants of the kitchen met this statement and request—Meely staring with wide-open eyes, her hand pressed to her fast-beating heart; Nettie's face going first red, then pale; Mr. Schwenckton trembling and pallid; Susie unmoved.

But it was Susie who broke their stupid silence. "So you see, Sam, he ain't still runnin'!"

A little hysterical squeal of laughter from Meely brought the young man's eyes around to where she stood by the table—clad in a kimono, her hair down her back in a braid. She was glad she was not dressed normally, for in her tailored school suit with her hair done up around her head, she was so transformed from the country bumpkin of her voile frock trimmed with artificial flowers and streaming ribbons that the extreme contrast would have betrayed her hopelessly as a masquerader.

For the man leaning exhausted against the kitchen door was St. Croix Creighton.

"How did you get here so soon?" quavered Mr. Schwenckton, too absorbed in his own quandary to see the flash of startled recognition with which his visitor's eyes met Meely's. She had succeeded, at an instant's notice, in assuming the look of bovine dullness which had so effectually disguised her ever since she had known him.

"Am I—is this Sam Schwenckton's farm?" exclaimed the amazed young man. "I'd no idea where I was, the road's so pitch dark! I've been groping my way for a half hour to find a house where I could telephone. That," pointing to the lamp, "was the first light I saw in five miles!"

"No, not five—not more'n two," Mr. Schwenckton's shaking voice corrected him.

"How do you know? Is this Mr. Schwenckton?" asked St. Croix, for the farmer, without his coat and hat and necktie, did not suggest to him his automobile companion of an hour ago.

"It is," Mr. Schwenckton heavily admitted. "And you, now that I see you in the light, I rekonize as the younger Mr. Creighton! Yi, yi, yi, yi!"

"Yes, I am in a mess!" responded St. Croix, interpreting the farmer's exclamation as an expression of sympathy for his plight. "May I use your—"

"If it's only your watch you want, it ain't no need to phone. Here it is!" Mr. Schwenckton, with shamed, averted face, held it out to its owner.

St. Croix, amazed, took it. "You caught the thief? But how? Do tell me! I never was more taken in! He seemed the most harmless, kindly old simpleton—"

This time it was Nettie who gave a little hysterical squeal which brought the young man's eyes, for an instant, to her rosy, eager face.

"Meely!" Mr. Schwenckton appealed, "you tell him how it was! Me, I couldn't get the words together for to explain such a bewilderment!"

Meely was appalled. The Schwencktons were accustomed to hear her speak good English; St. Croix had of course never heard her talk anything but the Pennsylvania Dutch dialect!

"Nettie," she murmured, "you tell him!"

Nettie, shy, but all too willing to hold the young god's attention upon herself, eagerly assumed the task of explaining her poor father's unfortunate mistake—and before she was half through her narrative, they were all laughing except Susie; and even she was feebly smiling.

"What gets me pupplexed," said Mr. Schwenckton amazedly, "is that me and you, Mr. Creighton, neighbors since you was born a'ready, though five miles apart and not seeing each other often (I ain't really laid eyes on you since you was a college boy, except to pass each other in our cars) —but that us we could ride together near eight miles yet and not rekonize each other—"

"I'd have known you in your farm clothes, I suppose, but—"

He did not explain how unnatural and unlike himself the farmer looked

"I've Been Held Up on the Road and Robbed," He Announced, His Voice Weak With Fatigue.

to him in his "store suit" with a collar and necktie on.

"It's a good thing we're neighbors that know each other or this here thing mightn't look so funny, but wery serious!" Mr. Schwenckton gravely opined.

"I didn't know," St. Croix said suddenly, when Mr. Schwenckton's abject apologies had been accepted, "that you had three daughters, Mr. Schwenckton; I thought you had only two."

"You thought right—I got only two."

"Oh," St. Croix nodded, "then this young lady isn't your daughter?" His nod indicated Nettie, but as she and Meely were standing together, Mr. Schwenckton misunderstood him.

"No, she's only a distant cousin, come to school to teach here."

"Teach? Why, she looks too young! You can't tell, these days, can you, how old girls are?"

Meely realized that his look of amazement, almost of consternation, was not at all for Nettie's youth as a teacher, but for the awful English with which the children of the district must be instructed!

Nettie was delighted that no one but herself, as she supposed, perceived his mistake, for it was wonderful to have Mr. St. Croix Creighton think her old enough and "smart" enough to be a school teacher! Thankful she was indeed that Meely didn't speak in and claim the honor.

It was obvious to Meely that St. Croix was even more concerned than she was that neither he nor she should by look or word reveal to this family the relation in which they stood.

Mr. Schwenckton offered, now, to get out his car again and take Mr. Creighton home, but the young man protested that if they would allow him to telephone home, one of the Beechlands chauffeurs would be here in a short time with a runabout.

While he was telephoning, Mr. Schwenckton ordered Nettie to make some strong hot coffee and get out some doughnuts and pie.

But what, Meely wondered, would St. Croix think of the teacher's being asked to do this instead of the daughter of the house? She considered swiftly what would be her best course to avert suspicion on both sides. To get across the kitchen to the stairway and run up to her room? Mr. Schwencken would be bound to stop her and insist that she stay and have coffee and doughnuts with them, and if he spoke to her at all, St. Croix would notice how differently he addressed her and Nettie. To remain here, however, was more certain to invite exposure. And yet, she was afraid to go away for fear of what might come out in her absence.

Nettie, as she bustled about making coffee and setting out cups and saucers, saw, with keen chagrin, how Mr Creighton's eyes kept turning toward Meely and never in her direction. And the expression on his face—furtive, hungry, infatuated! Was this, Nettie wondered, a case of love on sight? She was greatly puzzled, for in her opinion Meely "looked a mess" in that sloppy kimono and with a "plait" down her back.

As Mr. Creighton hung up the receiver, there was a quick movement in the room—Meely making for the stairs.

"Ach, Meely—" began Mr. Schwenckton.

"Good night," she interrupted, rushing up the steps before he could stop her—but not before she caught in St. Croix' eyes the evidence of the conflict in his mind—a passionate protest against her going, mingled with a fear of her presence.

Upstairs in her own room, while she prepared for bed, she had the exciting suspense of wondering whether they were talking about her; whether St. Croix had noticed the kimono she had on, a Japanese embroidered silk thing that a county school teacher would hardly own if she were what she should be! Yes, this kimono could be a "give-away."

"Well, when this sort of thing could happen it was evident that she could not much longer keep up her farce. She must bring things to a climax as soon as possible; beguile St. Croix to lay his cards on the table; force his hand for a show-down.

The sound of the cabinet organ in the parlor below her bedroom, and Nettie's shrill voice singing, interrupted her thoughts. Nettie was invariably called upon by her father to entertain "company" with her musical accomplishments of organ and voice, and of course such distinguished company as Mr. St. Croix Creighton would have to be favored. Through Nettie's lungs and fingers the entire family found their one and only artistic expression.

CHAPTER V

At breakfast next morning Meely warily watched the faces around the table for signs of newly awakened suspicions of herself. But she found nothing unusual in the demeanor of the family.

Nettie chattered excitedly about the elegance and "swellness" of Mr. Creighton's stylish clothes, his wonderful white hands, the way he said his words—"He says 'hoff' for half! It sounds awful pretty and genteel that way! And, ach, the manners he's got! The way he held my chair for me to set! Say!"—it beggared words.

"But I always say," her father spoke in, "that I don't think so much of manners—morals is so much more important."

"Gimme manners!" Nettie defiantly affirmed her choice.

"Morals and manners," said Meely, "can go hand in hand—they're not mutually exclusive!"

Meely had often noticed that her use of a word of more than two syllables invariably awed the family into a prolonged silence.

She broke the present lull by broaching a subject to Mr. Schwenckton that was weighing on her mind. "How often do county superintendents visit a school, Mr. Schwenckton?"

"Ach, about once in so often."

"Yes, but how often?"

"Not so wery often. Now and then."

"But I mean," Meely patiently explained, "how far apart are 'now and then.'?"

"Well, pretty far apart. You see, he's got too many to wisit to come often. And the schools is spread over so much area that it takes up time to go to and from."

(TO BE CONTINUED.)

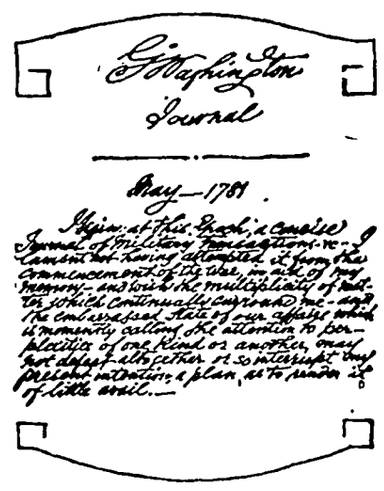
In Splendor, Venice Surpassed All Cities

In Venice of the Sixteenth century luxury and splendor surpassed all bounds; never before at any time nor in any city were religious ceremonies, victories, the conclusion of peace, the visits of foreigners, or the marriages of illustrious persons, celebrated with greater pomp and magnificence. Those in the occupations of cloth makers and drapers reaped huge fortunes, for on nearly every gala occasion miles of rich new fabric were used and visitors to the city were rendered speechless by the matchless spectacle. There was a great rivalry among the nobles to see who could appear in the processions in the most expensive robe of gold and velvet, while the richness and the hangings from balcony and carpets spread for the feet of the hour's hero strove to make themselves seen among the profusion of flowers, the countless flashing candles and the play of color. When some magnificent occasion of this sort was not in progress Venice was not permitted to be dull for a moment—there was always some carnival of merrymakers on the streets and masquerades were so common they became a nuisance and met with decrees forbidding them.—Detroit News.

Bess Liked Peacock Pie

It is recorded by historians of the day that Queen Elizabeth's favorite dish on festal occasions was peacock pie.—Brooklyn Eagle.

Washington's Diary



A facsimile of the first page of Washington's war diary, now in the library of congress. It is written in his own hand and contains records of events during the latter part of the Revolution. It bears a good specimen of Washington's signature and starts off with these words: "I begin at this epoch, a concise Journal of Military transactions—etc. I lament not having attempted it from the commencement of the war, in aid of my memory—and wish the multiplicity of matter which continually surround me—and the embarrassed state of our affairs which is momently calling the attention to perplexities of one kind or another, may not defeat altogether or so interrupt my present intention and plan, as to render it of little avail."

Mount Vernon

In the infancy of the Republic
When the Nation's foundations were wrought,
Through the wisdom of Washington's judgment,
And the justice of Jefferson's thought,
Providentially planned, and perfected,
Was the spot for her Capital's home,

On a hill more divinely majestic
Than the hills that immortalized Rome.
On this hill of imperial splendor,
Through the rock-written annals of time,
Stands America's Capitol, lifting
Ever skyward her grandeur sublime,
Where, surrounded by parks and pavilions,
Beauty spots in our national pride—
In the heart of the sovereign city—
The Republic's directors reside.

O'erlooking the passive Potomac,
As he wanders his way to the sea,
On a mound fitly fashioned, and facing
The immortalized mansion of Lee—
Cut and carved from the rocks of the ages,
Which the mountains were loth to release—
Stands the Lincoln Memorial, preaching
The gospel of union and peace.

To the east, in uplifted aloneness—
Fitting climax to lofty surprise—
Stands the Washington Monument, reaching
Up to kiss the cool lips of the skies,
From the top of whose tower of granite,
Over five hundred feet from the sod,
Looking down to the depths through the distance,
Life enlarges its faith in its God.

But the spot that Americans cherish—
To which multitudes constantly come—
On the banks of the peaceful Potomac,
Is the worshipful Washington home,
Where the first in his country's affections,
And the first in her peace and her wars,
Sleeps the sleep of sublime satisfaction,
Overwatched by the Stripes and the Stars.

—Horace C. Carlisle, in Pathfinder Magazine.

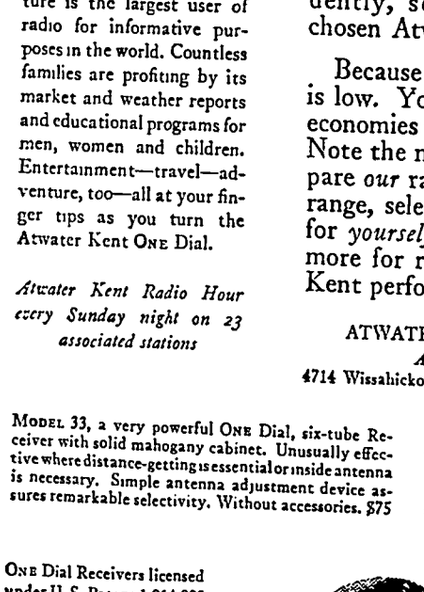
ATWATER KENT RADIO



It never goes back on you

Sam Pickard *says:*

"Radio is probably the greatest boon to education since the printing press was invented." Mr. Pickard, formerly chief of the radio service of the U. S. Department of Agriculture, is now a Federal Radio Commissioner. The Department of Agriculture is the largest user of radio for informative purposes in the world. Countless families are profiting by its market and weather reports and educational programs for men, women and children. Entertainment—travel—adventure, too—all at your finger tips as you turn the Atwater Kent One Dial.

Atwater Kent Radio Hour every Sunday night on 23 associated stations

YOU can trust Atwater Kent Radio as you would a faithful friend. Your neighbors down the road or over the hill—they know. The dealer in town—he knows. Everybody with radio experience knows.

Knows what? Knows that Atwater Kent Radio will *never go back on you.* This is its reputation. This is the reason for its leadership. This is why most farm families—buying prudently, selecting carefully—have chosen Atwater Kent as *their* Radio.

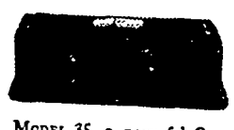
Because so many *do* buy, the price is low. You, too, can benefit by the economies of careful mass production. Note the new low 1928 prices. Compare *our* radio with others—for tone, range, selectivity, workmanship—see for *yourself* that you can pay much more for radio and not get Atwater Kent performance.

ATWATER KENT MFG. COMPANY
A. Atwater Kent, President
4714 Wissahickon Ave. Philadelphia, Pa.

Model 33, a very powerful One Dial, six-tube Receiver with solid mahogany cabinet. Unusually effective where distance-getting is essential or inside antenna is necessary. Simple antenna adjustment device assures remarkable selectivity. Without accessories. $75

One Dial Receivers licensed under U. S. Patent 1,014,002

Prices slightly higher from the Rockies West



Model 35, a powerful One Dial, six-tube Receiver with shielded cabinet, finished in two tones of brown crystalline. Ideal for a small table, window sill or bookshelf. Without accessories. $49

Model E Radio Speaker. New method of cone suspension, found in no other speaker, makes certain the faithful reproduction of the entire range of musical tones. An extraordinary speaker. Hear it! $24

If you have electricity

The receivers illustrated here are battery-operated. If you have electricity from a central station your dealer can equip any of them for all-electric operation. Or he can supply you with the Atwater Kent House-Current Set, which takes all its power from the lighting circuit and uses the new A. C. tubes.

WOMEN OF MIDDLE AGE

Praise Lydia E. Pinkham's Vegetable Compound

Mrs. Annie Kwinski of 526 1st Avenue, Milwaukee, Wis., writes that she became so weak and run-down that she was not able to do her housework. She saw the name Lydia E. Pinkham's Vegetable Compound in the paper and said to her husband, "I will try that medicine and see if it will help me." She says she took six bottles and is feeling much better.

Mrs. Mattie Adams, who lives in Downing Street, Brewton, Ala., writes as follows: "A friend recommended Lydia E. Pinkham's Vegetable Compound and since taking it I feel like a different woman."

With her children grown up, the middle-aged woman finds time to do the things she never had time to do before—read the new books, see the new plays, enjoy her grand-children, take an active part in church and civic affairs. Far from being pushed aside by the younger set, she finds a full, rich life of her own. That is, if her health is good.

Thousands of women past fifty, say they owe their vigor and health to Lydia E. Pinkham's Vegetable Compound, and are recommending it to their friends and neighbors.

PISO'S for Coughs

Cookie Dog

"What's your dog's name?"

"Ginger."

"Does Ginger bite?"

"No, Ginger snaps."—Stone Cutters' Journal.

Help Kidneys By Drinking More Water

Take Salts to Flush Kidneys and Help Neutralize Irritating Acids

Kidney and bladder irritations often result from acidity, says a noted authority. The kidneys help filter this acid from the blood and pass it on to the bladder, where it may remain to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread; the water passes sometimes with a scalding sensation and is very profuse; again, there is difficulty in voiding it.

Bladder weakness, most folks call it because they can't control urination. While it is extremely annoying and sometimes very painful, this is often one of the most simple ailments to overcome. Begin drinking lots of soft water, also get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast. Continue this for two or three days. This will help neutralize the acids in the system so they no longer are a source of irritation to the bladder and urinary organs, which then act normal again.

Jad Salts is inexpensive, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by acid irritation. Jad Salts causes no bad effects whatever.

Here you have a pleasant, effervescent lithia-water drink which may quickly relieve your bladder irritation.

From the viewpoint of the hat dealer, two heads are better than one.

Self-love is the only kind that is without a rival.

CHAPTER V—Continued

—12—

Meely decided that for at least a few weeks she could breathe freely, and feel comparatively secure from the danger of a visit.

And that very morning, just after recess time, as the children were trooping in from the playground, he walked in on her.

"Oh, dear, you here again!" she openly lamented as he, without offering her his hand, bowed rather curtly and drew forth a platform chair—not, however, seating himself while she stood, a courtesy to which she had, for so many months, been a stranger, that it thrilled her, to her amusement, almost as much as St. Croix' "manners" had thrilled Nettie the night before.

"I'm here," he grimly stated, standing behind his chair and folding his arms with a resolute, Napoleonic air that made her heart sink, "to hear you teach geography!"

"Here I stand—so help me Gawd!" she mocked at his determined mien. "Martin Luther!"

"And I don't leave this schoolroom until I have heard you!"

"Oh, gee!" she sighed.

He set his lips and stared straight ahead of him.

"I've had this school on my conscience since you yourself admitted that you can't teach. We can't let these children suffer from your—excuse me—incompetence. Will you call a geography class, Miss—Schwenckton?"

Did he or did he not hesitate over her name? She could not feel sure.

"But why this passionate interest in geography?" she complained. "Aren't you longing to see me teach spelling? I'll call a spelling class—"

"Geography, if you please."

"I suppose," she said accusingly, "you just want to expose me as not knowing any geography of the United States! Well, if you call that chivalrous—"

"I'm not here to be chivalrous, but to hear you teach."

"Why won't spelling do?"

"I prefer geography."

"Just because I jokingly pretended to think there were forty-seven states instead of fifty-seven!—and told you that when I was a mere child, I thought the Mississippi river ran east and west!"

"Exactly."

"Well," she said reflectively, "well, Mr. Creighton, before I take your request into consideration, will you tell me what is the extent of your power over my job? Can you take it from me?"

"I can advise your school board to take it from you. But," he hastily added, "of course I don't want to! I'd hate like the dickens—" Again he pulled himself up. "I should greatly dislike," he said primly, "to resort to such stringent measures."

"That's better—sounds more professional," she encouraged him. "Be professional or die!"

The children of the school were all seated now—rigidly upright in the presence of that magnate, the county superintendent—and Meely could no longer dally with the situation; she must decide what to do. She might repeat the successful geography lesson she had already given that morning on Italy—though a deliberate repetition of the whole performance would be so astonishing to the children as to be embarrasing to their teacher! For Venice, she had given them the songs of the gondoliers, and impersonations of Portia and Shylock; for Naples, street beggars and coral workers; for Rome, impersonations of Caesar and Mark Antony with tales of gladiators interspersed; for Florence, impersonations of Savonarola and the Medici. Much more than the school had been able to digest at one dose, but she had enjoyed it, feeling how cleverly she was doing it—ah, there was the rub! She did it too cleverly, too professionally. She could not risk offering it to Marvin Creighton.

Well, then, nothing left but to try to give a geography lesson in the prosaic, uninteresting way she had seen it done in a school she had visited, where the teacher, for a weary half hour, had had the children telling glibly what states enclosed other states. What had the teacher called that—a certain word she had used?

"I'll bore this man so he'll keep away from here for the rest of his life!" she determined.

"Zebilla," she addressed the brightest girl of the class that she summoned to stand before the desk, while she and the superintendent now sat behind it, "enclose the state of Pennsylvania."

Zebilla looked blank. "What's that I'm to do?"

"Enclose Pennsylvania," repeated Meely confidently.

Zebilla still looked unenlightened—even dazed. "I wouldn't know how to. I don't know right how you mean—enclose it!"

Meely saw she had gotten the wrong word. "I mean—surround it; tell what states, if any, surround it—or what bodies of water, or whatever does enclose, surround or circumscribe it!" she explained desperately.

"Ach, do you mean, Miss Schwenckton, I'm to bound Pennsylvania?"

"That's the word—yes, bind it."

A snort from the county superintendent was a signal for the amazed school and they broke into a roar of laughter that revealed to the embarrassed teacher how seriously she had erred. Her face flushed crimson. She hated this monster sitting on her platform laughing till the desk shook!

She rapped for order. The school became quiet. "Proceed," she said to Zebilla coldly.

"Pennsyl-wania is bounded on the north—"

When Zebilla had finished, Meely took as long a time as possible in drilling her to pronounce the letter V by catching her lower lip between her teeth. She prolonged this drilling to the point of absurdity, for if she called on any other pupil of this class to bound a state, she herself would have to keep her eyes glued to the map to see that they got it right. With Zebilla Zook that had not been necessary, for Zebilla could be depended upon to answer correctly. She always knew her lessons with depressing thoroughness. So it was not until the poor girl became restive and resentful under her prolonged drilling that the teacher desisted.

"Bind Connecticut, Hiram," she at last proceeded most reluctantly.

"Connecticut is bounded on the north by Massachusetts, on the east by Rhode Island—"

"Oh, come, an island can't bind anything. What is an island, Hiram?" she asked, very pleased at Hiram's blunder, for here she could be sure of her ground; she did at least know the forms of land and water!

"But Rhode Island," said Hiram, gazing at her almost in horror, "ain't no island—"

Her finger on the map, she could see for herself, now, that it wasn't—and, turning hot and cold with consternation, she yet tried to save herself. "Very good, Hiram—I was trying to catch you up! Of course we all know how it came to be called an island? Zebilla?"

But Zebilla, her stand-by, failed her there—she did not know!

"I'll ask the class," said Meely hastily, "to look that up for next lesson."

She feared she was not succeeding in her plot to "bore" the superintendent. She saw, in a quick side glance, that he looked anything but bored. Indeed, he seemed to be enjoying himself. Probably he'd stay the rest of the day! Oh, how she hated and despised him! Conceited pedagogue!

After a few more states had been bound (her eyes and finger fastened the while to the map) she heaved a sigh of relief and dismissed the class to their seats.

"Now you've had your heart's desire and have heard me teach geography. What further," she inquired with dignity, "can I do for you?"

"I leave it to you," he bowed, making no move whatever to go.

She decided to call up a reading class. There were no serious pitfalls for her in American literature. That is, if she could manage to resist the temptation to act out the reading lesson, in case it happened to be a "piece" (as the pupils would say) that lured her to a dramatic execution of it!

She settled that danger by ordering the class to turn to a speech of Theodore Roosevelt's. And too late she realized her mistake. The speech abounded in political allusions which none but a native American would understand. If only no one asked any questions! They so seldom did manifest curiosity about anything—but it would be just like the perversity of fate to inspire one of them to show off before the superintendent.

A hand was raised—the youngest little girl in the class. "Please, Miss Schwenckton, what does G. A. R. mean?"

Meely beamed with pleasure, for this was a question she could, as luck would have it, answer with convincing intelligence. She rejoiced that little Becky had been moved to ask it.

"The G. A. R. is a society of American women," she blithely replied, "the Granddaughters of the American Revolution, whose ancestors came over in the Mayflower."

* * * * * * *

"Well," said Meely icily, as she stood with the superintendent behind her desk at the end of the morning session, "I suppose that awful conscience of yours will force you to advise the school board to discharge me for 'incompetence'!"

They were practically alone now, those of the pupils who did not go home for the noon meal having gone out of doors to eat their luncheon.

Mr. Creighton shook his head. "No, I can't be expected always to act disinterestedly for the good of society—I'm only human, after all—and yours is the only schoolroom I've ever visited that hasn't bored me to death! Whenever I'm dull and need a riot of fun, I can just drop in here and hear you teach geography! No, I cannot rise to such heights of altruism as to recommend your dismissal! It's asking too much! I'm only hu—"

"Well, believe me," she retorted resentfully, "you'll not get a chance to sit 'round here making fun of me—I'll resign!" She turned away haughtily—but she was too good an actress not to know that she was not tall enough to look haughty impressively—and suddenly, without warning, she found herself crying. Desperately she fought to control herself, more mortified at such a childish display than she could possibly feel over perfectly excusable ignorance of a vast patchwork quilt of states, or of the fine distinctions between American alphabetical symbols—D. A. R.'s and G. A. R.'s! Useless information anyway!

But the strain of the morning had been too much for her and she could not stop crying. Her breath came in little gasping sobs, her shoulders heaved, she fumbled for her handkerchief—and not finding it, she jerked open a desk drawer, dragged out a towel and buried her face in it.

"Oh, but my child!—you poor kid!" Mr. Creighton unprofessionally and very remorsefully exclaimed. "I didn't want to hurt your feelings! Oh, please!" he begged in distress, laying a reassuring hand on her arm. "Come, come, don't cry! You're not going to be thrown out of your school—and I swear I won't laugh at you any more!"

She wiped her nose and her eyes with a corner of the towel. "I'd better resign!" she said dolefully, "or you'll be lying awake nights thinking of all the education those children are missing just because you were too weak to withstand a girl's tears!"

"Well," he said ruefully, though gently, "you have got me up a tree, you know! How you ever got a Kntztown Normal school diploma on your knowledge of United States geography—" She showed signs of weeping again, so he hastily veered off. "All right, let's never mention geography again! I do admit that the pupils in your school are more alert and wide-awake than any children in the county! There, doesn't that comfort you?"

She smiled dazzlingly through her tears. "Oh, but then I'm a success as a teacher!—since the whole purpose of teaching children must be to brighten up their wits, not to stuff states and names into them! It is not what I pour into them, but what I lead them to give out!"

"Ah, yes, but there's a lot of necessary drudgery in teaching which can't be side-stepped, my child; which really must be done. So if you'll be good and get down to hard work here—"

"But indeed I do! These things I do, yet do not leave the higher matters of the spirit undone. I do assure you."

He looked skeptical, but evidently did not feel it safe to pursue the subject, her bright eyes looking too ready to shed tears again.

"I'm keeping you from eating your lunch," he suddenly said, reaching reluctantly for his hat and coat.

(TO BE CONTINUED.)

Tradition Bars Jews' Union With Gentiles

The American Hebrew says that the tradition against intermarriage among Jews is traced back to Abraham, who ordered his estate manager, Eliezer, to obtain a wife for Isaac from among his, Abraham's, own people, in Aramea. It should be added that this is only a tradition. It became a practice among Jews at the time they returned from the Babylonian exile in the Fifth century before the common era. Intermarriage, however, has taken place among Jews at all times. The reason why Jews have clung to the tradition of Abraham and the enactment of Ezra lies in the psychology of group consciousness, especially as this is welded by the religious ideal. The belief of the Jews that they are a people chosen by God to disseminate knowledge of Him and His moral and ethical will among the peoples of the world is also a great factor motivated by the desire to hold to its mission in the world and, probably, also by the fear lest intermarriage should weaken the force for carrying out its mission.

Vain Search for Treasure

An Australian miner spent part of his life in the bush trying to refind a mine his partner found and died in describing. But he never succeeded, and, eventually, the bushmen stumbled on his skeleton. A party of French scientists narrowly escaped death from thirst in the Sahara seeking traces of a lost caravan of precious stones that never reached Timbuctoo, and was supposed to have been overwhelmed by a sandstorm, lost its tracks, and missed the wells.

Wheat Straw Is of Real Value

Much of Our Farm Land Is Deficient in Humus and Fertility.

"The real value of wheat straw is not what it is worth on the market or for feeding live stock, but what it is worth in the form of fertility and humus, when returned to the soil," says H. M. Bainer, director, Southwestern Wheat Improvement association. Continuing, he says, "Much of our farm land is deficient in humus and fertility, and every pound of wheat straw or stubble that is burned makes this condition worse.

Fertility Removed.

"Analysis of cultivated soils in the Southwest indicate that as much as one-third of the original nitrogen and one-half of the original organic matter has already been lost. Experimental data indicate that an average wheat crop removes from each acre of soil approximately 20 pounds of nitrogen, 8 pounds of phosphoric acid, and 10 pounds of potash. To replace this fertility, in the form of a commercial fertilizer, would cost something like $4.50 an acre. The fertility represented in returning the straw to the soil is probably worth $1 an acre, but the greatest value will come from the humus it will add.

Best Results With Straw.

"For best results, each crop of straw should be worked into the soil right away, but if this cannot be done, it should be rotted and returned to the soil in the form of manure later. The harvester-thresher has solved the straw problem, and it has been fairly well solved by the header. Bundle straw should be stacked in feed lots, where the feeding and tramping by the stock will assist in converting it into manure. Such straw as cannot be handled through the feed lot or the fields should be piled in out-of-the-way places, with lots of surface exposure, where it can remain until rotted and is ready to be hauled out as manure.

"A soil that is deficient in humus is also deficient in fertility. Humus adds life to a soil, it prevents puddling, cracking, baking and blowing. Humus improves the physical condition of the soil, making it mellow, friable and easier to cultivate. It also assists in holding moisture, thus helping to carry crops through periods of drought."

Lignin Is an Unutilized Farm Waste of Big Value

Whether or not you already know what lignin is and what it is for, you are likely to hear and learn more about it within the next few years. Lignin is a constituent of agricultural wastes, such as corncobs, cornstalks, and straw. It has been almost entirely wasted. Several years ago the chemists of the United States Department of Agriculture undertook to salvage some of the value of these by-products of the farms, and in the course of time evolved processes for the manufacture of furfural which is now being used for many purposes. The government discontinued the furfural experiments when commercial interests took over the work.

Lignin makes up from 20 to 30 per cent of the dry material of these wastes. The chemists have succeeded in converting lignin into varnishes, dyestuffs, and various aromatic chemicals that give promise of finding their places in the commercial chemical field. "Lignin," says Doctor Browne, assistant chief of chemistry and soils, "may be called the greatest of all unutilized agricultural wastes," and he continues with the significant statement that "it occupies with respect to industrial possibilities the position held by coal tar a century ago."

Agricultural Squibs

Have you made any fencing plans?

* * *

Sow peas just as early as you can work the ground.

* * *

Now is a good time to test your seed corn. Use ten kernels from each ear.

* * *

Start keeping farm records this winter when work is slack. You may be too busy to start next spring.

* * *

Long winter evenings will not seem as long or gloomy if a farm lighting plant dispels the early falling darkness.

* * *

Nowhere does the old proverb of "haste makes waste" apply more aptly than in preparation of the seed bed, and in planting.

* * *

Planted seeds must have air in order to sprout—which means don't cover 'em too deep. About twice the thickness of the seeds is the right depth.

* * *

A farm machine that stands out all winter not only depreciates in value, but requires a lot of extra time and patience to get it ready to run when it is needed again.

* * *

Testing seed corn with a rag doll is probably the cheapest and easiest method. It also gives an accurate test of each ear's ability to grow, if care is taken to keep the cloth moist and at the proper temperature.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

Don't Fuss With Mustard Plasters!

Don't mix a mess of mustard, flour and water when you can relieve pain, soreness or stiffness with a little clean, white Musterole.

Musterole is made of pure oil of mustard and other helpful ingredients, and takes the place of mustard plasters.

Musterole usually gives prompt relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

Jars & Tubes

MUSTEROLE WILL NOT BLISTER

Better than a mustard plaster

Lee's VapoSpray

Colds Bronchitis (Flu) and Pneumonia in—

Poultry

Lee's VAPO-SPRAY is a compound of oil of pine coal tar and eucalyptus, and is especially valuable in the treatment of bronchitis, commonly called "Flu" and other troubles of poultry.

SPRAY IN HEN HOUSE--It is used full strength for poultry by spaying it into the air of the hen house at night with an atomizing sprayer until a fog or mist is created The fowls are forced to breath the vapors given off with the result that direct action is obtained on the inflamation fo the trachea (windpipe) and lower bronchial tubes. Considerable relief is usually noticed from one treatemnt but it is best to continue the treatment for two or hree days In severe cases it is advisable to use Lee's Flu-Koff Emulsion with the above treatment—this has the soothing effect of cough syrup used by humans

We carry a full line of Lee Products for treatment of pour fowls and animals—Germazone, Lice Killer, Poultry Wormer, Hog Oil Wormer, Lee's Dry Dip, Bulk Liquid Dip, Etc

FREE—"The LEE WAY", a text book on the diseases of Poultry and Swine. Get your big rec 1928 copy today. It will tell you many things you need to know about Poultry and Hogs and it will save you money!

A full line of Close-To-Nature Incubators and Brooders—A Full Line Of Poultry Supplies—

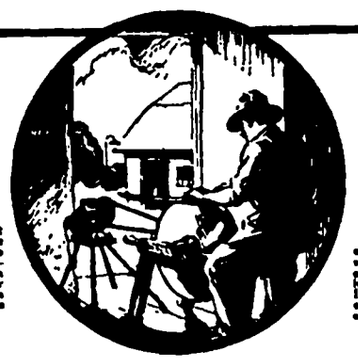
Westinghouse

Farm LIGHT & POWER Plant

Light that Saves ~ Power that Serves



Easy to Own

One of the things that makes the Westinghouse Light and Power Plant so desirable is the deferred payment plan. You pay part the plant installed for a small percentage of the cash, making the balance conveniently.

Easy to Operate

The Westinghouse Light and Power Plant is so simply designed that anyone, with a few minutes' instruction, can operate it. It can be installed in a corner of the cellar, or in an out-building.

THE money you now spend for kerosene alone will operate a Westinghouse Light and Power Plant. And you get *light* anywhere you want it by merely pressing a button.

You get *power*, too. Power that makes running water possible for the bath room, the kitchen sink, or out in the barn. Power with which to do the chores, indoors and out, *saving* your time and strength, as it *serves* you faithfully year after year.

Would you like to know more about the Westinghouse Plant? We have a new book that tells the whole story. Want a copy?

HOOP TOURNEYS TO START THIS WEEK

KLEMME DRAWS HAYFIELD FOR FOE IN TWO TOURNEYS

County Tournament This week And Sectionals Next Week

Klemme high school basket ball players have a stiff grind before them for the coming two week ends playing in the county tournament at Britt this week end and stepping into the sectionals at Mason City next week end.

The county tournament opens at Britt Friday and Klemme and Hayfield will battle Friday night for a place in the county semi-finals.

Popular sport dope is that Corwith will win the county tournament this year and have a good chance of getting somewhere in the sectionals at Mason City next week in Class "B."

The first round of the county contest does not promise much excitement and the Hayfield-Klemme game should produce the real thriller if both teams enter in good condition as they should be well matched.

COUNTY SCHEDULE

Friday Afternoon Games
GRADES
2:00 Crystal Lake vs Corwith
2:50 Garner vs. Kanawha
3:40 Hayfield vs. Klemme.
HIGH SCHOOL
4:30 Garner vs. Britt
Evening Games
HIGH SCHOOL
7:00 Goodell vs. Corwith
8:00 Kanawha vs. Crystal Lake
9:00 Klemme vs. Hayfield.

Saturday Afternoon Games
GRADES
1:15 Winnor Crystal Lake-Corwith vs. winner Garner-Kanawha.
2:05 Winner Hayfield-Klemme vs. Britt.
HIGH SCHOOL
3:00 Winner Garner-Britt vs. the winner Goodell-Corwith
4:00 Winner Kanawha-Crystal Lake vs. winner Klemme-Hayfield.

County Championship Saturday Evening
8:00 Final grade game between two winners of Saturday afternoon
9:00 Final High School game between two winners of Saturday afternoon.

The Sectional Line-up

The sectional tournament comes off at Mason City next week, March 1, 2 and 3 when 21 schools in North Iowa will battle for 'A' and 'B' honors. Officials have been chosen and Principal Rae of Mason City announces that the following slate is now final. Supt. C. G. Bray, Blairsburg, and J B. Bullock, Des Moines are officials

CLASS A

Thursday, March 1.
8 p. m. Belmond vs. Mason City.
9 p. m. Clear Lake vs. Garner

Friday, March 2.
11 a. m. Britt vs. Northwood.
2:30 p m Forest City vs Kanawha
8 p. m. Winner Mason City-Belmond game vs. winner Clear Lake-Garner game.

Saturday, March 3
11 a. m. winner Britt-Northwood game vs. winner Forest City-Kanawha game.
8:30 p. m. finals.

CLASS B.

Thursday, March 1
1:30 p. m. Alexander vs. Ventura.
2:30 p. m. Crystal Lake vs. Swaledale.
7:30 p. m. Grafton vs. Plymouth.
8:30 p.m. Hayfield vs Klemme.
Corwith drew bye.

Friday, March 2
9 a. m. Fertile vs. Thompson.
10 a. m. Sheffield vs. Hanlontown
1:30 p.m. Kensett vs Nora Spgs.
2:30 p. m. winner Alexander-Ventura game vs. winner Crystal Lake Swaledale game.
7:30 p. m. Winner Grafton-Plymouth game vs. winner Hayfield-Klemme game.
8:30 m. Corwith vs. winner Fertile Thompson game.
9:30 m. winner Hanlontown-Sheffield game vs. winner Kenset-Nora Springs game.
9 a. m. Semi-finals.
10 a m. Semi-finals
7:30 p. m. Finals.

K. H. S. DROPS TWO CAGE TILTS THE PAST WEEK

Swaledale-Klemme Game Featured High Scoring On Both Sides

The Klemme "Green Devils" lowered their 'batting average" considerable the past week when they lost two basket ball encounters, losing to Hayfield with a 30 to 17 score and dropping another battle in Swaledale's favor 43 to 34, both games on the home floor.

Hayfield invaded the camp Friday night and started the fireworks off in he first quarter, looping three ringers for six counts while Klemme chalked up a goose egg. The next frame was even more a night-mare for the locals when they gathered in a single free one and Hayfield looped twelve more counts making the half way mark 18 to 1 in their favor.

The third quarter was no better and the locals gained but a free one and a field goal for a total of three points while Hayfield kept on putting a few thru the loop regular, the score being Klemme 4, Hayfield 25.

The last quarter was like one of those games you read about in fairy tales Coach Heiden started to run in second string men and the "gag" worked fine as in that quarter our subs battled the stuffing out of the visitors and piled up 13 counters while Hayfield could only loop for a total of five points. However, the "jinx" was broken too late and Hayfield won by the final score of 30 to 17.

The Klemme grade team, midgets as compared to their visitors, put up a game fight and had Hayfield trimed 10 to 2 at the half. Klemme ost their hold after that when the larger boys from Hayfield got their basket optics working and neld the locals the balance of the game for no count while they rang up 8 in the third quarter and 6 more in the last frame. The final score. Hayfield 16, Klemme 10.

Swaledale Gets Sweet Revenge

Swaledale came over Tuesday evening with the intent of revenging the defeat they suffered from Klemme earlier in the season on their own floor. Swaledale took a good lead right off the start and at the quarter led Klemme 11 to 2 The locals came out of their dream then and played Swaledale a close game the balance of the game

The entire game was featured by specatacular basket throwing by the two teams and the scores piled up are larger than any game that has ever been played on the Klemme gym floor

Following the diasterous first quarter Klemme put up a good game fight and the half ended 21 to 11 in favor of the visitors.

The second half opened with real basket ball playing and Klemme had tightened down harder on the fast Swaledale loopers The third quarter ended 33 to 20 in Swaledale's favor and the final quarter Swaledale was out-played but won the game 43 to 34.

In summarizing the game we are of the opinion that if Klemme had buckled into the scrap with more pep in the opening quarter they could have defeated Swaledale. In this quarter the visitors made 14 points while Klemme gathered in but two. The second quarter was more even as Swaledale scored 10 points and Klemme scored 9. The third quarter Swaledale took a slight lead and looped 12 points against Klemme's 9 points The last quarter Klemme gathered in 14 points while Swaledale could find the hoop for only 10. In this final quarter Klemme made enough extra points over the visitors to off-set their lead in the two previous quarters, with one o spare to apply in the first frame. The first quarter is what lost the game for Klemme.

Although Klemme lost two games the past week, it demonstrated that Coach Heiden has a mighty good second string bunch of men to fall back on and in each of the two battles the second string men have helped to run up a big score in the final minutes of play.

MRS. JOHN BITKER DIED LAST FRIDAY

FUNERAL OF MRS. JOHN BITKER HELD MONDAY AFTERNOON

Was Former Resident Of Klemme And Vicinity

Mrs. John Bitker, daughter of Mrs. Emma Wenig of near Klemme, died at her home four miles southeast of Ventura, Friday afternoon, February 17th at about four o'clock at the age of 36 years, 7 months and 25 days.

Hattie Barbara Wenig Bitker was born June 23, 1892 at Klemme, Iowa and when an infant was Christened in the Methodist Church. She was a resident of this community practically all of her life until a few years ago when she moved with her husband and family to Garner and Ventura.

She was united in marriage to Mr. John Bitker on October 11, 1911 and to this union were born four children They are Gladys, Mildred, Johnny and Maurice. Besides her husband and children she leaves to mourn her untimely death her mother, Mrs. Emma Wenig, of near this place, her sister Gladys and her brother Harry who live with their mother on her farm; another sister, Mrs Fred Kothenbeutel of east of Klemme, and another brother, Oscar, of Sheboygan, Wisconsin, besides numerous other relatives and many friends.

Funeral services were held Monday afternoon at 1 00 o'clock at the home where a short service was held and at the Methodist Church at Clear Lake, at 2:00 o'clock, conducted by Rev. J. R. Tumbleson, pastor of the church.

The sympathy of the entire community is extended to the bereaved family and the relatives in their hour of sorrow.

FORMER KLEMME COACH GOING STRONG THIS YEAR

Hockey's Team Cleans Up In Palo Alto Basket Ball Tournament

The Mallard high school basketball team won the Palo Alto County Tournament at Emmetsburg by defeating Graettinger with a score of 27 to 19 In the semi-finals Emmetsburg lost to Graettinger with a 21 to 26 score and Mallard trimmed the Clyinder quintet with a score of 37 to 11.

The Mallard aggregation is coached by L. E. Hockey, coach for two years in Klemme, and at Mallard for his first year His team has lost but one game this year, and that to Emmestburg, and then latere defeating that school by a good margin.

In the finals Emmetsburg won consolation honors by defeating Cylinder with a score of 38 to 12. Gaettinger went into the finals against Emmetsburg, while Mallard had an easier foe in Cylinder.

The Mallard players put up a stiff game and at the end of the half the score was 20 to 10 in their favor. Graettinger pepped up in the last half but did not have enough team to win and the game ended Mallard 27, Graettinger 19

According to reports Hockey's team is doped to go quite a ways in the sectionals this year.

Here's luck, old boy!

NOTICE OF APPOINTMENT OF ADMINISTRATRIX

Notice is hereby given, That the undersigned has been duly appointed and qualified as Administratrix of the Estate of Henry Lemke, Jr, late of Hancock County, State of Iowa, deceased. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated February 18, 1928, A. D.

DAISY LEMKE,
(Feb. 23, M. 1-8.) Administratrix

NEWS OF SCHOOL THE PAST WEEK

SECOND NUMEBR OF LYCEUM MONDAY NIGHT

Other Interesting News Of Our Public School Activities

The second number of our Lyceum course will be given on Monday evening of next week It is a program by Ethel Salisbur Hanley, an impersonator. We believe she will give a good program. The Sophomore Class is sponsoring this Lyceum Course and wil very much appreciate a good attendance at this number Program will begin at 8:00 o'clock Admission has been set at 25 and 35 cents.

On Wednesday evening of next week, Feb. 29, those who won first place in each of the three classes in our local declamatory contest will speak at Belmond. They are as follows Harvey Nelson, Gladys Wilson and Irene Johnson We expect them to do splendid work and we hope several may go from Klemme to hear the contest which is the first round of the state series. We shall be compelled to contest against Belmond, Goodell, and Kanawha.

Our fifth and sixth grade boys and girls have been made more comfortable through the Board's purchase of some newer and more atractive seats. Many of the ones previously used were too large for these grades. Sevon pedestal arm chairs have been added to the high school equipment or class rooms.

A certificate of approval of our work and school has lately been received from our State Superintendent of Public Instruction. Mr. Simmonds who visited our school last semester speaks very highly of the work observed here and compliments the local board for their efforts to maintain a first class educational institution, for the purchase of needed equipment, as laboratory apparatus, maps, desks, books, etc.

We believe Klemme will compare very favorably with schools in towns of its size over our state in the matter of school spirit and quality of work Morningside College writes that Klemme graduates from that institution are making good and that we seem to be doing all that could be reasonably required of a school our size.

Supt. Mounce Entertained Hancock County School Masters

Supt. M. F. Penrod went to Garner Saturday to attend a meeting of the Hancock County School Masters who were being entertained by Supt and Mrs J. R. Mounce. Mrs. Mounce served a delightful lunch at noon.

The members present were Superintendents M. F Penrod, Klemme; C. E Cooper, Britt; L. W. Olmstead, Hayfield, C E. Rankin, Crystal Lake; A A Wolfe, Kanawha and C. W Thompson, Corwith. County Supt. J R. Baggs was also invited.

Following the luncheon the matter of drawing and arranging for the annual county basket ball tournament was taken up and school business discussed.

Plans to hold the annual spelling contest wwere formulated and the date set for March 31, to be held at Garner.

Otto Schroer Wants The Times Sent To His New Address

We are in receipt of a letter postmarked Buffalo Center, from Otto C. Shroer, who until recently was located on a farm north-west of Klemme Otto explained he had forgotten to notify the post office and the Times of his change in address and consequently was short on mail for a time. Otto emphasized the point that he could get along without most of his mail but he sure did miss The Times. It will go to him regularly. We do not know what he is doing, and so let this be an invitation to write us again Otto!

LIBERTY AND ELL LADIES HOLD JOINT MEETING

Third Year Clothing Project Now Being Taken Up In Work

The Co-Operators of Ell Township Clothing Project held their first meeting of the new year, February 16th at the home of Mrs. R. Schlavin This was a meeting for both the ladies of Liberty and Ell Townships.

The Ladies are taking up the lessons on the third year clothing. This lesson was on undergarments for adults, and was under the supervision of the demonstrator, Miss Merle Ramer.

The next meeting will be held at the home of Mrs. Chas. Griffen in Ell Township.

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

10:00 a. m. German Service.
11:00 a. m. Sunday school.
Tuesday and Saturday, Confirmation Class.
8:00 p. m. Wednesday, young people's Bible class.
3:00 p. m. Saturday Junior choir.

County Convention Saturday

The Republican County Convention will be held at the court house at Garner Saturday, Feb. 25th for the purpose of selecting delegatese to the Republican State Convention in Des Moines, March 7th.

F. A. Arnold is the chairman of the county central committee.

JURY LIST DRAWN FOR MARCH TERM

HANCOCK COUNTY COURT CONVENES MARCH 12

Hon. Judge J. J. Clark Will Preside At First Spring Term

The next term of the Hancock County District Court begins at Garner, March 12th, with Hon. J. J Clark presiding judge.

Following is the list of Petit Jurors drawn for the first spring term of court in this county:

Leo Paulson, Crystal, Forest City; C Powers, Crystal, Crystal Lake; Marcelles Fuller, Avery Goodell; Esther H Wallen, Britt, Britt; Emil Lau, Avery, Klemme, Lon Nelson, Jr., Avery, Goodell; G. N. Cunningham, Madison, Forest City; Walter Ranfrance, Ellington, Ventura; Geo. Ness, Avery, Goodell; Mrs. Clara R. Simmons, Bingham, Woden; Jessie Kuaupp, Concord, Garner; Amos Hanson, Avery, Goodell; Anna Evanson, Ellington, Garner; Lulu Lawhorn, Concord, Garner; Lela Davis, Amsterdam, Kanawha; Lucile Morris, Amsterdam, Kanawha; Wm. Brozek, Garfield, Garner; Dan McMahon, Crystal, Forest City; Mrs. Minnie Hubbard, Avery, Goodell; Gladys Freerkson, Amsterdam, Kanawha; Art Larson, Magor, Corwith; Roy Aldridge, Amsterdam, Kanawha Ben Reiby, Ellington, Forest City; A. Slattenew, Madison, Hayfield; L. J Hamilton, Avery, Goodell; Viola Freie, Ell, Klemme; Emma Neimeyer, Concord, Garner; Harvey Engaer, Garfield, Garner; Lula Haskins Concord, Garner; Lola Wilson, Concord, Garner.

The above petit jurors are required to report March 1,3 1928, at 10:00 a. m.

Grand Jurors For 1928

The following list of Grand Jurors have been drawn for the year of 1928 and are to appear at 10:00 a m. March 13, 1928.

M. S. Burgitt, Britt, Britt; E. J. Blumer, Liberty, Garner; Arthur Wellemeyer, Ell, Klemme; Geo. Sanford, Magor, Corwith; Frank Chizek, Garfield, Garner; C H. Schissel, Concord, Garner; John Ruoss, Crystal, Forest City; Ernest Senne, Bingham, Woden; Wray Hallett, Madison, Forest City; L. B. Miller, Amsterdam, Kanawha; J. M. Zielke Avery, Goodell; John Dominy, Twin Lake, Goodell.

CHAPTER V—Continued

—13—

"Oh, I say! Stop and have sandwiches and coffee with me!" she suggested chummily—not at all as a subordinate addresses a superior officer. "I can't bear eating alone—it's almost gross, isn't it? Will you? I've heaps—we'll have a jolly lunch! I've a thermos bottle of hot coffee, good strong coffee that I made myself," she chattered as she began to set things out on the flat desk-top, feeling exhilarated at a bit of normal human association and talk after her weeks of strained, artificial relations. With this man, if they kept off of pedagogy, she could be herself—up to a certain point at least (though of course she would have to watch her accent). She almost snatched his hat and coat away from him as she directed him to draw up his chair before the array of dainty sandwiches, coffee and fruit which she had spread out.

"But," he said as he placed their chairs and they sat down, "why is my company all of a sudden so welcome? An hour ago it was, 'You here again!'"

"Well, since you know the very worst about me, I can enjoy a chat with you. I've been dying for a man to talk to! I've been almost driven to flirting with the wooden Indian in front of the village cigar store!"

"'Flirting'? I'm afraid I can't play up. Don't know how. Afraid I've always been rather a stick with girls," he said dolefully, his eyes on her glowing face and creamy neck encircled by a fluffy, fluted white ruffle. What a brute he had been to make her cry—anything so dainty and sweet!

"I wouldn't presume to flirt with the county superintendent," she reassured him, "who knows the very worst about me!"

"The very worst—you're sure?"

"What further do you suspect me of? Not knowing the Presidents in order? Well, I don't. Nor the Twelve Apostles either. And I can't name offhand the Chinese dynasties for the past five thousand years. Have some coffee?"

She poured him a second cup and his heart thrilled to her as he saw how gay she now looked after her tears. He himself was lonely enough, in all conscience, and this bit of companionship with such an engagingly impudent child was, to say the least, very diverting.

"You made this coffee?" he asked. "Teach that to the girls of your school and I'll advise your trustees to raise your salary—and if they taste your coffee they'll do it!"

"You put good coffee before learning and call yourself an educator! Men do like their comforts, don't they? I wonder why I'm teaching school anyway, when American cooks are paid such huge wages. What do American cooks do with the millions they earn? Buy country estates and retire?"

"American cooks?" he repeated reflectively. "How about foreign cooks? English cooks, for instance?"

She felt a betraying warmth in her cheeks. He suspected her! No wonder, the way she so often spoke of American things, as though she were not an American!

"I should think," she answered calmly, "that with the terrible unemployment we read of over there, cooks ought to be cheap. I'm told, Mr. Creighton," she changed the subject, as she leaned back in her chair with a sandwich in her hand, "that you're a terrible idealist. How do you manage it?"

"I don't. Though the alternative is so self-destructive! Do you (am I to conclude), like most young people of this day, imagine yourself a cynic?"

"How can one escape it?" I have a cousin who was a radical Socialist until he married a rich wife. I have an uncle who was a liberal in all his ideas until a fellow-professor at his college was expelled for his liberalism—when my uncle changed his views. Believe in liberals with ideals? No, it's asking too much!" She shook her head over it hopelessly.

"Did you never know anyone," Creighton asked, "to sacrifice something for the sake of his ideals?"

"You?" she inquired, looking at him over an expanse of sandwich at her lips.

"Heavens, no! I was thinking of—Mr. E. D. Morell, for instance—"

"Editor of Foreign Affairs," she nodded—then instantly regretted her too-ready knowledge of this English editor. Wasn't the mention of him a bait? Would an American be apt to know of him? "Of course," she hastened to add, "liberals all over the world must take heart from Mr. Morell's steadfast courage and heroism!"

"Yes—but—he isn't very much known in America—how did you come to know of him?"

"Read about him in The Nation."

He looked surprised. "I'm sure," he said, "you are the only teacher under my jurisdiction that has ever even heard of that paper!"

Conversation with him was, after all, too full of pitfalls, she decided. She was glad when the children's returning to the schoolroom obliged him to take his leave.

Her curiosity as to how much he suspected was fairly consuming her.

CHAPTER VI

Aunt Rosy was again at the Schwenckton's, and it was manifest that her brother-in-law was not "overly pleased" at her unexpected visit.

Conversation at supper, in spite of her efforts to sustain it, seemed to languish. No one but Aunt Rosy seemed to be in the mood for this friendly chatting.

"Susie tol' me about yonr holdin' up young Creighton and takin' his watch off of him, Sam," she said, "and if I was you I wouldn't like it so well that that fast young fellah got a foothold in here with Nettie so lovesick she don't know half the time what she's about—"

"I don't know what you mean by a 'foothold,' Aunt Rosy," replied Mr. Schwenckton irritably. "He ain't been round here since."

"How do you know he ain't? This after, when I got here, I seen Nettie makin' sich chocolate futch and—"

"Yes," broke in Susie in a tone of grievance, "and mind what she done

"'Flirting!' I'm Afraid I Can't Play Up. Don't Know How. Afraid I've Always Been Rather a Stick With Girls."

yet! She cooked my fire out, so's I had to build it fresh to cook my supper!"

"And when her futch was done a'ready, did she offer some to me and Susie? She did not! And what's more, I don't see none of it bein' passed 'round to yous neither! What did she done with that there futch? Why, I seen her packin' it all up nice in a white box and hidin' it good away! Who for? That's what you'd better find out, Sam Schwenckton! Who for?"

Nettie, her face crimson, muttered something about "a big nosey" and "buttin' into other folks' business"—but her father interfered.

"Be peaceful, both of you. I won't have no wranglin' at our meals. Till supper's through a'ready, Nettie can tell me who the futch is for."

Nettie, flashing a look of hate at Aunt Rosy, subsided into a sullen silence.

Aunt Rosy was certainly a very disturbing element in this household. It was because of her presence here this evening that Mr. Schwenckton found himself, greatly to his astonishment, not to say bewilderment and distress, "up against" the younger generation in a way that was a shocking revelation to him of how times had changed. Incredible it seemed to his patriarchal ideas of family life that his own young daughter should dare to defy him—but here was the fact before his very eyes—Nettie stubbornly refusing to answer his questions as to what she had done with the fudge she had made. She admitted that it was already disposed of. But neither commands, threats nor coaxings would elicit anything further from her.

* * * * * * *

Meely was pledged for a rendezvous, about school-closing time, with St. Croix in the woods on the hilltop.

This would be her first meeting with him since their wordless encounter in the Schwenckton kitchen the night of the "holdup" and Meely, as she hastened after school to the hill, was tingling with curiosity as to what he would have to say of that dangerous moment which they had managed to come through so unbetrayingly.

She was pretty sure that poor little Nettie's fudge had been made for St. Croix. "For all I know, he has been seeing her and has discovered that I am the teacher!" she speculated.

Not that she believed he had been seeking Nettie. He was, for the time, too engrossed in herself. But Nettie, in her adolescent infatuation, may have been thrusting herself upon him and St. Croix would not be overscrupulous in accepting gifts the gods offered.

"I'll find out about that fudge," Meely resolved, "and if he is taking advantage of that ignorant child, I'll protect her!"

She wondered, as she went on her way, whether St. Croix would notice the coat she wore. The season having advanced too far for her gaudy voile frock, without a wrap, she was in a bit of a predicament, for her jacket suit was far too stylish for the Meely of St. Croix' mental gallery and the only other wrap she had was this half worn-out coat she had used on the steamer en route for America, an English tweed that had once been such a first-class garment she feared St. Croix would instantly detect its quality and style—he was so observant and informed in such matters—well, rather!

If he did notice that her coat was a good English tweed and ask questions, how on earth should she explain? She would have to trust to the inspiration of the moment.

"It's almost unbelievable that I've come through so far without his discovering me! I'm—some—actress, I am! They'll certainly have to notice me when I get to Hollywood!"

He was there ahead of her at their meeting place and the nipping air of the hilltop had acted as an irritant to both his passion and his temper. It was getting much too cold for these out-of-doors meetings and he knew of no place under a roof where they could get together without risk of detection—especially as Meely's father had grown suspicious for some reason; he had brought old Schwenckton's funny letter with him to show her; as a warning that she must be more careful; he would demand an explanation from her as to what she had done to rouse her father's suspicion.

Was there no way that he could have the girl except by taking her away from her home altogether? But of course he wasn't going to get himself into that kind of a mess! Absurd to think of it!

St. Croix still felt confident that when he nodded his readiness, Meely would be only too glad and eager to come to him. Why he had put it off so long was a mystery to himself. Something about her all along had seemed to check his being precipitate—though probably she was just as impatient at his dallying as he himself was.

But the time was surely ripe now and he must delay no longer.

"I'm very displeased with you," he began as they sat huddled together to keep warm, on the big flat log. "What on earth made you do such a reckless thing, my dear, as to send that box of fudge to my home? My mother got hold of it! Don't ever do such a fool thing again, Meely! What on earth made you break out like that?"

"Ach, well—you see, you gimme them swell handkerchiefs and so I wanted to pay you back."

"Of course it was nice of you to make the candy for me—but to send it to my home! My mother asked all sorts of questions—she's awfully worried—"

"She must be awful stuck-up if you're so scared of her knowin' you travel with me! But I knowed folks a'ready that's got twicet as much as she's got and they ain't so proud that they're ashamed to know me!"

"My mother isn't 'proud,' Meely—she's the gentlest, sweetest, dearest—"

He spoke with such feeling that Meely, who so seldom saw him show feeling for anyone but himself, was impressed.

(TO BE CONTINUED.)

Embryo Lawyer Puts Up Successful Plea

Apparently lawyers are born and not made, if a delightful yarn published in the Manchester Guardian correctly illustrates the development of the legal mentality from a start in the cradle, writes the London correspondent of the Christian Science Monitor. There had been a certain liveliness in the nursery just before bedtime, with the result that some of the furniture was broken. There was a fog of highly conflicting evidence in the nursery, and father decided that, failing a full and accurate account of what had happened, an anticipated holiday at Scarborough should be canceled.

After some moments of deep thought his young son, who will probably some day be lord chancellor, summed up the position in a sentence: "I have said I didn't do it, but if I can't go to Scarborough unless I say I did do it, I think I had better say I did it; but, if I did do it, I don't know I did it." Father is reported to have retired from the discussion at this stage, without risking further discomfiture by cross-examination.

Dustin, the Resourceful

Harrison Gibbs tells of a night when the stage manager neglected to place a mattress outside the castle walls as a landing place for Dustin Farnum when he made a spectacular leap in some melodrama. Farnum landed with a thud audible all over the theater. To stave off the laugh he thought fast, with the result that almost immediately he peeked over the parapet and remarked, "The lake is frozen!"

Salt of the Earth

The entire evaporation of the world's oceans would leave a layer of salt 235 feet thick.

POULTRY FACTS

FEEDING FLOCK OF LAYING HENS

The New Hampshire station gives the following feeding recommendations for laying hens, formulated at the 1927 conference of representatives of New England agricultural colleges:

Mash formula: 200 pounds coarse yellow corn meal, 100 pounds wheat bran, 100 pounds middlings, preferably white; 100 pounds oat products (see paragraph 3); 25 pounds meat scraps, not less than 50 per cent protein; 25 pounds fish scraps, not less than 45 per cent protein; 25 pounds steamed bone meal; 25 pounds dried milk; 5 pounds common salt.

Grain formula: 200 pounds whole corn; 100 pounds wheat; 100 pounds oats.

1. That dry mash be kept before the birds constantly in hoppers or troughs that can be and are kept clean and free from litter, dirt and filth. That all hard grains be fed in similar hoppers or troughs. The amount will vary with the breed, the rate of production, the weather, and possibly other factors, but there is a growing tendency among poultrymen to feed grain more liberally.

2. Whole corn is recommended because there are certain vitamine losses in cracking, and furthermore the feeder is better able to check up on quality. This presupposes that chicks have been taught to eat whole corn on the range, or before being installed in the laying house.

3. Oats should be omitted from the scratch mixture when fed germinated. The term "oat products" in the mash formula includes oat flour, ground oatmeal or ground 40-42 oats. All are used pound for pound.

4. Cod liver oil is a valuable supplement that ought to be added to the ration during the winter months at the rate of one pint per 100 pounds of feed or nearly one quart per 100 hens per week or one-fourth pint per 100 hens per day. It should be fed the year around to hens kept in confinement.

Ganders Are Drawback in the Geese Business

Geese naturally mate in pairs. Sometimes you can force upon a gander more than one mate. Sometimes you cannot. I should say that the average you would have to keep would be two ganders to three and possibly four geese. That is one of the drawbacks of the geese business, says a writer in The Farmer. You have to keep too many unproductive males. The productive females do not lay a great number of eggs, perhaps 30 to 35, and unless some pains is taken in feeding them the eggs do not hatch very well.

If you have plenty of roughage, however, they can be rather cheaply fed. Short cuttings of alfalfa or clover hay may consist of one-third of the bulk of their feed. The other two thirds should consist of corn meal, wheat bran, wheat middlings. They should have a small amount of animal matter. This feed might be mixed with skim milk or buttermilk or add about 5 per cent of meat scraps or tankage to it. You should have fine sand, say about one pound in 100 pounds of soft feed. This soft feed should be fed quite wet. They might have a little whole corn at night, but not a great deal. Too much will make them so fat by spring that the geese eggs will not be fertile.

Changing Breed Doesn't Help Egg Production

Unfortunately for a great many people the idea prevails that the only way to get more eggs is to change the breed or variety of birds kept. Merely changing from one breed of birds to another is not going to make any improvement in results, unless some one has previously done some constructive breeding with the particular strain of birds selected. Some very creditable records have been made by individual cows in various breeds, and we also know that individual hens in different breeds of poultry have made some very high egg-production records.

Contagious Roup

Contagious roup is a very easy disease to recognize, starting usually like simple cold, with a thin, watery discharge from the nose and eyes. This secretion has a peculiar, offensive odor. Inflammation sets into the nasal passages, eyes and spaces just below the eyeballs. Birds often cough and sneeze and breathing becomes noisy. If nasal passages become blocked the birds breathe through their mouths. The birds soon lose their appetite and become depressed.

Prevent Toe Picking

When boxes of day-old chicks arrive do not open them and allow the chicks to see each other very long. They will be hungry and with no feed in the box they may quickly form the toe-picking habit. This seldom happens when the chicks are placed in the brooder house where the litter and the feed hopper keeps them busy. Idleness is the foundation of bad habits in poultry of all ages. The busy hen on the range seldom eats eggs or pulls feathers from her flock mates.

The Cream of the Tobacco Crop

"Hoot, Mon, Luckies dinna hurt my throat or wind," says Sir Harry Lauder, famous Scotch Comedian

"I've smoked Luckies for years and all this time I've been active in my work which demands a clear voice for singing and good wind for dancing. 'It's always a bra bricht moonlicht nicht with Luckies—Hoot, Mon, they dinna hurt my wind or throat.'"

Harry Lauder

"It's toasted"

No Throat Irritation—No Cough.

Minute Weight

Doctor Kuhlman of Hamburg succeeded in registering weights as low as one-ten-millionth of a gramme.

Just Keeps on Going

Joe—"Doesn't it upset you when you run over a pedestrian?" Lee—"No. I've never hit one as big as all that."

Genuine BAYER ASPIRIN

SAY "BAYER ASPIRIN" and INSIST!

Proved safe by millions and prescribed by physicians for

Colds	Headache	Neuritis	Lumbago

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Old Folks Say Doctor Caldwell was Right

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice, known to druggists and the public since 1892, as Dr. Caldwell's Syrup Pepsin.

Then, the treatment of constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions that result from constipation was entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, which is a combination of senna and other mild laxative herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you, and the better for the general health of all. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle of Dr. Caldwell's Syrup Pepsin will last a family several months, and all can use it. It is good for the baby because pleasant to the taste, gentle in action, and free from narcotics. In the proper dose, given in the directions, it is equally effective at all ages. Elderly people will find it especially ideal. All drug stores have the generous bottles.

W. B. Caldwell M.D. AT AGE 83

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin" Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE

CHAPTER VI—Continued

—14—

"Well," she said with a long, deep sigh, "me I ain't got nothin' to be proud of—but my kar'kter!"

"Your—what?"

"My maur'l kar'kter."

"You mean your character?"

"Uh—huh. It's all I got."

"You've got something else—" He reached for her hand, drew off her cotton glove and clasped her fingers. "You've got—"

But she worked her hand free of his and drew on her glove again. "My fingers is cold."

He frowned. She might be glad he wanted to hold her hand!

"You not only have my mother, but your father, on the scent!" he reproached her. "What did you do to make him suspicious?"

"It was that there futch—Aunt Rosy tol' him about it. Did he—was he to see you?" faltered the girl—and the suspense in her voice was not assumed.

"No, but I had this letter from him." He drew an envelope from his pocket and handed it to her. "Read it—and see what mischief your fudge has made all 'round, my dear!"

It was a pathetic little note, Meely felt—poor Mr. Schwenckton anxiously endeavoring to protect his wayward child, yet equally anxious to avert dissension with his powerful neighbor by casting on him any base, unfounded suspicion; pointing out to St. Croix the impossibility of any safe or honorable relation between him and his daughter, due to their unsurmountable differences in station, wealth and education. Somehow, the most pathetic part of it to Meely was the poor man's struggles to write intelligent English. "Whiles we have always been in comfortable circumstances, yet limited, but honest and honorable."—"Our females in our family being ever Virtuous and very Chaste and never disgraced us, though many temptations."

Meely remembered, as she found the words all spelled correctly, how assiduously the farmer had, one evening, to her mystification, been consulting the dictionary and how he had asked her to spell for him several long words.

She was relieved to find that Nettie was referred to only as "My daughter," and not by name.

"Poor Pop!" she sighed as she returned the letter to its envelope and passed it back to St. Croix, "he means so well by us children!"

"So you see, Meely, you've got to be careful. No more fudge!"

"I never conceited it would give all this here trouble!" she lamented, on the verge of tears.

St. Croix looked a shade less austere. "Where'd you get the spiffy coat?" he asked. "Looks for the world like English tweed."

"It's the teacher's. She left me borrow the loan of it off of her."

"Now, look here! Why can't you say simply that she lent it to you?—instead of all those superfluous words—she let you borrow the loan of it off of her! Ye gods! 'She lent it to me.' That says what you mean, doesn't it? Five words instead of a dozen!"

"Ach, well!" pouted Meely, looking again as though she were on the verge of tears—and then suddenly, to her consternation, she quite uncontrollably snickered—crushing her hand against her mouth to keep from laughing hysterically. Fortunately for her, he took it for a suppressed sob.

"There, there, my dear!" he said half impatiently, half remorsefully. "Never mind! You're past teaching anyhow! Look here, Meely, why haven't you ever mentioned that the teacher boards with you? You've talked of everyone else in the household."

"Well, you see, I had afraid you might want to be gave an interduction to her and she's so pretty, I had jealous."

"She is a pretty little thing. But I wonder," he grinned, "what my brother, Marvin, thinks of such a little ignoramus teaching a district school! I didn't know they had such crude teachers as that in the schools!"

"But she's awful good in geography! She can bind every state on the patch-work quilt!"

"'Quilt'!"

"You know—the map. And sums! You had ought to see her do sums once! My—goodness! To be sure, she can't talk wery correct. She gets her w's and we's mixed terrible! But United States history! Why, she knows even the footnotes, now mind I'm tellin' you!"

While she talked, he watched her with shining eyes, but it was her ravishing self, not Nettie's proficiency in sums and footnotes, that caused the shining.

"I declare, Meely, in that coat you could pass for anything at all! You look positively like a swell! Patrician, actually!" He laughed, little dreaming, of course, that the girl understood why he laughed; why he thought it funny that Meely Schwenckton should look "patrician, actually!"

"And if I really was so pa—high-toned like I look in this here coat," she responded wistfully, "you could marry me then! Ain't, Mr. Creighton?"

"Marriage isn't the happiest relation between a man and woman, Meely—there is a freer, happier relation," he said insinuatingly—ingratiatingly.

"But since I ain't high-toned," she broke in, "why do you take all this here worry and trouble to meet up with me?"

"You're always asking me that, Meely! I've told you—you know—"

"No, I don't. If you think I'm common—too common to marry—then what is it about me you like so good?"

"Well, if you've got to have an answer, I suppose, Meely," he said, re-

"Well," She Said with a Long, Deep Sigh, "Me, I Ain't Got Nothin' to Be Proud of—but My Kar'kter!"

garding her appraisingly, "it's that you're so absolutely feminine!"

"'Feminine'? Well, but my goodness!—what would you expect?"

"It makes you, to most men, my dear, so irresistible! I can't understand how you've gone this long without being married. Why haven't you married, Meely?"

"Ach, I ain't got no curiosity!"

He winced. How blatantly vulgar she could be!

However, she had given him his cue—a wedge to break down barriers.

He found himself surprised at his own sense of reluctance to come to the point with her, to put his quest to the test; an undefined apprehension of disappointment—though of course that was ridiculous — surely she "loved" and desired him, or why had she been risking so much to meet him here? Surely she was flattered at his desiring her!

He suddenly snatched her to him with passionate kisses—so fiercely that this time she was too helpless in his hard grip to avert his lips—and into her ears he poured out words not in her vocabulary—she could only guess their meaning; could only surmise that now at last he was telling her what all along she had known—that he took her for a "hussy!"—and although through all these weeks she had been expecting this climax, yet it came to her now with a shuddering shock.

In vain she struggled to free herself from his arms and his appalling words.

"Let me go—or I'll scream!" she managed to gasp at last.

He was not too far gone to know the danger of her threat—their hilltop, though isolated, being not too distant for a scream to be heard from the valley below.

Panting, baffled, he dropped his arms from about her, his face distorted with a mingled resentment and an anguish of hungry yearning. But he clutched her skirt lest she get up and run away. She only moved, however, a few inches from him on the log, her whole body trembling, her face deathly white.

"If you touch me, I'll scream!" she gasped.

He could not find breath to answer her.

"Can we," she asked scarcely above a whisper, "talk this here thing out, Mr. Creighton?"

"What's there to say? I want you! You surely want me!—I'll amply reward you—"

"You mean—buy me?"

"Of course not—any more than you'll buy me. We want each other, Meely! I'll reward you for the risk you take—reward you well—"

"Do you mean you'll give me—money?"

"A pile of it—that you can put away for your marriage—"

Meely started—this was an amazing world that was being revealed to her! She had not dreamed how far some men would go, how ruthless they could be, in degrading a girl.

"For my marriage!" she breathed. "Ach, Mr. Creighton, I didn't know you thought that low-down of me!"

Before the look of utter dismay that had come into her face, he actually felt, to his own bewilderment, a momentary embarrassment. Was she going to be sentimental and scrupulous? That would make things much too difficult—he had certainly not anticipated having to wrestle with scruples!

"I don't think 'low-down' of you, Meely. We love each other—"

"Love? But I'd think, Mr. Creighton, that if a man loved a girl he'd purtect her, not hurt her!"

"But love never hurt anyone, Meely! It enriches and blesses—because it gives ecstasy! Ecstasy, Meely!"

"Supposin' you had a sister—would you go ahead and tell her to take such blessing and riches and ecstasy as you're offerin' me? Would you?"

He ignored this ridiculous question. "Meely, love should be as free and natural to us as breathing this autumn air! It's a glorious adventure—"

"But if it's that—'a glorious adventure'—why make it a sneakin', ugly bargain that you gotta hide and be ashamed of all your life?"

"Ashamed? Look at those birds—and all the other wild, free things! Are they ashamed? Then why should we be ashamed when we're only yielding to our natures that God gave us—"

He found himself reasoning with her just as though he believed she were seriously putting up all these objections!

"Yes, well, but the birds mate," she answered, "and live in a nest and hatch young ones. That's what love is—a home and children, living and working together and bringing up children. Nothing else is good enough for me, Mr. Creighton, thank you!"

"Oh, Meely, you don't realize!—a free, spontaneous love like ours can be so much more beautiful than the deadly dull, stale marriage relation!"

"'Beautiful'! Sneakin' and hidin' for fear we'll be found out!—and goin' against the Nature you talk about!—for it's goin' against Nature when you darsen't have a child. And you call that love! That ain't love, Mr. Creighton. It's—well, what would you call it? I don't know what you'd call it!"

"If all you see in love (a lovely young creature like you!) is childbearing!"

"But that's what love's for, ain't it?—if it's Nature you're plaguin' me to follow. And you offerin' me money yet for my marriage! As if even a common man would marry me if he knowed I was a loose woman! Even a workin' man, Mr. Creighton, wants his kids' mother to be a good woman!"

"But there's no 'right' or 'wrong' in love, Meely—love is so divinely above those superstitions! Love is—"

"I ain't thinkin'," she broke in, "so much about whether it's right or wrong. It's whether it's good sense for a girl to give herself to a man that thinks she ain't good enough to marry him! What's it worth to a girl?"

(TO BE CONTINUED.)

Health for Females in Open-Air Exercise

There seems to be no reason why a woman or girl should not get as much enjoyment out of life as any man or boy. Too many of our sex consider themselves hothouse flowers. If the weather is cold or stormy they will not venture outdoors. The sun must be shining and the weather warm before they will spend any time outside. Whether it is cold or warm, calm or stormy, every woman and girl should spend at least three hours daily in the open air. Not merely resting, but walking, washing or playing some game. Being in the fresh air is all right in a way, but to get 100 per cent value out of the good air, one should exercise in it. Even if the exercise consists only of deep breathing, this, at least, exercises the lungs. I find that too many women neglect their breathing. They very seldom take a deep breath. It is easy to get into the habit of taking the deep breathing; expanding the lungs to the limit if only two or three time a day. Doing this indoors is of little value. The fresh air should be taken advantage of. By this means, alone, one can obtain assurance against lung troubles. And there is no cost whatever for this treatment.—Psychology Magazine.

"Safety First"

Helen and her mother spent the summer on a farm and Helen was heartbroken when one Sunday her pet rooster had to give up his life because the minister was coming to dinner. Some time later she saw the minister coming to call, and she ran to the barn shooing the chickens, and said: "Get in quick; here comes the man that ate your father."

Silk culture is being fostered as a new industry in Mexico.

Orchard Information

PLAN TO CONTROL PEACH-LEAF CURL

To control peach leaf curl, the trees must be sprayed before the buds start to swell, advises A. Freeman Mason, fruit specialist at the New Jersey State College of Agriculture, New Brunswick.

When the buds are ready to start growth, the spores of the disease-causing fungus are ready to infect them; hence, if spraying is delayed it will be of no avail. Use the dormant spray consisting of commercial concentrated lime-sulphur diluted one part to nine parts of water, or homemade concentrated lime-sulphur diluted to a specific gravity of 1.03 Baumé. Either of these mixtures will also control San Jose scale. If the orchardist is certain that no San Jose scale exists on his premises the dilution may be one part of commercial lime-sulphur to fifteen of water, or 4-5-50 bordeaux mixture may be used.

Thoroughness is essential in spraying for peach leaf curl. The tips of the twigs must be coated on all sides if control is to be expected. Spraying each side of the tree with a change of wind is effective, providing every portion of the tree is covered, but if the tree is sprayed at one operation, the work must be done "against the wind," so that the lee sides of the twigs will be coated.

Oil sprays are not recommended, for they are generally much less effective than either concentrated lime-sulphur or bordeaux mixture in controlling peach leaf curl.

Plan to Prune Grapes in February and March

Careful pruning of the young grapevine is necessary for the development of a vigorous, productive bearing plant, says J. H. Clark of the New Jersey agricultural experiment stations. Pruning should be done during February or early March while the vines are still entirely dormant.

When pruning the average one-year-old vine, all but the one most vigorous cane should be removed. This one cane is then cut back to two buds. At this time or soon afterwards a heavy stake five to six feet high should be driven beside each plant. The canes are tied to this stake as a support during the summer.

By pruning time the second year, one of the canes should be long enough so that it can be pruned off near the top of the stake. All other canes should be removed. During the following summer this trunk will produce several side canes. Usually four of these are left at the pruning given after the third growing season, each being cut back to four or five buds.

At this time, the vines are ready for training on a trellis. The Kniffen trellis is the best for Eastern grapes. It consists of two wires, one at a height of about three feet from the ground, the other about two feet from the first and directly above it. One of the canes is tied in each direction on each wire.

Spraying for San Jose During Dormant Season

The time to spray for San Jose scale is in the dormant season—when the leaves are off the trees. Lime-sulphur is the old standby for spraying San Jose scale, but of late years lime-sulphur has not given entire satisfaction partly because in some localities the insect apparently has become resistant to it, partly because of lack of thorough spraying, improper dilutions and the application of insufficient amounts of material per tree, says the Farm Journal.

On old rough-barked apple trees, oil emulsions, applied while trees are dormant, are apt to be more effective. In the Middle West, the boiled emulsion of lubricating oil, particularly of the red engine oils, is being widely used with considerable success.

Horticultural Hints

Planting should be done as early in the spring as the soil can be worked into good condition.

* * *

Sweet and sour cherries are equally susceptible to disease, but care must be exercised in spraying sweet cherries as they are subject to burning with lime-sulphur.

* * *

Plants should be ordered soon for spring delivery. In case they arrive before planting time, the bundles should be loosened up and heeled in a trench until the soil is in condition to plant.

* * *

As spring is the best season of the year to detect the crown borer, all growers should examine their orchards carefully.

* * *

Raspberries should be planted in rows six feet apart and four feet apart in the row; blackberries are planted in rows eight feet apart and the plants five or six feet apart in the row; strawberries in rows four feet apart and twelve to eighteen inches apart in the row; currants and gooseberries are set five feet each way.

Satisfying Effect!

Mason City, Iowa.—"I have taken Dr. Pierce's Favorite Prescription and it has always given me entire satisfaction. As a tonic for women I do not believe it can be equaled.

"I have also taken Dr. Pierce's Pleasant Pellets as a mild laxative. I consider them the best remedy I know of to keep the stomach and bowels in condition. I think they are extraordinary." — Mrs. Wm. Keys, 610 S. Van Buren St.

Dr. Pierce's Medicines (liquid or tablets) can be bought in your neighborhood store, 60 Pellets, 30 cts.

Write Dr. Pierce, Buffalo, N. Y., if you desire free medical advice.

PIMPLES
Seem insignificant, but they denote bad blood. Constipation causes bad blood.

INDIGESTION

RELIEVED . . . QUICKLY
Carter's Little Liver Pills
Purely Vegetable Laxative
assist nature in its digestive duties. Many times one of these little pills taken after meals or at bedtime will do wonders, especially when you have overeaten or are troubled with constipation. Remember they are a doctor's prescription and can be taken by the entire family. All Druggists 25c and 75c Red Packages.
CARTER'S LITTLE LIVER PILLS

Vegetable Extract Latest

Extracts of vegetables similar to certain extracts of meat have appeared in Europe. They are actually the real vegetables subjected to a process which, after several years of experiment, has made it possible to preserve all the essentials of lettuce, celery, potatoes, cabbage, onions and other products of the garden in concentrated form. They are said to be especially suitable for soup, one pound of the extract making 60 cups. Domestic and tropical fruits will be added later.

COLDS Four things you must do to end a cold quickly. HILL'S Cascara-Bromide-Quinine does all four at one time. Stops a cold in one day. Red box, 30 cents. All druggists.

When You Catch Cold Rub On Musterole

Musterole is easy to apply and works right away. It may prevent a cold from turning into "flu" or pneumonia. It does all the good work of grandmother's mustard plaster.

Musterole is a clean, white ointment, made of oil of mustard and other home simples. It is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frosted feet—colds of all sorts.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

FARM BUREAU MEETING AT WM. JOHNSON'S ENJOYED

Extensive Program Had Been Arranged For The Evening

A Farm Bureau Meeting was held at the Wm Johnson home Monday evening which was quite a large crowd attended During the business meeting some of the members were appointed to go on a membership drive and many other things of importance were discussed After the business there was a very nice program was given, consisting of some violin and piano duets by the Misses Mildred and Gertrude Johnson, besides some dialogues readings and poems A hog calling contest and donkey parade were also very much enjoyed by all the prizes being won by Mr Cook for hog calling and Mr Barger for the donkey contest After the program a delicious lunch was served consisting of sandwiches, pickles, cherry pie and coffee All present had a fine time.

Miss Gertie Trampel was visiting with Miss Jane Dutheridge Sunday afternoon

Clarence Bachman was a business caller at the parental, Will Bachman home Wednesday

Jeff Bell was a business caller at the Peter Trampel home Thursday morning

Clarence Bachman was a caller at the Walter Reed home Thursday afternoon

Mr and Mrs Tom Roths and son Tom Jr, were visitors at the Frank Roths home Wednesday

Mr and Mrs Tom Roths and son Tom, Jr were visitors at the Ernest Helps home one day last week.

Miss Belle Waddingham is assisting with the work at the Clarence Larsen home for some time.

Mr. and Mrs D A Marshall and son Gilman made some calls over near Meservey Sunday

Mr Will Bachman was a business caller at the Walter Reed home on Sunday

Messrs Frank and Tom Roths were business callers at Goodell one day last week.

Peter Trampel and John were at the Harvey Harberts home Monday on business.

Some from this locality attended the J E Stille sale that was held Tuesday over northwest of town.

Dorothy and Robert Marshall returned to their home Monday after an extended visit at the D. A. and Herb Marshall home.

Henry Helps and son Harlow returned Tuesday evening from Chicago where they went Saturday with a car load of hogs

A number from this vicinity attended the 7th Annual Hog Sale at Ralph Ludeke's Thursday, as advertised in The Times.

Mr and Mrs. Will Bachman and John Bachman assisted with the work at the Clarence Bachman place Monday.

The Misses Gertie Trampel and Jane Dutheridge are staying at the Fred Gates home in town since Wednesday as the roads are too bad for them to back and forth to high school now

Quite a few of the children were down to Will Johnson's Friday evening to practice their parts for the Farm Bureau meeting which was held Monday evening.

Herbert Marshall, son of Mr. and Mrs Clyde Marshall, is visiting for a few days at the home of his grand parents and uncle and family. His sister, Dorothy, is also visiting there.

Messrs Phil Lowenberg and Wes Robbins were elected again this year for Road Supervisors. Grading and graveling of different roads was discussed, but nothing for certain is yet decided upon. The meeting was held in the city hall at Goodell.

Ernest Helps moved to his new place Monday where Walter Anderson lived. Mr. Anderson has moved to the place where Alfred Rowe had his sale this winter. Some of the neighbors as well as some of their relatives assisted them.

ing called here by the death of his sister, Mrs John Bitker of Ventura He reports that Mr. and Mrs. Ing. Lauritsen, Mr. and Mrs. Rudy Baack and Mr. and Mrs. Ben Swalve, Jr are all well and happy. Mr. Wenig returned to Sheboygan again Wednesday.

About this time of year people begin looking about to get the first glimpse of the robbin, harginger of spring This year the honor of being the first to see a robin goes to little Dorothy Croner, daughter of Mr and Mrs. Marlin Croner. She saw a robin perched on the electric light wires one day last week. Now, who will be the first to discover a meadow lark?

The Prouty Electric Shop at Garner has just installed a 1500 watt Westinghouse Power Plant for R. R. Lemke. Mr. Lemke has one of the finest farm homes in the community and with the electric plant installed has now a very fine improvement. Mr Prouty has installed quite a number of plants in this comunity this fall and winter. A light plant is one of the best improvements that can be installed on a farm

Basket Social

Everybody come to a Basket Social at Ell No. 4, March 2nd on Friday A community play, "De Coonville Ristocrat Club." Ladies please bring a basket or pie. Frances Haberkamp, Teacher,; Herman Barz, Director. 1wc

Emery Schaefer and Otto Smid hauled straw from the Dick Swalve farm Tuesday forenoon.

Frank and Harry Sandrey drove to Ventura last Monday and attended the funeral of Mrs. John Bitker.

Clarence Swalve has been on the sick list the past few days and unable to attend school.

Oscar Wenig came Friday for a visit with relatives and being called here by the death of his sister, Mrs. John Bitker of Ventura.

Miss Florence Swalve returned home Sunday evening after having spent a week at Titonka with some friends.

Alvin Thieman stayed at the Carl Wille home a few days last week as the roads were impassible to and from school.

Fred Pringnitz is doing chores at the Elmer Schlei farm while Elmer is recovereing from a recent operation.

Edwin Josten and Dick Swalve besides many others from this community attended the J. E. Stille sale Tuesday.

Elmer Schlei, who ha been at the hospital at Mason City has so far recovered that he was able to be brought home Sunday.

Real Progress

T. C. White, author, painter and poet of Peking, China, on his recent arrival in San Francisco, was asked his opinion of present-day literature.

"Well," he replied, "in fairness it ought to be conceded that the old-fashioned dime novel which is now selling for $2.50 is printed on better paper."

Costly to Railroads

In 1926 the railroads of the country paid more than $8,000,000 in settlement of claims for damage to fresh fruit and vegetables in transit. This amounted to an average of nearly $8 a car, while damage claims on all other commodities averaged about 50 cents a car.

Unlucky Place to Stop

Aunt—Now you mustn't have any more cakes, Johnnie.

Boy—Well, auntie—if I'm ill it will be your fault, because you've stopped me at the thirteenth!—Stray Stories.

More Highways

There were 153,530 miles of surfaced highway in the United States in 1904, and 521,915 miles in 1926.

FEAR THAT WHALES MAY BE WIPED OUT

Wholesale slaughter of whales by Norwegian fleets in the Ross sea is being protested by naturalists and scientists of Australia and New Zealand, who say that continuation of the practice will mean the extinction of whales.

A proposal to call an international convention to regulate the killing is being considered.

It is reported that two Norwegian ships operating from Stewart island in the Ross sea in the latter part of 1926 and the early months of 1927 captured 700 whales, yielding $2,500,000 worth of oil, and that another ship, with Hobart as its base, took about 50,000 barrels of whale oil to Norway.

It is estimated that 1,500 whales were killed in the last year. The territory is under the jurisdiction of New Zealand, which receives a royalty on the oil.

BIRTHDAY AND FAREWELL PARTY HELD AT SCHOOL

Party And Farewell Given In Dist. No. 7 School Wednesday

A combined birthday and farewell party was enjoyed by the children of Dist. No. 7 at the school house on Wednesday afternoon. Fay Neuberger celebrated her eleventh birthday that day and the farewell party was given in honor of Gladys and Harold Kothenbeutel and Lydia, Herbert and Francis Pearson.

A short program was given by some of the pupils of the schools after which games were played.

Ice cream, cake and candy was furnished by Fay Neuberger's parents and the teacher, Miss Stella Bock.

Mildred Thiemann spent Monday visiting at the E. Howard home.

The Benj. Mullin family called at the Henry Thiemann home Monday evening.

Mrs. Wm. Schlawin visited with her sister, Mrs. John Bock on Tuesday afternoon.

Mr. and Mrs. Werner Schlawin spent Sunday at the Wm. Schlawin home.

Mr. and Mrs. Ned Howard visited at the Herman Thiemann home Sunday evening.

Mr. and Mrs. Fred Kothenbeutel and family attended the funeral of Mrs. Kothenbeutel's sister, Mrs. John Bitker on Monday.

Mr. and Mrs. Peter Merkel, Mr. and Mrs. Ben Merkel and family and Mr. and Mrs. Howard all visited at the Carl Pearson home Sunday.

The south half of Ell Township will hold a follow-up meeting today Thursday afternoon on the first lesson in the third year clothing course. The meeting will be held at the home of Mrs. Peter Josten.

Mr. and Mrs. H. H. Thiemann and family, Mr. and Mrs. Geo. Thiemann and family, and Mr. and Mrs. G. A. Goll and Emma were all entertained at the H. J. Thiemann home Sunday for dinner.

KLEMME LOCALS

Something more unusual happened to our weather. Tuesday night it thundered, can you imagine that on February 21st?

Mr. Don Lewis and Miss Root took a load of Seniors over to Mason City Monday evening to see the Methodist home talent play.

Oscar Wenig came from Sheboygan, Wisconsin Sunday morning, be-

Mr. and Mrs. Emory Sc have moved to the U. G Smit south of town where they wi this year. Mr. and Mrs. U. G will move to town as they ha chased the Mrs. Phoebe Mayn perty. Lee Hawkins and fam now located in the place vac Mr. and Mrs. Schaefer in the part of town.

Ed. Jacobs, local hardware drove to Belmond last night an early morning train for apolis to attend a hardware convention which is in session this week. Mr. Jacobs attends ly every convention anywher and thus keeps himself pos whats the newest in his line iness.

VALENTINE JOSTEN, Secretary.

Klemme Co-Op. Creamery Company

Goodell News

(By Special Correspondent)

Leo Tisor of Mason City is working for his Uncle, Ed Hemingway

John Meinderts is moving onto the Mrs Eldred place

Mrs Mikesh, Sr. is reported as improving slowly.

Alfred Carpenter was a Belmond caller one day.

Fern n Griggs spent Sunday at the Clarence Newberger home.

Ray Wilkins and family are visiting in Canton, South Dakota

Nels Anderson is having a public sale today.

Miss Beckman spent the week end with her parents at Forest City.

Jay Buchanan is entertaining the mumps this week.

Mr. and Mrs A. C. Carpenter and Mrs. Tanner were Belmond callers.

Geo. Griggs transacted business Belmond Tuesday.

Mr and Mrs. Jay Griggs were in Klemme on business Tuesday morning

The Catholic Ladies held a dance n the Hall Monday night. A good ttendance was had.

Albert Wilkins vacated the Mrs. Eldred farm and moved onto the Conwell farm.

Anson Avery retured from the Hampton Hospital. He is recovering nicely from his operation.

Kenneth Griggs returned to school Monday after being absent for five weeks on account of illness.

Fred Busse, of St Cloud, Minn., came Sunday to visit his father and other relatives His father has been ill for several weeks

The Ralph Jennison family returned from Colorado where they have been sojourning the past few months

The Twin Lake Township Farm Bureau Ladies held their training school Wednesday at the E. J. Schneider home.

Ed Hemingway returned from the Mercy Hospital Wednesday. He had an operation for an abcess in the nose. He is feeling much better now.

Dolores Cook and La Vonne Sherwood are recovering from the whooping cough but not able to attend school this week.

Friends of Mrs. Axel McGregor were shocked to hear of her untimely death which ocurred in an auto accident near Belmond.

Warner Butts and Jay Griggs drove to Fast Lake and removed and stored away the rotary pump which had been used to keep the fish supplied with air.

Little Ruth, daughter of Mr. and Mrs Harry Ruka, was taken to the Hampton hospital for an appendicitis operation. At last reports she is recovering nicely.

Dr and Mrs. Snearly drove to Hampton Sunday. Mrs. Snearly remained at the Hospital for treatment Her many friends hope for a speedy recovery.

Grandpa Busse has been quite ill with the flu. His daughter, Mrs. Sandrew has been helping care for him the past week at the Henry Busse home.

The Farm Bureau Ladies training school on the 3rd year sewing was to be held at Mrs Will Waddingham's but on account of bad roads Miss Ramer was unable to be present and the meeting was postponed until a later date. These meetings are very interesting and those taking part are sorry to have them postponed.

Avery Township held a very successful Farm Bureau Meeting at the home of Mr. and Mrs. Wm. Johnson and a good attendance was had, but on acount of cold weather and bad roads some could not come. A very interesting program was given after which refreshments were served and a social time was enjoyed. Every one present enjoyed themselves and will say Mr. and Mrs. Johnson are real entertainers. The next meeting will be held in March in the Town Hall. Mr. and Mrs. Wesemberg are on the program committee.

SIX CARS OF LIVE STOCK WERE SHIPPED SATURDAY NIGHT

Stock shipments for last Saturday night fell somewhat below the big shipment of the previous week when seventeen car loads left the local yards.

The shipment Saturday night had one double-deck car, so the number of cars can really be put down as seven.

The Shipping Association had 2 car loads of mixed stock, cattle and hogs, and two car loads of hogs, one car being a double decker, or in all five car loads.

C. A. Larsen shipped two car load of hogs.

POLITICAL ANNOUNCEMENTS

Mr. Chick Buyer

We cannot call on you personally as we would like to do, but we welcome a visit from you to our hatchery where we will be glad to explain and show you our system of hatching chicks We maintain strict sanitation, do business on a business basis and try in every way to give value received for every dollar spent with us.

We use only eggs from the best stock the breeds afford and from pure bred, disease free, flocks that have been culled for color, type, vitality and egg production. Remember it is the early hatched chicks that make the winter egg producers.

NEWS REVIEW OF CURRENT EVENTS

Dissensions in the Pan-American Conference—Political Gossip.

By EDWARD W. PICKARD.

INTERNATIONAL discord was rife in the Pan-American conference at Havana during the week, and it became increasingly evident that plans for the adoption of a convention putting the Pan-American union on a reorganized permanent basis could not be put into effect yet. They were blocked mainly by the attitude of Honorio Pueyrredon of Argentina, who still insisted that the convention must contain a declaration against trade barriers in the form of high tariffs and who declared he would not sign a convention without that feature. His government, however, instructed him to sign the convention with reservations, whereupon he resigned both as head of the Argentine and as ambassador to the United States. The modus vivendi then adopted by the conference for the government of the Pan-American union until the governments shall ratify the new convention provides for continuance of the resolutions in effect with a few modifications.

Then, in a plenary session of the conference, the matter of immigration regulation came up, and three resolutions all aimed at the policy of the United States, were adopted. To each proposition, as it was adopted, Ambassador Fletcher, a member of the United States delegation, made the reservation that the United States regards immigration a purely domestic question and legislation thereon exclusively the function of the United States congress.

One of the resolutions provided that any American republic may restrict immigration from a non-American continent. Immigration into the United States from the other American republics and from Canada and the West Indies is now unrestricted, but the Coolidge administration favors the extension of our restrictive policy to countries in the western hemisphere and the question is to be considered by congress at this session.

The convention for regulation of commercial aviation among American countries, favored by the United States delegation, was adopted. But the Americans lost a point the day before when the committee on public international law adopted a rule of war that would operate to prevent any American republic from arming merchant ships against submarines. The fight for this resolution was led by Doctor Podesta of Argentina and the vote was 11 to 4. It is not likely that the United States will accept it.

The same committee, on motion of the Mexican delegate, asked that the Pan-American union convene a commission of experts to consider plant quarantines. Mexico especially objects to United States regulations that bar importation of Mexican fruits and plants infected with insect pests. Ambassador Fletcher gave notice that the United States would not consent to arbitration of plant disease quarantines.

Fascist Italy contemplated with satisfaction the dissensions in the Havana conference and looked on the meeting as a virtual failure. The opinion of the Roman press was that the major Latin-American nations, in order to escape from the hegemony of the United States, should seek cooperation with Spain and Italy, "which represent Latin civilization in the world."

HERBERT HOOVER, secretary of commerce, is now formally in the race for the Republican Presidential nomination, for he has consented to the use of his name in the Ohio primaries against Senator Willis. Under the Ohio law a candidate must give consent to the use of his name, and Mr. Hoover went that far, and then stopped for the present. He decided not to take the stump anywhere during the preconvention campaign and to remain in the cabinet; and he asked that expenditure of money in his behalf be "strictly limited and rigidly accounted for."

Willis' supporters in Ohio at first affected to be unalarmed by the Hoover move, asserting that it was brought about by a "group of state politicians without prestige" and would be without avail. But their complacency was disturbed when Maurice Maschke, national committeeman from Ohio, deserted the favorite son and announced he would support the secretary of commerce, believing him the strongest man the Republicans could select. Senator Willis was astonished and accused Maschke of having repudiated promises of support. The Hooverites predicted that Hoover would win from 16 to 24 of the state's 51 delegates to the convention. In a letter to Maschke Senator Willis more than intimated that the wets prefer the nomination of Hoover. "The chief newspaper supporters of Mr. Hoover openly state in their editorials and news columns that they are supporting Mr. Hoover for the nomination on the Republican ticket and falling in that, they will give their support to Gov. Al Smith," the letter said. "This makes their purpose and attitude in the matter very clear. I cannot believe that you and your organization sympathize with such a viewpoint."

Managers of the Hoover boom plan to enter nine or ten of the seventeen primary states. Their estimates of the initial Hoover strength in the convention run from 325 to 375, and they profess to be certain that he will be far ahead of Frank O. Lowden, whose vote on the first ballot has been predicted at 250 or more. The convention will have 1,089 delegates and 545 will be necessary for the nomination.

PROSPECTS for a long and bitter fight in the Democratic convention are increased by the news from Albany that Gov. Al Smith will insist that the platform contain a plank calling for modification of the Volstead act. This is his reply to the statement of McAdoo that no wet will or can be the Democratic candidate for the Presidency, and at least it shows he has the courage of his convictions. Recent canvasses have shown, it is said, that at the start of the convention the South will be almost solid against Smith, the exception being perhaps Louisiana. But it has been supposed that a lot of southern delegates would shift to the governor if there were to be no wet plank in the platform.

The dry Democrats at present are apparently concentrating their efforts on an attempt to bring about the nomination of Edwin T. Meredith of Iowa. He is a dry and favors rather radical legislation for farm relief. Though the survey of the South, before alluded to, revealed no especial sentiment here for Senator Reed of Missouri, his managers assert they have received many assurances of support for him in those states as well as in the West. Mr. Reed began his active campaign Saturday when he started for Dallas, Texas., on a speaking tour that will take him to the Pacific coast.

MANY members of congress, both wets and drys, have long sought to avoid going on record on the prohibition question in any form, but the other day they were all forced out into the open. Representative Linthicum of Maryland, leader of the wets in the house, moved to recommit the treasury and post office appropriation bill and add the following section:

"That no money herein appropriated for the enforcement of the national prohibition act shall be used in the preparation or issue of any permit for the removal or use of any industrial alcohol known to be denatured by any deadly, poisonous drug."

The motion was rejected by a vote of 281 to 61. Though outnumbered by more than four to one, the wets seemed pleased as various members representing wet districts were forced to make good on their Anti-Saloon league pledges.

PUBLIC utilities of the United States are to be investigated, but not by a senate committee as Senator Walsh of Montana desired. Senator George of Georgia and many others opposed the Walsh plan and radicals of both parties supported it. Finally the Montana senator's resolution was amended to provide that the federal trade commission should be directed to make the investigation and in this form it was adopted.

The inquiry is to apply to utility corporations doing an interstate business, and also will affect corporations holding the stocks of two or more public utilities operating in different states. The resolution directs the commission to go into the pertinent facts in connection with the securities of utility corporations, the extent to which holding companies or their stockholders figure in the situation, and whether any legislation should be enacted by congress to correct abuses. The resolution also authorizes the commission to inquire into the extent to which utility corporations or their officers seek by the expenditure of money to control elections of President, vice president, or United States senators, or to influence public opinion.

FARM relief legislation is again before the senate, for its agricultural committee has reported favorably on the revised McNary-Haugen bill. As altered, the measure meets many of the objections of President Coolidge to the original bill, but it still carries the equalization fee provision. An almost identical bill, introduced by Representative Haugen, was still being discussed by the house agricultural committee; but it was hoped by the senate leaders that it would be reported and acted on by the house before it became necessary for the senate to take a vote. The house committee heard last week the new proposition of B. F. Yoakum that the marketing problem be turned over to farm commodity organizations working under federal charters.

INDIANA'S great political scandal of 1024 became virtually a closed incident when Gov. Ed Jackson was acquitted on the charge of having conspired to bribe former Gov. Warren T. McCray. This verdict was directed by Judge C. M. McCabe on motion of the defense because the state had failed to prove that the bribery conspiracy had been concealed, and therefore the statute of limitations ran against the charge. The prosecution had produced a lot of evidence sustaining the bribery charge, but the defendant was saved by the technicality.

COLONEL LINDBERGH wound up his Latin American good-will tour by flying from Havana to St. Louis without stop. From the time he left Washington on December 13 he had flown 9,390 miles in 119.31 flying hours and without mishap. Secretary of War Davis has expressed the hope that the colonel will now give up all stunt and dangerous flying, but the young man indicated that after a rest he would resume his work in that line.

Capt. Joseph F. Donnellan, who started from Chicago to fly to Chile, abandoned his trip at Havana because the fogs made it too perilous for a single-motored plane.

HERBERT HENRY ASQUITH, earl of Oxford and Asquith, greatest leader of the Liberal party since Gladstone, died at his country home on the Thames near Oxford after an illness of two years. He was prime minister during the stormy years from 1908 to 1916, directing the course of the empire in the first two years of the war, after which he resigned to let Lloyd George, a more vigorous man, take the helm. In recent years he and Lloyd George had disagreed seriously and this almost split the Liberal party, but in October, 1926, Asquith retired from the party leadership. Prominent men of all parties paid tribute to the earl's great qualities when his death was announced, and parliament adjourned for a day. Burial was offered in Westminster Abbey but was declined by the family because of the known wishes of Earl Asquith.

Lee O'Neil Browne, a veteran member of the Illinois legislature and widely known lawyer, met tragic death at his home in Ottawa when he fell from an embankment into the Fox river and was drowned.

Eddie Foy, old-time comedian who was known throughout the country, died suddenly in Kansas City during what he had said was his farewell tour of stages on which he had appeared during more than half a century. He was seventy-three years old and his real name was Edwin Fitzgerald.

Cuticura Soap and Ointment

Announce their Golden Anniversary

FOR 50 years the name Cuticura has stood for all that is best in Toilet Preparations for cleansing, purifying and beautifying the Skin, Scalp and Hair.

First manufactured and distributed in the United States, they are now known and used throughout the world, ever-growing demand necessitating the establishment of additional laboratories for their manufacture in Canada, England and Australia.

Originated in 1878, the Cuticura Preparations have been able, through their wonderfully effective super-creamy emollient qualities, to meet the constantly changing demands of successive generations, and are today held in highest esteem for all the needs of the daintiest of modern toilets.

The Cuticura Preparations consist of:

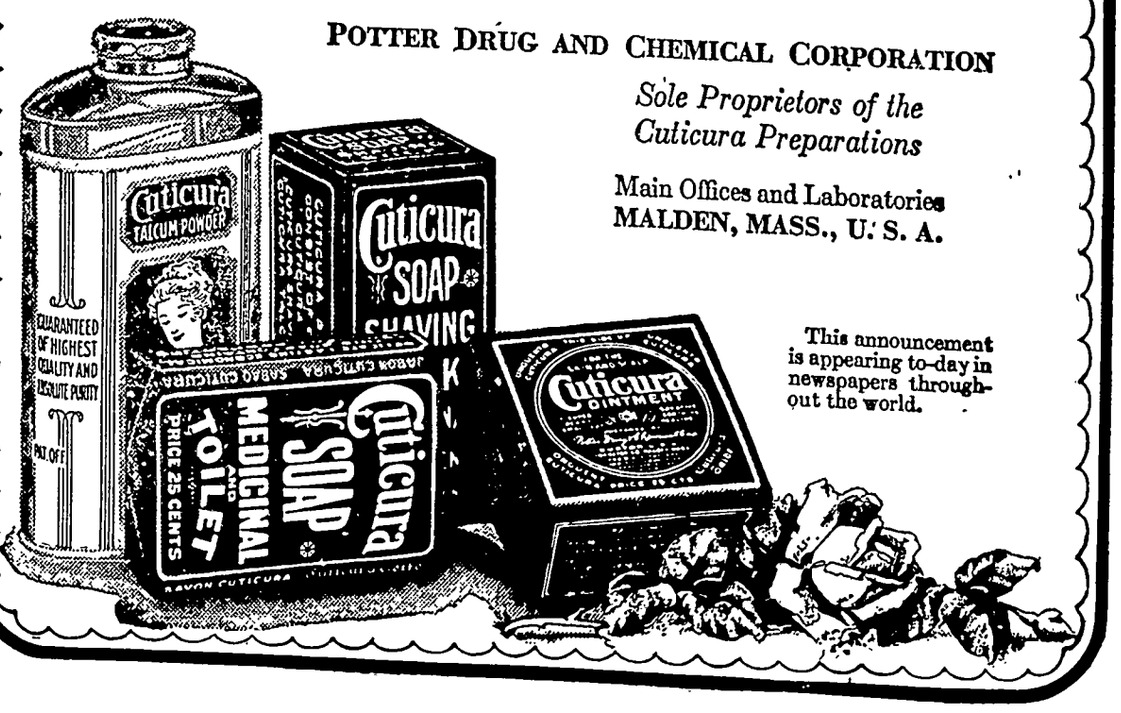
Cuticura Soap — Cuticura Ointment
Cuticura Talcum — Cuticura Shaving Stick

Each is a highly developed product, with the Medicinal, soothing and healing properties of Cuticura so delicately and delightfully blended that they are unique in Toilet Requisites.

POTTER DRUG AND CHEMICAL CORPORATION

Sole Proprietors of the Cuticura Preparations

Main Offices and Laboratories
MALDEN, MASS., U. S. A.



This announcement is appearing to-day in newspapers throughout the world.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for

Fletcher's CASTORIA

PISO'S for Coughs

Quick Relief! A pleasant, effective syrup—35c and 60c sizes. And *externally*, use PISO'S Throat and Chest Salve, 35c.

Wouldn't Take Free Bread

Something for nothing failed to go over in Pittsfield, Mass., says the Boston Globe. A salesman trying to introduce a new brand of bread to that city stood on a busy corner with a truckload of freshly baked bread, all wrapped up, too, and was not able to give away a quarter of the entire load. Nine out of every ten persons would refuse to accept a loaf when it was handed to them.

To Cure a Cold in one Day

Take Laxative BROMO QUININE Tablets. The Safe and Proven Remedy. Look for signature of E. W. Grove on the box. 30c.—Adv.

Woodpecker Made Trouble

A persevering woodpecker, which drilled two holes through wooden protection on pipes leading from a large tank, is responsible for the village of Emmons, Minn., being without water. After the bird had pecked the holes under the steel tank, subzero temperature froze the pipe and split the tank, letting all the water out.—St. Paul Dispatch.

LIME DEFICIENT IN SOW'S RATION

Cases of sows "going down in the back," or becoming paralyzed in the hind legs, which frequently happens after they have farrowed and suckled a litter of pigs, have recently been connected with deficient lime utilization by the affected animals, according to W. E. Carroll, chief of swine husbandry at the college of agriculture, University of Illinois. This disturbed lime balance can be produced either by insufficient amounts or by improper proportions of calcium in the ration. It also will occur if the ration does not contain vitamine D, even though its calcium content may be satisfactory.

Producing a litter of pigs and the milk to feed them requires liberal amounts of lime. If this lime, along with the necessary vitamine D for its assimilation, is not supplied by the ration, the sow will suffer, for nature will provide for the safety of the offspring. This is done by the sow taking from the supplies of lime in her own body, her bones, enough for the unborn pigs and sufficient to make normal milk for their nourishment after birth. When this is done, however, the reserves in the body of the sow are reduced to such an extent that her bones become weak and brittle. In this reduced condition, her bones sometimes give way under the heavy strain of the muscular pull upon them. Cases have been observed where this has resulted in the cracking of one of the vertebrae of the backbone. This cracked bone then pushes down on the spinal cord and shuts off the nerve supply to the hind quarters until the sow loses control of them.

It has been found that alfalfa hay—possibly clover and other legume hays also may be effective—and green pasture crops fed during pregnacy and lactation will prevent at least this nutritional type of posterior paralysis. Sows that are farrowing can be protected against this trouble by the addition to their rations of one-fourth to one-half pound of alfalfa meal or chopped alfalfa hay of good quality. Pasture, as soon as it is available, will take the place of the alfalfa. Sows so fed in the spring will be in much better condition to settle when rebred for fall litters.

Soy Beans Excellent to Fatten Live Stock

Soy bean hay has proved a very satisfactory roughage to fatten cattle, but I do not believe much benefit would be gotten from feeding the soy bean stems which have been left in the field until the beans mature, says a writer in the Prairie Farmer.

Horses and stock cattle will chew and consume a great deal of this threshed bean straw, but I do not believe it would be profitable to try to force fattening cattle to eat it. In fact, if they were getting plenty of corn I do not believe they would eat it. Some kind of hay, shock corn, or silage is almost essential in fattening cattle, particularly during the preliminary feeding period while getting them on full feed. Of course the shorter the feed the shorter may be the preparatory period.

After fat cattle are entirely upon full feed of corn it is possible to feed them on from two to four pounds of hay per head per day. It is possible, also, to feed them some concentrated supplement to corn. At prevailing prices, cottonseed meal seems to be a much cheaper supplement to use. Feed it at the rate of about two pounds per 1,000 pounds live weight per day.

Dwarf Essex Rape Is Satisfactory Pasture

Most any crop that will produce an abundance of green stuff palatable to the pigs and sows should make quite satisfactory pasture wherever it will grow. Certainly dwarf Essex rape is to be highly recommended, and soy beans also. Cowpeas, cane or sorghum, milo, kafir corn, thickly planted, oats, rye and other cereals furnish pasture over a certain period of time. A succession of such crops might be provided, such as rye or oats for very early spring, and this to be followed by rape with sudan grass or sorghum or millet through the hotter part of the summer, and with rape coming along for fall pasture, a very satisfactory and varied pasture may be had. Do not forget also the value of a good field of sweet clover or alfalfa, although the alfalfa would be strictly a permanent pasture, or at least a pasture that would be satisfactory over a period of years if it were not too heavily pastured.

Hog House Floor

There is much difference of opinion as to the best floors for hog houses. So far as ease of keeping clean combined with cheapness and long life are concerned, probably nothing can compare with concrete, and if it is given a rough float finish it is not slippery. However, the concrete floor is apt to be rather chilling. The ideal floor would be a concrete base with a cork, brick or pressure creosoted wood block upper layer, but this type is more expensive.

Seed Potatoes Grown in Ohio

State Association Certifies 6,336 Bushels for Spring Planting.

Seed potatoes produced in Ohio last year, by sixteen growers in twelve counties, have been certified by the Ohio Certified Seed Potato Growers' association, for planting this year. The growers whose seed potatoes have been approved by the association have a total of 6,336 bushels available. The potatoes have passed two rigid inspections in the field and one in the bin.

Use Separate Fields.

Additional restrictions looking toward the production of high quality seed are being taken this year by the association. Fields in which seed potatoes are grown must be separated from fields in which noncertified potatoes are grown, by at least 100 feet, in order to protect against the spreading of virus diseases through insect migration. The stock from which certified seed is grown must be approved after a test made in the greenhouses of the horticulture department of Ohio State university. Abnormality of yield or nature in the certified seed may disqualify it.

Plant Late in Season.

Growers of potatoes which are to be certified as seed are urged by the officials of the association to plant their seed potatoes late in the season, in order to shorten the incubation period for disease germs. The short growing season and consequent short incubation period of the northern-grown potatoes is believed to be responsible for the freedom of those potatoes from disease, and their desirability as seed.

Lists of growers of certified seed, and the varieties and amounts which they have available, are being distributed by the association through the office of E. B. Tussing of Ohio State university, secretary-treasurer of the organization.

Now Is Time to Strike Weeds Their Death Blow

Weeds can be fought to good advantage in the dead of winter by cleaning grain and legume seed by the use of fanning mills operated at the correct speed and having the right equipment properly adjusted. Some back-aching work killing weeds under a hot sun next summer can be avoided by fanning weed seeds this winter from the grain and clover and other seed which are to be planted in the spring.

"If the mill is not doing satisfactory work for the farmer he should send a sample of the grain from it to the manufacturers," says L. B. Bassett, farm machinery expert of the University of Minnesota. "They will tell him the trouble with the machine and the remedy. Sometimes the farmer may have to run the seed through the mill twice to get the results he is after. If the blast is of proper intensity all the shriveled, light chaffy kernels will be blown out."

Sowing of impure seeds has done more to fasten weeds upon communities than any other farm practice or lack of practice. The value of a good fanning mill in cleaning farm seeds is now well understood by progressive farmers.

Sowing Sweet Clover

When it gets warm in April or some time in May, take some kind of a screen, a sand screen would do, and go to a sweet clover patch and put the sweet clover dirt through the screen; sandy soil is best. Sack up four or five bushels of this sweet clover soil for each eight, ten or twelve acres. Sow this dirt by hand. Sow every other rod across the field, instead of sowing the whole field. Dogs, rabbits and other animals, also insects as well as rains will carry the inoculation over the whole field.

Agricultural Notes

A good double disking will put pea stubble land in fine shape for oats and vetch.

* * *

Several hundred thousand miles of hog-tight fence is one of the greatest needs.

* * *

After the first few cuttings of rhubarb stems, many gardeners neglect this crop until the following spring.

* * *

A small bed of Egyptian or winter onions planted either in the spring or better in the fall will produce year after year.

* * *

Do not fail to take good care of your rhubarb plants all season, as well as in the spring when you are making use of the tender stems for sauces and pies.

* * *

Put the garden on new soil this year. The garden spot on many farms is the garden spot for a lifetime. Diseases get firmly rooted, soil becomes depleted—change occasionally.

* * *

A hundred pounds of nitrate of soda to the acre averaged giving ten bushels more wheat to seven farmers in Ohio, Indiana and Tennessee. Their yields averaged 23.5 bushels to the acre without the nitrate, and 33.8 bushels with it.

EVERYONE loves a beautiful skin

It's a wonderful feeling—to know that your skin is flawless!

Nearly every woman's skin would be lovely
if it weren't for one
of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

IF any one of these conditions ails *your* skin—begin, today, to overcome it! You *can* have a lovely, flawless complexion.

The famous Woodbury treatments will help you to free your skin from any of the six faults named here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands of women to gain a beautiful complexion.

Simple clear directions for each of these treatments and the treatment for normal skins you will find in the booklet around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and very soon you will begin to see a wonderful improvement in your complexion!

A 25-cent cake lasts a month or six weeks—and every day it is helping to give you "a skin you love to touch."

Two Lives Saved by Marvel of Surgery

Two patients, whose respiration had already ceased and who were virtually dead, have been recalled to life in the hospital of Moerby, near Stockholm, through operations performed on the heart by two young Swedish surgeons, according to a statement by the head physician of the hospital published there. The patients suffered from thrombosis, a condition whereby blood clots are formed in the blood vessels. The thrombi, or clots, had entered the heart, stopping up the artery of the lungs so that the blood could not be emptied from the left half of the heart. A young physician, Dr. Clarence Crafoord, assisted by Dr. J. P. Stroembaeck, at once decided to attempt operations, quickly made incisions in the heart and removed the thrombi. Both patients now seem to be out of danger. This operation was first made by a German surgeon, Doctor Trendelenburg, and only two or three successful cases are so far recorded in the history of medicine.

Chairman Had Merely Got Republics Mixed

"How should I know whose republic it was?" retorted a committee chairman, following her report at the Massachusetts State Federation of Women's Clubs Sixth district conference.

The feature of her report was in telling how good the disabled veterans are who live in the hospital hereabouts.

"They are great readers of literature," she said. "The only thing one boy asked for Christmas was 'Pluto's Republic.'"

There wasn't a ripple of amusement; the 450 women sitting before her did not seem to quite know why an official sitting on the platform nudged the speaker as she sat down. The chairman of the meeting allowed the correction:

"Did you mean 'Plato's Republic'?"—Boston Globe.

Page Miss Venus

"Yes, dearie, Irving Thalberg practic'ly promised me the part of Venus in that dream sequence in 'Hell's Paradise,' and then that research editor, or whatever you call him, steps up and says:

"'She can't play Venus—she's got a vaccination mark on her arm.' Can you beat it?"

"It just proves what I always says, honey. These high brows is goin' to ruin the picture game."—Los Angeles Times.

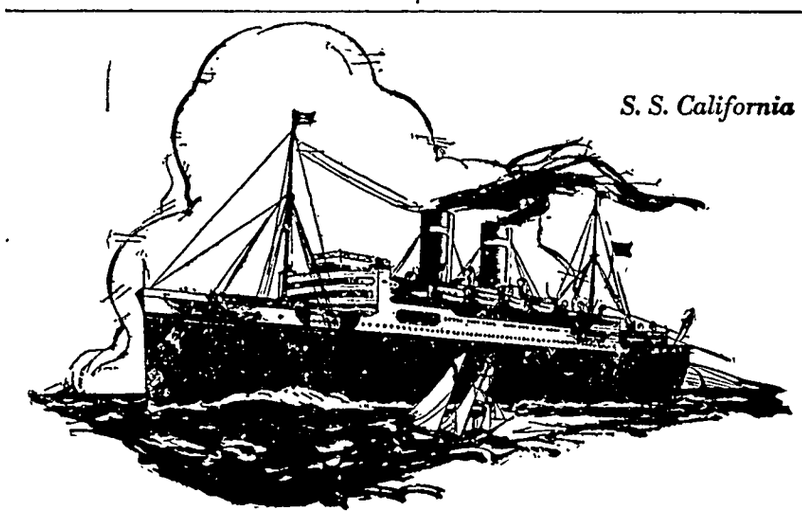
No Great Danger

"I would not live always," sighed the poet.

"Actuaries say you are not likely to," responded the other half of the sidewalk conversation.—Louisville Courier-Journal.

The average married man attributes his successes to himself and his failures to his wife.

Men have made some progress in their clothing. They have got rid of the frock coat.



S. S. California

Largest and Finest American Built Steamship Serves

MONARCH COFFEE

This Panama Pacific Liner is the world's largest electrically propelled commercial steamship. Her turbo-electrical driving machinery is the same as in the latest U. S. battleships. Everything about the S. S. California is the finest that can be secured. In keeping with this, it was but natural that her owners should select the world's best coffee—MONARCH. When the California sails from New York for San Diego, Los Angeles and San Francisco, her kitchens will be stocked with MONARCH Coffee fresh from the *Monarch* roasters in New York; and a new stock will be supplied from the *Monarch* roasting plant in Los Angeles for the return trip.

SALVATION ARMY APPEAL SATURDAY

ANNUAL APPEAL FOR FUNDS TO BE MADE IN KLEMME

County Appeal Extends From February 27th To March 10th

Since the great war the people generally have had their attention attracted to the work of the Salvation Army as never before However, the chief work of the Army was not its war work, but that quiet constant work among the needy of all classes, which is taking place 365 days in the year. They are always on the job for someone other than themselves. They carry on in 16 Major activities among which are: The Young Womens Boarding Homes. Rescue Hospitals, Industrial Homes for men, Mens Hotels, Free Medical Bureaus. etc.

Once a year in every county of the State, they ask the people to help them to keep up the good work for the people by aiding them financially. This is called the Home Service Appeal and is conducted through their Co-Advisory Boards, made up of local citizens who are interested in the splendid work they are doing. There is scarcely a devastating wind or fire or flood but the Salvation Army rushes to the scene to aid in rescue work No one wants to feel that it is more blessed to receive than to give and those who refuse to help are taking that attitude It is really Christian to want to help.

The County Advisory Board of Hancock County is presenting the Annual Appeal of the Army in the various parts of this county are from February 27th to March 10th.

Last year 139 delinquent girls were sent to the rescue home of the Army and one was sent out of Hancock County.

When the hurricane devastated the coast of Florida, the Salvation Army imediately rushed 100 trained officers into the devastated regions. Als, last spring the Army placed its entire rganization at the disposal of the agencies in charge of the flood.

They are always on the job for others

It is hoped that the response thruout the County will be very liberal Klemme always responds liberally to causes of this kind, so let's not fall down on the job this year and when the men call n you, open up your purse and give the Army a good donation.

Should those who wish to give to the Army are not called on, the donation can be left at The Times Office or given to Mayor Grange and will be properly credited and turned over to the Army.

The members of the County Board are:-

Dr G A Bemis, President.
F. E. Blackstone, Secretary.
J F W. Vrba, Treasurer.
Chester Rice.
Rev. C. H. Van Metre.

Mr. Paul Grange is the Chairman of the Local Appeal in Klemme.

MISS GLAYDS WILSON WON SECOND PLACE IN CONTEST

Belmond High School Took Three First Places

Last evening (Wednesday) Miss Gladys Wilson, dramatic speaker, Mr. Harvey Nelson, oratorical speaker and Miss Irene Johnson, humorous speaker went to Belmond to enter the first round of the state declamatory contest against speakers from Belmond, Goodell and Kanawha. The young people of Klemme were first place winners in the local declamatory contest held in January.

Although our speakers all spoke remarakbly well, they did not find favor in the eyes of the judges, who awarded first place in all three of the classes to speakers from Belmond.

Miss Gladys Wilson took second place in her class, and Goodell and Kanawha schools each took a second place.

The judges for this contest were all from Clarion.

KLEMME CAMP FIRE GIRLS CLEAR NEAT SUM ON PLAY

Girls Under Direction Of Miss Blank Put On Nice Home Talent Play

The Times feels that it owes the Klemme Camp Fire Girls organization an apology for not sooner giving mention of the excellent home talent play, "How Beth Won The Camp Fire Honors," which was put on a short time ago Our intentions were good and we had tickets for the members of our family, but at the time sickness prevented our attendance, and we are sorry to say that the matter slipped our mind, until we were reminded of it the other day. However, it is our sincere intention to be a booster for this splendid organization of girls and The Times stands ever ready and willing to help them in any project they a tempt to put across. We regret there is not a Boy Scout troop in town also, operating along the high ideals of the Camp Fire Girls

Getting back to the subject of the play we are pleased to report that the girls took in around $46 00 at the play and after paying expenses had about $26 00 to the good

From those who were fortunate enough to attend the play, we learn that the girls put on the play remarkably well, and the time and effort of Miss Marie Blank, guardian of the Camp, in directing the play, was most encouraging to her The story of the play brough ia beautifully the high ideals of the Camp Fire Girls and showed the true spirit of the organization Between acts the "inside" work of the Camp was demonstrated by the lighting of the camp fire and reciting of the camp ceremonial, after which the group sang a few of their songs

Each girl who took part in the play had her part well in mind and this co-operation developed one of the best home talent plays Klemme has had for some time

The Camp at the present time has a membership of about fifteen girls all good jolly girls and who take a real pride in their work Miss Marie Blank, is their guardian, and any mother can feel that her girl is under the very best of supervision at all times, either on hikes, vacations or at play.

And while we are on the subject of young people, we are wondering if there is not some way to organize a Boy Scout Troop in Klemme This is a subject which should be of importance to parents Our young girls are well taken care of under the supervision of Marie Blank and the Camp holds its regular meetings every second and fourth Monday evening at the Auxiliary Hall, and any girl between the age of 11 and 18 is eligible for membership

We beleive the same age applies to boys who wish to become Scouts Who has a suggestion to offer? It would be fine to have an organization in Klemme for the boys as well as the girls

Cliff Swartz and family moved to a farm north of Ventura Tuesday Alfred Merkel and family moved into the Swartz residence which they purchased

P. T. A. MEETING TUESDAY EVENING

WILL TELL OF PORTO RICO IN MEETING TUESDAY NIGHT

S. C. Pollock Scheduled To Address Parents And Teachers

Our P T. A Meeting will have its next program next Tuesday evening, March 6th. Mr. S. C Pollock, of near Garner has consented to come for an address.

Goodell Lady To Talk To P. T. A.

We hope to have Mrs Gus O'Krueg, of Goodell, to tell us about conditions in Porto Rico Mrs. O'Krueg has been there not long ago where her daughter is a Missionary, and we hope to learn some interesting things about our sland Possession in the West Indies off the coast of Florida

Home Ec. Girls Will Serve Lunch

We shall have some special music and Mis McGinnes of our Home Economics Department will direct her girls in serving the membership with light refreshments A small charge of fiftee. cents will be made to defray expenses of the eats Let's give our visitors a large and friendly reception. We believe they will us something worthwhile

One of our high school girls, we believe, may entertain us by a humorous reading She did well in our local contest and will again

Everyone who is interested in our school are invited and urged to attend the P T A Meetings. The program Tuesday night will be well worth while and we would like to have a big attendance

WIL LTELL O FPORTO RICO

HANCOCK COUNTY CONVENTION FOR LOWDEN

Delegates Named To Attend State Convention, March 7th

Following is the resolution adopted by the Republican Convention in session at Garner, Iowa, Saturday, February 25, 192 -

BE IT RESOLVED, by the Republicans of Hancock County, in convention assembled, that, believing Frank O Lowden, of Illinois, is highly qualified in every respect for the office of President of the United States, and believing that he would be fair, if elected, to all interests, including agriculture, we hereby instruct our delegates to the State Convention that meets at Des Moines on March 7th 1928, to support and vote, both in District caucus and Convention, only for such persons as delegates to the National Convention at Kansas City who are lopally and whole-heartedly for Frank O. Lowden for President; and to vote that the delegates to the National Convention shall be instructed to support and vote for Frank O. Lowden as Republican candidate for that office.

Delegates elected to attend the State Republican Convention March 7 1928 are.-

O. K. Maben, Concord; C. J Nauman, Magor; V S. White, Britt Christyna Callison, Boone; H. L Suckow, Ell, T H Thompson, Amsterdam; F R. Lackore, Madison, V P Casperson, Ellington; J E Wachtan, Concord; Owen F Conwell, Avery; Chris Boddum, Crystal

Alternates elected follow:-

Lewis Lason, Corwith Precinct E. O. Eliazon, Twin Lakes; Mrs E P Healy, Britt; Peter Josten, Ell, R R Lemke, Liberty; Wm Nall, Boone, Olaf Westerberg, Ellington W L. Sherwood, Avery, John Deibler Erin; F J Schoun, Garfield; C A Cunningham, Bingham.

R R Roberts, of Britt, acted as chairman of the convention and Miss Chistyna Callison as secretary.

KLEMME REFORMED CHURCH

Calvin Grosshuesch Pastor

10.00 a m English service
11 00 a m Sunday school
8 00 p. m. Wednesday. Young Peoples Bible Class.
3 00 p m Saturday, Junior choir.
Confirmation class on Tuesday and Saturday afternoon.

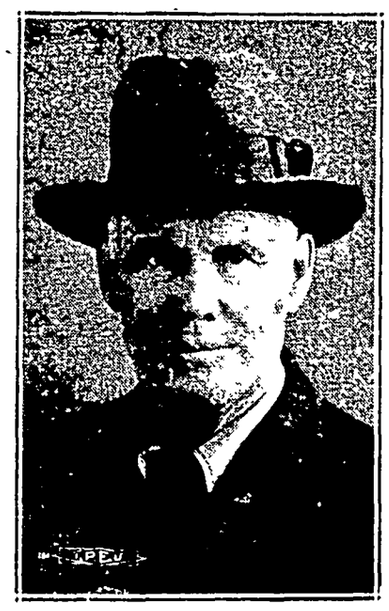
M. A. FELL DIED AT GARNER SUN.

WAS ACTIVE PIONEER BUSINESS MAN IN EARLY DAYS

M. A. Fel Helped Organize Klemme Times Over Forty Years Ago

It was a shock to the residents of Hancock County to hear of the sudden death of Mr. Marion A. Fell at Garner, Who passed away Sunday evening about 6 00 o'clock following a short illness of a few hours. His death was attributed to hardening of the arteries near the heart

He leaves his wife, two sons, Geo of Mason City, and Vernon of Marion, and one daughter, Miss Eva, of Mason City, three sisters, Nellie L. Fell and Mrs. Edith Brouwer of Oregon, and Mrs Bernice O'Niel, Clear Lake



M. A. FELL

Mr Fell was nearly 68 years old. He came to this county when fourteen years ago and was always active as a pioneer in the building of the county. Mr. Fell had a part in organizing banks in Klemme and at Goodell He had a part in the plan of running the "Klondike" from Garner to Titonka Some forty odd years ago, he, with John Kline organized and began publishing the Klemme Times in the building now occupied by the Thomas Barber shop

Funeral services were held at Garner Wednesday afternoon.

ANNUAL ELECTION OF SCHOOL DIRECTORS, MARCH 12th

Two Directors For Three Year Term Are To Be Chosen

The Annual School Election this year promises to be rather tame, as up to this time no one has filed to oppose the out-going candidates, Mr Conrad Quandt, and Mr. Harry Gibb who are both in the race again for the three year office.

Mr. Quandt has served one full three year term, and Mr. Gibbs is serving by appointment to fill a vacancy on a three year term.

Both of these men have made good directors and seem to have given general satisfaction.

There is hardly any doubt but what they will be given a second term, even if opposition should be sprung at the "eleventh hour."

Both men are interested in school matters, having children in school, and both work for the best interests of the community, using their best judgment in school matters and give their time freely when needed. We could ask for nothing more.

ELEVEN CARS STOCK SHIPPED SATURDAY NIGHT

Eleven car loads of live stock were shipped out of the Klemme yards Saturday night, all billed for the U S Yards, Chicago.

The shipment consisted of six car loads of hogs and five of cattle.

The Klemme Shipping Association had three car loads each of hogs and cattle. C. A Larsen shipped four car loads of cattle and one car load of hogs.

AVERY TOWNSHIP LADIES HOLD TRAINING SCHOOL

Co-Operators Held Fine Meeting At Johnson Home Friday

The Aveery Township Farm Bureau Ladies Co-Operators of the Training School started in their 3rd year sewing. They held an all day meeting at the home of Mrs. Wm. Johnson.

The project taken up was the cutting and fitting patterns for adults and Misses undergarments, and their finishing touches. This lesson was given by our efficient leader, Miss Merle Ramer and was very interesting.

Those in attendance were Mesdames Will Waddingham, Flora Bachman, Herb Marshall, D. A. Marshall, Len Wilson, W Thada, W. L. Sherwood, C. A. Arnold, A. R. White, A Trampel and J T Griggs.

At the noon hour a fine luncheon was served in cafeteria style.

These Co-Operators will hold their next meeting at the home of Mrs W L. Sherwood, April 3rd Each one of these leaders will hold a follow-up meeting in her school district and demonstrate the previous lessons to all the ladies in the district. They decided to combine two districts so the leaders ould work together in demonstrating the lesson.

NEW MACHINE BEING INSTALL-AT CREAMERY THIS WEEK

Will Speed Up Work Of Making Butter At Local Plant

A new six-ton capacity refrigerating machine is being installed at the Klemme Creamery this week, also cooling room to accomodate the extra capacity needed.

The new cooling plant is one of the very latest type and will be driven by a large electric motor. It is so arranged that at any time an automatic control can be installed to keep a constant temperature.

The new machine has a capacity equal to the cooling effect of six tons of melting ice per twenty-four hours.

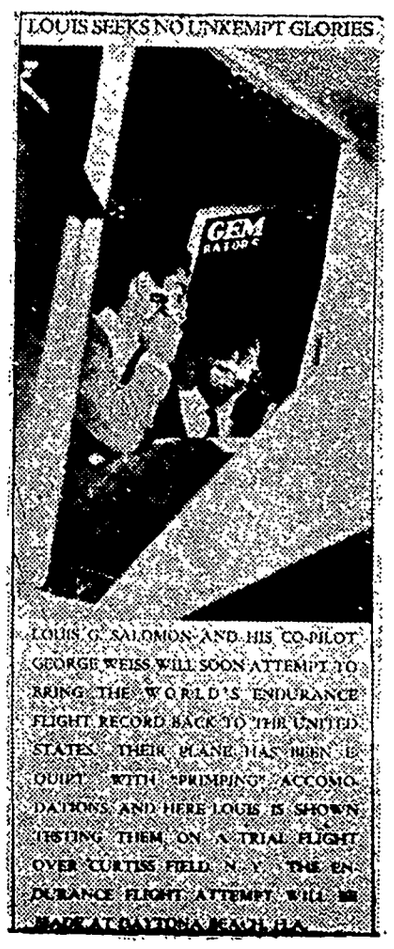
Besides being used for a near-freezing temperature in the big cold storage room for butter, the new machine wil be used largely to bring to a quick cooling stage the three large cream vats, which are now being cooled by water, a process too slow for the volume of cream handled at the plant

The work which before required hours, will now be a matter of but a few minutes. Better quality butter will no doubt also be a result of speeding up production and being able to quickly cool cream.

FOLLOW UP MEETING HELD AT HOME OF MRS. P. JOSTEN

Eleven Ladies Were Present At The Meeting Last Thursday

The Farm Bureau Project follow-up meeting for the south half of Ell Township was held Thursday, Feb 23 at the home of Mrs Peter Josten Eleven ladies were present and enjoyed a very profitable as well as a pleasant afternoon.



LOUIS G. SALOMON AND HIS CO-PILOT GEORGE WEISS WILL SOON ATTEMPT TO BRING THE WORLD'S ENDURANCE FLIGHT RECORD BACK TO THE UNITED STATES. THEIR PLANE HAS BEEN EQUIPT WITH "PRIMPING" ACCOMODATIONS AND HERE LOUIS IS SHOWN FIXING THEM ON A TRIAL FLIGHT OVER CURTISS FIELD, N. Y. THE ENDURANCE FLIGHT ATTEMPT WILL BE MADE AT DAYTONA BEACH, FLA.

CORWITH TOOK COUNTY TOURNY

KLEMME LOST OUT IN FIRST ROUND TO HAYFIELD

Corwith And Kanawha Battled For County Honors In Fats Game

The Hancock County basket ball tournament is now history, with the fast Corwith team taking the silver trophy as being champions of Hancock County.

The crowds this year were far less than last year. The gross receipts this year being $307.20 as against $440.00 last year. Expenses, including cost of officials, trophies, telephoning, advertising, use of the building, ball, score book, postage, etc amounted to $138.37. The balance of the receipts were pro-rated among the schools participating. As the Klemme five journeyed the farthest, a larger proportion was issued to them, amounting to $32.62

The Klemme-Hayfield grade team game was one of the snappiest grade games played and was close and exciting. The final score beieng, Hayfield 11, Klemme 10.

The Brit grade boys took the tournament by defeating Garner in the finals.

Following is the schedule as played for both high chool and grades:-

First Round High School

Britt 19, Garner 17; Kanawha 21, Crystal Lake 6; Hayfield 34, Klemme 13

Semi-Finals

Corwith 15, Britt 12; Kanawha 15, Hayfield 11.

Finals

Corwith 29, Kanawha 24.

Grade Section First Round

Corwith 12, Crystal Lake 8; Garner 18, Kanawha 0; Hayfield 11, Klemme 10

Semi-Finals

Garner 14, Corwith 12; Britt 9, Hayfield 7

Finals

Britt 17, Garner 11.

Klemme Playing In Sectional Today At Y. M. Mason City

The Klemme high school cage squad enter the sectionals at Mason City this afternoon at 4:30 o'clock, when they will again meet Hayfield for the fourth time this season.

Hayfield has defeateed Klomme by a large margin in all three former attacks and the chances are not so bright of breaking the jinx in the Mason City tournament. honors in the sectional

The class "B" teams at the sectionals promise to put up some real lively scraps and should furnish far more thrills than the "A" division There are several strong contenders in class B, they being Corwith, Thompson, Plymouht and Sheffield. Swaledale and Ventura may prove dark horses for semi-finals. We will not venture to say much about the finals, other than we predict either Corwith or Thompson will enter the finals.

In class "A" Clear Lake looks like the logical contender for the championship. The second round wil put away either Mason City or Clear Lake, and the latter is the favorite Kanawha may again prove to be the dark horse in class A and they have a good show of playing the semi-finals and even the finals against Clear Lake. That's our one guess. Kanawha has a bunch of fighting Swedes and when they get to going they are hard boys to stop.

NOTICE OF APPOINTMENT OF ADMINISTRATRIX

Notice is hereby given, That the undersigned has been duly appointed and qualified as Administratrix of the Estate of Henry Lemke, Jr, late of Hancock County, State of Iowa, deceased. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated February 18, 1928. A D

DAISY LEMKE,

(Feb. 23, M. 1-8,) Administratrix.

CHAPTER VI—Continued

—15—

"It's worth a moment of the keenest happiness mortals can know! Divine happiness! Isn't that enough?"

"'Divine'? I thought that there word meant somepin else—I thought it belonged to Jesus—"

"A divine moment, Meely, such as few ever know in the stereotyped marriage relation, my girl, believe me!"

"It ain't that I expec' you to marry me, Mr. Creighton—I know I can't rise to that. But if I can't rise to that, I can't fall to nothin' else between you and me, neither!"

The earnestness of her resistance was beginning to alarm him. Surely she did not mean all she was saying! She only wanted to be coaxed, persuaded. Surely it only needed a little patience on his part to bring her to the yielding point? But patience was a thing he was so unused to exercising that it taxed his nerves and his temper almost more than he could bear. The little hussy must be very experienced, she knew so well how to enhance her own value and stimulate his desire by her stand-offishness!

"Think, Meely, how stupid it is not to seize every chance that comes our way (few enough they are!) for happiness! Look at all the colorless years ahead of you, and don't miss this one ineffable hour!—such as will never be offered you once you're married!"

"Will your marriage hold you from any more such hours?"

"That's neither here nor there—my marriage, Meely, is quite another affair—"

"Meanin' it ain't none of my affairs? Well, but it's the affair of your wife, anyhow, whether you have any such grand hours—"

"My dear, we won't discuss my possible wife!"

"I'd feel awful sorry," said Meely, slowly shaking her head, "for your wife, Mr. Creighton."

He laughed uneasily. "Judging by the way I'm pursued by marriageable girls, Meely, your view of me as a husband can't possibly be the one generally held by many ladies of high degree! You don't know your luck, my girl!"

"Yes, well, but them 'ladies of high degree' run after you to marry you. You ain't astin' me to marry you."

"I'm offering you a love such as I shall probably never feel for the girl I marry! Oh, Meely!" He reached for her hand, but she drew it away.

"Meely! You'll lose me, you know, if you keep this up! You can't keep me dangling forever, you know!" The words, "keep me dangling," startled his own ears, so ridiculous was the idea of a girl such as Meely keeping him "dangling"! "If you do lose me, you'll only have yourself to thank!"

"What would I be losin' in losin' you?" she asked as one humbly seeking information.

"You'd be losing happiness, wouldn't you, my dear?"

"Happiness! Would I keep happiness—and you—by doing what you want? It's put out that you're going to marry your cousin—a grand lady with such a title or what. After you've got her, where would I come in?"

Ah, thought St. Croix, light dawning on his troubled mind, so it was that that was holding her back!—she had heard of his betrothal and was jealous!

"I give you my word, Meely, that I am not—as yet—engaged."

"I heard you was," she repeated stubbornly. "What would that cousin think of you if she knowed—about me?"

"That need not worry you!"

"Oh, needn't it!"

"Why should it? I have not seen this cousin since we were both children—and I am not—definitely—betrothed to her."

"But you're plannin' to be."

"Well, surely, my dear girl, it will hurt you far less if I marry some one I don't love—some one I don't really know—a person I've not seen since she was a homely little bow-legged kid!"

"'Bow-legged'!" exclaimed Meely indignantly.

"Yes, and pigeon-toed and towheaded and freckle-faced! You'll not be hurt by my marriage," he exclaimed fervently, "you beautiful thing!"

"Yes, well, but how about hurtin' her! When you even love another one!"

"She'll be doing the same thing, probably!" he defended himself. "It's purely a family arrangement," he answered, frowning impatiently at being forced into a discussion of his personal affairs; to his peculiar ideas of fitness it was a desecration to even so much as name his cousin—his future wife, no doubt—to a girl like Meely Schwenckton.

"Are you so sure she'll be willin' to marry you without lovin' you and without your lovin' her?" Meely asked wonderingly.

Nothing could have been more distasteful to him than answering such a question; dwelling at such length on this unseemly topic. But if to win her over he must pay that price, then pay it he would.

"Look here, Meely, perhaps I owe it to you to explain the situation to you. Lady Sylvia St. Croix will marry me because her family needs money—their estate, since the war, is gone to punk and my father will restore it and supply the income to keep it up. I will marry her because I shall enjoy the prestige in England which the marriage will give to me—and my children. So you see how entirely outside of my marriage will be my relation with you—how little it can affect it—"

"Well!" Meely severely pronounced judgment. "I may not be such a high aristocrat, but I'd be above such a low-down wicked marriage like that! There's better things to marry for and live for than savin' an old estate!"

"Oh, come, my dear, you've no least cause for jealousy of my cousin, I—"

Meely sprang up to elude his movement to seize her again in his arms.

Before He Could Lay a Finger on Her to Stop Her, She Had Turned and Fled.

"It's time I got home—Pop will be missin' me."

He sprang up too—his face almost purple with the strain of his self-restraint—but the look in her eyes halted him. One step toward her, her eyes said to him, and she would shriek to arouse the countryside.

"Meely" he exclaimed huskily, "what do you mean? Why, if you don't love me, have you led me on all these weeks? Why have you come here to meet me? Why? Tell me that—why?"

"To find out," she answered in an even tone, "what sort of a man you are. And," she added with a smile that pitied him, "I have found out!"

Before he could lay a finger on her to stop her, she had turned and fled.

By the time he had recovered from the bewildering shock of her words, her tone, she was far down the hill—too far for him to overtake her—even if he had not realized, to his stunned amazement, the absolute uselessness of overtaking her.

That he had been repudiated by this girl who for nearly three months had let him treat her contemptuously, had submitted to his bullying, his rudeness, his irritability, had accepted and returned his lavish caresses! All the way down the hill and along the highway toward the spot near the schoolhouse, where today he had parked his car, he stared incredulously at the amazing fact.

But a scene that met his bewildered gaze when he was about to get into his car, parked near the schoolhouse, did not decrease his mental confusion, nor serve to soothe his rasped nerves and outraged vanity.

Marvin Creighton, approaching William Penn schoolhouse at half-past five that afternoon, on his way to his temporary home at Absalom Puntz' cottage, noticed on the road far ahead of him a slim girlish figure in a long loose coat, hurrying along the highway. Though the daylight was fading, her carriage of herself and the set of her clothing were so conspicuously different from that of any country girl one was apt to meet alone on the road at this hour that even in this dimness that hurrying figure was sharply impressive.

Curiosity made him quicken his pace to catch up with her. But before he had overtaken her, she had arrived at William Penn schoolhouse, where, to his surprise, she stopped and went in.

Then it was, as he had half suspected, half hoped, a little dreaded, Miss Schwenckton!

A few yards before he reached the school he came upon a roadster, parked along the road, which he recognized as his brother's. The idea stabbed him that this attractive young teacher and St. Croix might be having a rendezvous in the school! Was St. Croix in there with her now? He was such a philanderer—sometimes so unscrupulous—the girl ought to be put on her guard.

"But darned if I want to be the one to warn her! And if ever a girl seemed capable of looking out for herself, she's it!"

In a minute he was at the schoolhouse door. It was slightly ajar; he pushed it open a bit wider and, not entering, glanced in. The sight that met his eye made him draw back precipitately—Miss Schwenckton, her back toward the door, was standing on her platform disrobing! She had already taken off her coat and frock, her white shoulders bared—

There was no one else in the school room, yet—

Marvin stumbled back a pace from the door. But though the thought that pierced him made him call himself "a cad," yet as he stood there wondering whether he should knock, he felt cold all over; and even while he hesitated, in what seemed to him an incredibly short time, she suddenly appeared before him in the doorway clad in a jacket suit and a jaunty sports hat! He was so taken aback, so utterly confused, that he could not move or speak, but stood as stock-still as the wooden posts of the school porch.

At sight of a man standing motionless at her door in the gathering gloom, she cried out in alarm—which brought him to himself.

"Don't be frightened! It's only—your superintendent!"

She gave a little gasp of relief. "Only! And of whom, pray, should I be more frightened?—though the schoolroom being empty just now, of course you can't bully me into teaching geography for your entertainment—my good luck!"

"Going home now?"

"Yes."

"Then"—he took from her hand the big door-key and the books she had in her arms—"may I walk with you?"

When he had locked the school door, he glanced up the road to the waiting car. Its lights had been turned on, illuminating the road over a wide area, and he saw that his brother, standing in front of his car, was witnessing his coming out of the schoolhouse with Miss Schwenckton. She, he observed, was viewing with a frank surprise the lighted car and its owner a few rods away. That look of surprise seemed so genuine, it was hard to believe that his own unexpected arrival at the school had foiled a meeting between these two. And yet it would be so like St. Croix to seek a furtive love affair with a charming girl like Miss Schwenckton when he'd die before he would openly associate with one of a class outside his own!—like a parvenu uncertain of his position, rather than like a man born to a secure place in the sun! But that a girl of Miss Schwenckton's spirit should accept such cowardly attentions seemed incredible. And this mystery of her changing her clothing in the schoolroom!—

As they turned their backs on the car and went on their way, neither of them referred to it—though Meely was so absorbed in wondering whether St. Croix had recognized her that her sense of Marvin's interesting companionship was less keen than it would otherwise have been.

"Does your work always detain you so late as this at your school?" he asked with subtle guile. She didn't know he had seen her coming along the highway!

(TO BE CONTINUED.)

Brother of Tecumseh Neglected by History

Elkswatawa, younger brother of Tecumseh, was largely responsible for the part that great Indian warrior and statesman played in organizing a federation of the red men to oppose the encroachments of the whites. In 1805 Elkswatawa proclaimed himself a religious leader and began to arouse the tribes of Indiana, Ohio and Illinois, to the great disturbance of the settlers. His doctrines were not primarily revolutionary, but temperance and total abstinence were tenets, together with reverence for old age and sympathy for the infirm. He also urged his people to resist intermarriage and to preserve their own customs and costumes. This being in line with what all Indians had held as ideal previous to Caucasian invasion, his preaching caused much excitement among the tribes and fear among the whites. It was the response of the Indians to his brother's pleading that started Tecumseh on his mission in the cause of federation which took him to the Cherokees and the other more civilized tribes of the South, in the course of which he covered many thousand miles.

Work for Evil

Misunderstanding and inattention create more uneasiness in the world than deception and artifice, or, at least, their consequences are more universal.—Goethe.

POULTRY

KILL PESTS IN POULTRY HOUSE

How would you like to sleep in a bed with bedbugs? The hen likes no more to sleep with mites, lice, fleas, etc., than you do with bedbugs. These pests are not so prevalent in the winter as in the summer, but if they are not properly eradicated they will make it very uncomfortable for the hen in winter. The general public has the erroneous idea that these pests of the hen go into hibernation in the cracks and crevices of the buildings and never bother the birds in winter. This does take place to a small extent, but what better place does the pest want to pass the winter than the good, nice, warm, feathery body of a hen?

These pests may be destroyed by careful and vigilant methods throughout the year. The buildings must be sprayed or dusted frequently with some good insecticide. Common old whitewash is a very effective spray or wash for the poultry house if carefully applied so as to fill all cracks and crevices, as well as cover the smooth surfaces. Then, too, it is very practical to apply one of several good commercial disinfectants. All such applications should be made at intervals of three or four months if no pests are seen, but in case some are noticed, apply immediately.

Then comes the treatment of each individual bird. This may be done by either dusting or dipping, but preferably dusting, especially in winter. There are several good commercial powders for the eradicatalon of these pests. In applying the powder hold the bird head downward with left hand, dust powder down into feathers, rub the feathers the wrong way and rub powder into skin.

Mash Used in New York Egg-Laying Contest

At the New York state egg-laying contest the following ingredients were used to make 1,005 pounds of mash:

300 pounds yellow corn meal	$7.14
250 pounds wheat bran	5.00
100 pounds red dog flour	2 85
100 pounds ground rolled oats	4 15
100 pounds alfalfa meal	2.85
100 pounds dried meat scraps (50 per cent protein)	4.20
50 pounds dried milk	4 75
5 pounds salt	.07

This makes the cost per hundred pounds about $3.08, and in the contest the best laying pens returned a profit of more than $4 above feed cost for each pullet. At the end of the forty-ninth week the best pullet had laid 283 eggs. The scratch grain used with the above mash consisted of cracked corn.

Crop-Bound Hen

Soon after the poultry are on range watch for the laying hen which has become cropbound from eating too much dry grass. The bird will show a lack of appetite and the crop will appear bulgy. Sometimes the material can be loosened by kneading and removed through the mouth. A lot of cropbound cases die because they are not located until the bird has about starved to death through the clogging of the digestive system.

Poultry Facts

Some poultrymen use the incubator for hatching turkeys, but the turkey or chicken hen is better.

* * *

Dirt, wet and darkness breed lice, mites, mange and other parasites. And these things are drains on your profit. Cleanliness and sunlight save losses—make you money.

* * *

In extremely cold weather it is a good plan to hang a burlap in front of the chicken roosts, as it helps guard against drafts, and also raises the temperature several degrees.

* * *

A hen throws off about a teaspoonful of moisture in her breath every three hours. This means a damp house, and probably roup or chicken-pox, if the house isn't ventilated.

* * *

The hen's crop is small and the winter nights are long, consequently the heavier feeding should come near the close of the day.

* * *

Each hen should have four square feet of floor space; this can be made more possible by raising all fixtures two feet above the floor.

* * *

The ventilation problem in the poultry house is much easier to solve if the hens are given enough floor space. Three and one-half square feet of floor space should be allowed for each hen.

* * *

Sprouted oats is the handiest substitute for out-door green feed. You can sprout the oats in pails.

* * *

Hundreds of successful poultrymen are now feeding cod liver oil in the winter to their layers and feel that this is a paying practice.

* * *

If the hen must go out of her way to avoid drafts, or walk around wet places in the litter, or if her working hours are cut short by a lack of light, or if she is crowded her egg production will be lowered.

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Wintry

"Must be a cold day." "Huh?" "I see the stenog has on her chiffon scarf."—Louisville Courier-Journal.

A Mother's Health Should be up to Par

Fort Scott, Kans.—"Before my baby came I took several bottles of Dr. Pierce's Favorite Prescription and it certainly was a wonderful help and benefit to me It gave me strength and courage and my baby is stout and healthy I am only too glad to recommend the 'Favorite Prescription' to expectant mothers."—Mrs. Stella Judd, 521 N. Crawford St.

Favorite Prescription can be had in tablet form as well as liquid at drug stores.

If you wish a trial package of tablets just send 10c to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

Write for medical advice. This carries no charge.

Discord in Homes

The statement is made on good authority that there are 10,000,000 pianos in the homes of this country and 80 per cent of them are out of tune.—Exchange.

Makes Life Sweet

For seven generations the Native Household Remedy of Holland for kidney, liver and bowel troubles has helped make life brighter for suffering men and women. Begin taking them today and notice how quickly your troubles vanish. At all druggists in 3 sizes.

GOLD MEDAL HAARLEM OIL CAPSULES

Oklahoma Farm Lands Have Added Value over most farming sections in the oil producing territory. A good investment returns from agriculture besides carrying the chance for oil and development. Much of it is underlaid with commercial coal. A safe investment with the greatest of possible profits. Write Invest. Co., Morgan Bldg., Houston, Tex.

To Cool a Burning Throat

Use Hanford's Balsam of Myrrh

Money back for first bottle if not suited. All druggists.

Millions for "Movies"

It is estimated that more than $500,000,000 is taken in by the box offices of motion picture theaters in one year in the United States and Canada. The total yearly receipts throughout the world exceed $1,000,000,000.

The Cream of the Tobacco Crop

Lucky Strikes are the Favorite Brand of Paul Whiteman—

"It was but recently, when I started to act as master of ceremonies with my band at the Paramount Theatre, that I realized how vital perfect voice condition was to a performer. I have always been a consistent smoker and fortunately, Lucky Strikes were my favorite brand. I like their toasted flavor and, best of all, I can smoke as often as I like, without fear of irritating my voice, which is becoming a great asset in my work."

Paul Whiteman

"It's toasted"

No Throat Irritation—No Cough.

ESTERN GIRL STRENGTHENED

Taking Lydia E. Pinkham's Vegetable Compound

anchester, So. Dakota.—"I was in rribly weak and run-down condition when a friend told me about Lydia E. Pinkham's Vegetable Compound. I began taking it and after a short time I felt better. We are a family of five and live on a 360-acre farm, so I have quite a good deal to do both indoors and out. At first I was unable o anything and had to have a girl, after taking the Vegetable Com- nd I finally gained my strength and also gained considerable in ght. I will gladly answer letters n women in regard to your medi- ."—Mrs. Otto J. Geyer, R. F. D. 1, 20, Manchester, So. Dakota.

Quart of Water Cleans Kidneys

Take a Little Salts If Your Back Hurts, or Bladder Is Troubling You

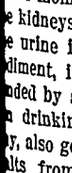
No man or woman can make a mis- e by flushing the kidneys occasion- y, says a well-known authority. ting too much rich food creates ids, which excite the kidneys. They come overworked from the strain, t sluggish and fail to filter the waste d poisons from the blood. Then we t sick. Rheumatism, headaches, er trouble, nervousness, dizziness, eeplessness and urinary disorders ten come from sluggish kidneys.

The moment you feel a dull ache in e kidneys, or your back hurts, or if e urine is cloudy, offensive, full of diment, irregular of passage or at- nded by a sensation of scalding, be- drinking a quart of water each y, also get about four ounces of Jad lts from any pharmacy; take a blespoonful in a glass of water be- re breakfast and in a few days your dneys may act fine.

This famous salts is made from the id of grapes and lemon juice, com- ned with lithia, and has been used r years to flush and stimulate the dneys; also to help neutralize the ids in the system, so they no longer use irritation, thus often relieving adder weakness.

Jad Salts is inexpensive; makes a lightful effervescent lithia-water rink which everyone should take w and then to help keep the kid- ys clean and active and the blood re, thereby often avoiding serious dney complications.

GREAT SWOLLEN TENDONS



Absorbine will reduce inflamed, strained, swollen tendons, ligaments or muscles. Stops the lameness and pain from a splint, side bone or bone spavin. No blister, no hair gone, and horse can be used. $2.50 at druggists, or postpaid. Describe your case for special instructions. Interesting horse book 2-S free.

From a race horse owner: "Used Absorbine on a yearling pacer with strained tendon. Colt all over lameness, though for a time, couldn't take a step. Great stuff."

CHAPTER VI—Continued

—16—

"Not always. Sometimes," she answered guardedly.

"I should think the schoolroom would be too dark for you to work there so late."

"I usually stop working before dark."

"But this evening?"

"I—lingered on—"

A brief silence.

"I must warn you, Miss Schwenckton, it's not really safe for you to be alone after dark either in your school room or on this lonely road."

"Then I'm thankful you're with me."

"But what detained you so late?"

"Oh — this and that — a bit of work—"

"Correcting spelling-papers, I presume?"

"Really, Mr. Creighton, your interest in perfectly unimportant, trivial things like spelling-papers! My—goodness!"

"I'll bet you never bore yourself with correcting spelling-papers! Not you!"

"How you came by the impression that I'm so light-minded as never to correct spelling-papers! Well, to be sure, it isn't my favorite pastime. I do sometimes indulge in other diversions."

No use—he could not trap her into admitting that she had been working in her schoolroom, but walking on the highway. Why didn't she want to admit it?

"Oh!" he exclaimed as at this instant she tripped over a rough place in the dark road and, to his consternation, fell headlong. "Are you hurt?" he solicitously inquired in alarm as he lifted her and she leaned against him panting.

"No, no. Don't you know, Mr. Creighton," she asked, as she moved out from the circle of his arm, "how dangerous it is to lift a fallen woman? "What a h—l of a road!" she remarked as they resumed their walk cautiously, his hand under her arm to guide her.

"There are just two kinds of girls," said Marvin, "that would talk about 'a h—l of a road'—high-born ladies and toughs! As a country teacher and pious Sam Schwenckton's relative, you don't come under either of these heads. What must I conclude?"

"That I adapt my speech to my company. When I'm with—Cousin Sam—my speech is Yea and Nay."

"If it were more than that I'm sure he would not harbor you—if for no other reason than for your corrupting influence on his children. You're not afraid he might have your school taken from you?"

"He would if he thought it was his duty to," she nodded, her tone expressing supreme indifference to this fate so dreaded of the county teachers.

"You wouldn't mind that—losing your school?" he asked curiously.

"It would be hard on the school. They'd not get another teacher like me in a hurry!" she smiled.

"I can well believe you!"

"I've always thought people that don't know me miss a lot!"

"I'm sure I've gained a lot in knowing you!"

"Thanks. Same to you. And if I were dismissed," she added with a sigh, "all the elegant education I'm getting in textbook lore would be brought to an untimely end! I'm learning a lot through teaching—from geography up."

"Up? Up to what?"

"Oh, the multiplication tables up to twelve. I never knew them so well beyond seven."

"Then for the sake of your education, I hope Sam Schwenckton doesn't find out what he's harboring in his family! But really, Miss Schwenckton," added Marvin earnestly, a solicitous note in his voice, "I'm afraid that with the sort of trustees we have in this district a teacher like you can't hold down this job long! I'd hate like the dickens to have your bigoted old trustees fire you, so let me warn you—do be a bit prudent—if it's in you to be! I've been hearing complaints—"

"Of me?"

"—from the parents. A small boy in your school, Jakey Rallensburger, roused his parents' suspicions by being so enamored of school since you've taught it, when heretofore he had to be flogged to make him go, that they were moved to investigate the reason and he admitted, after much probing, that he'd rather go to school to you than see a movie, because you told them about 'devils,' showed them pictures of devils and acted the devil for them! Satan, it seems, has become to Jakey a hero, to the unspeakable horror of his devout parents, who, believe me, take the devil seriously! They complained to me that they didn't send their child to school to learn to love and admire the devil! So I interviewed Jake and found you'd been telling these children of scenes from 'Paradise Lost'!"

"A little English poetry surely can't be objected to, Mr. Creighton?"

"It's not in the curriculum, Miss Schwenckton! Stick to the curriculum just enough to hold your job, can't you?"

"But do you know I couldn't endure my job a week if I didn't liven it up with a little of the joy of life!"

"Joy of life—'Paradise Lost'? You'll be brightening their lives with Dante's 'Inferno' next! By the way," he suddenly remembered, "you're booked for a talk to the district teachers at their monthly meeting next Saturday, aren't you?"

"Gawd help me, yes! Ain't it awful!"

"What are you going to give them? How to teach geography, I suppose?"

"I could even get away with that in the frock I'm going to wear! The softest, most alluring French blue georgette!" she said enthusiastically. "Anything I say will be well received in that garb! I'm trying to collect suitable shoes and hat to go with the frock, seeing the hard-boiled shoes and hat I'd just invested in, before I'd dreamed of buying this dainty frock, would be a thought too harsh. If I'd only known," she lamented, "that I was going to buy that luscious georgette, I'd have bought entirely different shoes and hat! Isn't it tragic they don't match?" she wailed.

"Good Lord, are you confusing a teachers' institute with a fashion show? I asked you what you're going to talk about to those teachers?"

"What would you advise?" she asked confidingly.

"Do you mean to say you haven't anything ready and the meeting booked for day after tomorrow?"

"I don't know any of the teachers, so I don't know their tastes."

"'Tastes'! Do you think you're expected to treat them to a vaudeville stunt? You're supposed, child, to dis

"The Danger Is, You Know, Father, That Marvin Might Take It Into His Cracked Head to Marry One of These Common Country Teachers!"

cuss some pedagogical problem or theory for their edifying! Now I'll admit you've some rather good ideas, if you could put them over—"

"It won't matter what I say—they'll be too taken up with looking at my blue French georgette—" She was off on the frock again and she sang its praises for the next two minutes without intermission, until they had reached the Schwencktons' gate.

As they stopped, Meely suddenly realized, with a passing anxiety, that she had been entirely neglecting to attend to her accent—she had been saying "jawgette" and "Mattah" and "teach-ah."

"Oh, come in and see Aunt Rosy. Will you?"

"Sounds tempting—but I hardly have time; I always spend Thursday evening with my mother, as my father is never home then; he attends a directors' meeting in Philadelphia every Thursday." He paused; then added slowly, deliberately, "Mother phoned me she particularly wanted to see me this evening, as she'd found an old photograph I'd asked her to look for—also, that she'd got some interesting mail from England—"

He paused again tentatively. Meely held herself rigid that he might not detect the tremor that went over her at his words.

"Good night," he said abruptly—and before she quite realized he was going, he had disappeared in the dimness of the road.

* * * * * * *

St. Croix Creighton and his father, dining at the Ritz-Carlton in Philadelphia, were discussing a certain matter not at all connected with the business of the directors' meeting which they had come to the city to attend.

If the infatuated eyes of Nettie Schwenckton could have beheld St. Croix just now—his evening clothes making him look taller, more slender, more than ever like the young god of her romantic air castles, she would indeed have thought her "honor" a small price to pay for any least notice such a divine creature might bestow upon her. Little did that enamored maiden dream that at that very moment her name was on the sacred lips of her demi-god, her image in his thought.

St. Croix, in his desperation that afternoon, after Meely's amazing rebuff, determined, on his way to his car, that he would pique her into a regard for him by exciting her jealousy; she herself had given him the hint when she had explained her silence about the teacher's boarding with them. He would make love to that school teacher under her very eyes! Meely should be made to see how other girls in her station, or in any station, for that matter, jumped at his nod!

And then he had seen, as he supposed, the school teacher in his brother's company; coming out of her schoolhouse hours after the closing time, apparently in a relation with him of the utmost friendliness. This was the third time in ten days that he had seen Marvin come out of that schoolhouse! His official duties certainly did not take him there so often as that. St. Croix was genuinely worried over the circumstance, as well as irritated at being foiled in his plan to make Meely jealous of the teache which of course he could not do if Marvin were intrigued with her.

Over their cigarettes and coffee St. Croix was shifting his own apprehensions about his brother on to his father's broad shoulders.

"The danger is, you know, Father, that Marvin might take it into his cracked head to marry one of these common country teachers! If he happened to fall in love with one of them, her station or breeding wouldn't stop him!"

"Her station wouldn't. Her breeding would. Marvin's fastidious."

"Within limits," St. Croix doubtfully admitted.

"Bad breeding would be a limit for him."

"I wouldn't trust him! He'd just fool enough to think he could raise her to his level. You know what he is—all for leveling and equalizing!"

"I ought to know what he is! I've suffered enough from what he is!" Mr. Creighton said bitterly. "Takes after his mother. Never got his crazy radical slant from me!"

"Mother's not radical."

"She's tolerant. Tolerant of anything!"

"Much too tolerant of Marvin's freakishness!" St. Croix grumbled.

"Yes, if she'd only stand squarely with me about the boy—" Mr. Creighton paused and shook his gray head. "No—no use. What good has it done, my taking the extreme stand I have?—even ordering my own son out of my house!" he exclaimed, a pained look in his eyes that made St. Croix, who was fond of his father, curse his brother in his heart. "I thought he'd come back cured in a month at most! But what does he do? Gets himself a good job and goes to work! More confirmed than ever in his wrong-headedness! I'm seriously thinking of asking him to come home again. Might as well. He'll never change. And it makes your mother so unhappy—his being away!"

"And the d—d gossip it makes!" St. Croix frowned.

(TO BE CONTINUED.)

Scarlet Uniform Not Conspicuous in Field

The writers of American school histories have frequently taken occasion to remark scornfully upon the scarlet uniform worn by the British regulars in the campaigns against the Indians during Colonial days, but, as a matter of fact, the scarlet coat of the Briton was a less conspicuous uniform than the blue subsequently adopted for the army of the United States.

Careful experiments have brought out the fact that light gray, such as that worn by the West Point cadets, is the color first lost to sight in the field. Scarlet comes next, with dark gray, blue and green in the order named. In target practice it has been found that of all colors scarlet is most difficult to hit. Light green is almost invisible under the violet tinge of electric lights, and would, therefore, be an excellent color for the uniforms of naval scouts who would be exposed to the rays of an enemy's searchlights.

Universal Passport

"Do not go West without money" is a Californian's advice to easterners. Good advice, and it may also be mentioned that it is equally good for those going East, North and South.—Boston Transcript.

Study Seldom Wasted

A man to whom three years of study have borne no fruit would be hard to find.—Confucius.

Idle talk can be very busy

Magpies Often Arrant Rogues

Diet Includes Great Number of Injurious Insects Like Grasshoppers.

(Prepared by the United States Department of Agriculture.)

Magpies, found over much of the northwest quarter of the United States, have a bad reputation among farmers, fruit growers, poultry keepers, and stockmen. Unlike many birds with unjustly bad reputations, the magpie deserves some condemnation. At times it becomes a serious pest, and in such cases shooting or poisoning may be the only remedy. The magpie has no particular aversion to the bitter taste of strychnine, so for bait this poison is recommended by the biological survey of the United States Department of Agriculture.

Magpies Steal Eggs.

Magpies have been known to steal eggs from chicken yards to carry to their young. They sometimes kill chicks. They also show great partiality to cherry orchards. Perhaps their worst offense is harrying weak or wounded animals, and even occasionally sound and healthy creatures. The magpie attack is torturesome. A magpie has been known to keep pecking and enlarging a wound of an animal, finally resulting in death of the animal after days of suffering.

On the other hand, the magpie often is beneficial. Its diet includes a great number of injurious insects, in particular grasshoppers and caterpillars in the spring and grasshoppers later in the summer and autumn. The grain the magpie eats is largely waste in the fields, for the bird prefers insects both at planting time and during the harvest season. For these reasons magpies are useful and should be protected wherever the evil they do does not overbalance their good services.

Not Hard to Eradicate.

Whenever it is desirable to eradicate magpies the task is not difficult, for the magpie is a year-round resident, and its elimination in a neighborhood where it is a pest does not cause a diminution of numbers in areas where conditions make the magpie a good servant to the farmer.

"B. W. D." Germ Menace to Poultry Industry

Bacillary white diarrhea is a poultry disease which constitutes a menace in every state, in some the most serious confronting the industry. It attacks poultry of all ages and, apparently, is transmitted from hen to egg and chick, from hen to hen (through eating raw eggs), and from chick to chick in the incubator and brooder.

The agglutination test is the best known to science for locating the disease in live poultry, and while it is not perfect, it may be nearly so in the hands of reliable veterinarians.

State regulatory methods are drastic, but seemingly a great aid in eliminating the disease.

"B. W. D." is an economic problem for practical poultrymen, as losses in chicks, laying pullets and hatchability of eggs all have bearing on success or failure of the poultry community.

Raising Broilers Part of Work of Poultryman

Raising broilers is a part of the work of every poultryman, whether undertaken as a necessary part of keeping up the supply of pullets or as a specialty. The New York state college of agriculture, at Ithaca, has issued a leaflet of interest in this connection with the title "Cost of Raising Broilers from Eight to Sixteen Weeks of Age and Their Market Value." Light and heavy breeds are both considered. Tables of weights, costs, market values and net returns at the various ages are given. One conclusion of the studies is that there is considerable doubt as to there being any profit in broiler raising as a separate enterprise and that, where broilers are to be sold as part of necessary methods of renewing the flock, they are most profitably disposed of at from ten to fourteen weeks of age, depending upon when they are hatched and how fast they grow.

Agricultural Squibs

The best time to hatch chicks is when grass first begins to show green in the spring.

* * *

Horseshoes set on end in the concrete make convenient handles for septic tank covers.

* * *

Rhode Island Greening is the one apple for which there is a steady demand throughout its entire season.

* * *

As a forest tree, beech is one of the "weed species," for it grows slowly, has dense shade, and crowds out other trees.

* * *

Leghorn pullets hatched early in March will usually begin to lay in late August and are likely to molt early the following winter.

* * *

Overcrowding hens in the poultry house will decrease the "egg money." At least three to four square feet of floor space should be allowed for each bird.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

A MOTHER'S PROBLEM

Is, how to treat her child who is peevish and fretty, yet not seriously sick. Many Mothers say they always keep a package of **Mother Gray's Sweet Powders** on hand for use when needed. They break up colds, relieve feverishness, worms, constipation, headache, teething disorders and stomach troubles, and act as a tonic to the whole system. Equally good for older people. Sold by Druggists everywhere.

TRADE MARK DON'T ACCEPT ANY SUBSTITUTE

Trial package sent Free. Address, THE MOTHER GRAY CO., Le Roy, N. Y.

Married in Auto

Ben Emerson of Ripley, Tenn., and Miss Media Mitchell of Memphis, Tenn., drove downtown in the latter city to be married, but a parking place was out of the question. Circling a block, they summoned Squire Coleman on the run and with the squire on the running board the next trip around the nuptial tangle was completed. They dropped the squire at his office and the groom stepped on the gas and a honeymoon was on.

Net

"Ah, the police with their drag net."

"That's only the dog catcher."

Riches are gotten with pain, kept with care and lost with grief.—L'Estrange.

Hill's Knocks COLDS

—in one day, HILL'S Cascara-Bromide-Quinine tablets knock a cold. Leave you feeling fine. Look for red box. 30c. All druggists.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster without the burn. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, croup, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

Jars & Tubes

MUSTEROLE WILL NOT BLISTER

Better than a mustard plaster

Mr and Mrs. David Schwichtenberg and children were at Garner last Saturday where their daughter Miss Viola had dental work done.

Mr. and Mrs. Wallace Pavey and family and Mr. and Mrs. Ben Coobs and son were Sunday visitors at the Henry Buseman home.

Mrs. Hamo Beek and several children came last Monday from Austin, Minnesota, and are spending a few days at the H. Buseman home before moving to the farm where C. Anderson now lives. Hamo Beek arrived Wednesday.

Mr. and Mrs. Will Bachman called at the Clarence Bachman home Sunday to get their daughter Lela, who was visiting there. They also were callers at the John Bachman home.

The children in District No. 2 were given a little surprise consisting of ice cream and cake by their teacher, Mrs. Nettie Roths and her mother, Mrs. Fred Bachman. The children who are moving away each received a present.

The Farm Bureau Ladies Training School on the 3rd year sewing was held with Mrs. Will Johnson on Friday, February 24th. This lesson was on Children's Clothing and was under the supervision of our able demonstrator, Mis Merle Ramer. Some of those that attended this meeting were Mesdames D. A. and Herb Marshall, Will Waddingham, and Fred Bachman.

EATS BIG STEAK AND FRIER ONIONS—NO GAS

"Every time I ate I had terrible stomach gas. Now, thanks to Adlerika, I eat steak and fried nions and feel fine."—Mrs. J. Julian.

Just ONE spoonful Adlerika relives gas and that bloated feeling so that you can eat and sleep well. Acts on BOTH upper and lower bowel and removes old waste matter pou never thought was theree. No matter what you have tried for your stomach and bowels, Adlerika will surprise you Wilson's Pharmacy. 1tc

Herman Kualmann returned Monday evening from Meno, South Dakota where he has been visiting his parents for a few months. He began work for Albert Barz again today

Dr. Anderson's Buick was limping around on three legt last week when he broke a front axel, due to the rough roads.

Walter Lau came from Waseca, Minn. to spend Sunday with his family here. He returned to work at Tuesday.

HARVEY SOLD POOL HALL TO EMMETSBURG MAN

Arthur Moulton Took Possession Of Business This Morning

A deal was closed in Klemme yesterday whereby one of the business places changed hands. S. A. Harvey sold his pool room, fixtures, and stock of tobacco, candy, cigars, etc. to Mr. Arthur Moulton, a young man from Emmetsburg. Mr. Moulton took possession of the business on March 1st.

Wednesday he and hi swife moved their household goods to Klemme aud reside over the pool hall. Mr and Mrs. Harvey vacated the apartment and will make their temporay dwelling with the F. H. Ridder family.

Mr. Harvey enjoyed a fine business during the past two years while he was the owner, and is a fine young man and a good booster for Klemme

Mr. and Mrs Harvey and their little daughter, Enid, have not made any definite plans but Mr. Harvey stated they would perhaps move to another location if he could find a business to his liking. However, at the present Mr. Harvey intends to take a positive as salesman for a Mason City automobile dealer and will work at that until he makes permanent plans.

Mrs Harvey is an able teacher of the piano and recently her students gave a fine recital at the school

The Times wishes the Harvey family good luck and happiness where ever they may decide to locate.

Mr. Moulton and his wife are now residents of Klemme and as such we welcome them into our fine community and business circle and wish them happines and success in Klemme. Mr. Moulton has been farming until this year. He has had quite a lot of experience in the pool room business and wil no doubt make a success of the business here His nickname is "Peto," and that is the way we introduce him to the people of Klemme.

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grow 21 heads of grain. One of the larger heads counted out 1,135 seeds. A conservative average for the 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about the height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

NEWS REVIEW OF CURRENT EVENTS

Triumph of Hughes in Pan-American Conference—Klan Drops Mask.

By EDWARD W. PICKARD

CHARLES EVANS HUGHES and his fellow delegates to the Pan-American conference have returned from Havana covered with glory, for they—and especially Mr. Hughes—obtained from the gathering practically everything that their government wanted, and the troublesome question of American intervention was postponed for five years with small chances that it will then be revived in the form it took at Havana. Probably the most beneficial result attained was the removal of misunderstanding among American countries. Just before the conference closed Mr. Hughes by a brilliant speech brought into line with the United States all the delegates except Doctor Pueyrredon of Argentina, who had been forced to resign, and Gustavo Guerrero of Salvador, who utterly lost his fight against intervention.

The accomplishments of the conference include:

Establishment of the principle of compulsory arbitration for the settlement of inter-American disputes, except those pertaining to the sovereignty and independence of nations in purely domestic problems.

A Pan-American union convention, placing that body on a permanent basis and permitting the members to have special representatives on the governing board instead of diplomats regularly accredited to Washington.

A treaty on the rights and duties of neutrals in event of war.

A commercial aviation convention open to the signature of all countries.

A treaty placing aliens abroad on the same footing as nationals.

A treaty establishing the right of asylum, to which the United States entered formal reservation.

A treaty providing for international co-operation for the suppression and prevention of revolutions in each other's territories.

Adoption of a Pan-American sanitary code.

A convention on maritime neutrality, the United States entering a reservation to the clauses forbidding the arming of merchantmen for defense in time of war.

A code of private international law dealing with the judicial status of persons, marriage and divorce. The United States declined to participate on constitutional grounds.

SUBJECTED to determined attacks, direct and indirect, in many localities, the Ku Klux klan has dropped its mask and changed its name. An edict issued by Hiram W. Evans of Atlanta, imperial wizard, read:

"After midnight February 22 it will be unlawful for any klansman to wear any mask or visor as part of his regalia, and any klansman who shall be unavoidably absent from the meeting to be held February 22 shall as soon thereafter as possible attend a regular meeting and there become a member of the Knights of the Great Forest."

Simultaneous ceremonies were held in every "klavern" and it was impressed on the members that the order henceforth has no political ambitions for itself or for its members. It was announced that "in the main there is to be no change from the ordinary customs of the klan. Klansmen ignoring the edict will suffer punishment."

Attorney General Arthur Gilliom of Indiana asserted that he would proceed with his suit to have the klan declared bankrupt and to have its officials restrained from further activities in that state.

SENATOR JIM REED of Missouri in his pre-convention speaking tour which opened at Dallas, Texas, Monday, is living up to expectations in that he is seeking to minimize or suppress altogether the issue of prohibition. His slogan is "Turn the rascals out," and he proposes to keep the federal power within constitutional limits, to abolish government by boards and bureaus, to equalize the burdens of taxation, to repeal all laws creating special privileges, and to dismiss the "vast army of spies, snoopers, sneaks and informers."

It is generally agreed that efforts to suppress prohibition as an issue will fail, perhaps in both the Democratic and the Republican conventions. The leaders of dry organizations were preparing for a conference February 28 at which plans were to be laid to force both parties to include dry planks in their platforms, and the wets will be correspondingly determined, especially the Democratic supporters of Al Smith, who has made his position fairly clear. There is even some talk of again putting forward William Gibbs McAdoo as a dry Democratic candidate, despite his renouncement of that ambition. Anti-Smith activity in the South seemed to be increasing, despite the fact that Mayor Jimmy Walker of New York was down there admittedly fostering sentiment in favor of the governor. In the Northwest Smith was gaining many friends, especially after winning in the South Dakota caucuses.

Ohio primaries are a matter of prime interest to the Republican leaders, and there, too, the prohibition question raises its head in the contest between Hoover and Willis. The state Anti-Saloon league seemed to be in a quandary, since it has always heretofore indorsed Willis and yet probably does not wish to be put in the position of classing Hoover as a wet. The Mississippi valley Southern states were keenly interested in the stand Hoover would take before the senate committee considering flood control legislation.

Replying to the Borah quiz, Mr. Hoover in rather platitudinous phrases declares himself a dry and calls the Eighteenth amendment a "great social and economic experiment."

The gossip in Washington was that Secretary of the Treasury Mellon, Charles D. Hilles and William M. Butler would form a "big three" combination that might dictate the selection of the Republican candidate. It is believed they will respectively control uninstructed delegations from Pennsylvania, New York and Massachusetts, the total being 208 delegates, or nearly one-fifth of the number in the Kansas City convention.

UNLESS his appeal is successful, Harry F. Sinclair, the oil magnate, will have to spend six months in jail. Justice Siddons of the District of Columbia Supreme court found him and three associates guilty of criminal contempt, sustaining charges against them involving them in obstruction of justice by jury shadowing in the Teapot Dome conspiracy trial of last fall. Justice Siddons, besides giving Sinclair the jail term, sentenced Henry Mason Day to four months in jail, William J. Burns to 15 days in jail and W. Sherman Burns to pay a fine of $1,000.

Justice Bailey of the same court upheld the right of the senate to arrest Robert W. Stewart of the Standard Oil Company of Indiana for refusal to answer questions.

The senate oil committee, in its efforts to determine how much of the Continental Trading company's $3,080,000 profits found its way to the Republican national committee, questioned a number of bankers from various cities. The committee had already found that at least $75,000 of the Liberty bonds involved was used to pay off a note of the Republican party at the Empire Trust company in New York.

GREAT BRITAIN sprung a surprise at the opening session of the security commission of the League of Nations in Geneva. Lord Cushenden, who succeeded Lord Cecil in the league, told the delegates the British government would support the Finnish proposal calling for financial support for nations attacked without provocation, believing that to be one of the most practical ways to prevent war. Cushenden also indorsed "the application of the Locarno treaties in other areas." In both instances this was a complete change of front by the British. Boris Stein, the Russian observer, submitted the soviet government's plan for disarming the world by sinking navies, disbanding armies and destroying airplanes and munitions within a period of four years. In place of the League of Nations the soviets propose that all international relations shall be controlled by permanent commissions which would enforce their decisions through a special land and water police service, by "nonmilitary pressure." For internal protection each nation would be allowed a small police force carefully restricted as to armament. The soviet plan is long and exhaustive and the security commission found it could not be dismissed without consideration.

LIEUTENANT COMMANDER BAYLISS of the destroyer Paulding and Lieutenant Commander R. K. Jones of the submarine S-4, the latter of whom lost his life in the collision of the two vessels, were held jointly responsible for the disaster by the naval court of inquiry. The court also found that Rear Admiral Frank M. Brumby, commander of the control force, including all submarines on the Atlantic, had failed to contribute "the sound judgment and intelligent guidance expected from an officer of his experience," during the time he was in full charge of salvage operations. Therefore, it recommended that Admiral Brumby be detached from command of the control force.

The court's principal findings provoked so much criticism that Secretary of the Navy Wilbur ordered the court reconvened for "the purpose of setting forth with completeness its reasons on which the opinions and recommendations as to the two commanding officers and Admiral Brumby are based." Until the court's final report is submitted Secretary Wilbur will not take any action.

BERT HINKLER, Australian aviator, completed his solo flight from England to Australia in a light plane with folding wings, in 15 days. His expenses, including food, fuel and accommodations, were only $250, or about 2 cents a mile. Hinkler established five new records, and Robert Horne, former chancellor of the exchequer, declared his flight "outclassed Colonel Lindbergh's achievement."

Lindbergh helped boost the air-mail service by leading a squadron of mail planes from St. Louis to Chicago, changing planes several times en route. The amount of mail carried by the planes broke all records. The colonel then flew to Detroit, where it was reported that he and Major Lamphier, flight commander at Selfridge field, might become connected with a new air transportation project between New York and Chicago, with Ithaca, Buffalo and Detroit as terminals. The rumor was not verified.

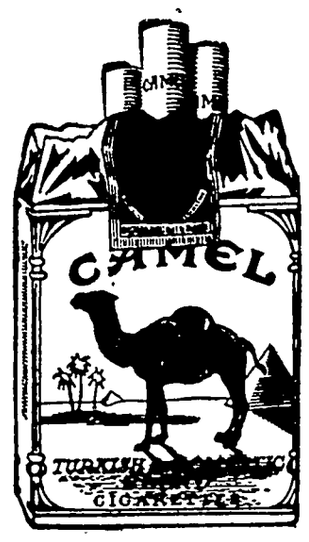
MUSSOLINI'S new electoral law was approved by the Italian council of ministers. It abolishes the party system, disestablishes the democratic basis of law making and reduces the chamber of deputies to a consultory body of experts without political functions. The law will become operative as soon as it is ratified by the present chamber.

FOLLOWING the action of the house before the holidays, the senate has passed the alien property bill. Provision is made for the return of alien property seized in war time, for the payment of compensation for German ships, patents, and a radio station, and for the financing of the payment of awards of the mixed claims commission to American citizens.

RECOGNIZING as permissible "some discrimination intended to encourage agriculture," the Supreme court of the United States has upheld the Kentucky co-operative marketing statutes which have been the model for similar legislation in 42 states and which were attacked as unconstitutional because of being class legislation.

REPRESENTATIVE W. R. GREEN of Iowa was appointed by President Coolidge as judge of the Court of Claims, and is succeeded as chairman of the house ways and means committee by Representative Hawley of Oregon. This is likely to have an important bearing on tax legislation, for while Mr. Green has supported the administration in most matters he has differed with Secretary Mellon on a number of issues, notably the repeal of the estate tax.

If you smoke for pleasure



People might smoke some cigarettes for a lot of queer reasons, but they certainly smoke Camels for pleasure. And they smoke more Camels by billions.

Camels

"I'd walk a mile for a Camel"

Cat Finds Only Bridge

How Bonzo, a black cat belonging to Bert Pierson of Hertz, England, found his way back home, is puzzling his owner. Pierson moved recently from Sheerness, on the isle of Sheppey, to Hertz. The only means of access to the isle of Sheppey is by way of the King's Ferry bridge. The cat found the crossing and traveled the 80 miles back to the old home, where he remained until found.

Making money is just a game. Men are not deeply interested in the money, but they like to win.

Pony Took "Stop Off"

A Shetland pony escaped injury when it leaped from an express car at Newton, Kan., while the train was traveling about 40 miles an hour. Express messengers did not notice the pony's absence until the train had gone a considerable distance. The Newton officials were notified and the missing passenger was found calmly grazing on the right-of-way. The pony finished its journey on another train.

Few men have sufficient confidence in their own veracity to believe all they say.

Biblical Shield in Charm

Mahzel, a device taken from the shield of David, and which has been carried by devout Jews for 5,500 years, is being commercialized in Europe as a lucky charm. The fad started when it was told that Levine had the sign on his airplane when he flew the Atlantic. Mahzel also appears on the ark in all synagogues.

Life's current coin is made of plain common sense.

Few people realize that their neighbors could be worse.

Who can resist it?

Who can resist the charm of a beautiful skin?

Nearly every woman's skin would be lovely
if it weren't for one
of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

Radiant—perfect—don't you want *your* skin to be that?

You can have a flawless complexion by keeping it free from the six faults given here. The famous Woodbury skin treatments will help you to overcome any of these troubles.

Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple clear directions for each of these treatments are in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—it will be a revelation to you of how much you can improve your complexion!

A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

WOODBURY'S FACIAL SOAP

Better and more Economical

Cold in Vermont

Frederick Rasmussen, the well-known agriculturist, said at a banquet in Harrisburg:

"Agriculture is carried on in some regions of northern Europe where it is so cold that if you try to describe it people think you are exaggerating. Yes, they class you with the farmhand who said:

"'Cold? Yep, it's mighty cold today, but 'taint nothin' to what I seen down hum wunst in the Vermont highlands. Why, one day in hog-killin' time up thar it was so cold that we had a kittle o' boilin' water settin' by the stove, and when we took it out in the yard it frize so quick the water was hot.'"—Springfield Union.

Scientists Study Island

"Not One Drink in Thirty Years!"

Former Heavy Drinker—Now Successful Business Man Saved From Ruin by Dr. Keeley's Famous Treatment

"Yes sir, I am proud to say I haven't taken a single drink in thirty years. And I used to drink to excess every day before I took The Keeley Treatment," says a former patient. Thousands of others, men and women formerly hopelessly afflicted with the disease of drunkenness, today point with pride to records of many years of total abstinence. To The Keeley Treatment alone they owe their present happiness and freedom from the greatest curse of all time—liquor and drugs. If you know anyone suffering from these vicious diseases—write us today. Let us tell you how The Keeley Treatment obtains permanent results in the treatment of liquor and drug addicts. Keeley's record dates back over a period of more than fifty years. The success of The Keeley Treatment is proved by its record in thousands upon thousands of cases. Don't delay. Investigate today. Learn how The Keeley method obtains sure freedom from liquor or drug cravings. Take steps at once to send the victim to The Keeley Institute. Your letter will be treated confidentially.

Write V. G. Nelson, Secretary.

LIVE STOCK NEWS

MARKET MILLET HAY BY STEERS

That millet hay can be more economically marketed through feeder steers than cane hay was shown at the Washington County Cattle Feeders' day at Akron, Colo., before a crowd of 200 interested farmers and live stock men.

Forty-six head of Aberdeen Angus steer calves were divided into two lots and fed two rations made up largely of home-grown feeds. Millet and cane hays, two of the surest dryland roughage, were used in the test to determine their value in producing fleshy feeders.

The results indicate that the farmer with cane or millet hays, for which there has been almost no market, can convert them into cash through cattle to advantage.

The steers in one lot were fed ground barley, corn and cob meal, cottonseed meal, cane hay and a small amount of mineral and salt. The other lot received identically the same ration except millet hay was substituted for cane hay.

The millet hay lot made an average daily gain of 2.12 pounds for the 76 days of the test, at a feed cost of $6.35 per 100 pounds gain. After figuring feed, interest, shipping and selling costs the animals must bring $9.48 per 100 pounds to pay out. This allows a margin of profit in the light of present prices. The calves in the cane hay lot gained an average of 1.8 pounds per day at a feed cost of $6.71 per 100 pounds gain, and will show a profit if sold for over $9.73 per 100 pounds. The steers were shipped to Denver immediately after the feeder day program where they will be exhibited at the stock show a few days before sold.

The cattle were owned and fed by A. A. Finker of Akron who cooperated in the demonstration with J. C. Foster, extension agent in Washington county, and B. W. Fairbanks, live stock specialist of the Colorado Agricultural college.

Pasture Is Essential to Brood Sow and Pigs

If possible, the brood sow while nursing a litter of pigs should be on a good green pasture of some kind If it is late in the fall or early in the spring so that pasture is not available, the sow should have all of the good green alfalfa hay she cares to eat. Corn can then be fed as the principal grain to the brood sow provided it is properly supplemented with other feeds. Feed in addition to the corn either some oats, middlings, or wheat bran. Then in addition to this, the sow should have either some milk product, such as skim milk or buttermilk or some dried protein supplement such as tankage or a mixture of tankage with linseed or cottonseed meal.

A ration of 75 per cent corn, 20 per cent either oats, middlings or bran, and 5 per cent tankage or a protein mixture of tankage and oilmeal or cottonseed meal would make a very satisfactory ration for such a sow. If skim milk or buttermilk is used, two to four gallons of milk per sow per day could be used.

Ripe Millet Hay Hard on Kidneys of Cattle

Ripe millet hay has much the same kind of food value as timothy hay except that it seems to be rather hard on the kidneys. Also there seems to be some tendency for the hairs on the heads to accumulate in the stomachs of cattle. On this account it is best to be on the safe side and feed it about half and half with some other roughage. It seems to be especially important to do this with horses because the kidneys of horses seem to be more susceptible to the influence of millet hay than the kidneys of cattle. Ripe millet hay when forming not more than one-half the roughage ration should be satisfactory.

Live Stock Squibs

Alfalfa pasture is the foundation of cheap pork production on thousands of farms.

* * *

Equal parts of shelled corn and oats will make a good grain mixture to use in getting the calf started on feed. The amount of feed at the start will depend somewhat on the size of the calf.

* * *

About three pounds of silage and one-half pound of hay for each 100 pounds of live weight of the calf is about all the roughage that should be fed. If more is allowed the calf will not eat enough corn to fatten rapidly.

* * *

Rickets in cattle, swine and poultry are very common troubles and are causing considerable loss.

* * *

For growing out and feeding breeding animals legumes are invaluable while they can be used to a very economical advantage in fattening rations.

* * *

Silage, hay and fodder with the addition of a pound of cottonseed or linseed cake for each cow daily will carry them through the winter in good condition.

Never before such BEAUTY *and* QUALITY for so little money!

WIN $1,000,00

Do You Need $1,000,00?

Think what you can do with $1,000

Twenty Cash Prizes

Come On—Let's Go—Win $1,000. Here it is! The greatest and most fascinating event ever conducted by Gentlewoman Magazine. Big prizes to be won. Boys, Girls, Men and Women—EVERYBODY can take part and win big money. A Nonstop Prize Flight—that's what it is. No, you don't need an airplane, you don't even have to leave your home to join the flight and win as much as $1,000.

IT'S NEW—It's Different, and It's Loads of Fun

HOW FAR CAN YOU FLY?

That's the big question. Lindbergh flew 3600 miles. Chamberlin flew 3800 miles. How far can YOU fly? All you have to do to win is to send in the coupon below, giving your proper name and address so that we can send you our official airplane, called the Treasure Hunter, (about four times as large as the picture above, and without any 8's written on the wings), and then see how many times you can write the figure 8 on the wing of the airplane that we send you. Isn't that easy enough for anyone? You can write as small as you want and make as many 8's as you want and then add them up and the sum total of all the 8's you have written will represent the mileage of your non-stop flight. For example: ten 8's will be eighty miles, one hundred will be eight hundred miles, etc. The one who has the greatest number of miles will be the first prize winner. In case of a tie, the full prize value will be awarded to each contestant so tied. This is going to be a short, snappy contest, no long waiting, nothing else to do, no list of words to write, nothing else to do except see how many times you can write 8 on the official airplane that we will send you FREE.

This contest closes May 1st, 1928. Don't delay—Quick action means $1,000.00 for you.

MAIL THIS COUPON TODAY

Puzzle Manager, The Gentlewoman Magazine, 615 West 43rd Street, New York, N. Y. Dept.

Please enter my Namo in your Non-stop Prize Flight contest and send me circular of the official Treasure Hunter Plane together with full particulars of the contest.

Unkind Assumption

A young West Virginia matron has been acquitted of assault with a deadly weapon after attacking her husband with a rolling pin. The jury presumably reached the conclusion that a rolling pin is deadly in the hands of a young wife only when she is making biscuits.—Detroit News.

In some of the strenuous vocations of men, cusswords, are, in fact, words of endearment.

New Platinum Supply

The London colonial office announces that a platinum-bearing area of about forty square miles in extent has been discovered in Sierra Leone, West Africa, because the deposits, which are alluvial, are "likely to be of considerable importance."

Platinum is the most valuable of all metals. The present price is about $70 an ounce.

An interesting point in connection with the new discovery is that at present the world depends on Soviet Russia for more than half of its platinum supplies.

Nothing Serious

"Have you seriously considered this step?"

This was overheard from the parlor.

"Ah, he is proposing matrimony," commented pa.

"Just dance talk," said mother.

For handling contents of cooking utensils a ladle has been invented that has a strainer over its bowl, controlled by a lever on its handle.

Class

"Fashionable wedding, eh?"

"An expert broadcaster has been retained."—Louisville Courier-Journal.

Are You Listening In?

Mr and Mrs. Lou Davis and children of Mason City, were entertained at the Henry Freie home Sunday

Mrs. George Stokesbarry was called to the bedside of her mother at Blue Earth, Minn, who is quite ill

Albert Fuller, of Good Thunder, Minn, was in this community a few days the past week.

Miss Luella Fiero of Forest City, was visiting at the Henry Lewis home Sunday.

Melvin Lau, of Garner, visited at the home of his grand parents, Mr. and Mrs. T. Blank, Sunday.

March 1st is not such a bad day. Looks like we might have an early spring.

E. F. Jacobs returned from Minneapolis Friday night where he went to attend a hardware convention.

Wm Greimann and John Rust spent Sunday at the Will Knisely home at Rockwell.

Mrs. Gee of Goodell, spent several days last week with her daughter, Mrs C. M. Gram and husband here.

Harvey Harberts and wife spent Sunday at the H. Harberts home at Goodell.

Wm. Buns and wife of Goodell spent Sunday at the Emil Beier home west of Klemme.

The W. F. M. S. of the Methodist church is meeting today at the Mrs. C. A. Arnold home.

Will Kirkwood has purchased the Standard Oil Filling Station building of Henry Lewis. Mr. Lewis built the place a few years ago and leased it to the Standard Oil Co. Mr. Kirkwood is the Standard Oil representative for the Klemme territory.

J. E. Stille and family have moved into the Ross residence, just north of the Times office.

ASK ABOUT WRIGHT'S Smoked Salt. The complete meat cure in one operation. Wilsons Pharmacy, Klemme, Iowa. 2tc

Mr. and Mrs. Fred Musfelt and Mrs. Mary Waterman were entertained at the Fred Radloff home last Sunday.

C. M Bredbenner has been putting up ice the past week. He has been harvesting ice from the A. R. White pond south of town.

Prof. Penrod, Wm. Gauger and Harvey Nelson took in the Methodist play at Mason City Sunday evening.

Mr. and Mrs. S. A. Harvey and daughter, Enid, were entertained at the Wes Schuldt home for dinner Sunday evening.

Emer Arnod returned home from Mason City ast Wednesday and is recovering nicey from his recent operation.

Watch for the big "moving list," in the Times next week. We still checking up to get the complete list for publication.

John and Frank Miller loaded a car of household goods and farm equipment Tuesday and shipped to Watkins, Iowa John accompanied the car and Frank and wief and Mrs. Miller and daughter drove down. John wil go on a 120 acre farm ½ mile west of the John Woods farm and Frank will manage a 160 acre farm for a stock feeder at Watkins.

Friends and relatives of Mr. and Mrs. Walter Lauden gave them a surprise reception at their home Friday evening. At the appointed time the happy gathering arrived and began to make merry. Cards were played until a late hour after which refreshments were served. Mrs. Albert Hippen and Emil Kraus won first prizes at cards, while Ulrich Hippen and Sylvia Larson took the consolation honors All enjoyed a fine time

A couple of weeks ago the Klemme Auxiliary Unit donducted an essay contest on "American Citizenship," at the Klemme school. Lucille Kraus was awarded first prize of $3.00 and Lizzie Wiepert was awarded a prize of $1 and second place. Mrs. P. W. Johnson presented the prizes one evening after school. The Auxiliary is now conducting another test among the students with questions on the Flag. Prizes of books wil be given for the best set of answers submitted.

Clarence Elder came home from Ames Saturday afternoon and returned Sunday evening. Clarence is taking up journalism and we are glad to report that he is making good. He has taken up writing and some of his work has been published by The Nebraska Farmer. Other articles from his pen are in the hands of the publisher. Clarence had his "eye teeth" cut in the printing business at The Times Office and so we are greatly interested in our former "devil."

Frank Ward had a narrow escape from death Sunday when his light Ford truck was struck by a Milwaukee freight on a crossing two miles of Wesley. Frank had been over in that vicinity to visit his brother. As he approached the crossing he was on the look-out for cars but did not see the freight bearing down on him until he was almost on the crossing. Frank used his head by stepping on the gas instead of using the brakes and cleared the track far enough so that the engine tore off the rear of the box on his truck as it went by. The impact swerved the car into a nearby ditch and pulled off a tire and did some damage. However, Ward was able to repair old Lizzy and was soon on his way home, unhurt, but plenty scared.

(Continued On Page Five)

FIRE DESTROYED BUSS FARM HOUSE

HOME OF MR. AND MRS. HARRY BUSS BURNED TO GROUND

Strong South Wind Endangered Big Barn Which Was Saved

The farm home of Harry Buss and family, on the Mrs. Elko Buss farm, south and east of Klemme about three miles, was burned to the ground Tuesday morning shortly before noon, and practically all of the househol dgoods and clothing of the Buss family was lost in the flames which rapidly consumed the structure, aided by a strong south wind.

It is thought the fire was caused by a defective chimney or sparks falling on the kitchen roof at the north part of the house. The fire was discovered by Mrs. Buss as she was working around in the kitchen when some bricks tumbled down onto the kitchen range and she saw the flames. The telephone was located near the chimney and she did not venture to reach it in this dangerous position. She grabbed the children and hurried them out doors and as her husband was far out in the field, Mrs. Buss ran about a half mile to the Mrs. Elko Buss home to telephone the alarm.

The home was a mass of flames when Mr. Buss arrived and nearby neighbors came to assist. Only a few household goods, some seed and some clothing was rescued from the flames. A large group of men kept a bucket brigade in operation to keep the large barn, just north of the burning house, saturated with water, and this good work no doubt saved further damage.

The house was insured as well as the contents, but will not cover the loss entirely.

METHODIST CHURCH NOTES
A. W. Guager, Pastor

Several from Klemme attended the sub-district meeting in Garner on Tuesday A splendid program was carried out.

All men are wanted at the great Men's Meeting in Kanawha on Friday evening, so plan to go. If you have a car plan to take a load. If you have no way of going then let us know.

The L. A. S. meets at the Parish house today.

In your plans for the coming Sunday have the hours of worship in mind and plan to be present and help.

SWANSON-BRIDGES

On Thursday afternoon, March 11, 1928, the marriage of Miss Ruth Swanson to Mr. Orville Bridges took place at the Methodist parsonage.

They were accompanied by Mr. Roy Swanson and Miss Dora Swanson. The Bride is a daughter of Mr and Mrs. Oscar Swanson and has grown to womanhood in this community. She possesses the fine traits of real womanhood and will be a real companion and home maker to the man of her choice.

The groom is a product of Liberty Township, where he grew up to manhood and posses qualities of real merit.

They will make their home in this little city where the groom will follow the trade of carpenter.

The best wishes of this community are extended to this happy couple.

Entertained Lots Of Company Sunday

There were quite a number of people visiting at the Fred Kluckhohn home Sunday. They were, Mr. and Mrs. J. W. Butcher and son Paul of Lapeer, Mich.; Mr. and Mrs. F. Kluckhohn and family; Mrs. G. W. Kluckhohn; Mrs. Sadie Turgasen and son, Donald; Mr. Wayne Studer and two children and Mrs. Studer, mother of Wayne of Lattimer, Iowa; Mrs. Homer Butcher, of Colling, Mich. Miss Eva Stokesbary and Miss Lucile Krause.

MANY FARMERS MOVED MARCH 1

TO LOCATE YOUR NEIGHBOR IS QUITE A TASK

The Following List May Help You Get Acquainted With Your Neighbor

There was a lot of moving going on March 1st and a few days prior to that date. The Times again makes its annual attempt to straighten out the tangle ast o who is who and where they went and where they all came from. To get the list started we just reach into our note book and put a pencil on the first name we come to—and it happens to be J. E. Stille. All right, we will begin with Mr. Stille.

He moves off his farm and came to town and his good family now reside in the Ross house north of the Print Shop. Chas. Bredlow and family moved from Vinita, Oklahoma and now live on the J. E. Stille farm.

John Miller and family and Frank Miller and family moved off of a half section farm northwest of Klemme to farms near Watkins, Iowa. Oscar Carlson and family moved o the farm vacated by the Millers.

Herman Stille, who owns the farm vacated by Carlson, came back from Colorado to farm his own place. Mr and Mrs. Paul Stille and family are also tenants fo Mr. Stille's farm and we presume they are pardners.

Paul Stille and family have been residing in Klemme. The place vacated by them is now occupied by Mr and Mrs. Orville Bridges.

Fred Albers and family moved to the Meinderts farm south of Goodell near the county line and get their mail on Belmond, Route One. Henry Neimaga and family live on the place vacated by Albers.

Fred Kothenbeutel and family who have resided several years on the F. A. Arnold farm north east of Klemme have moved to a Pringnitz farm several miles southwest of this town and get their mail from Kanawha. Herman Back and family, of Cedar Rapids, purchased the Arnold farm and now reside there. Mr. and Mrs. Back are parents of Nels and Chris Back, farmers near Klemme.

Ernest Helps moved to the farm vacated by Walter Anderson. Max Dietrich and family of Ventura moved to the farm vacated by Helps. Walter Anderson moved to the Old Gillett farm north east of Klemme.

Herbert Dickhues moved to a farm east of Goodell. Mr. Tibbits and family, who have been on the Dr. Zinn farm, moved to the place vacated by Dickhues.

Dr. Zinn's new tenant is J. T. Tebben and sons from west of Belmond.

Chris Anderson moved to a farm 3 miles east and 3 miles south of his former location. Hamo Beek of Austin, Minn., a former Klemme farmer and his family, have moved to the farm vacated by Anderson.

U. G. Smid and family purchased a home in Klemme and have moved to town. Mr. and Mrs. Emery Schaefer moved to Mr. Smid's farm just south and east of Klemme. Lee Hawkins now resides on the Albert Schmidt place in north Klemme, vacated by Mr. and Mrs. Schaefer.

A Mr. Kahler and family from Minnesota, have moved to H. R. Gibbs tenant house on his farm.

Ben Katter and family have moved from the farm north of Klemme to the A Katter farm 4 miles east and 1 mile north of the Elltown church. It was occupied by a Mr. Williams and family. Harvey Goll and wife have moved to the farm vacated by Katters.

Herman Merkel moved to the Dr. Zinn farm southeast of Klemme, the place vacated by Alfred Merkle and family. Alfred and family purchased the Cliff Swartz property in town where they now reside. Cliff and family moved to a farm north of Ventura.

Andrew Nelson and family moved to a farm south of Clear Lake which he purchased. Another Mr. Nelson and family have moved to the old Andrew Nelson farm.

H. J. Jahnke and family who have been living in Klemme a short time since moving from Minnesota, have moved north west of town to the farm vacated by Leo. Schmidt.

Carl Pearson has moved to the Fred Ax farm 3¼ miles north of Klemme, vacated by G. F. Hoffman, who has moved to Clear Lake. John Osterkamp and family have moved to the farm vacated by Pearson, east of town.

This list probably does not cover all the moving, but we have recorded as much as we could learn of. We will be glad to receive additions or corrections to this list of farm moving.

TWO TOWNSHIPS TO VOTE ON BUILDING NEW SCHOOLS

Voters In Avery and Twin Lakes Will Vote Question Monday

Two townships will go to their polls Monday to decide whether or not to build some new school houses in their township.

The people of Avery Township have two similar propositions up for the voters. They will decide on a building program to include a new school house in District No. 4 and one in District No. 5. The best part of this is that the Township has the money on hand to complete the twic new buildings without levying any special or additional tax, and they will still have some money left over in their treasury.

The voters in the district will no doubt support this proposition with a big majority in favor of the building program. The township needs several new school houses and with the money already raised they will no doubt put the thing over.

Twin Lakes Township are asking the voters their consent to build a new school in District No. 9. The Township has some very fine new school houses and having been building at the rate of one new building each year. The voters have always voted favorably on new schools and there is no doubt but what a large majority of Twin Lake voters will put the proposition across.

Good schools are certainly well worth while and adds to the value of the land in the townships where good schools exist.

THREE IN RACE MONDAY FOR SCHOOL DIRECTORS

Two Men Wil Be Elected For Three Year Term Each

The annual school election will be held in Klemme Monday afternoon March 12th, from 1:00 to 6:00 p. m. to select two directors, each for a three year term.

Three men are in the running—Conrad Quandt, Dr. D. P. Anderson and H. R. Gibbs.

Not bad material, so get out and vote for your man—two will be elected, one is bound to be beat, and it's too bad we can't put all three of the men into office.

Don't forget the time or the place 1:00 to 6:00 p. m. at the Town Hall

"SHEPHERD OF THE HILLS" IS PICTURE AT GARNER

Harold Bell Wright's Famous Ozark Hills Story Now On Screen

Harol dBell Wright's greatest story, the famous drama of the Ozarks is brought to the screen in "The Shepherd of the Hills," showing Friday and Saturday of this week at the Lyric Theatre at Garner, Iowa.

Why did this city stranger sacrifice everything he had in the world to shepherd the hill people, to teach them love and forgiveness? You'll find the surprising answer dramatically told in this great First National Special.

All the famous characters of Harold Bell Wright's most popular novel re-enacting the story that 10,000 000 readers hail as his greatest!

The sweet romance of a beautiful back-woods girl and a primitive bred-in-the-hills boy!

The fight between two huskies for the right to be called the strongest man in the hills!

A six-horse team crashing over the mountainside with an avalanche of earth!

A great throbbing human drama in America's most picturesque locale!

SPECIAL BARGAINS IN TOWN SATURDAY

BIG MARKET DAY PLANNED FOR SATURDAY, MARCH 10

Merchants Offer Many And Varied Special Bargains

Our readers will notice in scanning the columns of The Times this week, many special bargains offered for Saturday, March 10th. This is to be a big day in Klemme and along with a public auction, a Market Day Sale, large crowds should throng our streets during the day and evening.

The public sale lists every thing from a horse to horse collars, sewing machines to manure spreaders, and in fact nearly everything found on a rummage sale. This is a great opportunity to get seller and buyer together.

The Klemme Merchants who are advertising in this issue of the Times have many genuine bargains offered for the day. The publisher has inspected these offers and we declare you will certainly be able to get a lot of real value for every dollar spent in Klemme Saturday. There will be special bargain prices on everything from Gold Fish to Pickled Fish, Free Coffee to axle grease, smoked ham to neckyokes, leather shoes to high grade flour, laundry soap to overalls, and many other articles.

Plan to spend the day in Klemme Saturday, March 10th.

SIXTEEN CARS LIVE STOCK IN SATURDAY SHIPMENT

Ten Cars Of Hogs And Six Cattle Shipped To U. S. Y., Chicago

Stock shipments from the local yards took a shoot upward in number when the total reached sixteen car loads Saturday night. This is but one car short of the biggest shipment this year.

Of this number the Shipping Associtaion handled ten car loads, six car loads of hogs and four car loads of cattle.

C. A. Larsen shipped four car loads of hogs, and C. A. Evans two car loads of cattle.

All cars were billed for the U. S. Yards at Chicago.

Parents Surprise Daughter

Mr. and Mrs. J. W. Butcher and son, Paul, of Lapeer, Michigan, pulled a great surprise on their daughter and sister, Mrs. Fred Kluckhohn and family, when they drove in unexpectedly for a short visit with her and family. They were also accompanied by Mrs. Homer Butcher, who came with them for a short visit at the Kluckhohn home and for a visit with her relatives and friends. The party left again early Monday morning, going by way of Chicago and then to Gary, Indiana where they visited another daughter, Mrs. Edna Cheadle, and from there they journeyed on home.

The Place To Buy
Jamesway
Poultry Equipment

Swanson's
Chicks
Are Cheaper!

With our flocks laying unusually well and eggs showing strong fertility, we are going to sell our Chicks lower than ever before.

Our flocks are improved a good deal over last year, as we bought some from a trap nested flock and saved our own from a special mating which we had culled very close from all layers and mated to Pedigreed high record Cklo.

We are trying ou rbest to get you a Chick that will live when you get them and with the best of breeding we can get to make heavy winter layers, which is the largest profit in the poultry game.

We will have nothing but S. C. W. Leghorn Chicks and Eggs from our own flocks.

Come and see them—they are hatching now.

We carry a full line of Jamesway Poultry Equipment for sale at reasonable prices. Tell us your needs.

Swanson's

TRIO BOOKED TO SHOW NEXT WEEK

MUSICAL TRIO BOOKED FOR NEXT NUMBER HERE

This Number Should Be The Best Number On Course

On Thursday evening of next week a Musical Trio will appear on our lyceum course number. This promises to be the best number, perhaps, of the whole course. It is advertised as composed of Mr. Jesse, a piano artist, Claire M. Whitney, mezzo soprano and entertainer, and Eltreda Thompson, a violinist of splendid ability. Favorable reports have come from an impartial source and we expect them to please our ticket holders and hope others not yet in possession of season tickets may be prevailed upon to attend and enjoy the number.

Miss Hanley helped to redeem our course for she proved to be an exceptional impersonator. Her voice and gestures and general expression were very pleasing. Those who enjoy music and dramatics cannot afford to miss this next number. The program will begin at 8:00 p m Admission will be 25 cents and 35 cents

P. T. A. Members Enjoyed Talks

Our P. T. A. program was very well attended on Tuesday evening of this week. A very interesting program was provided by Mrs. Gus O'Krueg, of Goodell, who told us of the life and conditions in Porto Rico, our island possession in the West Indies. We can appreciate our U S. A. and our garden state of Iowa much more since hearing Mrs. O' Krueg.

Mr S. C. Pollock, of Garner, also gave an instructive and interesting address on "What We Owe Our Schools" We wish more could have heard these two splendid talks. Our Grammar Room appeared in two songs, carrying two parts, alto and soprano.

Spelling Contest To Be Held

We again urge parents interested in the success of their children in their coming spelling contest to encourage them by pronouncing a list of words to them as often as time permits. Worthwhile prizes have been promised the winners in each of the grades from 2 to 8 inclusively as well as first, second and third prizes to the best in all grades. Each pupil will get two chances at a prize and each time a chance for either one of three prizes. A capable student with perserverance should succeed in getting in on some of these prizes. The contest will be held the last of March, possibly March 23rd The County Contest at Garner will be held March 31st. Klemme should show up well there.

Will Practice For Base Ball

Our high school boys will now turn their attention to base ball, the popular out-door and spring game in America We shall miss Stokesbary from the diamond, whom the State Athletic Association rules ineligible because of having been enrolled in high school eight semesters previous to this semester but we are hoping others may show form and improve in the national sport.

As our base ball suits had been giving way our Coach placed an order for new ones that have been received. We are hoping for an early spring that practice may be begun.

Shamrocks Bow Again To Hayfield

Our basket ball team were again defeated by Hayfield boys, but led in scoring during most of the game. Hayfield spurted the last quarter and won their fourth victory over our boys this year. Our lads have not won a majority of their games this year, but we did not expect them to do so for most of them have been playing their first year and it takes more than a year to develop into first rank basket ball players. With the experience and knowledge of the game acquired this year and with the loss of but one man from the team through graduation, Klemme has better prospects for next year.

Send in your news items or call us on the phone. We want the news and are glad to have your co-operation. Times Office.

FOR SALE or trade, for good pool hall or grocery store, a modern six room house, two sun porches. Ask Fred Musfelt. 2tp

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated February 18, 1928, A. D.

DAISY LEMKE,

(Feb. 23, M. 1-8,) Administratrix

NOTICE OF ANNUAL MEETING Independent City And Town

NOTICE is hereby given to the qualified electors of the Independent School District of Klemme, County of Hancock and State of Iowa, that the Annual Meeting of said School District will be held at the Town Hall on the second Monday in March, 1928, commencing at 1:00 o'clock P. M., closing at 6:00 o'clock P. M.

A Director will be elected for a term of 3 years to succeed C. Quandt, one for 3 years to succeed Harry Gibbs.

The meeting will be open for the transaction of such business as may legally come before it.

PAUL GRANGE,
Secretary.

Dated Feb. 25, 1928.
(Publish March 1, 8, 1928)

The side show in Ringlings Circus never attracted more attention than the specimen of a snail which John Day has in captivity at his store. He found the snail, a rather large one, on a bunch of bananas. At our suggestion John fixed up a dish of water for the snail to swim in. Every morning John gives the snail his daily outing, combs his whiskers and feeds him a slice of banana peel

GARNER, IOWA

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grew 21 heads of grain. One of the larger heads counted out 1,185 seeds. A conservative average for the 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about the height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

News of Klemme and Vicinity

Dr. R. W Specht, Dentist, Garner, Iowa. adv

Emil Barz spent the week end in Klemme.

Bert Mathews of Garner spent Saturday evening in Klemme.

Dr. and Mrs. Missman were visiting in Belmond Tuesday morning.

R. A. Jorgenson and family spent Sunday at Garner and Mason City.

Several cases of Scarlet Fever are reported at Garner this week.

Mrs. R. W. Elder is on the sick ist this week.

Mr. and Mrs. Arley Blickenderfer's children have the chicken pox his week.

Mr. and Mrs. Wm. Smith and Miss Mabel were Sunday dinner guests at he J. N. Day home.

Don't forget the school election Monday afternoon. Three men in he race, two to be elected!

FOR SALE—Good grade of Poland China Brood Sows Karl Krause. 1tc

Mr. and Mrs. J. T. Griggs, of near Goodell, were Klemme shoppers Wednesday.

Mrs. Clarence Waterman and Miss Mildred Johnson are hostesses to the Ladies Aid this afternoon.

Herb Bailey drove in from Sioux City last Thursday afternoon for several days visit in Klemme.

Mr. and Mrs. J N. Day entertained Doctor Missman and family Sunday evening for supper.

Mrs. Worthy Usher came up from Dowan Wednesday to visit her parents, Mr. and Mrs. Tom Blank.

Mr. and Mrs. Elmer Arnold and son, Bruce, enjoyed dinner at the Albert Schmidt home Wednesday.

Miss Gracka Quandt has been on the sick list the past week with the Flu.

Party who borrowed battery charger please advise if it is any good. Paul Grange. 1tc

Lena Schroeder, Mrs. Marlin Croner and Dorothy and Grandma Schroeder were Garner visitors Tuesday afternoon.

FOR RENT—House in the country with garden, and pasture if desired. Inquire at Times. 2tc

Arthur Wellemeyer was at Charles City on business Tuesday, and while there had the opportunity of visiting his mother and sister.

EGGS For HATCHING from large boned dark R. C. R. I. Red farm flock. $2.50 per 100. Luppo Blank, Klemme, Iowa. 3tc

Clear Lake took class A honors at Mason City by defeating the Kanawha high school basket ball team, and Ventura took class B by defeating Corwith in the finals.

TEACHERS—The Times again is stocked on construction paper in the handy 9x12 assorted color packet at 25 cents. tfc

La Vonne Burgess can now boast that she is as big as any of them! She too is recovering from chicken pox this week.

The Salvation Army Appeal was put over Saturday and about $40.00 was contributed to the Salvation Army fund.

Jack for service. Gray and back, largest in territory. Peter Dulce, 6 miles east, 1 mile north of Klemme, 6½ mi. south of Ventura. 2tp

Little Miss Marian Waterman visited with her grand parents, Mr. and Mrs. C. F. Keraus and spent the night with them Saturday.

Tommy Gimer had a siege of the chicken pox the fore part of the week, but at this time Tommy s "pawing the earth and raring to get out again!"

HATCHING EGGS for sale at $1 per setting, $5 per 100; fine thr. b. h gd. S. C. R. I. Reds, high egg production strain. Satisfaction guaranteed. John Josten. 1tc

CORRECTION—Mrs. Elmer Arnold was hostess to the W. F. M. S. and not Mrs. C. A. Arnold as The Times reported last week. The error was our fault.

Mr. and Mrs. Henry Barz went to Hampton Tuesday, and back again the following day, as Mr. Barz was having an examination at the hospital.

Charles (Pickles) Gibbs has been conspicuous by his absence the past few days and inquiring where and why, we learn that he will soon go to work with the Northwestern Cement Co., as clerk in their shipping department.

Our printer's devil, "Bill" Gauger sprung a dirty one on us by picking up the chicken pox somewhere and diserting us when we are swamped with work up to the gills. "Bill" is making a grand and glorious recovery, however, and he promises us to never get it again, so we will let him off this time!

Mr. and Mrs. Arthur Wellemeyer were entertained at the home of Mr. and Mrs. Anton Pannkuk, of near Titonka Sunday to a dandy duck dinner. Mr. Pannkuk worked in the Welemeyer store several years, resigning in 1911 to go farming when he got married to Miss Nettie Haskins, who was then employed in the Wellemeyer household.

There is always something new under the son. The other day our young hopeful came home with a do-chigger called an I C Y P I. To the first five kids in town or elsewhere who can find this funny word in The Times this week, and tell us what an I C Y P I is, what it's made of, where to buy them, the Editor will buy these first five kids one of the new do-chiggers. Now don't all crowd in our office with muddy feet in the wild attempt to get one.

Mrs. Marlin Croner and Dorothy, Lena Schroeder and Grandma Schroeder, were visiting at Belmond on Wednesday

Boxed Stationery, latest tints at 50c, 60c, 75c, $1.00 and $1.25. At The Times Print Shop. 1tc

Hey! Skinney!

Hike over to "Cooney's" and get an—

I C Y P I

Boy! They're better'n ice cream cones and only cost a nickel.

And say! A full line of fine Easter Eggs too!

But don't over-look that ICYPI!

ABY CLINIC FOR HANCOCK COUNTY

ILL BE HELD IN KLEMME ON WEDNESDAY, MARCH 28

ree Clinic For Children Will Be Held In Five Towns Mar. 27-31

Arrangements have been made for series of Baby Clinics to be held n Hancock County during the week f March 26. These clinics are sponored by the Hancock County Farm Bureau and are financed by State nd Federal funds as provided by he Shepard-Towner law

They will be conducted by a physcian, Dr. J. F. Gerken of the Divison of Maternity and Infant Hygiene f the State University at Iowa City. Dr Gerken will be assisted by a urse, Miss Alice J. Pattee of the ame Division.

Clinics will be held a day each in ive different towns of the county. Farm Bureau women will help each ay Children eligible for examinaion in these clinics are those under six years of age. The number hat can be examined in a day is imited In case there are too many applicants, preference will always e given those children who need ttention the most. No children will e seen without an appointment.

Dr Gerken will make a thorough examination of each child brought to the clinic, and will report his findings to the parents with the advice to go to their family physician for treatment if any is needed. Local physicians are urged to be present when their own patients are being examined, as their presence is helpful to all concerned.

Parents wishing to have their children examined should get in touch with the chairman of the clinic most convenient for them to attend, and she will give them a definite time to come. The names of the chairmen are below and the complete schedule is as follows:-

Mar 27, Britt, School Building, Mrs. Ernest Schubert, Chairman.

Mar. 28, Klemme, School Building, Mrs C. A. Arnold, Chairman

Mar. 29, Hayfield, School Building, Mrs S. B. Durant, Chairman

Mar. 30, Corwith, School Building, Mrs. Ed. Oxley, Chairman.

Mar 31, Garner, School Building, Mrs W. J Elling, Chairman.

MESERVEY COUPLE CELEBRATE GOLDEN WEDDING

Forty Attended Celebration Of Mr. And Mrs. Luke Wessels

Sunday, March 11th, was the Golden Wedding Anniversary of Mr. and Mrs. Luke Wessels, of Meservey. In honor of the event forty persons came to help them celebrate the rare occasion. Nine children, thirty grandchildren and one great grandchild were present.

Mr. and Mrs. Pannkuk (their daughter) prepared a good wedding dinner at noon. In the afternoon Rev. Pannkuk delivered an appropriate sermon after which ice cream and cake were served.

Besides the relatives who were present, many friends and neighbors came to extend Mr. and Mrs. Wessels their congratulations.

Those present were: George Wessels and family, Meservey; E. Esk and family, Meservey; Leppo Wessels and family of near Garner; Dick Wessels and family, Meservey; Luke Wessels and family, Belmond; Bena Feckers and two children, Meservey; Ben. Vierkaut and family, Goodell; Fred Quandt and family, Meservey; M Quandt and daughter, Meservey; Mr. and Mrs. Lawrence Young and son; Fred and John Wessels, Klemme. The great grand son present was Bobby Young.

E. F. JACOBS WILL PUT ON AN EXHIBITION OF RANGES

March 19 to March 24th Majestic Ranges Will Be Shown Public

E. F. Jacobs, Klemme hardware dealer, has made arrangements to have a special exhibition of Majestic Ranges all next week, March 19 to March 24th, inclusive

During that week Mr Jacobs will have special demonstrations of the famous kitchen range In addition to special displays Mr. Jacobs will give a complete set of Solid Copper Ware free with every range sold during the week.

Monday, the first day of the demonstration, imediately after school, he will give away souvenirs to all of the children who call at his store

For a picture of the new Majestic Range and the copper ware to be given free, turn to Mr Jacob's adv in this isue.

WOODGATHERER DEGREE IS CONFERRED ON THREE GIRLS

Ten Other Camp Fire Girls Received Beads At Ceremonial Meeting

The Klemme Camp Fire Girls had a Ceremonial Meeting Monday evening, March 12th at the Legion Rooms.

At this meeting three girls became Woodgatherers, and ten Camp Fire Girls received beads. The girls who became Woodgatherers were Nova Koerner, Blanche Gimer and Lucille Keraus, while the following were awarded beads Monday evening Valeria Koerner, Clarice Wellemeyer, Irene Johnson, Reva Elder, Lela Bachman, Blanche Gimer, Thelma Kluckhohn, Nova Koerner, Lucille Krause and Ethel Barz.

Camp Will Sell Doughnuts!

During the business part of the meeting someone suggested that it would be a good idea to sell doughnuts and use the money earned to buy material with which to make Ceremonial Gowns Everyone approved of this plan, but they decided to get the consent of their mothers first.

The Girls will go to the homes and get he orders for the doughnuts at 20 cents a dozen The date has not yet been set but on a certain day they will come and fill your orders. This is a good chance to get good, home-made doughnuts folks, and don't let it go by!

FORMER KLEMME GIRL WED AT MORNINGSIDE

Daughter Of Mr. And Mrs. George Nissen, Of Iowa Falls

Readers of The Times will be nerested in the following item clipped from a Sioux City newspaper:

A college romance culminated saturday night in the drawing room of the Morningside College women's dormitory with the marriage of Miss Mabel Ruth Nissen, popular Morningside college senior, and Melvin Haas, graduate of Western Union college.

The double ring ceremony was performed by Dr. C. A Mock, president of Western Union college.

The bride wore a dress of white georgette over baronet satin and a full length veil caught with a coronet of pearls. She carried a shower of roses bouquet.

Mendelssohn's wedding march was played by Miss Brownie Wood, one of Miss Nissen's sorority sisters. Miss Helen deClercq, of South Bend, Ind., was maid of honor. Miss deClercq and four bridesmaids were attired in dresses of peach, Nile green and rose georgette.

Gerald Haas, of Hubbard, Iowa, brother of the groom, served as best man. Paul Nissen, of Iowa Falls, Ia, sang two solos, "I Love You Truly," and "At Dawning."

Decorations included palms, ferns and potted pink and white primrose. Long pink and white tapers provided special lighting effects.

Following the ceremony the couple was honored at an informal reception.

The bride is the daughter of Mr. and Mrs. George Nissen, of Iowa Falls, Ia.

Mr. Haas is the son of Mrs. F. I. Haas. of Hubbard, Ia. The parents of both attended.

REINHARD UFKEN

Mr. Reinhard Ufken was born December 31, 1881, in Emden, Germany, and died near midnight on March 12th, 1928 in a hospital at Mason City, Iowa, where several days before he had submitted to a major operation.

Mr Ufken lived in Germany until he was nearly twenty years old. In that country he received his education and training in religion. He was baptized and confirmed in the Reformed faith. At that time he migrated to America and came to this locality where he made his home with his uncle, Mr. Elko Buss.

After residing here a number of years and thinking that a change of climate might be conducive to his health he went west where he spent some years.

About seven years ago he went to New York where he took up farming with his brother Frank. After five years of farming he went to Milwaukee, Wis., where he found employment as a clerk in a hotel which position he held until four weeks ago when he resigned, and came here to his old home with the Buss family.

While by outward appearance he was hale and robust yet he was not a well man for he suffered from an affliction which at various times had caused him trouble.

However, little did he or anyone else realize that his condition was so critical or that death was so near.

On Thursday of last week he went to Mason City for a medical examination when it was deemed advisable that he submit to an operation which he had on Saturday and which brought on the fatal results.

Deceased is survived by two brothers, Cuno of Milwaukee and Frank of New York. Both are present to attend the funeral which is to be held Friday afternoon of this week at the Methodist church, conducted by Rev A. W. Gauger.

The only other relatives are the Buss family. Our sympathy is extended to these bereft of a loved one.

Interment was made in the Klemme Cemetery.

—Rev. A. W. Gauger.

MEYER-GIBBS

At the parsonage of Rev. A. B. Gedye, at Radcliffe, Iowa, on Sunday afternoon at five o'clock occured the marriage of Miss Emma Pearl Meyer of Mason City, Iowa, to Mr. Charles A. Gibbs, of Klemme, Iowa.

The young couple had hoped to steal a march on their Mason City and Kemme friends and keep the affair a secret until they began to keep house about the first of June. However, in this day and age, news travels rapidly and the happy event soon became general knowledge.

The bride is a daughter of Mr. and Mrs. August Meyer, of Mason City, and is an accomplished young lady At present she is employed in a business office at Mason City.

Everyone in Klemme knows the groom—one of the finest young men of our acquaintance in Klemme, the eldest son of Mrs. Emma Gibbs.

"Pickles," as we know him better is a former employee of The Times Office, working at the trade while attending high school here. He is a graduate of the Garner high school and later took work at the Upper Iowa University at Fayette. Prior to going to college he was employed at the Northwestern Cement Plant at Mason City. He will again work for the Company in the near future, having secured a good position in their shipping department.

Mr. and Mrs. Gibbs will be at home to their many friends after June first, Mason City, Iowa.

We offer our sincere congratulations.

QUANDT AND GIBBS RE-ELECTED SCHOOL DIRECTORS

Monday's school election in Klemme was rather a quiet affair and not much excitement was caused.

Three men were in the race for the two offices of a three year term of director: C. Quandt, H. R. Gibbs and D. P. Anderson. The two former were up for re-election to the office.

Quandt lead the race with 110 votes, Gibbs 98 and Anderson 30.

Two ballots were discarded as being "spoiled."

LIBERTY TOWNSHIP VOTES FOR ANOTHER NEW SCHOOL

Progressive Spirit Of Community Is Shown By Large Favorable Vote

Liberty Township, at its annual school meeting, again voted for a new school house, to be built in District No. 6. The vote was nearly unanimous in favor of the project as forty-eight voted in favor of and but four against the new building.

Liberty Township is made up of a very progressive group of people and they take a pride in having n their township the best of rural schools. The old school buildings are being torn down and new school houses are being built at the rate of one and two buildings a year. The past year a fine brick school was built just west of Klemme in District No. 7.

Not only do the people of Liberty Township look with favor toward better schools, but they also take a pride in building good roads. To accomplish this double building program it is necessary for them to open up their pocket-books, in addition to the regular taxes, to put over a new school or a better road. Dist. No. 3 people subscribed $400.00 and school Districts 1 and 2 subscribed $700.00 for general improvement and gravel of their roads.

Only where harmony rules is such progress possible.

KLOTZBACH-ANDERSON

On Wednesday evening, March 14, 1928, at the Levi Klotzbach home in Klemme, a quiet home wedding took place when their daughter, Ilo, was joined in marriage with Mr. William Anderson, of Eagle Grove, Iowa.

Rev. A. W. Gauger solemnized the marriage.

Only immediate relatives were present to witness the ceremony. A six o'clock wedding dinner was served immediately after the ceremony.

For the present the newlyweds will make their home in Klemme. The groom has for some time been employed by Mr. Albert Schmidt on his farm.

Here is wishing the happy couple a long and happy life.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

Nine representatives attended the Men's Meeting in Kanawha on Friday evening. A fine program and a time of social fellowship made it a meeting mighty worth while.

Bad roads will greatly interfere with Church activities as it does with all other activities for a time. However, let those who are not affected thereby give their best services so every activity of the church keeps moving up to par.

During this month St. Mark will be our book for Bible study. This should be a double interest since our S. S. lessons are taken from Mark at this time

Our Midweek services will be held in the Church from now on

THEY LIKED ICYPI

Friday evening after school the Times Office was fairly stormed by school kids who had read about the new ice cream confection, "ICYPI" in The Times and requested a ticket to procure one at the Crystal Cafe. The Editor had promised that the first five to read the adv would get an ICYPI free. A surprise had been kept back and twenty-five tickets were issued instead through the courtesy of Conrad Quandt, proprietor of the Cafe. Those who received tickets were: Marian Waterman, Carmen Kluckhohn, Bennie Schaefer, Max Barz, Dorothy Croner, Geo. Stokesbary, Kenneth Kluckhohn, Alvin Keeper, Raymond Schuldt, Willis Busch, Ailene Lau, Harold Jost, Clarence Kluckhohn, June Ludeke, Doris Ludeke, Grace Hartzell, Laura Lanahan, Buster Jorgenson, Nova Koerner, Thelma Kluckhohn Dorance Day, Valeria Korener, Lucille Kraus, Doris Carson, Byrnes Missman.

It is possible to improve bluegrass pastures by discing and seeding other crops on them in the early spring. Detailed information on this subject may be secured by writing to the Bulletin Section, Iowa State College, Ames, for circular 89.

DOINGS AT SCHOOL THE PAST WEEK

D. S. GIRLS SERVE BANQUET TO BOARD AND FACULTY

Is Annual Event Of Home Economics Class Of High School

Our Freshman girls of the Home Economics Department of our high school, directed by Miss McGinnes, their instructor, prepared and served our janitor, school board members, their wives, and the school faculty a very delicious dinner on Tuesday evening of this week. Everything went well and we believe the girls received some very valuable training in their culinary course.

Mr. Karl Krause very kindly provided a radio and Coach Heidel tuned in entertainment from such popular centers as Shenandoah, Omaha, St. Paul, Chicago, Shreveport and "Little Old New York." We are greatly indebted to Mr. Krause the entertainment provided for occasion. It added immensely to the pleasure of the dinner hour.

High School Staged Campaign

Our high school recently staged a campaign for subscriptions to the Crowel Publications, as Woman's Home Companion, Farm and Fireside, American, and Mentor. Our students sold an even $50 worth of the publications and will employ their share of the commission for selling toward the purchase of fiction for our school library.

Miss Shepherd Visits School

A Miss Shepherd of the extension department of our State Teachers College was given a warm welcome to our primary rooms one day last week. Her mission is to visit the schools of our state and confer with grade teachers especially in primary grades with a view to improving the quality of work for the children.

Our P. T. A. members will remember her for the silent reading demonstration given at one of our programs two years ago. She happened at that time to be working with Miss Buchan and Miss Lorein. She spoke very highly of the work she has found our teachers doing in Klemme and of the general order of our school. She left here for Britt.

NINE CAR LOADS OF STOCK IN SATURDAY'S SHIPMENT

Shipping Association Leads With 5 Carloads of Stock

Live stock shipments for the week end totaled nine car loads consisting of seven car loads of hogs, one of cattle and one mixed car load.

Of the above number the Shipping Association had three hogs, one of cattle, and one mixed load. C A. Larsen shipped four car loads of hogs. All were shiped to the Chicago market this week end.

SCHOOL BUILDING PROGRAM IS VOTED DOWN IN AVERY

Proposition Lost By Only Three Votes, 38-41

The hoped for school house building program in Avery Township received a set-back when the proposition was voted upon Monday by a vote of 38 in favor of building two new school houses, and forty-one against the program.

The proposed new school houses were to be built in Districts 4 and 5, as a beginning of a building program to continue until all schools had been rebuilt.

Backers of the building program movement say they are going to try again in a short time.

Ames Abe Says:

It takes rain toshow up dispositions. Which kind have you got? The kind that gets wet and draggy like a hen's feathers, or the kind that gets bright and sparkly like nice, new, green asparagus in the springtime?

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

Are They Married?

"Do you know I have a very small mouth? In the glass it does not look large enough to hold my tongue."

"It isn't."—Tit-Bits.

Custom is a poor excuse for making the same error twice.

That Cold

May End in Flu Check it Today

There's a way to do it—HILL'S. Does the four necessary things in one. Stops the cold in twenty-four hours, checks the fever, opens the bowels, tones the entire system. That's the aid you need. Don't be satisfied with anything less. Go right now and get HILL'S, in the red box. 30c.

Hill's Stops Colds

HILL'S

Cascara—Bromide—Quinine

A Raw, Sore Throat

eases quickly when you apply a little Musterole. It penetrates to the sore spot with a gentle tingle, loosens the congestion and draws out the soreness and pain and won't blister like the old-fashioned mustard plaster.

Musterole is a clean, white ointment made with oil of mustard. Brings quick relief from sore throat, bronchitis, tonsilitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds on the chest.

To Mothers: **Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.**

Jars & Tubes

MUSTEROLE

WILL NOT BLISTER

Better than a mustard plaster

Remarkable Resemblance

After more than a dozen people who knew him intimately had identified a body as that of Joseph Gregg and the funeral procession had started, Gregg walked into the sheriff's office at Salinas, Calif. Deputies were sent out to overtake the hearse heading for Monterey with the body. They brought it back, when Gregg himself viewed the remains and agreed that the dead man was his double. The body was held for identification and another inquest ordered.

Does Your Housework Tire You?

Mason City, Iowa.—"I was all rundown in health and became so draggy I could not do my work. I was at a loss what to do, for nothing I tried had been of any benefit to me.

Finally, I began taking Dr. Pierce's Favorite Prescription and it helped me at once. I started to pick up and regain my strength and my complexion became clear and rosy. I am sure Dr. Pierce's Favorite Prescription has been of more benefit to me than any other medicine I have ever tried."—Mrs. Della Barlow, 127-2d St. S. W.

History in Legends

An Indian chief has dictated to his secretaries a history of his tribe from the creation of the world as it is related in legends.

Erland Nordenski, the Swedish explorer, who has just returned from Panama, has brought back a copy of the history, which he regards as one of the trophies of his expedition.

His special interest was the Cuna tribe of the Atlantic coast. They are people of good intelligence and culture who cling to their old traditions. The chief who dictated the history employs two secretaries, one familiar with English, the other with Spanish.

Drink Water If Back or Kidneys Hurt

Begin Taking Salts If You Feel Backachy or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders. By all means, drink lots of good water every day.

Scots Save Flax Time

A new process for preparing flax without retting is being exploited in Glasgow, Scotland, that is said to reduce the time to one-twelfth of that ordinarily required.

Bad Speech

Jean—Do you like my teeth?

Harvey—Dearest, I think they're immense!

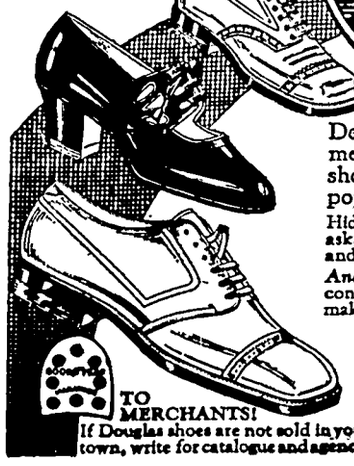
When in doubt it is a good plan to tell the truth.

W. L. Douglas Shoes

FOR MEN, WOMEN AND BOYS

THE NEWEST STYLES FOR SPRING

America's Best Known Shoes



HERE'S A WAY TO SAVE MONEY!

Read the following statement . . .

Despite the fact that leather prices have gone up tremendously in the past several months W. L. Douglas shoes for Spring are the same high quality at the same popular prices.

Hides increased 75% to 85% in price during 1927. "But", you ask, "if that is true, how can Douglas Shoes sell at the same price and still be as good as ever?"

And here's why—early in 1927 we foresaw this rise in prices—we contracted at the prevailing low prices for enough fine leather to make the shoes we are offering this Spring in 120 W. L. Douglas stores in the principal cities and through reliable dealers everywhere. *A fair and square retail price stamped on the soles of Douglas shoes at the factory, guarantees honest value.*

Men's $5 to $8—Women's $5 to $8—Boys' $4 to $5

Catalog of New Spring Styles mailed on request.

W. L. DOUGLAS SHOE CO.

173 Spark Street, Brockton, Mass.

TO MERCHANTS! If Douglas shoes are not sold in your town, write for catalogue and agency.

DAIRY FACTS

SUMMER PASTURE FOR DAIRY COWS

(Prepared by the United States Department of Agriculture.)

One of the hardest-working animals on the farm is the high-producing dairy cow. Proper feeding to supply her with the nutrients necessary for milk production is essential at all times. The fact that proper feeding is neglected in summer more often, perhaps, than at any other season, is due, no doubt, to the mistaken idea that pasture is an all-sufficient feed.

Some hints on the feeding of dairy cows in summer are presented by J. R. Dawson, dairy husbandman of the United States Department of Agriculture, in a six-page illustrated leaflet issued by the department. It is known as Leaflet No. 7-L, and copies can be obtained on application to the United States Department of Agriculture, Washington, D. C.

A cow producing as much as 35 pounds of milk a day, Mr. Dawson says, cannot ordinarily eat and digest enough grass to furnish all the nutrients for her needs. A cow producing only 20 or 25 pounds per day will scarcely be able to get sufficient nutrient out of the good pasture grass which she can eat to keep up this amount of production. Yet thousands of farmers expect their dairy cows to produce more than this during the summer on poor pastures with no additional feed.

In addition to good pasture, cows producing more than 20 pounds of milk daily should be given one pound of grain to each four or six pounds of milk produced. The grain may be a mixture of the ordinary farm grains such as corn, oats, wheat bran, or barley, and should always be ground. For cows producing more than 35 pounds of milk daily a grain mixture should contain one high-protein concentrate, such as the oil meals; otherwise the ration will be too low in protein in comparison with the carbohydrates and fats.

When pastures are poor or dry, it is advisable to supplement them by other succulent feeds, such as summer silage or crops grown to be fed green. Plans should be made now for a supply of summer silage and green crops to supplment pastures.

Superphosphate Adds to Great Value of Manure

Dairy farmers have much to gain by applying superphosphate (acid phosphate) to their land with manure, it is pointed out by a recent statement for the press issued by the New York State College of Agriculture at Ithaca. The authorities give the following directions for using superphosphate in this way:

"Scatter it in the stalls and gutters at the rate of 1½ to 2 pounds daily for each cow. It is a good absorbent and is a sanitary material to use in the dairy barn. Farmers who do not wish to scatter it in the stalls and gutters may spread it over each load of manure at the rate of 50 to 75 pounds to a load. If manure is stored, scatter it over the stored manure every few days at the rate of 40 to 60 pounds for each ton of manure.

"Farmers who have tried this plan find it saves time and conserves the valuable parts of the manure."

Lice Seriously Retard Good Growth of Calves

Lice cause great annoyance to calves and may seriously retard growth if present in large numbers. They are difficult to control, but about the most satisfactory treatment is dipping or washing with a coal tar dip solution. This method cannot be used during cold weather, but should be used the first warm, still spring day. Soak the calves to the skin at every point with a 2 per cent solution of some good coal tar dip. In a week or ten days the treatment should be repeated to get the young lice which have hatched.

Dairy Hints

Starve the calves, and the cows will starve you.

* * *

In churning, the speed which gives the greatest concussion is most effective.

* * *

The proved sire seems to be the best solution of the dairy breeding problem.

* * *

Selling your neighbor unprofitable cows in unneighborly, but then there is the butcher as your means of escape.

* * *

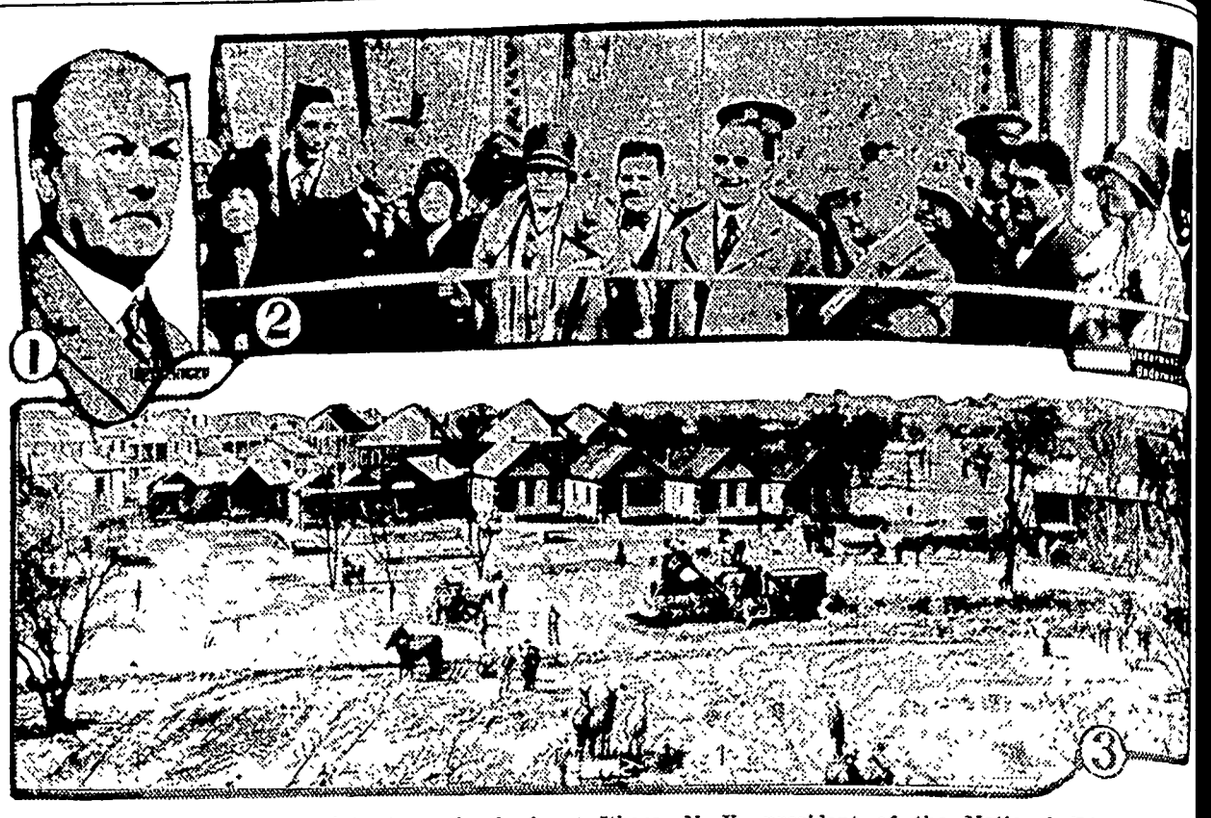
The dairy barn should be arranged to admit plenty of fresh air and sunlight and provide for convenient and adequate storage of feed.

* * *

Cooling cream and milk immediately after separating takes out the animal heat and removes the smothered flavor so often objected to.

* * *

Proper housing of dairy cattle will lower the cost of production of dairy products and will make the labor connected with the handling of dairy animals less objectionable.



1—Frank D. Boynton, superintendent of schools at Ithaca, N. Y., president of the National Education association. 2—Opening the new bridge at Bay St. Louis, Miss. 3—Breaking ground at Houston, Texas, for building for the Democratic national convention.

NEWS REVIEW OF CURRENT EVENTS

James A. Patten Bares Oil Bond Deal in Republican Campaign Fund.

JAMES A. PATTEN, veteran Chicago Board of Trade operator, testifying before the senate Teapot Dome investigating committee, related how he unknowingly handled $25,000 of the $260,000 in Liberty bonds advanced by Harry F. Sinclair to help wipe out the Republican national committee's 1920 Presidential campaign deficit.

The bonds were turned over to him in December, 1923, by the late Fred W. Upham, then treasurer of the Republican committee, according to Mr. Patten, who declared that while he knew nothing at the time of the source of the bonds he did suspect—because he, rather than a bank, had been asked to buy them—that something was wrong.

The suspicion became so strong, Mr. Patten, continued, that after a troubled night of thought, he contributed the $25,000 in bonds to the building fund of the Evanston hospital.

Mr. Patten's testimony, as well as the inability of William V. Hodges, present treasurer of the national committee, to find any record of a $160,000 contribution by Sinclair in the books turned over by Upham, strengthened, according to Senator Thomas L. Walsh (Dem., Mont.) his own contention that Sinclair's contribution deliberately was concealed and that the bonds were sold to unsuspecting individuals who were credited with gifts in the amount of their bond purchases.

A CONSPIRACY against organized labor on the part of the courts, railroads and state authorities was charged by John L. Lewis, president of the United Mine Workers of America, in testimony before the senate committee investigating conditions in the central bituminous coal field.

Mr. Lewis assailed the railroads on their rate structure; condemned the courts for use of the injunction weapon against strikes; scored the use of state police in operations against "peaceful assemblies" of striking or unemployed miners, and shot some barbs at coal interests dominated by John D. Rockefeller, Jr., and Secretary of the Treasury Mellon.

In reply to a question by Senator Watson, Indiana, as to the manner in which congress might aid in remedying conditions of employment and disorganization which had been described by the witness, Mr. Lewis said:

"Partly by consolidation of the units of the industry. Thus you will aid in removing the cut-throat methods of competition among the bituminous companies. You will remove disorganization and fear. You will remove conditions which now lead a coal operator to say: 'I am in favor of paying an American standard of wages, but don't tell anybody I said so.' It is doubtful if the bituminous coal industry pays 1 per cent after its fixed charges are paid. The industry should be treated as the steel industry has been treated."

ELIMINATION of pollution and improvement of the sanitary quality of the water in each of the Great Lakes will be undertaken immediately as the result of an agreement reached by representatives of the health departments of eight states.

The representatives, meeting in Gary at the fifth annual convention of the Lake Michigan Sanitation congress, reached, in a resolution, a "Great Lakes Drainage Basin Agreement," in which the health departments of Minnesota, Illinois, Indiana, Ohio, Pennsylvania, Michigan, and New York are pledged to conduct a united and vigorous campaign to stop pollution.

Co-operation by the United States public health service was promised by H. R. Crohust who was sent from Washington. Doctor King was chosen chairman of the committee named to outline its plan of action.

GEN. ALVARO OBREGON, unopposed candidate to succeed President Calles of Mexico, has issued a statement declaring the conference at Havana a failure and discussing at length the question of Mexican immigration into the United States.

"It has been said that the inferior conditions of Mexico's laborers make them undesirable guests there, and that they go to the United States with the object of propagandizing socialistic ideas," said General Obregon. "But the truth regarding the inspiration of this bill (now before the house and senate committees at Washington, seeking to restrict western hemisphere immigration) is not yet known.

"Every Mexican laborer in the United States produces more than he consumes, thereby establishing co-operation both for private and public riches. Therefore, there is no pretext, in the most rudimentary logic, for the restriction of Mexican immigration."

INFORMATION as to unemployment is sought from the secretary of labor in a resolution adopted by the senate after a two-hour debate with a political tinge.

Senator Wagner (Dem., N. Y.), sponsored the resolution and placed the responsibility for present conditions at the door of the Republican administration. He accused President Coolidge of spreading misinformation in his annual message, and mentioned Secretary of Commerce Hoover as being responsible also for reports reflecting unwarranted optimism.

Senator Wagner said that while federal agencies do not compute the exact number of unemployed throughout the United States estimates from private sources show a total of 4,000,000 men out of work.

"I cannot say who furnished the President with this misinformation about high wages and plentiful employment at a time when all the signs and all the evidence indicated that wages were dropping and the ranks of the discontented were daily being recruited by new armies of the unemployed," Senator Wagner said. "But I do know that it was a grave responsibility to lull the congress and the nation into the belief that conditions were satisfactory; its effect was to lead to congressional and national inaction so that the crisis was permitted to become more acute."

CHARLES C. EBERHARDT, United States minister at Managua, has communicated to the government of Nicaragua the determination of the United States government to see that Nicaragua has a fair and free election. Mr. Eberhardt has informed the Diaz government that further delay on the part of the Nicaraguan legislature in passing an adequate election law would compel the United States to take steps necessary to see that its obligations in Nicaragua were carried out.

IBN SAUD, king and sultan of Nejd, officially has declared a holy war against the desert Moslems of Iraq and Transjordiana, British mandate states. This move, coupled with Egypt's rejection of a proferred treaty, has caused Great Britain to slap down the lid on Egypt's pretensions to independence. The blow takes the form of a note sent to the Egyptian government by Lord Lloyd, British high commissioner, declaring that it will not tolerate the passing of any laws by the Egyptian parliament which are likely to hamper his administration in Egypt or hinder the British government in its duty of defending the interests and security of foreigners.

The note is directed at three recent laws passed by the Egyptian parliament, but not yet signed by the king. The first permits Egyptians to carry arms; the second repeals a law regulating the public assembly and granting practically free, uncontrolled public meetings, and the last deals with the methods of election of village mayors.

All these, it is believed, were passed by the Egyptian parliament to see how far Great Britain would allow the Egyptian Nationalists to go. The position of King Fuad is difficult. He is a nominee of the British government and not particularly popular in Egypt, and while he has to obey the British, who put him on the throne, he has also to make a show of playing up to the National sentiment. In the circumstances, it is expected, however, that he will veto the three laws.

Men, armored cars, tanks and airplanes were quickly mobilized along the border of Transjordiana by the British authorities to turn back any attack by the tribesmen.

THE door to the border has been unlocked for Canadians in a decision handed down by the Court of Appeals reversing a decision of the Federal court of Buffalo. The decision was made in the case of two Canadians who were arrested on December 1, 1927, as they were entering this country without having unexpired consular immigration visas as required by the immigration act of 1924, and by rule 86 of the Department of Labor. The effect of the higher court's decision is that Canadians may, without restriction, enter the United States to work or seek employment and return to their homes in the evening.

FULL returns from the general election in Japan place the balance of power between the government and the opposition in the hands of 14 independents, of whom Yusuki Tsurumi is one of the leaders. Mr. Tsurumi is well known in the United States and is known to be friendly to this country. A happy augury for good relations between Japan and the United States is seen in this by Mr. Tsurumi's friends in this country. It is also believed that it will lead to a more liberal policy on the part of Japan toward China.

SENATOR THOMAS WALSH of Montana, who has been injected into the race for the Democratic nomination for the Presidency by party leaders opposed to Gov. Al Smith of New York, received a setback in his first trial of strength with the New York governor. The scene of the conflict was the Democratic state convention in South Dakota. Smith received 43,876 votes to 41,213 for Walsh.

South Dakota Republicans indorsed Frank O. Lowden of Illinois as their Presidential preference without opposition.

The Iowa Republican convention instructed the seven delegates at large for Governor Lowden. The state's twenty-two district delegates, two from each of the eleven congressional districts, were "strongly urged" to cast their votes for Lowden. Under the rules only the delegates at large can be instructed by the state convention.

Kansas Republicans in state convention indorsed the Presidential candidacy of Senator Charles Curtis of that state.

WHEN the disarmament commission meets in Geneva the British government plans to lay before it a scheme for limitation of tonnage and extension of the age limit in battleships.

An interesting note on government reports on the fleets of the world, just issued, shows Great Britain still is vastly superior to any other sea power. At first sight, America and Great Britain appear almost equal, but an analysis of the report proves Britain's superiority.

Take the matter of battleships, where the 5-5-3 ratio is supposed to obtain. Great Britain has sixteen battleships, the United States has eighteen, and Japan six, but Great Britain has four new cruisers, while the United States has none. In cruisers, Great Britain has forty-nine and the United States has thirty-two, while Great Britain has eight aircraft carriers and the United States has only three.

In the case of destroyers the United States apparently is far ahead with 309 to Great Britain's 150, but most of the Unleed States' are small and obsolete, while Great Britain's are all up-to-date.

Similarly, in submarines, Great Britain has only 55 to the United States' 121, but again the majority of America's are small, old, and fit only for coast defense.

FORMER members of the house or senate, found lobbying for or against legislation within two years after their retirement, would be liable to at least two years imprisonment under a bill introduced in the house by Representative Edgar Howard (Dem., Neb.).

LIVE STOCK

NSHINE CUTS COST OF PORK

the swine feeding tests at the experiment station one of the rtant observations made was the of sunlight on nutrition. Those that were fed out in the open ey got plenty of sunlight made t the same daily gain as the ones inside. But they did it more omically and on less feed.

e pigs fed inside required an age of 425 pounds of feed for hundred pounds gain to reach a ht of 225 pounds, while those fed in the sunlight reached the same ht, with only 391 pounds of feed each hundred pounds increased ht. The outside fed pigs made 2 more per head over and above costs than did those fed inside.

r. Evvard, who was in charge of experiments, thinks that sunshine responsible for the difference. He convinced of this because of the that the outside fed pigs did not nearly so well during the early t of the feeding season, when the s were short and cold. On the er hand, after the days became ger and more mild, there was a rked improvement in their gains. ring the early part of the feeding ison it took about 10 pounds less d per hundred pounds gain for the side fed pigs, but at the close, en the days were longer, these pigs about 70 pounds less feed for h 100 pounds gain than did those inside.

The conclusion drawn is that prob- y in midwinter, during the short rs and severe weather, it is well feed pigs inside. When this is ne, however, they should, by all ans, have alfalfa hay as a source vitamine D to take the place of e sun's rays, and to aid in assim- ting minerals. As soon as the ys lengthen and the weather be- mes more mild, the pigs should be ven their feed outside.

eeding Baby Beeves to Make Good Finish

The standard baby beef ration is e to ten pounds per head daily of over or alfalfa hay, ten or twelve unds of corn and one or two pounds linseed oil meal. A few pounds of ats can be substituted for part of the rn in the ration, but with prices as ey generally prevail it seems as ough cheaper results are usually ob- ined with straight corn. Cottonseed eal can be substituted for the lin- eed oil meal, but unless the cotton- eed meal is $10 a ton cheaper, it eems as though the linseed oil meal as a slight advantage. If neither lover nor alfalfa hay is available, it sually pays to buy enough so that t least two pounds of leguminous ay can be fed per head daily. The alves can be started out on only four r five pounds of corn per head daily, ut it is well to increase the ration s fast as the appetite permits until hey are on full feed.

Cod Liver Products of Some Value to Swine

Does it pay to feed cod liver oil or od liver meal to fall pigs in dry lot receiving a good basal ration of yel- ow corn, 60 per cent protein meat meal tankage and simple mineral mix- tures?

Tests at the Iowa experiment sta- tion showed that high-grade cod liver oil has a nutritional value. For mar- ket hogs properly fed the added ex- pense of the cod liver products is not justified, thinks John M. Evvard. The man who has pure breds he is fitting for shows is in a much better position to make a profit from such materials. Further tests will be made, using oth- er basal rations.

Live Stock Notes

Experimental work in England has shown that iron is very necessary for young swine.

* * *

Proper care and management to in- sure a good calf crop will increase profits from beef cattle raising.

* * *

Are you making plans now for good hog pastures next summer and fall? Alfalfa is conceded to be the best pasture. Next comes sweet and red clover, rape and mixtures of rape, oats and sweet clover.

* * *

Alfalfa hay is excellent for breed- ing cattle and sheep. It has proven at one and the same time to be the most palatable, the most productive and most permanent type of pasture for hogs.

* * *

Alfalfa gives us one of our most valuable hays, but because of danger of bloat is not a safe pasture except for hogs and horses.

* * *

While cattle and sheep do some- times bloat when running on sweet clover pasture, there is not the same danger as with alfalfa.

* * *

Opinion among hog breeders is pret- ty evenly divided between the A-type and the gable roof type of individual hoghouse, while still others favor the small shed-roof type.

Careful Planting Aids Vegetables

Four Important Points to Keep in Mind in Moving Young Seedlings.

Checking the growth of vegetables by careless methods of transplanting means a poor growth and yield.

Glenn O. Randall, extension horti- culturist for the North Carolina State College of Agriculture, gives four im- portant points to keep in mind when moving the young vegetable seedlings from the plant bed to the open garden or field. He states, first, that the gar- dener must not disturb the roots any more than is possible; second, the seedbed should be soaked shortly be- fore the plants are moved; third, the soil should be thoroughly prepared to receive the little plants, and, fourth, delicate plants should be hardened off before planted in the open field.

Don't Disturb Roots.

"In order not to disturb the roots, the gardener should take up a good ball of earth with each plant as this will prevent breaking of the rootlets," says Mr. Randall. "Wetting the seed- bed before removing the plants will allow them to withstand the loss of moisture in the field. If roots are pre- vented by a lumpy or poorly prepared soil from taking hold and adjusting themselves as rapidly as they should, the plants will grow off slowly. It is often impossible to firm the soil around the plants because of poor soil preparation.

Hardening Plants.

"Hardening the plants to be trans- ferred from a hot bed or cold frame is the process of gradually exposing the young plants to the weather. This is done by first ventilating the bed for a few hours during the warmer part of the day and then gradually remov- ing the cover entirely. This helps the plants to withstand the cool weather and also helps them to withstand the hot weather when finally trans- planted."

Mr. Randall states that the observ- ance of these simple precautions will aid the gardener to be more success- ful with his work and will result in his securing better and more vigorous growth as well as better yields.

Poultry Shipping Rules Effective Jan. 1, 1929

Revision of express regulations rela- tive to shipping coops for poultry will be made effective on January 1, 1029. These new regulations provide that shipping coops must be large enough to prevent overcrowding and top of each coop must be covered by slats not more than one inch apart, or by wire screen containing meshes not to exceed one inch in size. Charges will be based upon the gross weight of coop and contests at the time of ship- ment. Any coop which, with its con- tests, exceeds 150 pounds in weight, will not be accepted.

It was proposed that these regula- tions would be made effective at once, but through the efforts of Harrison F. Jones, secretary, National Poultry, Butter and Egg association, the ex- press company was urged to withhold the new classification in order that shippers might have time to become conversant with the rules before they were made effective.

Considerable loss has been experi- enced in the past through the crush- ing of heads of birds. This will be prevented in the new coops with the slats of the tops closer together.

Alfalfa May Be Sown in Early Spring in Wheat

Alfalfa may be sown in the early spring in wheat or oats, just as red clover is sown, or it may be sown alone in early August on ground spe- cially prepared after removal of a June or early July harvested crop. For summer seeding the ground should be prepared and harrowed at intervals of several days to kill the weeds that start, before sowing the alfalfa. From 12 to 15 pounds of seed should be sown per acre, prefer- ably using a drill, either a special seed drill or the wheat drill set to run shallow.

Whether or not liming is necessary will depend upon the soil; if it is sour, lime should be applied. Inocu- lation is very important, especially if alfalfa or sweet clover has not pre- viously been grown on the land. Stable manure is valuable in starting an alfalfa field. If the land is rather run down, not only apply manure but use from 400 to 500 pounds of fer- tilizer containing 12 per cent of phos- phoric acid and 6 per cent of potash.

Agricultural Hints

The main object of cultivation is to control weeds.

* * *

The rapid rise in the popularity of sweet clover has been nothing short of phenomenal.

* * *

Cement-asbestos shingles can be nailed directly over the existing wooden ones on a roof.

* * *

Planting seed corn only an inch be- low the surface in heavy soil has pro- duced double corn yields in northern Wisconsin.

* * *

Sweet clover seeded in small grain and plowed under the following spring for corn will increase corn yields from 10 to 30 bushels.

Timepiece Hailed as Unique Among Clocks

What is said to be the most intelli- gent clock on earth was recently in- vented by Frank Fontana, a San Fran- cisco jeweler. The unique timepiece not only tells the time in San Fran- cisco and 23 other cities at the same time, but it also gives the moon phase, date and day. Although the entire clock is only 18 by 18 inches square it contains something like 500 sep- arate parts, most of which are in plain view. It took the inventor seven months to build the clock.

As early as the Eighteenth century it was very common practice for clocks to be equipped to tell, besides the time, the month, the day of the month, phases of the moon, etc. But for some reason the practice did not become general. Notwithstanding, the modern "prince of clocks" holds the record of all time in the number of performances.—Pathfinder Magazine.

Death Costly Affair Among the Blackfeet

Among curious customs observed by Indian tribes at the death of a member, the Blackfeet of the terri- tory around the headwaters of the Missouri river had one of the most in- explicable. At the decease of a child the father went outside his lodge and placing earth upon his head wailed loudly. This vocal tolling of bells notified the tribesmen of the sad event and they would come rushing to the lodge to take possession of all the portable property therein they could find. The grief-stricken parents were stripped of all other worldly posses- sions, sometimes not even excepting their clothing. Relatives of the de- ceased child attested their grief by cutting off their fingers—the number of joints severed displaying the de- gree of their sorrow. Any relative who merely wept at the funeral was looked upon with disdain.—Detroit News.

Youth and Love

Keep youth and love by keeping a beautiful skin

Nearly every woman's skin would be lovely if it weren't for one of these six easily-corrected faults . . .

Blemishes
Blackheads
Sallowness
Conspicuous Nose Pores
Excessive Oiliness
Dryness

EXAMINE your face in full daylight—is one of these conditions making *your* skin unattractive?

If so—begin, today, to correct it!

Don't lose the lovely skin that gives a woman such wonderful charm.

The famous Woodbury skin treatments will help you to overcome any one of the common skin troubles named here. Hot and cold water—ice—and cake of Wood- bury's Facial Soap—that is all you need to carry out these world-famous treat- ments, which have helped thousands and thousands of women to gain a beautiful complexion. Simple, clear directions for each of these treatments and the treat- ment for normal skins you will find in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and see what a wonderful improvement it will make in your complexion!

A 25-cent cake lasts a month or six weeks —and every day you use it, it is helping to give you "a skin you love to touch."

ELL TOWNSHIP .... oGr.

Mr. and Mrs. Henry Thiemann were Mason City callers Friday.

Mr. and Mrs. Orville Bridges are helping at the Carl Swanson home.

Mrs Peter Josten was on the sick list this week.

Benj. Mullin is assisting with the chores and other work at the Harry Buss home.

Mr and Mrs. Wm Schlawin were entertained at the Werner Schlawin home for dinner Sunday.

A baby boy was born to Mr. and Mrs Carl Swanson Monday morning

Mrs. John Bock was a visitor at the school in Dist. No. 8 last Thursday.

Mr and Mrs. Albert Tanner and family were Mason City callers Saturday

Mr and Mrs. Frank Kluckhohn and family were entertained at the E C Buentenbach home Sunday.

Rhine Ufkin, who has been staying at the Mrs Elko Buss home this winter, passed away at the Mercy Hospital Tuesday.

Mr. and Mrs. H. H Thiemann and Mildred and Mr. and Mrs. Geo. Thiemann and family all helped with the butchering at the H. J. Thiemann home Monday.

Anumber of people of this vicinity attended the Farm Bureau Meeting held at the home of Fred Grieimann Jr, last Wednesday. A lenghtful lunch was served at noon. Following the lunch a program which was given by the young folks and County Agent L. Nutty, was really enjoyed by all.

FINE CROWD AT ELL TOWNSHIP FARM BUREAU MEETING

Was Hold At The Fred Grioman, Jr. Home Last Wednesday

The Ell Township Farm Bureau held their monthly meeting Wednesday, March 7th at the home of Mr. Fred Greiman, Jr.

A delightful lunch was served at noon which was followed by a fine program given by the young folks of the community, and an interesting talk was given by the county agent, Mr Lee Nutty of Britt and which was enjoyed by all.

Liberty News Notes

(Special Times Reporter)

Earl Kahler was a Belmond visitor Thursday on business.

Henry Helps called at the Oscar Carlson home Wednesday evening.

Miss Helen Lemke was a Sunday visitor at the Oscar Carlson home.

Victor Schoenwetter was a Garner caller Thursday.

Walter Bredlow helped his father Charles Bredlow, haul hay last week

Emil Beier was a Garner visitor Wednesday.

Will Lemke hauled hay from the Herman Stille farm Wednesday.

Mr. and Mrs. Quintin Stille and son were Garner callers Thursday

Miss Lydia Beier visited at the Roy Schaefer home Thursday.

Mrs. Ed. Schaefer of Klemme was a visitor at the Elmer Schaefer hom Saturday.

Ray and Glen Lange were unabl to attend school the fore part of th week due to the flu.

Mrs. Clyde Marshall and Dorothy were visiting at the Henry Wade home Wednesday.

Mr. Albert Lange is much better now and is able to be up and around most of the time.

Earl Kahler had his car cut down and a box put on to make a light truck Roy Schaefer did the work.

Roy Schaefer and Earl Kahler marketed a load of hogs in Mason City Wednesday.

Mrs. Straatman is in Garner visiting at the George Neumeyer home. She has been at the R. R. Lemke home for several weeks

Milvern Schoenwetter, son of Victor Schoenwetter, was unable to attend school several days last week on acount of having the flu.

Miss Mabel Schaefer has been confined to her bed the past week, ill with the flu. Bernice Tanner is the teacher at No. 8 in her place.

Mr. and Mrs. Emil Blumer and children drove to Garner Saturday night to see the play, "Sheperd of the Hills."

Robert and Francis Tanner were unable to attend school the first part of the week on account of the flu.

The Annual Township School Meeting was held Monday afternoon at the Center School. It was decided to build a new school house at No. 6 this next year.

Mr. and Mrs. Floyd Franklin moved on the Chris Schaefer farm the last part of the week. They are well known in the north part of Liberty as they formerly lived near Garner.

Mr. and Mrs. R. R. Lemke and family and Mrs. George Neumeyer of Garner, were in Mason City last Thursday evening, taking in the style show.

Emil Beier, Ben Ridder, Lew Abele, and Emil Blumer drove to Kanawha Friday night to be present for the banquet given by the M. E. Church Men of this part of the District.

Well, Old Lizzie is taking a rest nowdays and Dobbin is wondering what its all about. The roads are in terrible shape in some places. We've decided to postpoue that joy ride for awhile, at least until we forget the last one(?).

Sunday being Otto Lemke's birthday, his wife got up one of her fine chicken dinners and invited in several guests to enjoy the day with them. It is needless to say that justice was done at the table and a very social afternoon was spent by all. Those present were Mr. and Wm. Beier and Grandma Lemke of Goodell, Mr. and Mrs. Eric Clark and Dick of Garner, Mr. and Mrs. John Lemke, Mr. and Mrs. R. R. Lemke and Irene, and Will Lemke and family.

The Farm Bureau Meeting that was held last Friday evening at the Center School was well attended. The play, "Tompkin's Hired Hand," being the principal feature of the evening. Ben Greiman also gave an instructive talk on fruit trees adapted to this township. It was appreciated as we knew that Mr. Griemman knew by his own experience what he was telling to others. Refreshments of cake, sandwiches and coffee were served nad every one had a fine time All must try to remember the next meeting on April 6th. Mrs. Ralph Upmeyer is chairman for this month and we expect something good.

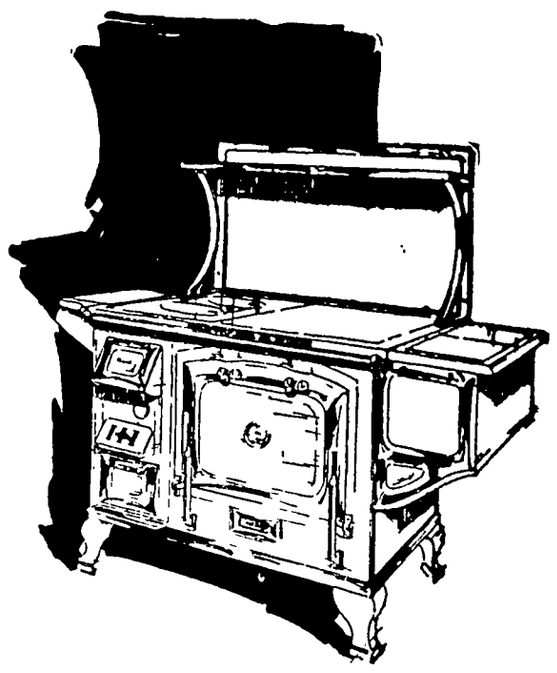
An Interesting Exhibition of

Majestic Ranges

ONE WEEK ONLY—

March 19 to March 24

We extend to you a cordial invitation to attend our Exhibition and Demonstration of GREAT MAJESTIC RANGES which will be conducted by a Factory Representative.



The New Majestic Range

THE GREAT MAJESTIC is the one range supremely worthy of a place in the modern kitchen—in your kitchen. It's spotless, gleaming beauty matches that of your other kitchen furnishings. . . And its unsurpassed cooking and baking ability wll be a continual source of joy and satisfaction. Come! See the various models. See the many conveniences of the Great Majestic Range demonstrated.

FREE—A Complete Set of Solid Copper Ware!

Good cooking utensils are scarce—Copper ware is the best. This Majestic solid copper ware is made special, extra heavy, tinned, nickeled and mirror polished.

Beautiful, Durable, Serviceable
You'll love it—

The entire set is presented gratis with every Majestic Range purchased—but only during this big sale.

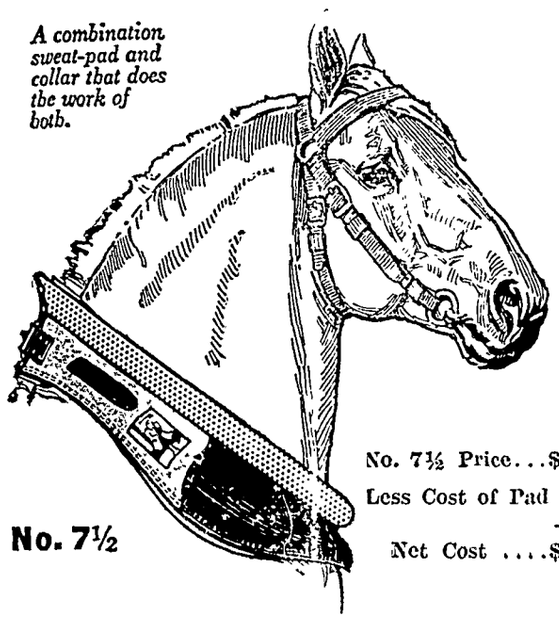
Jim Dandy Collars
Easy on Your Pocketbook

A combination sweat-pad and collar that does the work of both.



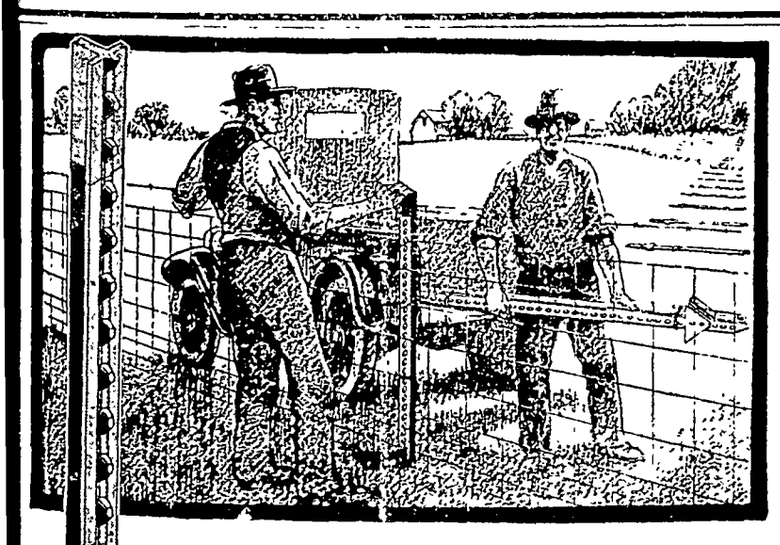
No. 7½ Price...$3.25
Less Cost of Pad .75
Net Cost $2.50

No. 7½

BUILT FOR REAL SERVICE

JIM Dandy collars are reinforced with leather at every point where the wear comes. A heavy Hair Felt interlining built right into the collar, strengthens it, increases the wear and acts as a sweat pad, absorbing the sweat through the ticking face Two row chain stitching both inseam and outseam through the heavy Hair Felt interlining prevents cutting of stitches. Jim Dandy collars are easy on your horse because they prevent sore shoulders and easy on your pocketbook because they cost only about one-third as much as an all leather collar.

Frank Gruetzmacher



"I've found that fenced into small fields my farm will make more money"

WE hear more and more of our farmer friends making that statement every year. Farmers in this community who shift over to a diversified program of farming must find it profitable because they never switch back to the old system.

More and better fences are the key to this new profitable farming program. Good fences depend on good fencing materials—the only kind we handle.

Red Top GUARANTEED **Steel Fence Posts**

Come in and let's see what we can work out together—how a little more fencing on your farm will help you turn waste into profits, get you bigger and better crops and raise the value of your farm.

COUNCIL PROCEEDINGS

Klemme, Iowa
February 6, 1928

Regular meeting of Town Council held at the Mayor's Office.

All members of Council present

Motion made and seconded to allow the following bills:-

A E Finn, January Salary	$85 00
James Kuchar, Installing pump	80.00
Community S. S. Company 125 gallons of gas	20.63
Wm Kirkwood, 10 gallons gas	1 95
Northern Lumber Co., telphone calls and stamps	3,25
Klemme Co-Op Grain Co Coal	7 20
Harry Gram, Hauling Coal	.50
Etchen Auto Company, Repairs	9.45
E F Jacobs, Supplies	17.69
Central States Electric Co, Jan Street Lights	37.11

Motion made and seconded that bills be paid.

Motion made and seconded that the poll tax for the year of 1928 be fixed at $4.00 and $5 00 if not paid before Nov. 1st

The council to act as a committee to interview supervisors in regard to widening corners west of town.

Motion made to adjourn.

A. J. KUDJE, Clerk

Half Million Quit Farming

In 1927, nearly 2 million people moved from farms to towns or cities, while a million and a third moved from towns to farms. Hence, the net farm loss last year was a trifle over a half million, it is stated in a report from the United States Department of Agriculture. The decrease in farm population was less last year than in 1925 or 1926.

Ames Abe Says:

If some parents had their "spank spots" warmed up half as often as they spank or say 'don't" to their kids, civilization would take a sudden boost for the better.

Test Million Cattle A Month

With 19,299,094 cattle under supervision at the beginning of 1928, reported by the Bureau of Animal Industry, United States Department of Agriculture, the scope of cooperative tuberculosis eradication work assumes enormous proportions.

It's time to be thinking of how the yards or fields can be arranged this spring so that the spring pigs and chicks may be raised on "new" soil, on grounds where these classes of livestock have not been kept or where they have not run for several years.

Dried skimmilk added to flour in baking bread makes it possible to get a 10 per cent larger and 4 per cent heavier loaf than without it. The dried milk also adds greatly to the nutritive value of the bread.

Privileges of Peers Growth of Centuries

In England there is always more or less objection to the house of lords, and efforts are constantly made in the direction of "reforming" it in one way or another. The word really means equals, and comes down from the Middle ages, when the great tenants in chief of the crown, that is, those who held their land directly from the sovereign, were regarded as being all equal (for "pares" in the Latin) in law. Gradually a distinction arose between these direct tenants, or greater barons, and the rest. And so the old "pares" became peers. And as their first duty was to attend the king's courts, so bit by bit grew up the custom of attending parliament. Thus originated the house of lords.

The peers have always enjoyed certain privileges. The peer is exempted from serving on a jury, the theory, however, being not so much out of any favor to himself as from a fear that his rank might influence his fellow jurors to his own point of view And in addition, he has the magnificent—though never exercised—power of keeping on his hat in a court of law.

Childish Fear Not to Be Roughly Treated

Fears are very crippling indeed. With wiser training our children might readily escape the specific fears and the general anxieties, timidities and self-doubts which so woefully hamper them. But you can never rout fear with brutal, radical or "heroic" measures. It is cruel to force a child, as is often done, to endure alone just what it most fears. You are not making him brave—no, not even if he conceals his fears to please you. The fear pressed below the surface lives on and festers there.

Ridicule or honest amusement are likewise useless. Fear, no matter how foolish it sounds to the unfearing, is too real a thing to be laughed off. It calls always for gentleness, sympathy, a serious effort to understand the cause, patient reassurance and, in many cases, skillful re-education in which pleasant associations or better understanding on the child's part drive out the fear.—Edna Brand Mann in the New Age.

Varieties of Canaries

Canaries were known in a domesticated state at the close of the Fourteenth century, though they may not have been common, as Gesner, who wrote in 1555, said that he had never seen one. Variation among them began early, as partly yellow birds were known at Nuremberg in 1611 and in 1677 wholly yellow canaries (also a white variety) were recorded from Augsburg, in Germany, an early center for the fancy The various forms have had their origin in distinct geographic areas, and though some are almost extinct at present all at one time or another have had a devoted following of fanciers. At present at least 14 distinct strains, with a large number of varieties, are known.

Nature's Eccentricities

Visitors to the Lake district of England are familiar with the disappearing island of Derwentwater but few know that it possesses a mountain that rocks. The Napes Needle on Great Gable is loose, and may at any time came crashing down the mountainside

Wasdale and Wastwater are at the foot of the Great Gable, which is reckoned the most perfect mountain form in Britain Wasdale head, a great center in the season for crag-climbers and hill-walkers, has three well known boasts—that it possesses the highest mountain the deepest lake and the smallest church in England The roof of the church is said to be partly formed of the hull of a Norse galley.

Comparatively New Word

Nowhere has the practice of cheering taken such a place as in America It has no real analogy at English schools and universities. English crowds, it is said, became familiar with it only about 20 years ago when the New Zealand football team introduced the cries of the Maoris into their matches there. The word cheer in the sense of shout of encouragement or applause is really of recent coinage. The meaning does not appear in Johnson, and Defoe speaks of it as a sailor's word.

Aim Is World Peace

The World Peace foundation known until 1911 as the International School of Peace, was founded by Edwin Ginn of Boston Mass., in 1909. Its object is to bring about by education through the college, the press, the pulpit and the platform the peace and better order of the world. The management is vested in a board of trustees, a board of directors (corresponding to the faculty of a college) and an advisory council, the individual members of which are of high national and international reputation.

Paradox

Back in 1900 man rushed along on horseback or in horseless carriages at five or ten miles an hour. And in thirty-odd years he reached his final destination—the grave.

Nowadays by auto and airplane man dashes along at one to two hundred miles an hour. But it takes him, on an average, about fifty years to reach his final destination—the grave.

Moral: What's the use of hurrying?

Paul Mueller, assistant buttermaker at the creamery had a birthday last Friday and to keep Paul feeling young his good wife prepared a big dinner for him and a number of his friends were invited to partake of the delicious morsels Those present were Mr. and Mrs. W M. Kirkwood, Mr. and Mrs. Emil Krause and daughter, and Verle Wooton, of Des Moines.

Farmers!

Now Is The Time To Have Your

Disc Sharpened

I have a modern machine to do the work and can sharpen your disc to suit you—Just let me know how you want it—ground thick, thin or medium. I do the work right on your farm, and you do not need to touch your disc—I will attend to everything. Satisfaction is guaranteed.

GARNER, IOWA

"PROSO," A NEW FIELD GRAIN FROM RUSSIA

An Ideal Chick Feed

A nursery in northern Iowa has been growing PROSO for the past twelve years, using it as a cover crop for cleaning ground, getting it ready for setting to strawberries and other nursery products. The grain has practically the same analysis, pound for pound, as wheat, and in Russia it is used for making bread, etc., as we use wheat. A single PROSO plant stooled and branched and grew 21 heads of grain. One of the larger heads counted out 1,185 seeds. A conservative average for the 21 heads was around 500 seeds to the head or a total of 10,500 grains of seed on the plant grown from a single seed, making an increase of over ten thousand fold.

This new grain makes an ideal chick feed, and can be fed in the bundle, as it comes from the threshing machine, or ground into mash alone or in combinations with other grains. It is a great egg and meat producer. PROSO plants grow to about the height of tall oats and the crop is harvested and threshed the same as oats. The seed may be planted any time after corn planting to July 4th the crop being earlier to mature than either millet or buckwheat and a much heavier producer of both grain and straw, the latter making a splendid rough feed for all sorts of stock. For use in clearing up land infested with Quack or Thistles, PROSO has no EQUAL.

You can save a lot on your feed bills, by growing a field of PROSO. Write to THE GARDNER NURSERY CO., Box 10, Osage, Iowa, mentioning this paper, and they will send you a big 4 oz. package of PROSO SEED, postpaid, for 25c. This is enough to grow one-sixteenth of an acre if drilled in rows and should yield from five to ten bushels of grain. Write today, for this offer may not appear again.

If you want to try a larger amount they will send five packages, postpaid, for one dollar.

CHAPTER VIII—Continued

—19—

"My cousin is a baronet, Sir John St. Croix, and his son's death left no heir to his title; so that it would have died out with him, but that the king conferred on his daughter, Sylvia, the title of baroness and the right of continuance of the title in direct line, so that her oldest son will bear the title of baron."

As Marvin stated these facts, his efforts to watch his companion's face rendered his driving rather eccentric.

"Oh," she exclaimed, "is that the English titled lady they say around here you refuse to marry?"

Nothing could have been more impersonal than her tone—though he noted that her cheeks were flushed.

"Has that gossip reached you?"

"Couldn't have dodged it!" she smiled.

"By the way, I believe you told me, the first time I met you, didn't you, that you'd been 'jilted'?"

"Only once."

"What for?"

"That's what I'd like to know! Can you understand a man's deliberately and of his own free will and choice losing the chance to annex me for life? Why," she abruptly inquired, "did you jilt your cousin, that baroness?"

"I didn't. I was never really engaged to her. Our parents had a sort of understanding—"

"Did the noble lady fall in with it?"

"I never heard that she objected."

"Then don't you think you rather let her down?"

"Not so much, in my opinion, as a mariage de convenance would let her down! Anyway, my brother, whom she'll probably find much more to her taste, is going to marry her."

"Is he?"

"If she'll have him."

"And you think she will like him better than you?"

"If you'd ever met him you wouldn't ask!"

"Oh, why?"

"He's a ladies' man—has prettier manners than I have and better clothes."

"Some girls don't care for 'a ladies' man.'"

"Well, if she turns him down I might begin to be interested in her myself."

"Why?"

"If she could be so disinterested. My brother has a big income from my father. I have only what I earn."

"You haven't a very high opinion of girls, have you?"

"What makes you think so?"

"You seem to think they've no sense—preferring manners and clothes to—a man!"

Marvin felt a tingling sensation along his arm that made it difficult for him to keep his hand on the wheel, such an urgent pull was on it to snatch her to him and kiss the lips that paid him such a tribute; he was not used to compliments from girls—because he was not used to girls at all.

But the necessity, at this moment, of finding a parking spot in front of Sunbury's best hotel prevented his replying.

"I've been wondering," Meely said, as their waiter arrived with oysters, "are you going to make this educational job your life work, Mr. Creighton? Or are you 'using it as a stepping-stone' to other ambitions?" she wickedly suggested.

"Have you any idea," he seriously replied, "how hard it is to find a job an honest man can do? Pledge yourself to absolute honesty in this world and you'll starve to death or rot in jail! Public school positions are political jobs controlled by a bunch of exploiters. Show me one profession or business in which a man can be entirely honest. The church? It is to smile!—ask any pastor! Journalism? Ask John Swinton, one of America's most beloved journalists. Medicine? Read 'Arrowsmith!' The law? Ask Judge Lindsey! Teaching? Ask Scott Nearing!"

"Well, what is one to do about it?"

"Darned if I see any solution for a fellow that was born with a twist like mine!"

"Most people born to great riches as you've been, certainly are not troubled with your difficulties, Mr. Creighton! I've always been poor, so I can't quite feel your plight."

"All my life I've felt bitterly the hoggishness of our family's living in luxury on the labor of others who live on the ragged edge of poverty."

"You take life as seriously as I did at sixteen! Grow up and be a cynic like me, then you'll be happy, though rich. Can it matter to the vast universe how we worms on this tiny earth behave?"

"Not to the vast universe—but to us while we're here. Got to have traffic laws, you know, unless you can get off the high road to a road no one else uses; where, of course, you'd have a right to drive yourself to death if you wanted to. But can you find such a road? Can you—"

His voice trailed off into silence as he sat staring at her absently; for while he had been talking he had become conscious, as he looked at her, of seeing a face within a face—the childish face of that photograph of his English cousin looking out at him from the mature, intelligent countenance of this young woman.

That photograph was at this moment in his inside breast pocket. An almost irresistible temptation seized him to take it out and compare it with the living face before his eyes. Or to suddenly confront her with it and note the effect.

"Why on earth do you keep staring at me like that?" she inquired in astonishment.

He came to himself with a short laugh. "Well, I've seen worse chromos than your face!"

"Oh, don't be so impersonal!"

They laughed gayly as, having finished their luncheon, they rose to go out to their waiting car.

CHAPTER IX

Four o'clock on Monday afternoon, at which hour Meely, though not aware of the fact, was booked for something of a reception at her schoolhouse, found her dismissing her pupils with almost frantic expedition, that she might be alone to answer a letter she had received that morning, which

Marvin Felt a Tingling Sensation Along His Arm That Made It Difficult for Him to Keep His Hand on the Wheel.

cried, or rather shrieked, for an answer; and not a moment had she had all day to write it. Her mother was in need—distressing need—her own dear mother! So, the little sum which, in the few months of teaching, she had amassed toward her trip to Hollywood, must be sacrificed and the trip indefinitely postponed.

She had been writing rapidly for only a few minutes, however, when her ear was caught by the sound of a car stopping outside the schoolhouse.

Marvin Creighton? Even he was unwelcome while her letter remained unwritten—and she would have to tell him so.

A knock on the door which one could not have called hesitating. It was, on the contrary, peremptory. Followed immediately by the entrance of an elderly, ruddy-faced, white-haired man who seemed, on sight, an anachronism in this schoolroom, for Meely saw at once that he was a prosperous-looking gentleman of a rather courtly bearing. Not one of the school trustees—she had met them all. Not the father of one of her Pennsylvania Dutch pupils—this was a man of the town. Suddenly her heart began to beat faster. No one else about here could possibly look like this except—yes, it must be—the elder Mr. Creighton!

What on earth did he want?

He came to the platform and, as she rose, he held out his hand. His manner, though courteous, was distant, and his countenance grave and rather forbidding.

"This is Miss Schwenckton?"

"Yes?" she said interrogatively.

"Mr. Creighton," he introduced himself. "I'm glad I find you still here; I was afraid you would have gone."

"You wanted to see me?" was her rather superfluous question. Her heart was quaking and she made a desperate effort to get herself in hand. The man looked formidable!

Drawing a chair to the desk, he motioned her to be seated and sat down beside her.

"I am planning a little gift to this school, Miss Schwenckton. A Christmas gift. Electric lights. I wanted to ask you when the men can work in here without interfering with you?"

She placed a blotter over her letter, which lay under his very eyes. She did not believe this electric light stuff; he needed an excuse to come here to see her. What for?

"The schoolhouse is empty every day after four," she replied, "and all day Saturday."

"Any day after four?" he reflected. "The schoolhouse is always empty after four?"

"Today is an exception. I stopped to write a letter."

"Ah, to write a letter?" he repeated, and she heard the skepticism in his tone. "Then you're not in the habit of receiving visitors after school hours?"

"You're my first."

"Now you surprise me! I was under the impression that—er—my son sometimes visited you here after school hours!"

He looked so coldly disapproving as he spoke that Meely never for an instant supposed he referred to his elder son, whose visits, being strictly professional, would, of course, be beyond criticism. It must be that some garbled rumor of her intimacy with St. Croix had reached the man and he was here today to put a stop to it! But how exciting! What would he do about it? Try to bribe her, buy her off? Oh, surely that sort of thing was only a "movie" device, it didn't really happen; she had never in the whole course of her life met any one who had "bought off" any one or who had been "bought off." If only she could have known he was coming, she would have made up for the part; rouged and powdered like a real "tough"; enhanced her price as a menace to St. Croix. Why, she could have made herself look so dangerous Mr. Creighton would have paid anything to be rid of her—enough to finance her needy family for a year perhaps, while she worked herself in at Hollywood. But the way she was looking just now, he must be finding her perplexing. That was why, probably, he seemed so dazed; he had heard she was a common little hussy and he found her looking respectable; as respectable as his own wife!

Mr. Creighton was indeed feeling as dazed as he looked—for hadn't St. Croix told him that the girl was illiterate, vulgar, talked the dialect of the county?—and here was a girl who looked not only like a lady, but whose sophisticated bearing and perfectly good English so astonished him that for the moment he was disconcerted; a sensation to which he was, for the most part, a stranger. The bare idea of suggesting to her that he would buy her off, pay her to go away, turned him cold. He had no least difficulty in understanding Marvin's "falling for" her.

"I'm not mistaken, am I, in taking you for the teacher?" he asked.

"I'm the noble martyr," she admitted. "Don't I look it?"

He checked the gallant retort which rose involuntarily to his lips; he'd spoil everything if he didn't watch himself—the girl was fetching.

Their attention was caught at this instant by the noise of another motor stopping before the schoolhouse.

Meely thought with a thrill, "What a situation if Marvin walks in here and finds his father warning me off St. Croix! Oh, cricky!"

She was puzzled by the accusing look with which Mr. Creighton was regarding her—did he think it was St. Croix' car out there?—and she had just denied that she ever had visitors here at her school! No wonder he looked at her accusingly!

(TO BE CONTINUED.)

Made Arrow Complete Its Destined Course

In the mountain province of Luzon, Philippine Islands, where the Igorots and Ifugaos and Kalingas live by primal laws duplicated in the Old Testament of the Bible, but modified by Christ's philosophy in the New, a journeying missionary priest recently was shot in the back with an arrow. He turned back trying to discover his hidden assailant, and when the young man in the bushes found out that he was a priest, he came and knelt before him and begged heavenly pardon. There was a feud on, he explained, and he had thought the priest an enemy; in the dusk of late twilight he had not recognized the priest's garb. All right, but how could they get the arrow out of the priest's back? Oh, that would be very easy and would not hurt much; so the young mountaineer stepped behind the priest, cut the feather-end off the arrow and jammed the point on through the priest's body; and then he stepped around in front and pulled the arrow out. The wound healed soon enough, no vital organs having been scotched.—Exchange.

Not Altogether Aged

There is a woman in our neighborhood who is eighty years of age, but who walks with an erectness and springiness that is the envy of women many years younger than she. The other day my young daughter saw her pass, and, turning to me she said: "Mother, her face is much older than her legs, don't you think?"—Exchange.

POULTRY

CHARCOAL OF BIG VALUE TO FOWLS

We have been told by Dr. D. F. Kaupp, V. D., poultry nutritionist and avian pathologist, North Carolina university, that charcoal has a purpose of preventing digestive derangement, as is so well recognized not only in human but also in veterinary science. It has its part in preventing harmful fermentations, absorbing poisonous gases, and thereby holds in check diarhhea.

"There are many flocks of hens that have a tendency to diarrhea or looseness of the bowels. Such flocks should benefit from charcoal treatment. In many flocks of brooding chicks bowel trouble is prevalent. There may be an unnatural fermentative condition of the stomach and bowels and a tendency to indigestion as shown by the fact that the feed remains in the crop instead of passing on, and diarrhea may follow, or the chick may die of indigestion. Here is another case where I would recommend charcoal as a digestive corrective. There is no question, either from a scientific standpoint or from a practice feeding standpoint, but that the presence of charcoal in the digestive tract has a corrective effect upon digestion."

Now hear what Dr. W. F. Hoist, nutrition specialist, poultry division of the University of California, has to say:

"Much investigational work has been carried out in order to demonstrate the benefit of charcoal feeding, but with no success. It is certain that the absorbing power of charcoal has been much overemphasized. Even if present the absorbing power would be of questionable value. Charcoal feeding for poultry should be given up as an unnecessary expense, just as it has been abandoned in human dietetics, where it was formerly recommended."

Ventilation Essential in the Poultry House

Ventilation is an essential in the poultry house if the flock is to be kept healthy and in production. Ventilation is best provided through an open front on the south side. For the average farm poultry house one square foot of opening on the south is sufficient for each ten square feet of floor space in the house.

Care must be taken in ventilating the house that no drafts are permitted. The birds can stand a lot of cold, but they soon develop colds and roup if exposed to drafts.

Properly ventilated houses will be free from moisture and dampness. If these conditions are present it will be well to look to ventilation.

Inbreeding in Mating Turkey Flock Is Bad

It is considered safest to avoid inbreeding in mating flocks of turkeys, and it is a general rule to use unrelated stock in an effort to produce poults with as much natural vigor and resistance to disease as possible. However, mating a vigorous young turkey tom back to the old hens might produce poults of good quality. Of course, he would only be closely related to one of the hens in the flock. The amount of inbreeding that can be carried on safely can only be determined by the breeder himself as he knows the pedigree and the vigor of the flock.

Poultry Notes

Good heavy oats make a fine feed for poultry, and especially if mixed with a little corn and wheat.

* * *

The roup season is on. Guard against dampness, and drafts, if you would keep your flock healthy and on the job.

* * *

Cabbage is rich in the green material needed by laying hens. About six pounds of cabbage may be fed per hundred birds per day.

* * *

Hens in the breeding flock should be allowed out of doors in direct sunlight during the winter and encouraged to take plenty of exercise.

* * *

One of the important essentials for high egg production in the poultry flock is that the hens be kept comfortable.

* * *

To insure absolute dryness the poultry house should be located on porous, well-drained soil on a slope, preferably to the south or southeast.

* * *

Hens can withstand extremely cold weather if their house is dry and well ventilated. The floor should be well littered so that the birds do not come in contact with the cold floor.

* * *

Electric lights in winter is a way of making things natural for hens, who do more work with longer days.

* * *

Egg laying is the prime object for which poultry is kept. The females must possess the egg-laying characteristics if we wish our poultry to pay.

* * *

Roup acts like a bad cold. There is first a watery discharge from the eyes, with an offensive smell, then the eyelids stick together and swell, and there may be sores on the face and comb.

The Cream of the Tobacco Crop

"I Appreciate Lucky Strike" Says George M. Cohan

America's Stage Favorite

"Good old Luckies! We've been pals for years. And like an old friend they treat me well. No irritation to my throat and no coughing. And I appreciate Lucky Strike—the full body tobacco with the toasted flavor that's been the same since that day we met."

CHAPTER IX—Continued

—20—

And now, as at this instant they heard the car start away again, the accusation in her inquisitor's gaze deepened; for Mr. Creighton was sure that it was seeing his father's car at the door that had made Marvin drive on. The girl was a liar and a schemer. In the very act of waiting here for his son, she had denied that she ever remained here for visitors! If she had not a guilty conscience, if in her relations with Marvin there were nothing to hide, she would not, of course, find it necessary to lie. A dangerous wench! Marvin could thank his father for saving him from her. Mr. Creighton felt ruthless.

With his usual directness he came to his point. "You were expecting my son? That was, of course, his car that stopped here and then, at sight of mine, drove on—wasn't it?"

"Not being an adept at seeing through a brick wall, Mr. Creighton, I don't know."

Her evading a direct answer to his every question only confirmed him in his darkest apprehensions.

"Miss Schwenckton," he said abruptly, "I would make it worth your while to resign from this school and go away."

"Away from your son, Mr Creighton?" she inquired pleasantly.

"Exactly."

"But in these days of airships whither can I flee that he cannot follow? If I take the wings of the morning and dwell in the uttermost parts of the sea, or ascend up into heaven, or make my bed in hell—"

"What is it worth to you to get out of this neighborhood and stay out?"

"Well, not being very experienced in these transactions—"

"'Not very experienced'!"

"Not very," she imperturbably repeated, "so I'll have to ask your advice. What's the most I ought to ask? I want to do as well as I can for myself, of course"

"Come, Miss Schwenckton, I'm serious—please don't try to play the fool with me! You must know that I could get rid of you less expensively. A few words from me to your trustees, and you would lose your position. But I've no desire to injure you. I prefer to help you—"

"Help me out of the neighborhood?"

"I'll amply compensate you for the loss of your school and something substantial over."

"You really and truly are offering me money to give up this darned school and go away?"

"I am."

"But," she exclaimed, a glad surprise coming into her eyes, "this is the first time in all my life that I've had money thrust at me! Will you give me any amount I ask?"

"Of course not—you'll have to be reasonable," he protested, feeling shocked that a girl who looked like this should after all be sordid and unprincipled.

"Just what would you call reasonable, Mr. Creighton?"

"Name what it's worth to you to leave and then I'll answer you."

"Well, then, let me see—well, I'll take my railroad fare to Hollywood and enough more to support me (and my family) for six months while I'm convincing the picture makers at Hollywood what a gold mine I'd be for them."

"Your family? You're not going to tell me you have some children to support?"

"No, I won't go so far as that. Only some parents. Two helpless little parents."

"If I give you a check for five thousand dollars, when will you leave?"

Meely caught her breath. The sum seemed vast to her. A thousand pounds! It would liberate her from this schoolroom prison, relieve her mother's needs and waft her to far-away California with a sense of ease and security such as she had not known in many years!

"If you will sign this statement, giving up all claims upon my son—"

He took a folded paper from his breast pocket and laid it on the desk in front of her, pushing aside the letter she had started to write to her mother.

"All right," she answered him gayly, though not at once signing the paper. "And if I fall at Hollywood, I'll marry one of your sons and then my husband can pay back to you this loan—"

"One of my sons! I've only one son who'd be fool enough to give you the chance, young woman!"

"But Mr. Creighton," she asked in genuine curiosity, "how did you find out about us? Did St. Croix talk in his sleep?"

Mr. Creighton stared at her. Now why, he wondered, was she putting up a bluff like that?—pretending it was St. Croix!

"St. Croix!" he repeated, with a laugh. "Don't waste your talents, Miss Schwenckton, trying to deceive me! My son, St. Croix, will never cause me a moment's anxiety as to his choice of a wife!"

"A wife!" she breathed. "My—goodness! What's all this about, anyway?"

"I'm sure you know quite well what it's all about."

"If it's not about St. Croix, I don't!"

She looked so sincerely puzzled and astonished that for an instant he believed her—almost.

But only for an instant. "I'll never have to pay any girl five thousand dollars to keep St. Croix from marrying her!" he repeated.

"But—but," she faltered, "if it's Marvin you've been talking about—do you mean Marvin? But you can't possibly—but what on earth makes you think Marvin wants to—" She pulled herself up with a jerk; if she were not careful he would realize that there was no least need for his paying her that bribe! "Oh, if it's Marvin you mean," she rattled on, "then I'll reconsider! I don't think I can sign away Marvin! Or, if I do, that'll really cost you something! Marvin is really worth something!"

"You're mistaken. He's worth the puny salary he makes—fifty-six hundred dollars a year. Not a dollar more."

"I know—I didn't mean that kind of worth. I meant human worth. I wouldn't, however, get money from you, Mr. Creighton, on false pretenses. I really have my doubts whether Marvin would want a wife who could not tell how many states there are in his country. Do you think he would?"

"I'll tell you what sort of a wife Marvin wouldn't want when you've signed that paper."

Without a moment's hesitation she took up her pen and affixed her name, "Amelia Schwenckton," to the state

"And if I Fail at Hollywood, I'll Marry One of Your Sons and Then My Husband Can Pay Back to You This Loan."

ment that she gave up all claims of every description upon the son of Mr. Creighton.

"How unbusiness-like you are!" he said as he received the paper from her hands and tucked it into his breast pocket, "to sign this and give it over to me before I have given you my check.

He took from another pocket a bank book and rapidly filled out and tore off a check.

"Now, then," he said, not at once handing it to her, "when will you go?"

"I think I ought to give the trustees a chance to get a teacher in my place, don't you? Think of all those children running 'round loose for days without getting educated! My conscience won't stand for it!"

"A conscience that can stand for bribes—"

"But your conscience seems to stand for them! If you think bribes so base, why do you go 'round offering bribes to your sons' prospective wives? Corrupting the Poor Working Girl! By the way, Mr. Creighton, this won't be a bribe, it will be a loan. I'll pay you back—if I have to marry one of your sons in order to. For I prophesy, Mr. Creighton, that when you know me better, you're going to want me for a daughter-in-law! Oh, yes, you are! When I come back from Hollywood I'll prove it to you—for I'll stop and pay you a visit. Or, I'll stop off and be your cook until I've earned that five thousand dollars. In America a cook must earn five thousand dollars in the bat of an eye—"

"When will you leave?" he sharply repeated.

"The very moment I've the wherewithal to leave!"

"But," he informed her in a firm tone as he handed her the check, "if you dare to come around here again, you will be dealt with, Miss Schwenckton, in a more summary manner than you will like!"

"I'm afraid, Mr. Creighton, I'll have trouble cashing this—and it would put you in such a funny light, giving five thousand dollars to such a dangerously alluring girl as I am apparently! If you've the real money about you—"

He had been wondering whether she would prove so sophisticated as to realize that. He had no intention, really, of letting her leave the room with that check.

"You are indeed 'experienced,' Miss Schwenckton, for one so young!" he said ironically as he took back the check and gave her a roll of bills—ten five-hundred-dollar notes.

And it was at the very moment of her receiving these that again the sound of a car stopping outside interrupted them.

"He's come back again," said Mr. Creighton bitterly, "in the hope that by this time I'd be gone! You have played your game well!"

"And this time," she answered blithely, her head bent to listen, "though your car is still there, he doesn't seem to be driving away again."

Little did they dream that the first car that had stopped and then driven on had carried away Mrs. Creighton, who, the moment she had recognized her husband's car parked nearby, had been startlingly convinced that Marvin's fantastic suspicions of a plot between his father and Lady Sylvia St. Croix was not after all fantastic! For what else in the world could bring her husband to the schoolhouse?

She had decided, after a moment's debating with herself, not to intrude upon their conference. She would let Marvin know, when she saw him on Thursday, what she had discovered. It was so evident that he was deeply interested in the girl—was his interest too deep to be turned to aversion by the fact that she was Lady Sylvia St. Croix and in league with his father to intrigue him into marrying her?—as he had declared such a fact would disgust him!

A half hour after she had driven away, Marvin, driving out toward Absalom Puntz', felt, as he drew near William Penn schoolhouse, that that spot was fast becoming to him the pivot on which his whole universe turned!

As he came nearer, the sight of a car standing before the little building made his heart sink like lead in his breast. Was Miss Schwenckton having a rendezvous again with St. Croix?

As soon, however, as he was near enough to recognize the car, he saw, to his startled surprise, that it was not St. Croix', but his father's! Instantly he was convinced, just as his mother had been, that his suspicion of a collusion between "Miss Schwenckton" and his father, to entrap him into a marriage, had been well founded.

He did not, with his mother's delicacy, decide not to intrude upon them. On the contrary, he lost not a moment in parking, alighting, and striding straight into the schoolhouse to confront them—his heart and brain in a whirl.

At the sound of his approaching step they had stepped down from the platform, Mr. Creighton's face stern as the Judgment day, Miss Schwenckton's as interested as if she were in a theater seeing a play, as they stood looking expectantly toward the door.

Marvin's long stride halted at sight of them.

"Well?" his father peremptorily inquired. "What are you doing here?"

"My duty as the county superintendent. Earning my salary."

"An easy, pleasant way to earn it—calling after work on your young teachers!"

"I'm here much oftener during school hours," answered Marvin, wondering whether this tone of displeasure were assumed and why.

"You wished to see me about something, Mr. Creighton?" Miss Schwenckton addressed Marvin composedly—the elder Creighton recalling that she had spoken of him as "Marvin."

"Only to investigate," replied Marvin, "why, at this hour, your school is still open."

(TO BE CONTINUED.)

Belief in Witchcraft Strong in Year 1680

A writer, looking over the annals of Newburyport, Mass., dug up a curious case of the witchcraft craze. It was in 1680 that some very strange happenings took place in the house of an old resident; pots and pans rattled at unearthly hours of the night and missiles flew through the air in the most mysterious manner and on one occasion a brick from the chimney struck the old man and nearly ended his earthly existence. His wife was tried and convicted of being a witch and sentenced to be hanged. A neighbor suspected a boy, the old man's grandson, and in telling the aged man he could determine the cause, hinted he had a knowledge of astrology and astronomy. Suspicion of witchcraft fell on him and he was tried and escaped conviction only when another neighbor testified he had seen the boy throw a shoe at his grandfather.

Then suspicion fell on the grandmother and she was convicted and sentenced to death. Meanwhile the grandson went away and the disturbances ceased. A reprieve was granted and later the case was dismissed.

"Show Me"

An English inventor filters the scratchings and metallic sounds from phonographic music by passing it through more than 50 feet of tin tubing filled with peas.

SEND TO MARKET WHAT IS WANTED

"There is no sense in shipping 3-inch apples to a market where they will bring less than 2½-inch apples. While there is a similarity in methods of sales in most markets, yet there are some distinct differences and variances as to requirements which the product must meet," said E. W. J. Hearty, an apple exporter and commission merchant, speaking on distribution problems in the apple industry before a conference of the New York food marketing research council in New York recently.

"Generally speaking, the important domestic markets seek large fruit. It is becoming increasingly difficult to sell small sizes in New York city at anywhere near the relative value of large fruit. As a general rule to follow, I would suggest two sizings—one of 2¼ to 2¾ inch fruit and the other of 2¾ inch and up, eliminating apples below 2¼ inches in diameter except for special demands definitely known in advance of packing. This suggestion should be considered as subject to change and in line with market requirements as they may arise. Naturally there will be individual crops where it would be clearly unwise to attempt a division, but this is a matter for individual determination."

Speaking of the demands of foreign markets, Mr. Hearty pointed out that "Swedish consumers like small red apples provided they are clean and healthy. Usually Germany and Holland have plenty of common and medium quality and size fruit, but they lack fancy fruit. Hamburg seeks superior quality and large size."

Mastodon Strawberry Is Bearer of Good Quality

A word about Mastodon, the new everbearing strawberry, is not amiss here. The berries of Mastodon are just what the name indicates—real giants. Moreover, the Mastodon is a dependable bearer of good quality—both spring and fall. Five quarts of berries from twelve plants the first season is not unusual, says a writer in the Farm Journal.

About corn-planting time is the time to set out plants. Trim off all but two or three of the younger leaves before planting. Cut the roots back to three or four inches in length. If the ground is not ready when plants arrive, heel them into the soil; separate roots of bundles before packing dirt around heeled-in plants.

Set plants from 15 to 30 inches apart, in rows two and one-half to three and one-half feet apart. Don't set too deep, or the plants will be smothered. If set too shallow the roots will dry out. Just cover the base of the crown with soil. Pack soil firmly about the roots. A garden trowel is splendid for setting the plants.

To keep the roots wet when planting carry the plants in a pail of water or wrap them in wet burlap.

Codling Moth Parasite Found Well Established

One of the introduced parasites of the codling moth, Ascogaster carpocapsa, seems to be well established in the vicinity of Yakima, Wash., and increasing, according to a report received recently by the bureau of entomology of the United States Department of Agriculture. During 1927 a block of 58 unsprayed trees about a mile northwest of the point of original introduction of this parasite was kept banded and examined weekly. From these bands 24,800 codling moth worms have been taken during the season, of which 7,000, or 31 per cent, were parasitized. Last year a parasitism of 22 per cent was found. Approximately 1,300 of those recovered recently have been shipped to British Columbia for introduction there, and about 1,300 more have been distributed to various places in the state of Washington. The rest are being held until spring, when they will be sent to various apple-growing districts in the Pacific Northwest.

Better to Plant Young Trees Than Move Old

Apple trees of almost any reasonable size can be moved. But if they have been growing vigorously for four years, the root system will be found rather spreading, so that considerable mutilation of roots will be necessary, with proportionate cutting back of tops. There is strong probability that it will pay better on the whole to plant younger trees instead of moving the older ones. Much depends on how much time and labor can be put on the job in order to get the large trees moved with as little disturbance as possible.

Pruning the Grape

Recent studies with the grape have indicated that a moderate-sized cane would give the maximum of fruit production, rather than to have either a small weak one or a very large one. A recent study led to the conclusion that there is so little correlation between the length or diameter of cane and crop production with the Worden, that careful selection of canes as to size is not necessary. One year's work with Concord indicated that the same statement might be made for it.

The roads the past week have been in a very bad condition, due to the snow last week. However, at this writing there is still hopes they may soon be better again.

The First National Bank has a statement of condition in this issue of The Times. The statement is set up in a new form this time and will no doubt, be much easier for the average person to understand.

Miss Nina Johnson, who teaches at Charlton, Iowa, accompanied by her cousins, Lloyd and Harold Swanson, of Charlton, visited at the Albert Johnson home last week Sunday.

The old volley ball gang got together again Monday night for a big game. There is talk of putting on a local tournament some night to have a lot of fun. You fellows be on deck for the next game!

All children under eleven years of age please be at the M. E. Church at 3:00 p. m. Saturday to receive parts for the Easter program. Parents will please send their children. Miss Mildred Johnson

Mrs. Harvey Stille has been unable to be at the restaurant the past few days on account of being ill with the flu. However, at this writing she is reported much improved. Lena Kever is assisting with the cooking at the Stille Cafe during Mrs. Stille's illness.

Danny Johnson should have been on our "moving list" last week, but we did not know he had gone on a farm. Danny has moved on the O. A Benner farm 3½ miles south of Ventura, on the gravelled road. His sister, Miss Pearl, keeps house for him She also teaches at the school near by.

Hey! Skinney!

Hike over to "Cooney's" and get an—

ICYPI

Boy! They're better'n ice cream cones and only cost a nickel.

And say! A full line of fine Easter Eggs too!

But don't over-look that ICYPI!

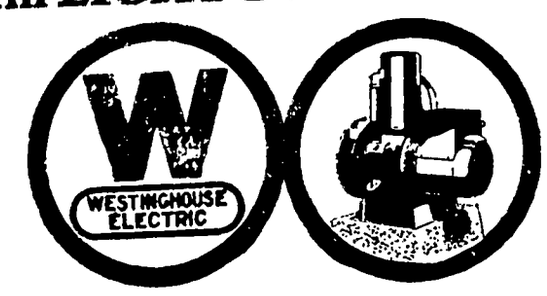
Crystal Cafe

Conrad Quandt, Prop.

The Name Westinghouse

on your

Farm LIGHT & POWER Plant



KEEP in mind that in choosing your *lighting plant* the *maker* must not be overlooked. The plant we sell is made by Westinghouse—headquarters for radio, KDKA, KYW, WBZ, and KFKX—one of the greatest electrical organizations in the world—a concern employing 50,000 people.

Westinghouse *knows* electricity, knows how to build *everything electrical*—and offers you a lighting plant that is absolutely dependable, easy to operate and easy to own.

May We Tell You More?

Prouty Electric Shop
GARNER — IOWA

CHILD CLINIC HERE NEXT WEDNESDAY

SHEPARD-TOWNER CLINICS TO BE HELD IN THIS COUNTY

Clinics Are Sponsored By The Hancock County Farm Bureau

Arrangements have been completed and enrollments are coming in rapidly for the Shepard-Towner Clinics to be held in Hancock County during the week of March 27th.

These Clinics are being sponsored by the Hancock County Farm Bureau and are free to anyone who wishes to take advantage of it. The work will be in charge of Dr. Gerken, a Baby Specialist from Iowa City. He will be assisted by Miss Pattee, a nurse.

How To Enroll Babies

Babies should be enrolled with the chairman of the local committee and she will assign the time for them to appear at the clinic. In this way there will be no waiting. Babies should always be accompanied by their parents.

The following will be the schedule of places and the leaders who will have charge at the following places

TUESDAY, Mar. 27, Britt, Mrs. Ernest Schubert, Chairman.

WEDNESDAY, Mar. 28, Klemme, Mrs. C A. Arnold, Chairman.

THURSDAY, Mar 29, Hayfield, Mrs S. B. Durant, Chairman.

FRIDAY, Mar. 30, Corwith, Mrs. E. Oxley, Chairman.

SATURDAY, Mar. 31, Garner, Mrs. W J Elling, Chairman.

KLEMME AUXILIARY CONDUCTS PATRIOTIC QUIZ AT SCHOOL

Campaign Of Education On American Flag Is Of Great Interest

The Educational Campaign sponsored by the Klemme Legion Auxiliary should prove of great interest to the pupils of our public schools who have been given a se of questions to answer Not only should this be of special interest at school but we venture that many grown-ups will be "stumped" by a number of the questions submitted

Following we print the entire form of questions submitted to the pupils to answer A set of answers to these questions will be printed in The Tiems later

QUESTIONAIRE OF KLEMME LEGION AUXILIARY

Campaign of Education on American Flag

Name of School
Grade
Room Number
Pupil's Name
Address
Teacher's Name

Answers should not be submitted separately but should be collected by the teacher of each room and forwarded together to the chairman of the flag committee, at the Legion Auxiliary, plainly marked with the teacher's name, the name of the school and the number of the room, and the grade. No answers should be submitted before the appointed date, and all answers must be in prior to the final time set.

1 When was the Stars and Stripes adopted as the United States Flag?

2 Quote the language of the resolution of the Continental Congress establishing the United States Flag

3 During what period in the United States History did the United States Flag consist of

(a) Thirteen stripes and thirteen stars?

(b) Fifteen stripes and fifteen stars?

4 How many stars i our flag?

5 How many stripes in our flag?

6 W at is the color of the uppermost stripe?

What is the color of the lowest stripe?

7 When a United States Flag is suspended on a wall with the stripes vertical, is in reality and legally the flag of the United States? If not, why not?

8 How early in the day a d how late in the day should the flag be displayed from a mast?

9 When a flag is suspended across a street between buildings, what should be the position of the stars?

10 What date do we observe as the birthday of our flag?

11 What did General Washington say relative to the colors and tars of the new flag?

12 What are the proportions of the National Flag?

13 When, by whom and in what manner were these proportions established officially?

14 How should a flag be raised and lowered?

15 On what days and occasions should the flag be displayed?

16 When was "Old Glory" first displayed in battle?

(a) On land?

(b) On sea?

17 How is the flag saluted?

(a) By those in military or naval uniform?

(b) Civilians?

(c) Females?

18 When should the salute to the flag commence while it is passing in street parade. and when should it end?

19 What are the best methods of displaying a flag indoors?

20 When a flag is displayed on a wall, what is the position of the stars? Why?

21 What is the exception to the general rule that the flag should not be used as drapery? Why?

22 What is the correct manner of displaying the flag on Memorial Day?

23 What is meant by half staff?

24 When the flag is displayed at half-staff, as on Memorial Day, how is the flag placed in it's position?

25 How long should it remain at half-staff on Memorial Day?

26 What should then be done?

27 When our flag is formally raised what should all present do?

28 What should spectators do if walking on the street when the flag is passing in parade?

29 Describe the correct manner for placing the flag over a casket

30 Should the flag be lowered into a grave or be allowed to touch the ground?

31 Is it permissible to place anything upon the flag?

32 When and how should blue, white and red bunting be used?

34 Should the flag ever be worn as a part or whole of a costume?

35 When our flag is carried with other flags in parade it should have the place of honor Where is the place of honor?

a6 What ceremonial United States Flag event ocurred during the World War which more closely united the two Anglo-Saxon nations?

37 Is the hoisting of any other flag above our flag permitted?

38 What is the exception to this rule?

39 When only should the flag be displayed with the stars reversed or in the lower left hand corner?

40 What is the National Flag called in the Navy?

41 Over only what three buildings in America is the flag flown officially continuously day and ght?

42 What is the rule to be observed when flags of more than one nation are being flown in unison?

43 When a number of flags of different nations are grouped in a cluster, what is the position of the United States Flag?

44 When the flag is illustrated in printed form, what is the position of the stars?

45 What is the origin of the anthem, "The Star Spangled Banner"?

46 When, by whom and under what circumstances was the appelation "Old Glory" given to the United States Flag?

47 What is the Universal oral salute to the flag?

48 Why are we so little informed about our flag?

49 How can this be remedied?

50 What other question would you like to have answered about the United States Flag?

We suggest that you clip out the above questions to refer to them again when the answers are printed. Then file the two sets and you will have some valuable information for future reference.

FRANK ROTHS DIED OF HEART TROUBLE

UNEXPECTE END CAME AFTER VISIT IN TOWN

Heart Trouble Cause Of Mr. Roth's Sudden Death

The people of Klemme and vicinity were greatly shocked this morning when it was learned that Frank Roths about sixty years old, had died suddenly at his home southeast of Klemme late Wednesday night, following an at ack of heart trouble

Mr. and Mrs Roths had been in town all evening, visiting friends and shopping about town and Mr Roths was apparently in good health and was as jolly as ever That evening after returning home Mr and Mrs Roths were talking over their evening's visit when Mrs Roth's noticed her husband gasping for breath and knew he was having an attack of heart trouble, which at times bothered him She sumoned a doctor but dea h came almots immediately

At this time funeral arrangements have not been completed, pending news from distant relatives. However it is thought services will be held at Goodell Sunday or Monday.

The sympathy of the entire community is extended to the bereaved family in their time of sorrow

GARNER BANKS NOW AS ONE

FARMERS NATIONAL TAKES OVER BUSINESS OF FIRST

When the citizens of Garner came down town Saturday morning they found business changes had taken place during the time they were asleep—that the Farmers National bank had taken over the assets and liabilities of the First National—and Garner had but one bank.

Rumors had been circulating about town for several days previous that there was to be a change in the banking situation in Garner, that what has happened was contemplated, but only a few of those on the inside really knew what was going on.

William Taylor, national bank examiner, had been on the job for some time and it was through his efforts that the deal was finally consummated.

In assuming the assets and liabilities of the First National bank the Farmers National is adequately secured by the capital stock and surplus of the First National and other securities.

The officers of the Farmers National remain the same as heretofore with two names added to the directorate. They are: J. N. Sprole, president; F. E. Blackstone, vice-president, Chas Wellik, cashier. Directors. J. N. Sprole, Chas. Wellik, Alex Ross, A. E Katter, A. Kelly, F. E. Blackstone, W. J. Barz, O. K. Maben and Fred Greiman, the last two of whom were formerly directors of the First National.

The capital stock will remain the same as in the past, $50,000, but the surplus has been raised to $15,000. The total amount of deposits at this time is over $800,000.—The Garner Signal.

KLEMME UNIT ENTERTAINED COUNTY AUXILIARY

Garner Unit Bid For Next County Auxiliary Meeting

The American Legion Auxiliary of Klemme was hostess to the Hancock County Units at a meeting held at the Parish House in Klemme on the afternoon of March 9th.

Due to the inclement weather the attendance was not as large as had been hoped for and the usual attendance was below the standard.

However, the ladies report a successful business meeting was enjoyed under the direction of Mrs. Kirkpatrick of Crystal Lake Also a short program, sponsored by the Klemme Unit was given and a lunch was served

An invitation was extended by the Garner Unit for the next meeting to be held in May.

The Auxiliary wants to thank all those who took part and helped to make the program a success.

When a percolator strainer becomes clogged, pour coarse salt into it and scrub the perforations inside and out. Rinse thoroly with boiling water to wash away the salt and the loosened coffee deposit.

A. Larson Funeral Was Held At Jewel

AGED FATHER OF JOHN LARSON PASSED AWAY FRIDAY NIGHT

Came To This County From Denmark Fifty-Five Years Ago

With his task finished and his race run—weary with the weight of years resting heavily upon him. The subject of this sketch came to the eventide of life and responded to the call of Him "who giveth his beloved sleep."

Mr Andrew Larson, fataer of Mr Larson, who lives one mile west of Klemme, was born February 22, 1842 in Oldenburd, Denmark.

Of sturdy Nordic stock, he grew up to full vigor of manhood in the place of his birth, as a real son of his country.

There he lived until he was thirty years of age However, the migratory spirit had possessed him and he turned his face to the new world

Previous to their migration Mr. Larson was united in wedlock to Miss Christina Sorenson, about sixty years ago and two of their children were born to them before coming to his country.

Fifty-five years ago they came to America and located near Burlington, Iowa, where they engaged in farming. A little later they moved to Jewel, Iowa, where they lived since Thirteen children were born to this union, one died in infancy.

As the years passed by five more of the children preceded their father as also did his companion, 15 years ago.

From that time on for the most part, deceased resided alone in his own home until the infirmities of age overtook him so completely that he became unable to take care of himself when he made his home with his children of whom four sons, and three daughters survive their father.

The last three weeks of his life were spent in the home of his son, John, near Klemme, where he received the most tender of care.

For some time it was evident that his strength was failing fast and life was ebbing away. It thus was only a matter of time when death would come to relieve him to his eternal home. He prayed much during his last days on earth that God might come and take him home. This summons came about midnight of last Friday, March 16, when he peacefully slept away ditto his eternal home.

He is survived by four sons and three daughters. They are: S. P. Larson of Ceylon, Minn., John Larson of Klemme, Iowa, Mrs Christina Kolling, of Williams, Iowa, Marenus Larson of Nashua, Iowa, Andrew Larson of Owatonna, Minn., Mrs. Chris Topenberg of Fairmont, Minn., and Mrs. Frank Kuller, of Goshen, Indiana, as well as by thirty seven grandchildren, six great grand children and a host of friends.

Deceased was baptized and confirmed in the Lutheran Church in Denmark, and ever remained a faithfut member of his church.

Funeral services were held on Monday conducted by Rev. Gauger, of Klemme After a brief service in the Larson home at 9:30 o'clock the remains were taken to Jewel where the funeral service was held in the Fleenor home at 1:00 o'clock.

Other relatives in attendance at the funeral were Mrs. Hans Larson of Jewel, Mr. N. P. Larson of Fairmont, Minn., Mr. Andrew Wickersham and Mrs. Elizabeth Wickersham Witt, of Onawa, Iowa.

Interment was made in the Jewel cemetery.

Corwith Shippers To Meet

The annual meeting of the Corwith Shipping Association is to be held Saturday, March 24. The shipments of tho Association have been on the increase and it is hoped that a good meeting can be held and that there will be even more increase. Officers will be elected and reports will be given.

KLEMME-VENTURA ROAD TO BE BUILT

FIVE MILE GRADING CONTRACT TO BE LET APRIL 5th

Work Must Begin By May 12th And Be Finished By August 1st.

The long sought for good road from Klemme east to the Cerro Gordo county line will soon be a reality, and there should be much rejoicing at the good news.

County Highway Engineer Merten and the Board of Supervisors were in this vicinity Tuesday looking over the proposed project and make final arrangements to let the contract.

The official notices appear in this issue of the Times, and the ball has started rolling for a real road east of town.

The bids wil call for the excavation of approximately 35,000 cubic feet of earth, and other work incidental to the project. The successful bidder must begin work not later than May 12th and must have the entire grading completed by the 1st of August.

In an interview with the Conuty Highway Engineer Merten yesterday The Times inquired into the possibility of getting the road graveled before fall Mr Merten informed us that such a plan might be possible, but he said much depended on the condition of the grade and if would be tie enough during the summer to warrant graveling. However, he assured us that graveling would be done not later than next spring, if not before.

AMES MAN WILL GIVE SEED TREATMENT DEMONSTRATION

Demonstration For Ell Twp. Will Be Held At Carl Wille Farm

The Hancock County Farm Bureau has arranged for the services of Mr. R. H. Porter of the Extension Service who will put on four seed treatment demonstrations. Mr. Porter will use the dust method for the treating of oats and barley for smut. He will take up a thorough discussion of all the different seed treatments of corn and small grains and also will discuss the control of corn and small grain diseases These meetings will be of interest to the farmers who are planning on treating their seed oats and their seed corn. The meetings will be held as follows:-

ORTHEL TOWNSHIP, Wednesday, Mar. 28, 10:00 a. m., Penn Eckels.

BOONE TOWNSHIP, Wed., March 28, 1:30 p. m., John Chambers.

CONCORD TOWNSHIP, Thur., Mar 29, 10:00 a. m., W. L. Lawhorn.

ELL TOWNSHIP, Thur. Mar. 29, at 1:30 p. m., Carl Wille.

10th DIST. OF FARM BUREAU TO MEET AT FORT DODGE

W. J. Schlawin, Vice-Pres. Will Attend From Klemme

A meeting of the Farm Bureau officers of the 10th District will be held at Fort Dodge, Wednesday, March 21, at 10:00. It has been called by Chairman V. E. Donelson. The meeting is held to discuss various Farm Bureau problems and to get better acquainted with Farm Bureau work in the state.

Those attending from Hancock County are H. V. Caldwell, President, Mrs. Ernest Schubert, Chairman of Womens Work, Mrs. Axel Trulson, Chairman of Club Work, Fred Missel, Secretary, B. F. Higdon, Treasurer, W. J. Schlawin, Vice President and L. T. Nutty, County Agent.

CHAPTTER IX—Continued
—21—

"You needn't try to bluff me, Marvin!" his father frowned. "I know all about it! You've come here to keep an appointment with this young woman!"

"I was not aware of it!"

"I tell you," his father indignantly insisted, "you needn't try to humbug me! I caught her in the very act of waiting for you!"

Marvin looked perplexed. "Well, if you did, why on earth should you (apparently) be blaming me for that?"

"When I show you what I have here—" But as his father snatched from his breast pocket a folded paper, Meely broke in:

"Now that you are here, Mr. Marvin, will you be so kind as to drive me to the nearest telegraph office? I've got to wire some money to my needy parents and it's pressing."

"I'm at your service," Marvin, looking more and more bewildered, responded, taking her coat from a hook on the wall as she started to reach for it, and holding it while she slipped into it.

"B-but," his father stammered, flushing very red, "Miss Schwenckton! Your promise! This paper you've signed—"

"Yes?" she inquired. "What about it?"

"What about it! Your signed promise to make no demands on my son—"

"But I wouldn't suppose my asking him to take me to the express office to cable—telegraph to my family a bit of money I've acquired—would come under the 'demands' referred to in that paper, would it?"

"In the very hour of your signing this paper and accepting that money you dare to go off driving with my son!"

"What on earth?" asked Marvin, their demeanor and conversation not only not bearing out his supposition, but suggesting a very different state of things.

"Look at this!" his father exclaimed, thrusting the paper at him. "Read that! And then decide whether you want to go off driving with that girl!"

Marvin, feeling dizzy, read the few sentences on the paper signed "Amelia Schwenckton."

"But what, in God's name, is it all about? What sort of 'demands' is she swearing not to make on me—" He stopped short, a staggering idea flashing upon him. "You must mean St. Croix!" He turned to the girl. "Does this refer to St. Croix?"

"I don't know!"

"You don't know!" cried Mr. Creighton. "Why," he exclaimed, "are you both trying to saddle St. Croix with a thing he has nothing to do with? As if I'd ever have to buy off a girl from marrying him!"

"Are you buying off Miss Schwenckton from marrying me?" laughed Marvin, and as he spoke he tore the paper into bits and scattered them on the floor.

"What makes you think, Father, that such desperate measures as this are necessary for my protection against even so dangerous a person as Miss Schwenckton?"

"And anyway," the girl spoke in, "I'm resigning. Please find a teacher, Mr. Marvin, for my school, will you?—for I'm leaving tonight."

"Father! Why on earth are you driving her away? There's absolutely nothing between us and—"

"'Dangerous person' is right, Marvin, and no exaggeration! I have just given that girl five thousand dollars for the signed promise which you so imprudently destroyed!"

"I don't believe it!" cried Marvin sharply.

"Miss Schwenckton, will you show him the roll of bills I've just given you?"

"He might tear them up as he did your piece of paper!" she demurred, showing no least embarrassment or shame. "It's not a bribe, Mr. Marvin," she explained, "it's a loan, which I shall pay back as soon as I've earned it at Hollywood. Your father seemed so anxious to believe that I was luring you to your ruin and so eager to buy me off you that I hadn't the heart to disappoint him; especially as I'm in desperate need of money. And it is nice of your father to give the American screen a chance to be elevated! So I'm off to Hollywood!" And before either Marvin or his father could reply, she had seized her hat and fled from the room.

Marvin made a dash to follow, but his father interposed—slamming the door and standing against it.

"Don't make a d—d fool of yourself, Marvin! Running after a girl who takes a bribe!"

"No worse than your giving her a bribe!" Marvin panted.

"You can thank me for saving you from being taken in by an unprincipled hussy!"

"Stop calling her names! You're entirely wrong about her!"

"What would you call a girl who accepts five thousand dollars to drop you cold?"

"You heard her say she was borrowing it to go to Hollywood. She's perfectly right, too. She needs it and you don't. You've too much money and she hasn't enough. You held it out to her and she grabbed it. I don't blame her! What started you on such a wild chase as this? What on earth put it into your head that I was courting her? Surely she didn't claim I was?"

"Her accepting the bribe was an admission of it! If you'd marry a girl that would take a bribe—"

"You thrust it on her—she needed it desperately—"

"Do you deny being in love with her?"

"I wasn't sure until just now! But a girl with pluck enough to cheek you, Father, and grab while the grabbing was good—oh, well," Marvin drew a long breath and turned away, his face suddenly gloomy and sullen, "you needn't worry! I wouldn't marry an actress, they're too temporary; I'd prefer a permanent arrangement in marriage. Let me out, please."

"Marvin!" His father's tone was suddenly gentle. "Give up this fool job of yours and come home! Your mother is unhappy, having you away. And—of course I want you back, too."

Marvin hesitated. "I can't turn down this job until my term of office is over. And if my living at home means I've got to sell my manhood to you, Father—"

"I'll not interfere with you."

"Even if I decide to marry a county teacher?"

"We can deal with that contingency when it comes up."

"All right, then."

The two men left the schoolhouse together.

* * * * * * * *

Mr. Creighton took St. Croix to task for his misleading description of the school teacher.

"How you ever got the idea that she was illiterate, common—"

"But she is!"

"We can't possibly be talking of the same person!"

"The person I'm talking of is Miss Schwenckton, the teacher of William Penn school, the niece of the farmer, Sam Schwenckton. I had doughnuts and coffee with her and Sam Schwenckton and his wife in their very own kitchen the night my watch was taken from me!",

"I don't understand it at all!" complained his father. "Barring the fact that the girl accepted a bribe from me, I'd call her a thoroughbred!"

The puzzle seemed insolvable.

Meantime, Marvin was feeling by no means so lenient toward Miss Schwenckton's accepting that money from his father as he had pretended. In spite, however, of the sick recoil he felt from her for departing with that five thousand dollars, the sight of her schoolhouse when he drove past it, now occupied by her efficient, informed and uninteresting successor, gave him a pang that every day grew sharper; a restless longing that was in danger of increasing to an insatiable hunger.

St. Croix, meantime, had just about reached a stage where he was on the point of defying prudence and trying to see Meely once more; and Marvin was contemplating the probable folly and futility of his asking his board for a leave of absence to go to Hollywood, when a cablegram which their mother received just at this time from England diverted them somewhat from their absorption in their own misery.

The cablegram was from Mrs. Creighton's cousin, Sir John St. Croix, announcing that his daughter, Baroness Sylvia St. Croix, would sail for America on the Berengaria on January 2 for a short visit to her American cousins. She could be identified at the boat by a handkerchief tied on her left wrist.

This news threw the family into some excitement. St. Croix volunteered to go to New York to meet the ship. He, however, demanded of Marvin that he leave him a clear field.

"I can at least safely promise you," said Marvin, "that I'll keep out of it unless—until," he corrected himself, "she turns you down."

CHAPTER X

As St. Croix' longing for Meely was never for a moment associated in his mind with the idea of marriage, it did not in the least dampen the zest with which he went to New York to meet—as he confidentially hoped and believed—his prospective bride. This would be a marriage so exactly to his taste!—allied to an old English family of rank, administering a distinguished old estate that for generations had been in the family.

His experience with girls gave him no reason to doubt that he would find favor with his noble kinswoman. So, it was with a complacent self-confidence that, well-groomed and clad in his smartest clothes, he stood on the wharf on the afternoon of the arrival of the Berengaria and with tense expectation watched the passengers file past him down the gang-plank—his eyes searching for a young girl with a handkerchief on her left wrist.

He did hope she would be good-looking. It would be an awful wet blanket if she turned out to be ill-favored; though nothing short of an actual hump would stop him. A man could of course seek his consolations outside his home—

It did not occur to him, naturally, that his wife might have need of consolations and compensations.

Looking for a wrist bound with a handkerchief proved to be rather a maddening business. Wrists could be examined only as the passengers passed close before him, while faces could be scanned halfway up the gangplank.

A procession of men and elderly women sent his gaze far up the plank in search of more young people—when suddenly his eye was caught by a lovely face at the top of the long slope which struck him as vaguely familiar—yet unfamiliar, too, in its vivacious expression, its intelligence, its delicacy. Surely he had seen that face somewhere before—though the poise of an exquisite small head, the general look and air of a thoroughbred, the modish style of the young woman, were not familiar.

Why! She looked like Meely Schwenckton! How strange—and how absurd! At least her features did—extraordinarily like!—yet so widely different, too, with that vivid, intelligent countenance, proudly arched little head, graceful bearing—and of course her neatly arranged hair, stylish clothing. But good G—d, how like Meely she looked!

"Am I seeing things?" he wondered, his heart beating thickly.

So close she passed him by that her arm brushed his and her eyes looked for an instant straight into his—but not the trembling of a lash nor the least quiver of her lips suggested that she had ever seen him before, as she walked on to mingle with the crowd—leaving him bewildered, confounded, with a weird doubt and uncertainty—when suddenly, as his gaze followed her, she lifted her hand to straighten her hat, which in the crowd had been pushed askew—and he saw, with a wild bounding of his heart, that her wrist was tied up with a handkerchief!

In an instant he was at her side and had seized her hand—the confusion of his mind so great that all his usual self-confidence was lost in a floundering muddle. He had been so sure of himself, of his ability to impress favorably even a sophisticated English aristocrat with his ease and sang-froid—and he was painfully aware that no country bumpkin could have been more awkward.

(TO BE CONTINUED.)

River Kept in Order by Chinese Engineer

In view of the disastrous Mississippi floods it is interesting to note that 2,100 years ago a Chinese engineer, Li-ping, laid down the correct engineering principle for controlling the flood conditions of a river flowing through a flat alluvial plain.

The works that he and his sons established for controlling the waters of the Min river in Szechwan province and distributing them across the great Chengtu plain are still in perfect operation. The Chengtu plain is an area 100 miles long and sixty miles wide. Across this plain the Min river is distributed in eight main branches, converging at the lower end of the plain to form a single river again, which empties into the Yangtze above the Gorges.

Throughout the 2,100 years, the engineering principle laid down by Li-ping, without which the whole system would have destroyed itself centuries ago, has been followed. Flood conditions are still unknown. On the walls of the temple built to the memory of Li-ping and his sons at Kuan-hsien, is written this saying, familiar to every Chinese student: "Shen tao t'an tso yen," meaning "Dig the bed deep, keep the banks low."—Minneapolis Tribune.

Sound Advice

Of a gentleman who is frivolous none stands in awe, nor can his learning be sound. Make faithfulness and truth thy masters; have no friends like unto thyself; be not ashamed to mend thy faults.—Confucius.

Antiquity of Bagpipes

Jacques de Morgan, during his excavations in Persia, found some terra cotta figures, dating from the Eighth century B. C., playing on what appear to be bagpipes. Again we find the bagpipe in Persia in the Sixth century A. D. on the great arch at Takht-i-Bostan. While crude, the representation serves as evidence that the bagpipe was in use during the 14 centuries which elapsed between the time the terra cotta figures discovered by De Morgan were molded and the carving in the rock at Takht-i-Bostan.

The Cream of the Tobacco Crop

MARTIN JOHNSON,
Explorer, Smokes Lucky Strikes in Wildest Africa

"Once on the Abyssinian border my shipment of Lucky Strikes from America missed us, and I was miserable until the natives followed our tracks across the Kaisout desert to Nairobi with my precious cargo of Luckies. After four years of smoking Luckies in wildest Africa, I find my voice in perfect condition for my lecture tour in America."

Ohio Village Reborn

Ohio's old town of Schoenbrunn, two miles southeast of Cleveland, is the state's newest village as well, for it now has one house, which is more than it has had in more than a century. This structure is a copy of the log cabin built by Rev. David Zeisberger, Moravian missionary, who founded the settlement May 3, 1772. By August of that year, Schoenbrunn became a thriving settlement of some sixty houses of hewn timber. Then the site was lost for 146 years, being discovered in 1923 by excavation.

Overlooked by Soviet

Nikolaiev, Ukrainia, founded by Emperor Nicholas I in the early part of the Nineteenth century and the largest Black sea port after Odessa, is the only remaining one of importance in the Soviet Union which still bears the name of one of the czars.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

W. N. U., DES MOINES, NO. 12—1928.

Sylvia of the Minute

By HELEN R. MARTIN

CHAPTER X—Continued

—22—

"Lady Sylvia St. Croix? That is—I am—that is to say—may I present myself?—you are—who are you?"

She stared at him in what seemed undisguised astonishment and drew away her hand. But she stepped out of the crowd and stood aside with him on the dock.

"You have been sent to fetch me? You are, I suppose," she said, scanning his recherche attire, "my cousin's groom?"

The voice, the accent, were, to be sure, as utterly different from Meely's as were the tone and manner of the girl—a self-possessed, reserved manner that made St. Croix her abject slave—in spite of her unflattering and stupid mistake in taking him for a groom—heavens!

"I am your Cousin St. Croix, Lady Sylvia," he stammeringly explained.

"Oh?" with a surprised lift of her fine brows. "How do you do?" She offered her gloved hand and as he took it it flashed upon him that he would know Meely Schwenckton's hands among a thousand—he would know the very touch of them—he had always thought her hands so unusual for a working girl. When this girl drew off her gloves— But how utterly absurd!—though the resemblance was truly amazing—

An experienced traveler, St. Croix knew how to expedite the tedious customs business and in a very short time he was helping Lady Sylvia into a taxicab.

Seated at her side in the cab, listening with strained attention to the tones of her voice, stealing glances at her exquisite profile, noting the movements of her gloved hands (if only she'd take off her gloves), St. Croix felt every minute more bewildered, more uncertain. There was something in the very atmosphere of her presence that made him feel as if he were sitting beside Meely—yet the incongruity of identifying in any way this elegant creature with Meely Schwenckton—her civilized speech with Meely's Pennsylvania Dutch dialect, her grace with Meely's vulgar clumsiness, her sparkling countenance with Meely's heavy dullness, the simplicity of her coiffure with Meely's elaborate pompadour—

The wild absurdity of his predicament in not being sure made him feel, as he told himself, "woozy!"

All at once he recalled that Meely had a tiny brown mole under the lobe of her ear—he had kissed it often. Her hands and that mole! If he could only lift the lobes of Lady Sylvia's ears and have a look! But suppose he found the mole there—what would it mean and what would he do about it? Surely this was the weirdest experience that had ever fallen to the lot of a man!

"You have changed so much since you were a child, Cousin Sylvia! I'd never have recognized you." He put out a feeler.

"No, of course you wouldn't. When you last saw me, I was a homely little tow-headed, bow-legged, pigeon-toed, freckle-faced kid!"

The words had a vaguely familiar sound to St. Croix. He seemed to hear again the unaccountable indignation with which Meely Schwenckton, that day in the woods on the hill, had repeated, "Bow-legged!" His head swam and he felt almost ill.

Suddenly he turned in his seat and looked straight into her eyes with a very definite and frank suspicion. "This," he inquired with what he felt to be subtle cunning, his eyes probing hers like gimlets, "was of course your first crossing?"

"Well, I've crossed the Channel so often that crossing the Atlantic didn't seem anything! Why, I'd hardly know I was on a boat at all, crossing the Atlantic. Why, crossing the Atlantic—"

She was evading a direct answer to his question!—and covering the fact by volubly chattering.

Seated opposite each other, presently, in the dining car, he waited in strained suspense for the critical moment when their waiter would bring their order and Lady Sylvia would be obliged to remove her gloves; and at the same time he was wondering how he could contrive to have a look behind her ears for that tiny mole; for that mole could have been no part of a make-up; he knew it too intimately not to be quite sure that it didn't come off!

"So," she suddenly remarked, resting her folded arms on the table and bending forward confidentially, "your brother, Marvin, won't have me, will he?"

St. Croix made an effort to conceal his surprise and embarrassment at this unexpected broadside. He felt it lacked delicacy.

"I'm afraid when he sees you, he'll change his mind!"

"'Afraid'?"

"I needn't tell you why—you know!"

"Tell me," she smilingly invited, "what's he like?"

"A queer bird! Seems to hate his comforts! Wants to live like a hod-carrier or a street-cleaner or a—Why, he's gone and taken a teaching job, if you'll believe me, for a petty little salary that wouldn't keep me in gasoline! Insists on living simply and working for his living."

The waiter's arrival with their food brought him up short.

As Lady Sylvia drew off her gloves, he fairly held his breath. But to his chagrin, that test proved no more conclusive than anything else about her, for her hands were now, to his distaste, so covered with rings and so perfectly manicured (Meely's nails had never been so pink and polished) that while these lovely hands certainly did somewhat resemble Meely's, he felt, as about everything else concerning his cousin, that he could not feel sure.

"I wear all these rings," she explained apologetically, "when I travel because I think it's the safest way to carry them."

Well, since the hand-test failed, he was all the more determined to find that mole!—if it were there to be found.

A very vague attention he gave to his dinner, as, with every least movement of her head, he tried to see under and around and through her earlobes!

"Lady Sylvia," he said abruptly, with a sudden reckless daring, "I want

"Lady Sylvia St. Croix? That Is—I Am—That Is to Say—May I Present Myself?—You Are—Who Are You?"

to take you to see an acquaintance of mine who looks so remarkably like you that it's uncanny!"

"You mean, don't you, that you'll bring her to see me?"

"No. Couldn't. She's a farmer's daughter living about five miles from us. An ignorant, vulgar—"

He stopped short, his face flushing red, feeling, insanely, as though he were insulting Meely Schwenckton to her face! "A very nice country girl," he hastily amended his remark, "but not a person one would ask to call on you!"

"But why?"

"Oh, not in our class."

"Then you have 'classes' in America?"

"You know we do! Ever hear of our Colonial Dames or D. A. R.'s?"

"I've heard of your G. A. R.'s to my sorrow! But these C. D.'s and D. A. R.'s—they seem to be an expression of the national yearning for a titled order; for all those silly social encumbrances which England, so much more advanced in democracy, is trying to slough off So this farmer's daughter is an ignorant, vulgar girl who is 'uncannily' like me? Thanks!"

"I'll take you to see for yourself how much you look alike. I want to see you two together! Why, you're as alike as twins—except that you are wholly unlike—I mean your features are alike; that's all."

"It will be interesting to see her—like seeing oneself on the screen! I'll know, for once, what I do look like. A portrait painter once told me my type was unusual—"

She chattered on, but he scarcely heard her, so intent he was in trying to penetrate the veil of her ear-lobes—when suddenly she stopped short, laid down her knife and fork and looked at him in puzzled astonishment.

"Why," she inquired breathlessly, her brows puckered in bewilderment, "are you looking at me so strangely?"

"I'll tell you," he smiled frankly. "You look so like that farm girl that the very shape of your ears is like hers!—so that I should not be at all surprised to find you had even the same little brown mole under the lobe of your ear that she has!"

"Well!" she exclaimed, "how extraordinarily intimate you must have been with her to have learned all about her little brown mole under her ear-lobe! This is interesting, not to say exciting! Own up—how did you come to know about this mole?"

"Do you have one, too?"

"What 'satiable curiosity'! See for yourself." She lifted the lobes of her ears—and he looked.

There was no mole there.

But his relief was not greater than his astonishment and confusion that two people could look so alike without being related. However, he could delight in her, now, without fear and dread—and be proud of her distinction and even enjoy this weird resemblance to the girl for whom his senses hungered.

"Now appease my 'satiable curiosity'!" she insisted. "How—did—you—discover—that farm girl's little mole?"

"Well, you'll find it in your heart to forgive me, I know, that her beauty, so very much like yours, proved so irresistible that—sometimes—I kissed her when I got a good chance.

"And it was while engaged in kissing her that you discovered the little mole?"

"You see if she hadn't been beautiful, like you, I shouldn't have wanted to kiss her—being a bit fastidious in my taste."

"Your fastidious taste," said Lady Sylvia reflectively, "didn't find her too vulgar to be kissed, though she's too vulgar to be asked to call on me?" She shook her head hopelessly. "It's too much for my logic. I don't get it. Kissing doesn't seem to me less intimate than calling! But one thing I do get—I am to play the role of the rival of this 'ignorant, vulgar farm girl' in your affections! It isn't a role that appeals to me."

"I'll show her to you and you'll understand!"

"But how will she like that—your bringing me to inspect her? She might not like it at all! I shouldn't think she'd like it! She might fall upon me and scratch me!"

"But, my dear cousin, you don't suppose that a girl of that class takes the caresses of men of our class seriously?"

"You're sure that girl didn't take you seriously?"

"She wouldn't presume to!" he answered, a faint tinge of uneasiness in his voice.

"I've never been able to understand," she said almost plaintively, "how it is that while men of the most civilized background will seek the most intimate relations with low girls, it would be worse than death to women of the same background to be so much as touched by a common, coarse man. Why is that, St. Croix?"

St. Croix looked rather shocked, as though he felt her choice of a theme to be in very poor taste, to say the least.

"Well, you know," he answered lightly, "when the gods made man and woman they used a great deal less clay and much more divine fire for the woman than for the man; so that woman is of course less earthly, finer, more celestial! Will you," he asked as they now rose to leave the diner, "come to the smoking corridor for a cigarette?"

She thought she would not; but when he had taken her back to their chairs, she urged him to go for a smoke without her. That he refused to do; he had no desire to tear himself from the delectable sight of her for even the few minutes it took to smoke a cigarette. But when she insisted that he must go so that she could take a little nap, as she was "awfully sleepy," he reluctantly yielded.

His reflections as he smoked were increasingly reassuring. The agitating sense of the girl's dual personality was somewhat dulled by the soothing effect of several cigarettes. Even the recollection of certain vague doubts he had always felt about Meely, certain inexplicable things like her fine hands, her being able to get away so often from the hard work of the farm, the touch of foreignness in her speech, her very stupidities that sometimes had seemed more like keen thrusts at him—none of these things were convincing enough to counteract the evidence of the mole. Meely had a mole and Lady Sylvia had none.

He had to go through several day coaches to reach his parlor car, and it was when he was hurrying down the aisle of the last of these, scarcely seeing anyone as he progressed, for the backs of the passengers were toward him, that suddenly the back of a head just a few feet ahead of them brought him to a petrified standstill—froze his very blood—and made his heart sink like lead; for there, under his very eyes, so close that he could have put out his hand and touched her, sat Meely Schwenckton—her heavy, fair hair arranged in the vulgarly exaggerated pompadour she always affected; wearing a grotesque flowered blouse that looked like a kimono or a dressing-sack tucked into her skirt (which no doubt it was!) no rings on her hands; sitting in the slovenly, slouching way that had so often offended his sense of "decency."

The seat behind her was empty. Noiselessly he slipped into it. Her head was bowed over a copy of Snappy Stories; curly tendrils of hair on her white neck—

The mole! Was it there? A mad hope seized him that even yet he might find Lady Sylvia and Meely to be two different people. He bent his head and looked. And there, under her left ear, was the little brown mole!

(TO BE CONTINUED.)

Had Odd Accomplishment

Earl Russell has this anecdote in his book, "My Life and Reminiscenses":

"My grandmother, Lady John Russell, was a great favorite with Queen Victoria throughout her life. Not alone, of course, because she had the peculiar and unusual capacity of wagging her ears like a dog. But this accomplishment intrigued the queen and she suddenly called on Lady John to show it off to an ambassador. My grandmother was so taken back that she lost for a long time the power to move either ear, and only utimately regained her power to move one which she occasionally did for my edification."

Four-Day Atlantic Liners

Keels for ten passenger liners, the fastest ever built, will be laid in American shipyards next spring, if present plans are carried out, as the first step to link America and Europe with four-day passenger service. Even that record may be speeded up in good weather by using airplanes to reach the ships hundreds of miles at sea, and to leave them at equal distances from the coast. Each vessel is to be provided with a landing deck for airplanes. Plans for the high-speed ships have been drawn, and the hull model already tested in the towing basin at the Washington navy yard. The ten ships will cost $150,000,000.—Popular Mechanics Magazine.

Do You Cough?

Omaha, Nebr.—"Last winter I contracted a severe cold which affected me terribly and it seemed that I could not get rid of it. Finally I decided to take Dr. Pierce's Golden Medical Discovery. I had an idea it would relieve me if anything would, and so it did. I took three bottles and was relieved of all the affects of my very bad cold. I think the 'Discovery' is a wonderful tonic for anybody in a debilitated condition of health."—Mrs. M. E. Stillam, 2417 Dodge St.

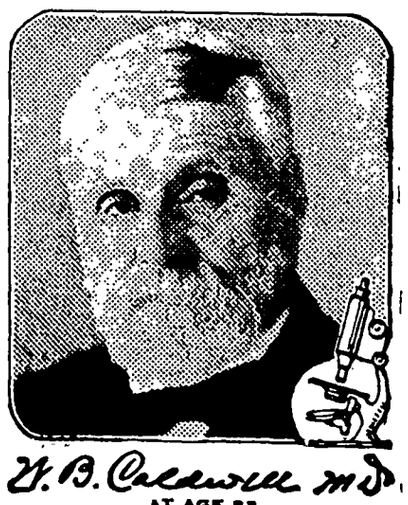
Doctor Found Women and Children Sick More Often than Men

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated.

In the course of Dr. Caldwell's 47 years' practice (he was graduated from Rush Medical College back in 1875), he found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it previously had in Dr. Caldwell's private practice. Now, the third generation is using it. Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Dr. Caldwell's Syrup Pepsin, and we have gotten many hundreds of letters from grateful people telling us that it helped them when everything else failed.



W. B. Caldwell M.D.
AT AGE 83

While women, children and elderly people are especially benefited by Dr. Caldwell's Syrup Pepsin, it is promptly effective on the most robust constitution and in the most obstinate cases. It is mild and gentle in its action and does not cause griping and strain. Containing neither opiates nor narcotics, it is safe for the tiniest baby. Children like it and take it willingly.

Every drug store sells Dr. Caldwell's Syrup Pepsin. Keep a bottle in your home,—where many live someone is sure to need it quickly.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

C. C. Mayne came up from Goodell Saturday to renew old acquaintences in Klomme. Mr. Mayne has been ill for a few weeks with the flu, or he said he would have visited Klemme sconer. He now lives on his farm, although he does not do any farming, three miles west of Goodell

---

The first walking shoes for the baby should have pliable tops and unpolished, flexible but firm soles, which are broad enough to make a good platform for each foot.

Canada, by means of standardization and a grading law, increased its annual egg consumption per person from 201 in 1921 to 313 in 1925.

Now is a good time to look for higher yielding strains of seed corn, oats or other crops. Many good new ones have been developed in recen years.

Sometimes oats used for seed do not grow well. To be safe, the seed should be tested for germination.

COUNTY SPELLING BEE TO BE HELD NEXT SATURDAY

Local Spelling Contest Will Be Held Next Tuesday Afternoon

The Hancock County Spelling Bee or contest, has been set for Saturday afternoon of next week, March 31st. We hope to make a showing and our pupils have been promised prizes for superior ability in spelling in each grade, and for first and second and third rate ability in the whole school from grades 2 to 8 inclusive.

Three prizes will be awarded to the three best spellers in each grade. First prize $1.00, second prize 50 cents, third prize 25 cents. To the best in all grades $1.50 to champion, 75 cents to second best and 50 cents to third best.

Our local spelling bee will be held at our school house on Tuesday afternoon of next week. Parents of children will be welcome to their children's room for the contest and we hope many will come.

NOTICE TO BIDDERS

Sealed bids will be received at the Office of the County Auditor, Garner, Iowa, until 1:30 o'clock P. M on April 5th, 1928, for the grading and incidental work on the Klemme-Ventura Road.

Bids will be opened at the above office promptly after the time for receiving same has closed.

A certified check or cashiers check, amounting to five (5) per cent of bid, payable to the County Auditor, shall be filed with each bid, which in the case of the bidders receiving the award, should he fail to execute a contract and file a bond within the ten (10) days after the acceptance of his bid, shall be retained by the County as liquidated damages.

The proposed work consists of grading five (5) miles of road involving 35,000 cubic yards of earth excavation on the Klemme-Ventura Road.

Work must be commenced by May 15th and must be completed by August 1st, 1928.

Plans and specifications for the work may be seen at the above office or at the office of the County Highway Engineer, Garner, Iowa.

The County reserves the right to waive technicalities and to reject any or all bids.

Payment will be made in warrants on the Road Fund of Hancock County, Iowa.

In making the award the facilities, reputation and responsibility of the bidder will be given due weight.

By virtue of statutory authority a preference will be given to materials, products, supplies, provisions and all other articles produced, manufactured, made or grown within the State of Iowa.

This letting is held by order of the Board of Supervisors of Hancock County, Iowa.

(Signed) H. C. MEYER,
County Auditor
Hancock County, Iowa.

Garner, Iowa.
March 21, 1928.

PUBLIC NOTICE

To Whom it may Concern:

You are hereby notified that at 10 o'clock A. M. on the 5th day of April, 1928 at the Court House in Garner, Iowa, there will be conducted a hearing on the proposed plans and specifications and proposed form of contract, which have heretofore been adopted by the Board of Supervisors of Hancock County, Iowa, and on the cost of and necessity for the following public improvement, the estimated cost of which is, Ten Thousand, Four Hundred, Fifty Dollars, viz grading and incidental work involving 35,000 cubic yards of earth excavation on the Klemme-Ventura Road

At said hearing any interested person may file written objections to the proposed plans, specifications on contract form or cost of such improvement and may be heard orally in opposition thereto, but objections must be in writing to constitute a legal basis of appeal

Dated at Garner, Iowa, this 21 day of March, 1928.

(Signed) H. C MEYER,
County Auditor
Hancock County, Iowa.

12 Choice Trees and Plants

named in order from left to right as they appear above.

1 Mountain Ash Tree 1 year. White flowers turning to clusters of red berries.
2 Japanese Berry Shrubs. Yellow flowers followed by red berries.
2 Red Gold (*Sugar Saver*) Strawberry plants. Berries up to 8½ inches.
2 Number 38 Hybrid. New earliest to ripen dark red strawberry.
2 Everbearing Strawberry plants. Will bear berries from July to November.
1 Hardy Violet plant for border, foundation or potting.
1 Madam Chereau Iris. Beautiful, hardy perennial.
1 Russian Olive shade tree 1 year. Silver leaves and fragrant yellow flowers.

In three years time you probably would not sell these trees and plants for $25.00 and they will add greatly to the attractiveness of your place and be a permanent advertisement for our nurseries.

Write Today! and we will send twelve trees and plants Free at planting time in spring 1928. Include 25c for packing and mailing or not, as you please. A postal will bring them.

Catalog describing our Hardy "*Blizzard Belt*" Profit Making new Strawberries, Orchard Fruits, Ornamentals, etc FREE.

Our new *Red Gold* or Sugar Saver Strawberry is the result of 17 years of strawberry breeding and is far ahead of any strawberry we have ever grown. Has 30 day fruiting season. We have counted 43 berries, buds and blossoms on a single fruit stalk and eleven stalks on one plant, the tallest of which measured 15½ inches and so stout and sturdy that they held the big berries up out of the dirt and made picking a pleasure. Largest Red Gold berry to-date measured 8½ inches around. Berries are very sweet and meaty and have that good old fashioned wild strawberry flavor. They only require one half the amount of sugar for making the very highest grade of preserves, saving a full pound of sugar with each quart of *Red Gold* berries.

If you want these twelve choice trees and plants, write for them today It will pay you to get acquainted with our PROFIT MAKING Nursery Products.

Every Time a Fence Breaks *You Lose Money*

POSSIBLY it's only part of the crop, perhaps the stock that breaks through dies from gorging or is maimed or killed. Either way you lose enough to pay for many rods of sound, tight fencing. Be prepared for such emergencies. Keep a few RED TOP posts handy on the farm. Strengthen at once the weak spots that develop in your fence lines. Replace rotting wood posts with RED TOPS. This makes the fence stronger and saves losses.

RED TOPS can be driven easily, through the hardest soil. That makes it easy to repair or build fence at any season with RED TOPS. And RED TOPS are made of tough, durable, long-lived steel that gets the most years of usefulness from any fence. Stock and hog-tight fences are the key to profitable farming.

Red Top

KLEMME SCHOOL NOTES

Our high school boys have been limbering up their arms and hands for the national game of base ball which they will indulge in when the weather becomes warmer and the diamond dry enough.

Both Goodell and Swaledale have written for games and both will be accomodated. Other games will be scheduled.

Our Home Economics room will be occupied next week by a physician an dnurse who will conduct a clinic for babies, and parents who wish to consult Dr. Gerken and Miss Pattee are invited to attend with the children up to two years of age. This is an opportunity to consult competent authority on the problems of caring for babies and of doing the most for them We feel no mother can afford to neglect the advantage of this counsel. They will be welcome For further particulars and for an appointment for the clinic call or see Mrs. C. A. Arnold

Philip Bock is helping with the spring work at the John Bock farm this week.

NEWS REVIEW OF CURRENT EVENTS

Wall of Water Carries Hundreds to Death in California.

A TREMENDOUS wall of water turned loose into San Francisquito canyon when the giant St. Francis dam burst under pressure of 12,000,000 gallons of water, carried more than 400 sleeping residents of the narrow valley to death.

The great concrete retaining wall, 185 feet high, built less than two years ago to impound water for the city of Los Angeles, gave way without warning, releasing the flood upon the sleeping inhabitants of the picturesque valley.

Everything was swept away—human beings, houses, cabins, workmen's tents, orchards and live stock. Of the estimated 500 persons who were in the narrow canyon and lowlands below at the time the dam gave way, only a few more than a hundred have been accounted for

Property damage is estimated at from $10,000,000 to $30,000,000.

Some city officials of Los Angeles declared a preliminary examination indicated the break had been caused as the result of an earth movement or some external force. Passing motorists and valley residents declared seeping around the buttress might have been the cause.

The canyon bottom and valley were swept clear of all signs of civilization for several miles. In the silt deposit, which in some cases was 30 feet deep, remained the uncounted bodies of the victims, houses, live stock and other ruins.

SUDDEN shifting of a side of Mount Serrat, located in the center of the city of Santos, state of Sao Paulo, Brazil, crashed thousands of tons of earth and rocks without warning onto a section of that place, and left a dead and dying toll of more than 200.

Houses and buildings in the path of the slide were crumpled and buried, their occupants apparently not discerning the impending disaster until it was too late to escape the huge avalanche.

Mount Serrat, with a moderately high peak, is located practically in the center of Santos, Brazil's principal coffee port, with residences and business buildings spread around it on three sides.

THE United States senate published the report on conditions in the bituminous fields of Pennsylvania by the subcommittee which the senate sent into that area on an investigation that lasted five days.

The report declared the conditions to be dangerous to public order and deplorable as to morals, housing, sanitation, and general living conditions.

It was unfavorable to the methods of most of the operators and it praised "the splendid courage" of the women folk of the striking miners in the face of "privations which make the mothers' lot always the hardest to bear."

Legislation by congress was recommended for the correction of chaos in the industry which the investigators said, "generally is not in a prosperous condition in this country."

"We most respectfully urge," the senators concluded, "that the investigation by the whole interstate commerce committee of the senate be searching and severe in every detail, looking forward to some solution by legislation that will put the great coal industry of America on a reasonably prosperous basis."

WILLIAM M. BUTLER, chairman of the Republican national committee, denied that he received or handled any part of the $260,000 in Continental Trading company Liberty bonds advanced by Harry F. Sinclair to help wipe out the committee's 1920 Presidential campaign deficit.

Butler's denial was made public almost simultaneously with the text of a letter in which Senator Borah (Rep., Idaho), called upon Butler to lead the Republican party in a move "to clear itself of the humiliating stigma" placed upon it by acceptance of Sinclair's campaign contribution.

The letter suggested that Butler would have only to make the appeal and thousands of honest Republicans would willingly contribute "from one dollar up to any reasonable sum" in order that the money advanced to the party's war chest by Sinclair out of the same fund he used to pay Albert B. Fall, former secretary of the interior, for the Teapot Dome naval oil reserve might be returned.

THE White-Norris constitutional amendment to abolish "lame duck" sessions of congress, and change the Presidential inaugural date was rejected by the house. The vote was 209 to 157, with two members answering present. This was 36 votes less than the two-thirds necessary for approval of constitutional amendments.

The amendment sought to change the meeting date of congress from March 4 to January 4. This would have abolished the "lame duck" sessions of congress, or those in which sit members who were defeated at earlier elections. To conform with this change, the resolution proposed to have the President take office on January 24, instead of March 4.

SECRETARY OF THE TREASURY Mellon informed the senate Teapot Dome committee that he received $50,000 of the $260,000 of Liberty bonds which Harry F. Sinclair advanced to cover part of the deficit of the Republican national committee in 1923, but that he had refused to retain the bonds in exchange for a like contribution.

The treasury secretary disclosed that the bonds had been sent to him by Will H. Hays, former chairman of the Republican committee, and that, when Hays subsequently called on him to explain his purpose, he had declined to keep them as suggested. He added that he had returned the bonds to Hays and shortly thereafter made a contribution in the same amount from his own funds.

A FEVERISH day on the New York stock exchange March 9 saw the sale of 3,706,500 shares, General Motors being principally involved. The market closed with General Motors at 161. The following day the market was checked at 156, but General Motors had regained more than a point at the close. Several things caused the orgy of speculation: A decrease of $26,000,000 in brokers' loans, removing the likelihood of the Federal Reserve bank board immediately raising the discount rate; a widespread feeling that General Motors will be able to compete successfully with the new Ford, and the news that the Managers' Security company, owned by General Motors executives, had bought 200,000 shares of stock, reflecting the confidence of the executives in the continued prosperity of the concern.

THE coal industry held attention during the week as the senate's committee continued its investigation. John L. Lewis, president of the United Mine Workers, testified that in his belief laws should be passed to permit the closing of uneconomic mines, to prevent railroads from exploiting mines by their insistence upon cheap coal, and to curb the use of injunctions in labor disputes. W. G. Warden, head of the Pittsburgh Coal company, attacked the union on the witness stand. He said he believed in democracy in government but in a "benevolent despotism" for business. An attorney for the union miners charged that the Federal Council of the Churches of Christ were planning a report to "whitewash" the operators of blame in the present strike and its consequences.

RODMAN WANAMAKER of New York and Philadelphia died March 9. He was reported to be the most heavily insured man in the United States. Policies on his life totaled $7,500,000.

He was one of the foremost merchants of the world. He inherited the widely known Wanamaker stores in New York, Philadelphia and Paris from his famous father, the late John Wanamaker. Long known as an aviation enthusiast, he gained his chief fame along that line by backing the successful flight of Commander Richard E. Byrd to France last summer. At the time it was said he had spent $500,000 on proposed transatlantic flights, about half of that amount being for the Byrd expedition.

AMERICAN LEGION officials are mobilizing their forces for what is heralded as the greatest peacetime offensive ever attempted in this country in the interest of legislation providing for the universal drafting of man power and the control of labor and industry in the event of another war.

Backed by Secretary of War Davis and many high army officials, the former service men of the nation will make their seventh effort since the war to convince congress and the American people that steps should be taken in peace time to guarantee the President the widest dictatorial powers in case of another national emergency.

A PROVISIONAL estimate by the census bureau placed the population of the United States as of July 1, 1928, at 120,013,000, an increase of 14 per cent over the 105,710,620 actual count on January 1, 1920. The next federal census will not be taken before 1930.

The new total was arrived at by estimating the increase since 1920 on the basis of the best available returns on births, deaths, immigration and emigration.

THE automobile industry is perturbed over the realization that it may be forced to pay a certain wheelmaker upward of $500,000,000 for using wheels on automobiles. A patent granted to Edward P. Cowles, of Sparta, Mich., in 1914, on interchangeable wheels gives the manufacturer who today owns its license rights the authority to make this huge collection from the industry, in the opinion of many lawyers.

PLANS for breaking down all obstructions to American supervision of the Nicaraguan elections next October have been under preparation at the State department following conferences between Secretary of State Kellogg and Senator Borah (Rep., Idaho), chairman of the senate foreign relations committee.

American officials, it is asserted, are determined to carry out their pledge and give the Nicaraguan people a fair election. Opinions expressed indicate the administration is prepared to furnish such marine forces as are necessary.

FORMIDABLE naval preparations were announced in the Italian chamber of deputies by Admiral Sirianni of the Italian admiralty. Italy now has under construction one billion four hundred million lire ($73,920,000) worth of armed vessels, which include two 10,000-ton cruisers and twelve submarines, started under the 1924 program, the admiral revealed. All these will be in operation within two years. This year's program includes two new cruisers, four destroyers, and four submarines, he said.

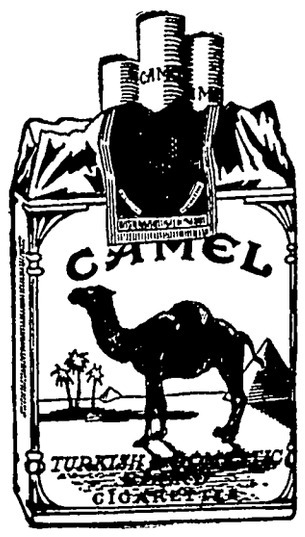
JONATHAN DIXON MAXWELL, pioneer automobile manufacturer and one of the three men who built the machine now preserved in the Smithsonian institution, believed to have been the first automobile, is dead.

Mr. Maxwell, whose name was given to the Maxwell automobile originated by him and manufactured by the company of which he was president, was associated with Elmer Apperson and Elwood Haines in building the machine believed to have been the predecessor of the modern automobile.

AGAIN the attempted conquest of the western passage of the North Atlantic by aviation has failed and Capt. Walter Hinchcliffe and Miss Elsie Mackay, who set out from an English airdrome for a flight to America, went down somewhere in the Atlantic. No trace of their airship has been found.

AN APPROPRIATION of more than $1,000,000, to be used in reforestation of denuded areas and in other conservation activities, is asked in a bill introduced in the senate by McNary of Oregon.

If you smoke for pleasure



—you have the right idea. Enjoyment in smoking is the thing that counts and you get it full measure in

Camels

Unfortunate Yawn

When Miss Dorothy Caldwell, eighteen, of Dallas, Texas, awoke one morning she was unable to close her mouth. It required three hours for physicians to get her dislocated jaw back into place. They said that yawning while asleep probably caused the dislocation.

Beg Your Pardon

Harry—Is Mr. Bale in his room?

Clerk—Sorry, but there's nobody home on the top floor.

Harry—Oh, then I'll ask somebody else.

Another War Predicted

A war worse than the World war probably will come within a century, believes the English chemist Haldane. And, he adds, it is possible it may prove fatal to our particular type of civilization. At the present time the main thing science can do is to make wars unprofitable for the victors as well as the vanquished, says Capper's Weekly.

Only Way Out

"I hear Brown's marrying a landlady." "Yes, the poor fellow couldn't pay his board bill."

Dead Man Gets Quotations

Alfred McGee, wealthy Alabama cotton grower, requested his grave made near the highway so that farmers hauling their cotton crop market could call out to him in a l voice the price of cotton, and this h been done for forty-five years.

Thirty-Two Points

There are 32 points of the co pass.

Money talks. Perhaps that is w they put a woman's head on a sil dollar.

One of those Lovely Skins men turn to look at

You, too, can have "a skin you love to touch"

Nearly every woman's skin would be lovely

if it weren't for one of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

FAULTLESS!—that is how your skin should be. And you can make it so!

The famous Woodbury skin treatments will help you to overcome any of the six troubles given here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped so many thousands of women to gain a beautiful complexion.

Simple clear directions for each treatment and the treatment for normal skins are in a booklet wrapped around every cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and see what an improvement it will make in *your* complexion! A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

WOODBURY'S FACIAL SOAP

POULTRY

AKE PROFIT IN RAISING TURKEYS

ost people consider that it is prac-ally impossible to raise turkeys. wever, the results of some breeders well as those of the experiment sta-s show that it is not only possible raise turkeys, but it is also possible make a profit at the work.

hen turkeys are being raised a ducer has only one thing in mind, ely, keeping them alive and lthy so that they will grow into rketable poultry. With chickens re are two propositions to watch, s and market poultry.

urkeys are subject to many of the ments that bother chickens, but the f trouble has been a disease own as blackhead. This disease ects turkeys of all ages, but is par-larly disastrous when poults are t nicely feathered.

here has been a reason for these ses in many cases. Chickens are ected with blackhead, but it does usually kill them. In many cases ckens have acted as carriers of disease to the turkeys. In view this many people have found it rantageous to raise the poults away m chickens and on fresh ground. is has encouraged the use of incu-tors and brooders for turkeys and, ere properly managed, they have ored very satisfactory.

When young poults are reared with ickens they usually get worms. orms seem to help the parasites that use blackhead, as it makes an open-g for the parasite to enter the sys-m. People who raise their young rkeys on fresh ground, away from her poultry, are not apt to be ubled with blackhead. Turkeys ll even stand confinement, if plenty green stuff, good sanitation and equate protection is provided. The innesota experiment station raised rkeys in confinement for the last ree years. It is not necessary for e young poults to catch grasshop-rs, as animal protein needed in eir ration can be supplied with meat raps.

irst Feed of Poults of Much Importance

The first feed of the poults is very portant. The second day they ould be given a little clean drinking ater and have access to some fine nd.

The third day they will show signs hunger. Feed them about five mes each day for several days. ard-boiled eggs, clabber cheese, corn ead and pinhead oats are all good ods for the baby turk.

Give only what they will clean up hickly. Keep them hungry and look-g for more. As they develop they ay be given cracked wheat, corn eal and hulled oats. Good results ill be obtained by keeping bran be-re them at all times. Sweet skim ilk and btutermilk may be given in e early morning. Green feed and rit should be given, if it must be pur-hased from the poultry supply ealers.

When the hen is allowed to range, e turks will get plenty of exercise nd pick up lots of bugs and worms s well as weed seed and green ma-erial. One must be careful to drive he mother in before a rainstorm nd put her and her brood in a house hat does not leak.

The hen should not be allowed to oost away from her coop a single ight while poults are small. Rats nd skunks may steal her young and storm may come up during the ight and destroy the young. Keep watchful eye on the flock and suc-ess will be assured.

Late Molters

The most desirable of the late lay-ng hens which molt as late as Sep-ember 15 or later should be mated ith the best males of the flock or preferably with males secured from breeder of a good strain of produc-ion-bred stock. A small pen of 15 to 5 breeders will produce cockerels or the flock matings the following eason and, furthermore, will help to ay the foundation for a flock of high producing birds.

Giving Eggs Air

Cooling the eggs gives them an air-ng and replaces the stale air in the gg chambers. It also slows down he hatch. The early hatches need o cooling except the amount received hile they are turned. If the eggs re cooled too much twice a day it is vident that it will take some time o bring them back to 103 degrees. It ften means that three or four hours ut of each twenty-four the eggs will e developing at a temperature below 03 degrees.

Kill Weak Chicks

This advice given by the Ohio Col-ege of Agriculture seems a little bit ruel, but it is probably worth follow-ng: Do not under any circumstances elp chicks out of the shell. Chicks hich do not have enough vitality to et out of the shell, either because of lack of vitality in the egg or be-ause of faulty incubation, are not worth having. "Kill and burn all eak or crippled chicks as soon as he hatch is over. Weak chicks are lways a menace to the flock."

Self-Fed Sows and Pigs Win

Easiest Way of Doing a Thing Proves to Be Best on Government Farm.

(Prepared by the United States Department of Agriculture.)

Once in a great while the easy way of doing a thing proves to be the best way also. An instance of such a happy combination of "easy way—best way" conditions which should appeal to all hog raisers is the method adopted by the United States Department of Agriculture in feeding and handling sows and litters during the suckling period.

Prefer Self-Feeding.

Sows and litters are now self-fed in preference to being hand-fed at the government farm as a result of conclusions formed from a three-year study of the two methods. The general plan of the test was to place the same kinds of feeds in separate compartments of a self-feeder for sows and litters being self-fed as were given to the hand-fed group. The hand-fed sows and litters were fed all they would readily clean up twice daily while the self-fed sows and litters had free access to the self-feeder at all times.

The results of the three-year test indicate that: Self-feeding sows and litters during the suckling period saves both labor and feed; the self fed lot was more thrifty than the hand-fed lot; a total of 441 pounds of feed was required for 100 pounds of grain in the self-fed lots, while the hand-fed lots required 603 pounds; the pigs from the self-fed lots made greater daily gains from farrowing to weaning and also during the various tests in which they were subsequently used.

No Overcrowding.

It was noted also that no overcrowding of sows and pigs occurred at the self-feeder even where there was a large number of sows with litters in one lot. There is also less danger of overeating when feed is available at all times as is the case with self-feeding.

Sows and litters may be put on the self-feeder as soon as the sow is on full feed after farrowing. The trials also indicated that 81 per cent of sows from self-fed lots when bred settled at the first service, as against 47 per cent for the hand-fed sows.

Pays to Know Volume of Timber in Farm Woodlot

It pays to know the volume of timber in a farm woodland before making a sale, says the forest service, United States Department of Agriculture. If the farmer does not know how to estimate standing timber, he would do well to call in expert assistance, which can often be obtained through the county agent or state extension forester. The value of such an estimate is shown by the experience of a woodland owner in Williamson county, Tenn. The highest bid which he received for his tract of hardwood timber before it was estimated was $2,700, which he was inclined to accept. However, he employed an experienced cruiser to estimate the timber and assist him in finding other bidders. Within three months the tract was sold for $6,500, half in cash and half due in six months. The cruiser charged $500 for his services, and the owner thus netted $6,000, or $3,300 more than he would have obtained without securing assistance.

Alfalfa Wilt Is Cause of Plant Dying in Spots

Does your alfalfa now die out in three or four years, where before it used to live a good deal longer? Or does it die only in spots, and seem to lack vigor?

Maybe the trouble is alfalfa wilt. This is caused by a breed of microbes which get into the plant somehow, and plug up the sap vessels. The plants may look all right, and then suddenly wilt down on a hot day. Later in the summer, some of the plugged roots may produce pale, spindling shoots with small leaves. If you cut across the tap root of these plants, the woody part will be found yellow and discolored next the bark.

Not a great deal is yet known about this disease. Scientists think that the microbes enter the plants through wounds, but how to stop the injury is not yet known. Disking alfalfa may sometimes lead to this trouble, and probably shouldn't be done if there is any wilt in your section.—Farm Life.

Short Farm Notes

The farm with the most acres may not do the largest business.

* * *

A water tank built on top of a silo provides water under pressure for farm use.

* * *

Store seeds in a cool place if you order them early. They are kept in better condition than in a warm room.

* * *

Look over the hoes occasionally and grease the blades if they are growing rusty. A rusty hoe is a poor tool.

* * *

Order seed liberally. It is the cheapest commodity on the market. It is better to have too much than not enough.

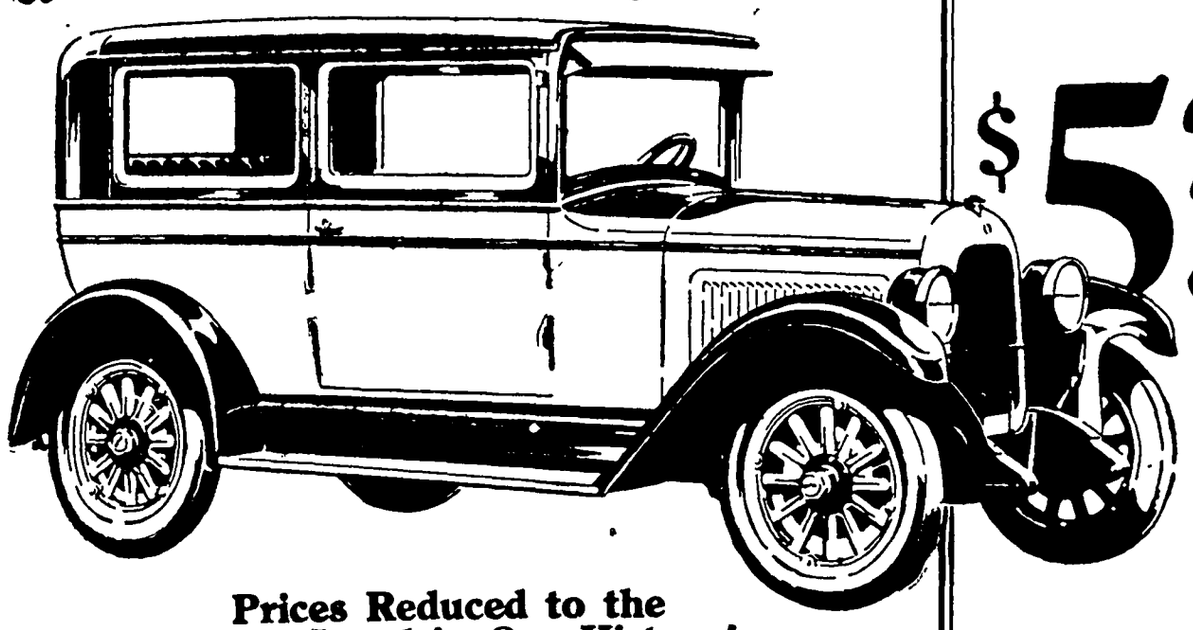
The Only Light Car

offering all these Quality Features



Only Whippet has all these features:

- Full force-feed lubrication
- Silent timing chain
- Light-weight, single plate clutch
- Gasoline tank at rear
- Metal, oil-tight universal joints
- Big 4-wheel brakes
- Long, semi-elliptic springs
- Heavy, rigid tapered frame
- Alemite chassis lubrication
- Low-swung, full-vision bodies
- Adjustable steering post
- Balloon tires
- Snubbers

$535 5-passenger COACH

Prices Reduced to the Lowest Level in Our History!

It is important to remember in considering the sensational Whippet price reductions, that the *quality* of these cars is now finer than ever before.

The perfected Whippet is smarter, more colorful, with added grace of line, and new items of equipment. Full-crown fenders, cadet visor, window reveals and other refinements give it the style appeal of the most modern fine cars.

Everywhere owners report their complete satisfaction with its spirited performance, its remarkable economy, its comfort and its easy handling.

Prouty Electric Shop

GARNER — IOWA

"Hank" Sez:

That Carload of FIELD SEED is now here. We have a complete variety of Seed on hand. The grade is HIGH—the price is LOW. Come in and get yours today!

POULTRY FEEDS NOW—

We have in stock a full line of Feeds for Poultry—Chick Starter, Chick Feeds, Laying Mash—in fact anything you need in the Poultry Feed Line.

FLOUR—AND MORE FLOUR

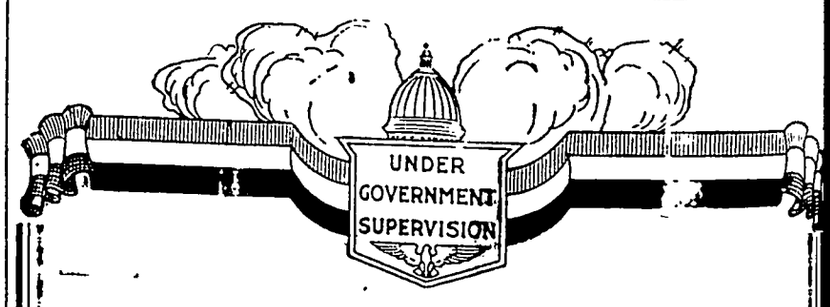
Sure! We just unloaded another car load of Flour. Take a tip—buy now!

NOT TOO LATE TO BUY COAL

Plenty of cool—maybe cold—weather ahead. Why take a chance of freezing?—Get another load of our good coal and laugh at the weather man. Sure, we have some good range coal too.

And—"If we haven't got what you want—we will get it for you—quick"

North Iowa Grain Co.



Success -

You may have noticed that the successful men of our country prepared themselves for success when they were very young, and the successful men who are living today will tell you that saving was the first step toward successful endeavor.

Save a little as you go, but save it regularly. The greater things will come in natural sequence.

ERNEST SCHULDT DIED MONDAY EVE

HAD LIVED IN THIS COUNTY FOR MORE THAN FIFTY YEARS

Had Active Part In Building Church In Liberty Township

Mr. Ernest Schuldt was born September 17, 1855 at Eldana, Meckelnburg-Schwerin, Germany, where he spent his boyhood days.

At the age of 10 years he came to America with his parents, Johann and Sophia Schuldt. They came to Colesburg, Iowa where lived an uncle, Charles Schuldt Here they engaged in farming.

At the age of thirteen years he was converted to God through the ministery of Father Merten, who was pastor of the German Methodist Church at Colesburg.

Ernest lived with his parents and relatives until he was 21 years of age, when he came to Garner, Iowa, and worke das a farm hand for his uncle, Charles Schuldt, who owned the farm which is now known as the Ulrich farm

In June, 1876, he joined the German Methodist Church at Garner, Ia and maintained his loyalty to that Institution.

For four years he worked as a farm hand and on October 30, 1880, was united in marriage with Miss Minnie A. Stille, who proved to be a real helpmate and who so faithfully and tenderly cared for him through this most trying and painful affliction.

Mr and Mrs. Schuldt started their matrimonial life on a farm southwest of Garner which is now known as the Henry Katter farm from which they moved onto the Wellemeyer farm. After several years as a tennant farmer they purchased a farm on which they lived for many years until they retired and moved to Klemme.

Mr. Schuldt's life as a pioneer recalls to our memory not only the making a seemingly wasteless prairie into a most beautiful and productive farmsteads, also reminds us of a heritage far more valuable than dollars and cents can represent

The spiritual fire which dominated the hearts of Mr. Schuldt and his comrades, many of whom have preceded him—we think of Henry Griewe, Ernest Lenz, John Gruetzmacher, Beier, Schlei, Gast, and others, is what makes it possible for us to enjoy the spiriutal blessings now. To them we owe our greatest and most sincere respects.

He had the pleasure of helping our religious institution grow from a small room service in the old Concord courthouse with only a few members to the rural schoolhouses and finally to the modern edifice which now is the Liberty Township Church.

He has had the honor of holding nearly every office which the institution affords.

Beside his public spiritness he maintained a deep spiritual character which manifested itself in all his dealings. The atmosphere of kindliness and hospitality and of untiring service which was so prevalent in the Schuldt home is what drew to it the host of friends whom the deceased cherished so highly.

He enjoyed seemingly good health until about a year ago when an affliction made inroads on his health. On July 9 he submitted to an operation which at first promised to be successful. His condition finally proved to be cancer.

His relief from this terrible malady came on March 26, 1928. He having attained the age of 72 years 6 months and 9 days.

There are left to mourn his departure his bereaved widow, one son and five daughters. They are: Mrs. J. W. Haefner, Mr. Wesley Schuldt, Mrs. Charles Busch, Mrs. Victor Schoenwetter, Mrs. John Suckow, and Mrs. D. P. Anderson. All reside in this community. He is also survived by fifteen grandchildren and one great grandchild, as well as by three sisters and one brother. These are: Mrs. Anna Hartke, Mrs. Minnie L. Josten, of Garner, Mrs. Sophia Mitzner of Colesburg, Iowa, and Mr John Schuldt of Vancouver, Washington, besides other relatives and a large host of friends.

Funeral services were held this afternoon (Thursday) at the Methodist Church conducted by Rev A W Gauger and Rev Wessel, of Reinbeck, a former pastor of Mr Schuldt's They were assisted by Rev Grosshuesch of the Reformed Church

Interment was made in the Klemme Cemetery

(Contributed by Mr. J W Haefner)

SCHOOL BOARD RE-ELECTS ALL TEACHERS

Special Meeting Of Board Held Last Thursday Evening

At a special meeting held last Thursday evening the Klemme school board met to discuss the hiring of teachers for the coming year, accordingly they agreed upon re-electing each teacher of the Klemme High and Grade Schools for another year of teaching.

The parents who have children in the Klemme schools seem to be well pleased with the teachers this year A number had expressed their wish to the board that the present corps of teachers be given a chance to teach here again next year The board acted accordingly to this wish

How many will sign contracts is not known at the present time No doubt all, or most of the present teachers will return next year

NEWS OF THE KLEMME SCHOOL THE PAST WEEK

We are glad for the interest taken in he local spelling contest promoted by our Parent-Teacher Association and to rthe encouragement given the pupils by their parents We are grateful to those who officiated as judges, Mrs Jorgenson, Mrs Sampson, Mrs Thomas and Ethel Wellemeyer Rev. Grosshuesch, a member of the committee for the contest was on hand and helped provide the money and award the prizes. We are also grateful to him

Gladys Schlichting, who won the first prize for placing first over all, will represen Klemme at the County Contest at Garner next Saturday afternoon Gladys made a good showing last year and we believe she will remain up with the best of them this year

Our faculty and seniors were given complimentary tickets to the Junior College play at Britt on Tuesday evening of this week All went and enjoyed the entertainment immensely.

Our attendance has materially improved this week. Most of those who were ill or confined because of sickness at home are back at work and trying to make lp for lost time

Many were present with children at the free clinic on Thursday of this week This speaks well for the parents of our community The University of Iowa has instituted a worthwhile program for the mothers and fathers of our commonwealth and we like to see them availing themselves of it in interest of their children

We understand Dr. Gerken and Miss Pattee left Klemme for Britt where they will also hold a similar clinic.

Twenty-one children were cared for at the local clinic.

The lecture number on our lyceum course has been postponed from April 5th to April 13th, placing it week after next We believe Mr Price will give a splendid address.

Our April P T. A Program will be given next Tuesday evening Mr. Wellemeyer. Mrs Walter Lau and Rev Grosshuesch have consented to present topics. The lower grade children will sing for us two numbers We have for the last two programs depended upon out of town talent and we shall now listen to our parents whom we believe can give us discussion worth coming to hear. Program will begin at 8.00 o'clock.

Card Of Thanks

We wish to thank all for the acts of kindness and help, and words of sympathy and floral offerings presented by friends and neighbors in the death of Reinhardt Ufken

Mr. and Mrs. Frank Ufken,

Mr and Mrs Cuno Ufken, family.

Mrs. Elko Buss and family

LIBERTY TOWNSHIP MAN PASSED AWAY

FUNERAL SERVICES FOR FRED BEIER FRIDAY AFTERNOON

Services Will Be Held n Liberty M. E. Church At 2:15 O'clock

Frederick Beeir, generally known as "Freddie" died rather unexpectedly o nWednesday morning, March 28th, 1928, at 8 15 o'clock at the old Beier homestead in Liberty township, after a lingering illness that covered a period of about one year.

He was seriously ill some time ago and his life was dispaired of then, however, he recovered and since then had been fairly well until about a week ago when he turned worse but not so much so that his condition was considered very serious until about a day before he died

Carl Frederick Beier was born on March 3, 1876, in Clayton County, Iowa When he was one year old the family moved to this county, and resided here ever since Frederick was never real well physically nor mentally and lived through life seriously handicapped He had a kindly disposition and enjoyed and appreciated the kindnesses and friendly words tendered him by others

He seemed to have an intuitive understanding of things spiritual and derived much joy when he turned to God in prayer and communed with Him in his simple, childlike way. He seemed to realize when the end drew night that he soon would be reliever and freed from the barriers which had hampered him all through life A glad joy seemed his when tho end drew nigh and his soul was released to go to that realm where such embarrassments are unk own

We reejoice with him today that he has been relieved and now is happy with his saviour.

He is survived by his aged mother who was ever solicitous about him, by three brothers and three sisters, all known in this community.

Funeral services will be held on Friday afternoon A regular service will be held in the home at 1:30 for the benefit of Mother Beier, who is unable to attend the services in the church At 2.15, or soon thereafter services will be held in Liberty church

Interment will be in the Liberty cemetery.

—Rev. A W. Gauger.

STATEMENT OF THE OWNERSHIP, Management, Etc., Of The Klemme Times

Published weekly at Klemme, Ia., for April 1. 1928.

State of Iowa,

County of Hancock, ss

Before me, a notary public in and the State and county aforesaid, personally appeared R A. Jorgenson, who, having been duly sworn according to law, deposes and says that he is the Owner of the Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption

That the names and addresses of the publisher, editor, managing editor, and business managers are: R. A Jorgenson, Klemme, Iowa.

That the Owner is: R. A. Jorgenson, Klemme, Iowa.

That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

(Signed) R. A JORGENSON, Owner.

Sworn to and subscribed before me this 22 day of March, 1928.

(Seal) C G Waterman.

My commision expires, July 1, 1928.

Card Of Thanks

We wish to thank our friends and neighbors who assisted us in our recent bereavement, for floral offerings from the Royal Neighbors and Woodmen, and for acts of kindness and words of sympathy bestowed on us.

Mrs. Frank Roths and family.

STOCK SHIPMENTS NOW ON INCREASE

NINE CARS STOCK SHIPPED OUT SATURDAY NIGHT

Shipments Show Increase Over The Weew Before

Stock shipments for Saturday took a slight jump and climbed well up to the regular mark again.

Nine car loads of live stock were shipped out Saturday night.

The Klemme Live Stock Shipping Association, of which Joe Johnson is the manager, handled seven loads of stock, consisting of six car loads of hogs and one car load of cattle.

C A Larsen, local stock buyer and shipper, had two car loads of hogs in the Saturday night shipment.

Joe Johnson and Oscar Carlson went to Chicago on the stock train.

Flag Questions Answered Here

AUXILIARY QUESTIONS ON FLAG ANSWERED THIS WEEK

Questions Which Were Puzzling Are Answered In This List

Last week The Times printed the list of questions on the Flag submitted by the Klemme Auxiliary to the pupils of the Klemme Schools to find the correct answers.

The answers only are printed this week. By referring to The Times of last week you will find the questions. Use them in comparing the followings answers given:-

1 Sept. 3, 1777.

2 "Resolved, That the Flag of the United States be thirteen stripes, alternate red and white; that the Union be thirteen stars, white in a blue field representing a new constellation."

3 (a) 1777. Representing the thirteen original colonies; a star and a stripe for each.

(b) Jan. 3, 1794. When Vermont and Kentucky entered the union, two additional stars and stripes were added. Changed back to thirteen stripes on April 4, 1818.

4 48, one for each state.

5 13, one for each of the thirteen original colonies.

6 Red.

7 White.

8 From sunrise to sunset.

9 Union to the north in an east and west street; union to the east in a north and south street.

10 June 14

11 "We take the stars from Heaven, the red from our own mother country, separating it by white stripes, thus showing that we have separated from her, and the white stripes shall go down to posterity representing Liberty."

12 Width, 1.; length 1.9; width of union 7-13; length of union .76; width of each stripe, 1-13; diameter of each star, .0616.

13 President Taft, Oct. 29, 1912; revoked and republished by President Wilson in 1916.

14 Hoisted briskly, but lowered slowly and ceremoniously.

14 Everyday thruout the year, weather permitting, but especially on National and State holidays and on all historic and special occasions.

16 (a) Aug. 3, 1777 from Fort Slonwix in New York.

(b) 1775 by Capt. John Paul Jones

17 (a) Stand at attention.

(b) Remove hat and hold it at left shoulder with right hand over heart.

(c) Right hand over heart.

18 At the moment the flag passes the observer.

19 The flag represents the living country and is itself considered as a living thing. The union of the flag is the honor point; the right arm is the sword arm and therefore the point of danger, hence the point of honor.

20 The union uppermost and to the flag's own right, that is, to the observer's left.

21 The only exception to the rule that the Flag shall not be used as drapery is in the case of military funerals when the caskets are draped with the Stars and Stripes.

22 At half staff until noon; from then until sunset at full staff.

23 By half staff is meant hauling down the Flag to one half distance between the top and bottom of the staff.

24 Hoisted to the peak for an instant and then lowered to half staff.

25 Until noon.

26 Hoisted to full staff.

27 They should stand at attention and men uncovering.

28 Pause and stand at attention until the flag passes.

29 Place the flag so the union is at the head and over the left shoulder.

30 No.

31 No.

32 Bunting of the National Colors should be used for covering a speakers desk, draping over the front of a platform and for decoration in general. Bunting should be arranged with the blue above the white in the middle and the red below.

33 No.

34 No.

35 Either on the marching right, that is, the flag's own right, or when there is a line of other flags the flag of the United States may be in the front of the center of that line.

36 Shortly after the entrance of the United States into the World War, the first American troops to reach London after the Declaration of War carried into St. Paul's Cathedral a number of American Flags, which were placed together with those of the other Allied Nations in the Great English Shrine. This epochal event marked the alliance of the two great self-governing Anglo-Saxon nations.

37 No.

38 Time of war.

39 Sign of distress.

The National Flag flown by the United States Navy is called the "Ensign."

41 The only three buildings in the United States over which the Flag is flown officially day and night are as follows: Over the East and West fronts of the National Capitol and over the adjacent House of Representatives and the Senate Office buildings

42 They should be flown from separate staffs of the same height and the flags should be of approximately the same size.

43 The United States Flag should be at the center or at the highest point of the group.

44 The union should be above and to the reader's left.

45 Written by Francis Scott Key on Sept. 14, 1814, after a surprise attack of Ft. McHenry the night before.

46 Given by Capt. William Driver.

47 "I pledge allegiance to the United States of America and to the republic for which it stands. One nation indivisible with Liberty and Justice for all.

48 Until June 14, 1923 there was no authorized set of rules by which we could observe Flag etiquette

On that date the National Flag Conference convened at Washington, D. C. and formally adopted the rules and regulations that have been given in this set of questions and answers.

49 By instructing everyone in Flag etiquette and everyone observing it.

METHODIST CHURCH NOTES

A. W. Gauger, Pastor

On the coming Sabbathday we will have Dr. G. T Notson, Superintendent of the Methodist Hospital at Sioux City, with us. As this day is also Palm Sunday his message will be in keeping with the day. You will enjoy hearing him as he has been a leader among men during the last quarter of a century.

We are likewise planning our Easter services in both churches. Programs are in the making and the day will bespeak the real Easter Joy in every service. As heretofore we shall have a baptismal service and also receive members either by transfer or on confession of faith. Will those interested kindly cooperate so that we may be able to serve all.

Our young people will again sponsor an Easter egg shower for our hospital Our own district led in this line last year and we feel sure that it will give a good account of itself again this year.

GLADYS SCHLICHTING CHAMPION SPELLER

WILL REPRESENT KLEMME IN COUNTY SPELLING CONTEST

Gladys Schlichting, eighth grade pupil battled her way to the championship in the spelling contest promoted by the P. T. A. at the local chool Tuesday afternoon.

After winning the laurels in her own grade she entered the finals for the "free-for-all" class and again came out victorious and winning the Klemme school championship and he right to compete in the Hancock County contest at Garner Saturday afternoon.

Last year she won the school contest and went a long way in the county contest before being defeated With her experience of last year stands a good chance of winning the county championship and the right to enter the state contest at Des Moines.

The local contest Tuesday was of great interest and contests were in progress from the second grade to he eighth, inclusive. The winners of the three places in all of the grades are as follows:

Second Grade:
Buster Jorgenson, 1st. $1 00.
Paul Schuldt, 2nd, 50 cents.
Avis Barz, 3rd, 25 cents.

Third Grade:
Jean Lau, 1st, $1.00
Norman Sampson, 2nd, 50 cents
Carmen Kluckhohn, 3rd, 25 cents.

Fourth Grade:
Milvern Barz, 1st, $1.00
Kenneth Busch, 2nd, 50 cents.
Leo Brinkman, 3rd, 25 cents.

Fifth Grade:
Ruth Wellemeyer, 1st, $1.00
Mabel Schlichting, 2nd, 50 cents
Bessie Larsen, 3rd, 25 cents

Sixth Grade:
James Larsen, 1st, $1.00
Irma Sampson, 2nd, 50 cents
Ovella Bredbenner, 3rd, 25 cents.

Seventh Grade:
Margaret Gates, 1st, $1.00
Henry Smid, 2nd, 50 cents
Irene Harms, 3rd, 25 cents.

Eighth Grade:
Gladys Schlichting, 1st, $1.00
Emma Goll, 2nd, 50 cents
Mildred Lemke, 3rd, 25 cents.

Final Contest:
Gladys Schlichting, 1st, $1.50
Ethel Barz, 2nd, 75 cents
Emma Goll, 3rd, 50 cents.

The word on which the final test decided the winner was, "philosopher."

The prizes were awarded by the P. T. A.

KANAWHA WINS BUSINESS MENS VOLLEY BALL GAME

First Experience For Klemme Men In Outside Of Town Game

The Klemme Business Men's Volley Ball Team accepted an invitation from the Kanawha Business Men to play a game of volley ball on the Kanawha court Monday evening.

The Kanawha men won the series of four games out of five, the locals only taking one game.

Following the regular games the two towns played mixed teams for a series of three games.

The Kanawha men will invade the local camp Friday evening of this week for a return schedule.

This is Klemme's first year playing voley ball and a lot of good experience was gained in Monday evening's tilt.

Britt Junior College Entertained K. H. S. Seniors and Teachers

The senior class of the Klemme high school and the faculty were entertained by the Britt Junior College Tuesday evening, to attend the home talent play presented by the Junior College. The play was grealy enjoyed.

CHAPTER X—Continued

—23—

He drew a long, deep, quivering breath. Well, he would have an explanation of this mystery if he had to drag Meely by force into the parlor car to face either her empty chair or her living counterpart!

"Meely!"

She turned with a bound and at sight of him, her dull face expressed surprise and pleasure. "Well—of—all—things! Mr. Creighton yet! Well, me, I'm that took back, Mr. Creighton! What brang you to New York over? Come on," she said, making room for him beside her, "and set down here, side by each—ain't? My land's sakes!" she exclaimed as he obeyed her, "ain't you feelin' good, Mr. Creighton? You look that pale! Most like a dead one! What ails you, anyhow? Are you mebby car-sick? I got awful car-sick goin'. But comin', I'm feelin' right good. I was to New York over to look for a place. I'm a right good cooker and I heerd they paid good cooks in New York as much as five dollars a week. With room and board yet! So I says to Pop, I says—"

She stopped short, reached for a coat that was crushed between her and the window, slipped it on and stood up. "Come, St. Croix," she spoke naturally, "the game's up of course. Let's go back to our chairs—if you're not embarrassed to walk through this train with my pompadour! I thought this the quickest, easiest way to make you see how I do it! For I'm in the way of being a professional actress, St. Croix, and 'make-up' is my strongest point."

Her countenance was concerned and sympathetic as, sitting opposite him in the parlor car, she considered his white-faced suffering. Was she cruel, she wondered? But surely, this was "coming to him"—he deserved it! And yet he looked so ghastly! Perhaps he might kill himself and it would be her fault! Well, would that be as bad as what he had plotted to do to "Meely Schwenckton"? It would not!

"I'll tell you, St. Croix, all about it if you want to know," she suggested in a troubled voice, her face almost as pale as his own. "I'm sorry if I've hurt you terribly, but think how you were going to hurt me!"

"Not you!—the girl you pretended to be," he said huskily. "And such a girl would not have been hurt! A girl like you can't judge for one like Mee—of the Schwenckton breed!"

"Better than you can, St. Croix! You would have ruined her life for her!"

"Not if she'd been what she seemed!" he insisted, his voice low-pitched and hoarse.

"What she seemed was an ignorant, stupid, but perfectly decent girl! And after the pitiful note Mr. Schwenckton wrote you which you thought was about me! It was about his daughter Nettie, who he knew was in love with you. It was she that sent you that fudge."

"How the h—l you ever managed the devilish coup!" he exclaimed desperately.

"The queer thing, St. Croix, was that there wasn't a thing premeditated about it—it all just happened. I just fell into the thing step by step. I'll tell you. I'll begin with the mole. I knew that was a landmark for you! So I put flesh-colored court plaster over it and powered the spot with flesh-colored powder."

He stared at her helplessly.

"The big mistake you made, St. Croix, was in not knowing I was the teacher of William Penn school Nettie Schwenckton wasn't. You had us mixed. I was the teacher; and I boarded at the Schwenckton farm."

"But—but," he stammered, "then Marvin helped you put this thing over on me!"

"Oh, dear, no! He had nothing to do with it!"

"Do you swear to me he didn't know who you were?" St. Croix demanded with jealous suspicion and resentment.

"Well, he certainly did suspect me for a fraud and a bluff when he heard me teach United States geography! But he didn't know anything more about me than you did. Now, I'll tell you ALL! I've always been mad to go on the stage or the screen. I managed to scrape together enough money to go to Paris to study dramatic art a few months. Then I got a small part in an English repertoire company that played in the provinces and I earned enough to buy my passage to America, the only place, I was told, where screen stars earned anything. It was an awful risk, my coming here, I had so little money. But I reassured my anxious parents by telling them that if I got stranded I'd send out an S O S to the Creighton family. Meantime, as Marvin has jilted me, Mother and Father decided there was no obligation upon us, now, to tell your family of my adventure and my ambition, until we saw how I succeeded on the screen, if at all!"

"But it has surely been understood all along, Sylvia, that I was eager to take Marvin's place—"

"There wasn't any place to take, St. Croix. Marvin may think, in his pride, that he jilted me—but the fact of the case is that I jilted him first. I never would hear of marrying either of you! But my poor parents needed your money so badly, they always hoped I'd change my mind, and so they never broke it to any of you that I'd backed out. Well, I came over to America in the utmost ignorance of everything I should have known; rather expecting to take Hollywood by storm!—feeling quite condescending in offering my talents (which I myself greatly admired) to the American managers; and not knowing that Hollywood was three thousand miles from New York. Fortunately, I learned a few needful facts on the way over. My deck chair happened to be next to a young American woman who had been a country teacher. She told me all about herself—how she had gone over in June with the student-teacher excursion and had met and fallen in love with a man on the ship, a young college professor. As soon as they'd landed at Plymouth, they'd gotten married, traveled all summer, and were now on their way home. She told me the first thing she'd got to do when she got home was to send in her resignation to the country school she was to have taught if she had not met her fate and gotten married. When she mentioned the state, county and township where she was to have taught, I recognized them

"You Made Love to That Girl and Would Have Despoiled and Ravished Her."

as the address of the Creightons. Next thing I was telling her my story; and when she learned how little money I had, she was appalled; and when she told me Hollywood was three thousand miles from New York and that it took five days and five hundred dollars to get there, I was panic-stricken. So we fixed up a plot. Her parents' home was in Reading, Pennsylvania, and her husband and she were going there until his college opened. She invited me to go home with them and she would give me her normal school diploma and lend me the use of her name, Amelia Schwenckton (now no longer her name), and I could go and appropriate her school for a few months, until I'd saved enough to go to Hollywood.

"She was really a young woman of quite a feverish imagination, I do assure you. Her Schwenckton relatives had never seen her (they're very distantly related) so I could pass myself off to them as their cousin. The thing appealed to me not only as a solution of my penniless predicament, but as a jolly adventure, especially as I knew the school was in the neighborhood of the Creightons' home! I'd have a chance, I thought, to look them over without their knowing it.

"Of course, St. Croix, I meant to make myself known to your family very soon. But I had not realized how difficult that was going to be. I got in deeper every day. And it was such fun, I didn't want to give up my lark and my freedom and become Lady Sylvia! And it was all such a marvelous school of acting for me; I was proving to myself that I could act—mastering that dialect with its extraordinary inflections; and succeeding in taking you in, St. Croix, so far beyond my highest hopes!

"It was when you were pointed out to me, St. Croix, at that barn dance that the idea first came to me to pass myself off to you as a Pennsylvania Dutch girl—for I thought it would give me such a chance as no girl had ever had before to learn to know my possible future husband!"

"I'm afraid," St. Croix murmured, "you think you learned to know him too well!"

"I'm afraid, St. Croix, I did!"

"Do you think it was fair to take me unawares like that?"

"Why not?"

Suddenly a new realization came to him that turned him a degree colder than he already was. "But if you were the teacher," he exclaimed, "why, then, it was you that Marvin was all the time seeing at that schoolhouse! It was to you my father paid five thousand dollars to get away! My G—d!"

"Yes, wasn't that a sprightly scene! That's what I'm going to see your father about. I ran home to England with that money to feed my starving parents. Now I'm going to make a clean breast of it all to your father and then if he'll let me borrow what I've still got of that five thousand, I'll go to Hollywood with it. The only blot on my family escutcheon," she sighed, "is my having taken that bribe from your father! But I needed it."

"Will you tell me," demanded St. Croix, frowning darkly, "is Marvin in love with you?"

"I'm sure I don't know. He never told me so, the one time I met him unprofessionally."

"And you are perfectly confident, are you, that Marvin had no suspicions at all as to who you were?"

"I fancy he had several suspicions. Oh, St. Croix, it's going to be awfully embarrassing, facing them all! Especially your awful father after my taking that money from him! It makes me shudder! When we get there, St. Croix, let me walk in behind you, will you?—and I promise to bring up a good, solid rear in the procession! Oh, but I'm nervous about it!"

"To see you sitting there looking like Meely Schwenckton and talking straight English!—it's the d—t knock-out I've ever experienced!" St. Croix almost groaned.

"Didn't I do the part to the life?" she amazingly appealed for applause. "Now I can go to Hollywood not only to offer Myself, but my Piece as well—for I've written a scenario of this weird, wild escapade, St. Croix, that they can't resist! You'll see yourself in a 'movie' and find out just how—just what you're like!"

"Sylvia!" He leaned forward and took her hand. (They had their end of the car pretty much to themselves.) "Give up this Hollywood idea! You know how I love you—"

"'How,'" she repeated thoughtfully, as she gently withdrew her hand. "Yes, I know 'how'."

"But look here! You're not going to hold me to account for treating you like the creature you pretended to be!"

"What sort of a creature was I pretending to be?"

"You know what I mean, Sylvia!"

"Yet you made love to that creature! A man's standards," she shook her head over it, "are certainly low!"

"They're high enough when it comes to choosing a wife, Sylvia!"

"Then let a woman's standards be as high when choosing a husband!"

"You don't know life, my dear, or you wouldn't say such an impossible thing! My own standards are far more fastidious than the average!"

"Gracious!"

"If you'll marry me, I'll worship and reverence and adore you all my life long!"

"My dear St. Croix, I can't imagine anything more uncomfortable than being 'reverenced'—heavens! You've known Meely Schwenckton much longer and better than you've known Cousin Sylvia and I'm afraid if you married me, you'd be far more likely to bully and browbeat the meek and lowly Meely than to 'worship, reverence and adore' the Lady Sylvia! You're so used to bullying me, I couldn't risk it!"

"You actually believe I could ever for a moment confound you with the stupid, vulgar girl you pretended to be?"

"You made love to that girl and would have despoiled and ravished her!"

He winced and looked shocked. "Please! Such words on your lips!"

"Bunk! Bosh! You would have done to her what you consider indecent even to speak of to me! Do you think I forget what you told her of your feelings, about your marriage? You said to her, 'I will marry my cousin because I shall enjoy the prestige this marriage will give to me and to my children.' You weren't even hoping for love in your marriage. That you would find outside of marriage—with girls like Meely Schwenckton!"

"I hadn't seen you then, Sylvia!"

"You were planning to marry one girl while you were trying your best to seduce another! And in the face of that, you dare to speak of marriage to me?"

"Yes! Because I love you! I was mad about 'Meely' and you are she—with just the difference that turns desire into worship!"

"I'm afraid, St. Croix, that Marvin's repudiating me is more to my taste! You see, my dear cousin, I know too well how unchivalrous you are to womanhood, how you dishonor it and ravage it!"

Again he winced and drew back. "I cannot bear," he frowned, disgust in his eyes, "to hear such coarse language on the lips of a girl I respect!"

(TO BE CONTINUED.)

Ancient Stone Unveiled

The "Brus Stane," which dates fram 1304, and was lost for 150 years, was recently installed permanently in the staircase of the town hall at Annan, Scotland. At the ceremonies the unveiling was by Sir Robert Bruce. The stone was originally part of the ancient "Castle of Brus" at Annan. After its disappearance for a century and a half it was found ten years ago in a North Devon garden.

Obstinacy Defined

Obstinacy is will asserting itself without being able to justify itself.—It is persistence without a reasonable motive.—It is the tenacity of self-love substituted for that of reason and conscience.—Amiel.

Go through life seeking a "kick" and you'll probably get several.

LIVE STOCK

TANKAGE IN PIG RATION FAVORED

Tankage in the ration of pigs being finished for market occupies a position of extreme importance according to the Kansas agricultural experiment station tests which are discussed in the Agricultural Student.

One phase of experiments conducted last summer was to determine the value of tankage as a protein supplement for fattening spring pigs on alfalfa pasture. The pigs used weighed approximately 90 pounds each and the feeding test covered a period of 115 days. One lot of these pigs was fed corn and tankage in a self-feeder and another lot was fed corn alone in a self-feeder. Both lots were run on alfalfa pasture of similar quality.

The pigs receiving no tankage gained .85 pounds per head per day; those receiving tankage, 1.34 pounds. The pigs receiving no tankage required 441 pounds of corn to produce 100 pounds of gain; those receiving tankage, only 360 pounds. Where no tankage was fed, the cost of gain was $6.62 per 100 pounds, but where tankage was fed, the cost was only $6.02 per hundred. The pigs fed tankage were fat and ready for market at the close of the experiment and were valued at $12.50 per 100 pounds. The pigs that received no tankage were not fat enough for market at the close of the experiment and were valued at only $12.30 per 100 pounds.

The hogs that were fed tankage returned $6.78 per head for pasture, while those receiving no tankage returned $2.22 per head for pasture consumed. In this test one pound of tankage fed free choice in a self-feeder saved 4.6 pounds of corn in producing 100 pounds of gain. In other words, at the price of corn used in this test, 84 cents per bushel, a ton of tankage was worth $138.

Many Have Difficulty in Raising Good Pigs

Many farmers have difficulty in raising vigorous, healthy pigs. Hog lots that are occupied year after year without cleaning bring about unsanitary conditions.

Some of the common diseases of hogs have their beginnings within the first few weeks of the life of the pig. That an excessive number of pigs are lost during the spring and summer months on many farms has been observed. Unlike hog cholera, when a large number of animals die within a short time, the pigs with the filth diseases often live for a much longer period. Such pigs as do survive these filth diseases are the so-called runts, and it is seldom profitable to feed them.

Intestinal round worms and pig typhoid are two common diseases of young pigs which are found under filth conditions. When these pig diseases occur they invariably break out on farms where the same hog lots, pens and wallows are used for years. The soil is loaded with worm eggs and swine sewage bacteria which are ready to attack the young pigs.

Ration of Straight Corn Is Not Enough

The effect of a ration of straight corn in comparison with a balanced ration is strikingly shown in experiments conducted at the Iowa experiment station. Yearling sows fed corn alone farrowed pigs that averaged 1.85 pounds at birth, whereas similar sows fed corn and tankage containing liberal amounts of lime and protein farrowed pigs that averaged 2.42 pounds at birth. Pigs from gilts fed corn alone averaged 1.74 pounds, while pigs from similar gilts fed corn and alfalfa hay averaged 2.29 pounds at birth.

This striking comparison suggests that inadequate foetal nourishment may be the forerunner to the runt pig.

Live Stock Hints

Sweet clover is hard to cure when cut for hay and there is some danger in feeding when moldy.

* * *

Brood sows need exercise. They also need alfalfa in the ration. If the alfalfa is fed in a rack placed some distance from the place where the sows sleep they will get both the exercise and the alfalfa.

* * *

All ewes in the flock should be placed on a light grain ration about six weeks before lambing. About a half pound a day of a mixture of three-fourths oats and one-fourth corn makes a good ration.

* * *

The cost of raising beef calves will be determined by the cost of maintenance of the breeding herd.

* * *

Feeding calves for baby beef is becoming a common practice on many farms. This method of producing beef calls for careful feeding and management.

* * *

Yearlings and older cattle can be wintered on a cheaper class of feed than calves. The best ration for wintering these older animals is silage and leguminous hay.

The Cream of the Tobacco Crop.

Paul Waner,
Voted Most Valuable Player in 1927 National League, Says Luckies Do Not Affect His Wind

"When I first started to smoke I was anxious to find a cigarette that would give me pleasure without taxing my wind or irritating my throat. I soon discovered Lucky Strikes. I am very fond of the excellent flavor of these cigarettes and they keep my throat clear and do not affect my wind in the least."

Paul Waner

Clever Trick Worked

A New Yorker opened a new restaurant in West Forty-fourth street, but not many persons were aware of the fact. So he bought the largest goldfish bowl he could find, filled it with water and placed it in his window with this placard over it: "Invisible fish from Rio de Janeiro." The police have frequently had to drive away the pedestrians who gathered before the window in an endeavor to see the invisible fish. One man tapped on the glass and shook his hat in an attempt to bring the fish out where he could get a better view.

Persons who are locked in slumber are contented prisoners.

A man is never so easily deceived as when trying to deceive others.

Apple Monuments

A well-known monument to apples, in the form of a pillar, was erected in 1895 at Wilmington, near Lowell, Mass., to the Baldwin apple. There is also a tablet in the town of Camillus, Onondaga county, New York, on the original site of the Prentice apple tree. Another monument in New York is the monument to the Northern Spy, erected in 1912 at Bloomfield. The Wealthy apple is commemorated by a monument at Excelsior, Minn. This was unveiled in June, 1912.

Real Work

"Does your congressman do any real work?"

"I should say he does," answered Farmer Corntossel. "He has to work mighty hard to keep gettin' re-elected."—Washington Star.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

"Aspirin" is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

WESTERN GIRL STRENGTHENED

By Taking Lydia E. Pinkham's Vegetable Compound

Manchester, So. Dakota.—"I was in a terribly weak and run-down condition when a friend told me about Lydia E. Pinkham's Vegetable Compound. I began taking it and after a short time I felt better. We are a family of five and live on a 360-acre farm, so I have quite a good deal to do both indoors and out. At first I was unable to do anything and had to have a girl, but after taking the Vegetable Compound I finally gained my strength back and also gained considerable in weight. I will gladly answer letters from women in regard to your medicine."—Mrs. Otto J. Geyer, R. F. D. 1, Box 20, Manchester, So. Dakota.

THICK, SWOLLEN GLANDS

which make a horse wheeze, roar, have thick wind or choke-down can be reduced with Absorbine. Also other bunches or swellings. No blister, no hair gone, and horse kept at work. It is economical. At druggists, or $2.50 postpaid.

Ever Try This for Kidneys and Liver?

EVERYBODY knows that herbs are beneficial in helping nature in its important duties of keeping the system in good working condition. The kidneys and liver are constructed delicately; constant care and attention are necessary to help them perform their duties of removing the poisons from the system daily. Neglect and carelessness may result in serious ills and misery. A little help to the kidneys and liver forestalls possible danger. Try Warner's Compound and get blessed relief.

Sold by all druggists. Sample sent free. Warner's Safe Remedies Co., Rochester, N.Y.

WARNER'S COMPOUND

Formerly Warner's Safe Kidney and Liver Remedy

A number of tropical game birds have been brought to Sapelo island, Georgia, in an attempt to acclimatize them to the United States.

Better a diamond with a flaw than a pebble without one.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

CHAPTER X—Continued

—24—

"The only really objectionable thing about you, my dear, is your rotten sense of propriety. You need to be shocked out of it. And, believe me, I'll do my cousinly best for you in that regard! But I can't marry you, St Croix. And it isn't only because of 'Meely'—it's hardly that at all. It's because you and I could never be mates. When you know me better, you'll realize that; you and I are everything the other can't stand! If I had to live with your standards, St. Croix, I'd feel as cramped as though I were in jail. And you'd have fits if you had to reckon with a free-lance like me who finds all sorts and conditions of people so interesting and likable that your taking 'classes' so solemnly, your respect for a bauble like a title, and all that, just seems to me awfully funny'"

"You don't really know me, Sylvia!" he pleaded. "With 'Meely' I was not my real (and better) self! I was of course a cad! But that was not my true self, Sylvia," he insisted. "If you'll give me a chance to prove myself—"

"St. Croix, shall I tell you how impossible it would be to me to marry you? Just as impossible as it would be for you to marry that poor Meely Schwenckton!?

St. Croix recoiled—for he knew when she said that that he was beaten.

It was the first time in all his life that he had been humiliated. And by a girl!

CHAPTER XI

Mr. Creighton, senior, after the first shock and embarrassment of discovering the identity of his wife's relative, Lady Sylvia St. Croix, with the teacher, Miss Schwenckton, whom he had ignominiously bribed to abandon his son when it was his dearest wish that she should marry him, regarded the episode with vast amusement; Mrs. Creighton and Sylvia liked each other on sight; Marvin accepted the confirmation of his suspicions with outward calm, but inward delirium; but St. Croix, almost as soon as he had delivered the girl over to his mother, had escaped from his own devastating situation by fleeing to Florida on the pretext of looking into his father's interests there.

As these interests were not so pressing as to necessitate his leaving home at this crucial time, his action could be interpreted by his family in only one way—Sylvia must have given him to understand quite unequivocally that he, the younger son, was not an acceptable substitute for his elder brother—even though the elder had long since flatly refused to so much as consider the question of marrying her.

Mr. Creighton could now only hope that the apprehensions he had suffered lest Marvin had fallen a prey to the charms of the teacher of William Penn school were indeed well founded.

The very morning after her arrival she asked "Cousin Creighton" to let her have a talk with him alone. Shut up with him in his study, the revelation she there made to him of her ambition and determination to exploit herself at Hollywood came to him as a blow.

"The only way you could stop me, Cousin Creighton," she answered his arguments against her plan, with sympathy in her tone for his manifest dejection, "would be to take back your money—what's left of it." She pushed toward him on the table between them a pile of bills—a pensive wistfulness in the lovely eyes she raised to his. "I can't go, of course, without your money."

"And if you can't go, what then? Will you," he asked hopefully, "then marry one of my sons?"

"If I said yes to that," she replied in alarm, drawing back the bills, "you'd take back your money! No, if I can't go with your money, I'll earn the money. And if you won't give me a job at mining, I warn you I'll turn evangelist! I've heard there's money in that. I'd make piles, for I'd be a new American sensation—an English titled woman prancing and ranting over your broad land as a Soul-Saver! I could do it, too!"

"Yes, and would, by G—d!" he exclaimed. "Keep the money, in heaven's name!"

"Thank you. Then that's settled."

"If you fail at Hollywood?" he gloomily inquired.

"Don't wish it on me—please! If I fail, I'll come back and marry any of your sons that want me. Only I draw the line at St. Croix. I couldn't," she shook her head, "marry St. Croix."

"Why?" asked Creighton testily, wounded in his paternal pride.

"First, because I'm not in love with him. Then I think a girl owes it to her children to pick out a good father for them—and St. Croix strikes me as too self-absorbed to make a successful husband and father. His own interests would always be first with him."

"St. Croix is a very fine young man!" his father warmly defended him. "Sensible and well balanced. No wild vagaries—"

"But I like rebels and vagabonds so much better than 'fine young men'!"

"Oh, then you mean," said Creighton, again picking up hope, "that you will marry Marvin if Hollywood disappoints you?"

"Not unless he asks me to."

"If he doesn't ask you to," exclaimed Mr. Creighton, "he's a—"

"Yes, isn't he! I think so too. But though I'd never marry a man that hadn't proposed to me, if I never got married, that question need not engage us, Cousin Creighton, because I'm not going to fail at Hollywood!"

* * * * * * *

It was a few days later that Marvin Creighton, one evening after dinner, standing in front of the library fire, looked down reflectively over his

"Is This a Proposal, Marvin?"

folded arms upon his radiant young cousin who reclined lazily and with a maddening grace on the big couch that stood before the fireplace.

"It's incredible—utterly incredible!" he voiced his reflections.

"Yes, isn't it?—everything! But what in particular were you referring to?"

"That you—sitting there in front of me—you!—are the girl I said I wouldn't marry! Why didn't some one suggest that I cross to England and look you over first?"

"Probably because they were all too sensible to think you'd pay any attention to such a good suggestion. And if you had, you'd probably have found me flown from home to elude you."

"You see, you were offered to me," he explained, "like a mark-down at Woolworth's! Too cheap an article, it seemed to me, to take as a wife—seeing I did have a few dreams of fair women that were not so purchasable! And now, if I'm correctly informed as to 'the fury of a woman scorned,' there can't be the least hope for me—can there, Sylvia?"

"Is this a proposal, Marvin?"

"Well, I'm not sure it is. I'm not so conceited as to think my worth to you could measure up to the worth of a career for which you are highly talented! So I don't think I am proposing. I don't believe I intend to—if I have any influence with myself."

"Let's be engaged, Marvin, until I see how I make out at Hollywood. If I succeed, then no wedding bells for Meely and you'll have to jilt me again!"

"If only," he fetched a deep breath, "you hadn't that fatal talent! For we're mates, Sylvia, it's written in the heavens! I believe, you know, that you and I are mates in the real and lasting sense—for it's you I love, sweet child, not just your epidermis, lovely as it is—"

"My what?"

"I can think of you as old and wrinkled and I want and love you just the same—"

She warbled, "'Believe me if all those endearing—' But that's such old stuff—can't you tell me something a little more up to date?"

"Our sort of love, Sylvia, is so rare (or so it seems to me) that it's an awful pity, don't you think, to let it go by us even for the sake of a brilliant career?"

"Go by you, you mean?" she sweetly inquired; "for I didn't say I was in love with any one in particular."

"I said, didn't I, that we were mates? I'm your mate, too, if you only knew it—as much as you're mine!"

"When did you begin to feel that way?" she asked with a bright interest, her eyes shining up into his with rather a feverish excitement.

"From the first day I met you in your school! I couldn't keep off you! You had me—in the hollow of your hand!"

"Oh, gee, I didn't know it! And, Marvin! I've got to hold on to myself like anything or you'd have me in the hollow of your dear hand—and I don't want to be in any one's hands—not even in your strong and tender ones!—for I want to act!"

"I've seen you with those school children—I think your bigger career, Sylvia, lies in your having a brood of your own—I don't shock you, child, do I?"

"Well, yes, when you suggest a whole 'brood'! I think that's too many! I wish," sighed Sylvia, "I could have babies and a career, too. If I insisted on that, would you jilt me?"

"But, dear child, I can't live in California. Not even in New York. My work will always be here. And what kind of a marriage would that be—you in California and I in Pennsylvania?"

"You wouldn't give up your work for marriage; why should I? What is going to become of marriage when women's professions become as important and as inevitable to them as a man's is to him? I wonder!"

"Do you really think, Sylvia, that being a screen actress is as big a thing as rearing children?"

"It would depend, I should say, upon the sort of children you rear. I'd consider it an awful waste of life to bring up most of the people one knows!"

"But you and I, Sylvia," said Marvin solemnly, "might get some satisfaction from bringing up a family of—well, honest, fearless truth-seekers, prophets of a new gospel—"

"Oh, come, Marvin, let's give them a chance to be themselves!"

"That's what I want them to be! So few of us are ever ourselves! We're forced into a mold that's quite unlike our real selves! Let's rear a family that shall be a nucleus to start something—"

"But it's so dangerous, these days, to start anything—"

"Let them start the long-looked-for 'good-will to men' era. It's about due, if humanity is to survive, don't you think? Well, what do you say? Shall we?"

"This is the queerest proposal I ever had!"

"Well, I can't seem to do anything, even propose to a girl, according to pattern!"

"But you see, Marvin dear, love lasts such a short time. My career on the screen would last rather longer."

"Ours won't be the kind that doesn't last! It will be the kind that grows! It will—"

"Oh, you're young! You sound sixteen! I'm not so sure. But it does not really matter, does it?—whether it lasts or not? It's the supreme thing now!"

"You admit that?" he eagerly demanded.

"Oh, yes, Marvin! You've gone and dimmed the glory of the screen for me so that I don't feel half so enamored of it as I did—"

"I tell you, Sylvia!" He flung himself on the couch at her side. "You go on out to your old Hollywood, my dear, and try it out. For if you didn't give it a trial, you'd never be satisfied, never be sure you had not made a mistake—"

"I might even throw it up to you that you'd deprived the world of a great star—"

"That's what I want to avert. So you go on out there—and then when you decide to be mine, I'll have you fast!"

"I won't go a step unless you promise to come to see me over some week-end."

"It's three thousand miles across this continent, you know—or probably you don't know! You probably think California is a suburb of Philadelphia! You need to travel out to Hollywood to pick up some United States geography on the way."

"Now, Marvin," she feebly protested as he slipped a hard, strong arm about her and drew her close, "if you really make love to me, I'm lost!"

[THE END]

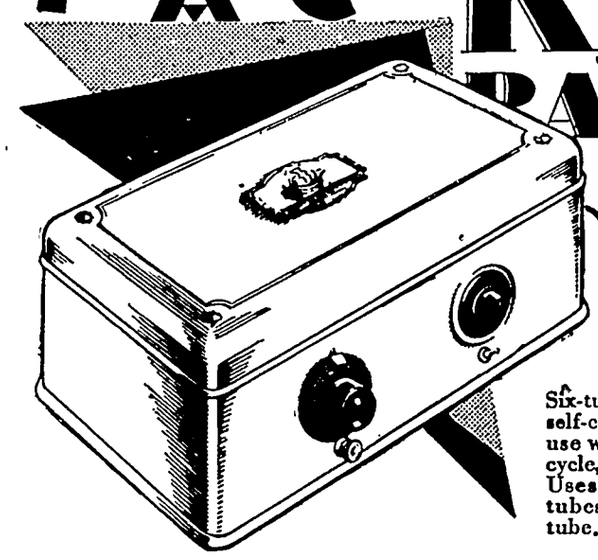
Fragments of Bottle Good Legal Evidence

Fragments of a broken bottle once settled a legal dispute as to the location of the original corner post of a surveyed tract. It was customary in the old surveys to place broken bottles, crockery or other articles that would resist decay in the holes where the corner posts were to be set, and notes of such deposits were recorded by the surveyor in his book.

On this particular occasion, when an effort was being made to establish the location of a post in Canada which had been set sixty years previously, the surveyor's gang dug for two days over an area covering more than fifty square feet. Finally the diggers unearthed broken glass with embossings that corresponded to the notes in the original surveyor's book. With this point established, more than thirty posts in the vicinity were restored and the dispute over the boundary lines was settled.—Kansas City Star.

Longer a man lives, the more he is convinced that truth lies deeper than at the bottom of a well.

modern! ATWATER KENT RADIO



Model 37

Six-tube, FULL-VISION Dial, self-contained A. C. set. For use with 110-115 volt, 60-cycle, Alternating Current. Uses six A. C. amplifying tubes, and one rectifying tube.

$88 *without tubes*

What a year for listening! Don't be left out

PRESIDENTIAL YEAR! Politics popping all over the lot!

Remember "Twenty-four votes for Underwood" four years ago? Remember how you said the thrill of that one convention repaid many times the price of your radio set? Remember what you missed if you had no radio—or a poor one?

This year radio is playing a much bigger part. Both parties are preparing for a campaign *inside* American homes—by radio.

Tunney is signed to fight twice. Man! What a year—by radio.

And the programs NOW. Tonight! Tomorrow night! The headliners of music—of politics—of everything—are on the air—NOW. Don't put off buying your new Atwater Kent A. C. set until the last moment before the conventions. Enjoy the wonderful things radio brings *now*. When summer comes—you're ready.

Get the set that's always ready—for a convention, a concert, a fight or a frolic—the modern set—the set that has changed everybody's conception of radio—that is going into far more homes than any other—the new, self-contained A. C. set—the Atwater Kent 37.

Batteries can't run down—for there are no batteries. The house current costs only a fraction of a cent an hour. And the FULL-VISION Dial, which you read at a glance! How swiftly and surely and *clearly* it brings in your station!

The modern, satin-finished cabinet is no larger than a child's suit case. The price is *compact*, too—because public demand has permitted us to effect amazing economies of manufacture. The program you can't afford to miss is EVERY NIGHT. Listen with the Atwater Kent 37. You'll see!

Model E Radio Speaker $24

Radio's truest voice. All parts protected against moisture. Comes in a variety of beautiful color combinations.

NEWS REVIEW OF CURRENT EVENTS

Gigantic Combination of Capital Announced at New York.

THE New York World announced that it regarded as an accomplished fact the biggest communications merger on record. This, it stated, was the combination of the Mackay companies, operating 5,000 Postal telegraph offices in the United States, and the International Telephone and Telegraph company.

The deal brings together companies with combined assets of $225,000,000 and with about 125,000 miles of joined cable, telephone and telegraph wires in the United States, Canada, Mexico, Cuba and Central and South America.

The merger as outlined will see the ascension of the Behn brothers—Sosthenes Behn and Herman Behn—whose family fortune was founded in Porto Rico, over the Mackays, California forty-niners.

The Mackay fortune was founded when John W. Mackay, father of the present head of the Mackay companies, discovered the famous Comstock lode in 1845. The elder Mackay later started the Postal Telegraph company. His son obtained control of commercial cables and last year the Federal Telegraph system on the Pacific coast. Mr. Mackay's personal fortune is estimated at $50,000,000.

PRESIDENT COOLIDGE believes the United States can still be helpful to Nicaragua by assisting the people of that country to choose its government, despite the action of the Nicaraguan house in rejecting the McCoy bill providing for supervision of the coming election by the marine corps.

This view was reflected by an announcement from the Navy department that two additional battalions of marines had been ordered to Nicaragua to reinforce the 2,700 already on duty there.

The two additional battalions will bring the total of United States forces in Nicaragua to 3,700, the greatest number ever to operate in that country at one time. Should the marine force be unable to cope with the situation, about 1,500 blue jackets and marines on board five cruisers in Nicaraguan waters will be available for shore duty.

Secretary Wilbur said the additional marine forces were to be used primarily for overseeing the coming elections and not for action against General Sandino, rebel leader, although the troops may be employed to further the general activities of the marines in Nicaragua.

The problem now confronting the Washington government, in Mr. Coolidge's opinion, is that of devising some plan under which the United States can fulfill its obligations under the Stimson agreement according to the original spirit of that pact—one of helpfulness to the Nicaraguan people in the selection of its public officials.

ADMISSION that "we may have overlooked something" by the builder of the collapsed St. Francis dam featured the first official inquiry to fix the dam blame at the coroner's inquest over the bodies of 69 of the dam victims.

William Mulholland, seventy-two, chief engineer of the Los Angeles municipal water board, who built the dam, declared: "The only ones I now envy are those that are dead."

Loss of life in the disaster is now computed at 449 persons—272 known dead and 177 missing and believed to have perished. While search for dead continued, more than 100 tractors being used to tear through big piles of debris, authorities in the stricken zone decided to confine efforts only to reclaimable land. Debris on unreclaimable area occupied by the old bed of the Santa Clara river will be burned. Authorities said it would be impossible to put a large enough force at work to recover bodies on unreclaimable land within a reasonable time.

Evidence that a dynamite explosion may have caused the collapse of the dam and released the flood of death on the Santa Clara river valley was said to be in the hands of investigating authorities.

So much credence was placed on the findings of deputy sheriffs assigned to the flood area that every reservoir and dam in the entire Los Angeles water system was put under a heavy guard.

AN AMERICAN girl was married March 17 to one of the wealthiest of Hindu princes in a ceremony modern in manner, medieval in splendor and ancient ritual.

The wedding, which united Miss Nancy Ann Miller of Seattle with Sir Tukoojirao Holkar, former maharajah of Indore, was witnessed by thousands of Hindus, dressed like true princes and princesses and wearing the costliest jewels money can buy.

After the ceremony, which ended ten days of ritual whereby Miss Miller became a Hindu, princess and a member of the Holkar family, bride and groom were hosts at a banquet to 10,000 guests.

FEDERAL supervision of the coal industry, as tentatively suggested by Senator Gooding (Rep., Idaho), was indorsed on behalf of the United Mine Workers by John L. Lewis, president.

Lewis, who has informed the senate investigating committee that his organization is ready to meet with operators to suggest legislation to stabilize the industry, declared that the union would be "practically unanimous" in supporting federal control of coal production and marketing, because the Gooding proposal is the most constructive made to date. The coal commission idea has been indorsed also by several coal operators during the inquiry, but others refused to commit themselves.

ONE of the most pitiful tragedies in the annals of the American navy was revealed in the Charlestown (Mass.) navy yard. Eight remaining bodies were taken from the submarine S-4, now in dry dock there. At the same time it was made clear what occurred inside that vessel after it was rammed and sunk by the coast guard destroyer Pauling, on rum chasing duty, near Provincetown December 27.

Conditions shown as the water was pumped out of the S-4 made it evident that every one of the 40 men in the submarine had found temporary safety in locked compartments and had died many hours later either suffocated by deadly gases or smothered by the exhaustion of the air.

Thirty-four men had lived for an undetermined number of hours in the motor and engine room compartments. Five or six men who had lived approximately three days in the forward torpedo room had died, it was indicated, sleeping peacefully in their bunks. Some of them had partly undressed to make themselves more comfortable.

COL. CHARLES A. LINDBERGH is now a congressional medal of honor man. President Coolidge pinned the coveted emblem, the highest decoration of the American government, upon the blushing trans-Atlantic hero during a brief, impressive ceremony March 21, on the White House grounds.

Vice President Dawes, Speaker Longworth (Rep., Ohio), members of the cabinet, and high officers of the army and navy witnessed the presentation

THE Bank of the Soviet Union has engaged the New York law firm of Simpson, Thacher and Bartlett to fight the Bank of France's attempt to replevin $5,210,000 in gold sent here by the Russian institution and is prepared to bring a counter-claim for losses it may sustain through the French action.

It is estimated that the Russian bank is losing from $700 to $1,000 in interest daily on the metal, which lies in the vaults of the Chase National bank and the Equitable Trust company. Had it not been for the French action the gold might have been out of the country by now or else used as the basis of credits with private American interests.

Simpson, Thacher and Bartlett are scrutinizing the French-Soviet treaty to determine whether the Bank of France's action is in accordance with its terms. Under the treaty, all claims by French nationals against the Soviet government are subject to diplomatic adjustment. A spokesman for the Bank of the Soviet Union said that, although the treaty has been in force for some years, the Bank of France has never filed a claim for the gold until the present action.

ACTING upon the instruction of the Canadian cabinet, Gov. Gen. Willingdon of Ontario approved orders in council commuting to life imprisonment the death sentence passed on Dorris McDonald and confirming the death sentence passed on George McDonald, her husband, both Americans. They were found guilty of the murder of Adelard Bouchard, Lachine (Quebec) taxi driver.

A TWO MILLION DOLLAR trades school as a memorial to his father, John Wanamaker, is provided in the will of Rodman Wanamaker, Philadelphia merchant. The document disposes of an estate of from $75,000,000 to $100,000,000, instead of $50,000,000, which was the first estimate of its value.

THE London Daily Experss says Lord Balfour, lord president of the council, former prime minister and one of the outstanding British statesmen of the present generation, is suffering from heart trouble and has canceled all his engagements. He has been ill for some time. In January he suffered a severe attack of laryngitis.

THE $274,000,000 new warship construction program was approved by the house and sent to the senate. The vote was 287 to 57.

In passing the Butler bill, the house voted for the construction of 15 cruisers of 10,000 tons displacement each and one aircraft carrier of 13,800 tons.

The measure carries a provision requesting the President to "urge the necessity" of another international conference for the limitation of naval armaments and gives him authority either in whole or in part in the event of a limitation agreement.

RECEIPTS from the March 15 income tax returns reported to the Treasury department to the close of business March 17, aggregated $215,550,008. On the same date a year ago the returns aggregated $197,690,398, an increase this year of $17,858,600.

Should this proportion hold good for the entire collection on income for the last calendar year, the treasury would receive about $100,000,000 above its estimate.

TWENTY-TWO of the 25 countries represented on the preparatory committee for a League of Nations disarmament conference lined up against the Soviet plan for immediate complete disarmament.

Hugh S. Gibson, the United States; David Whitmarsh, Cuba; Baron Rolin-Jacquemyns, Belgium; Jonkeer Rutgers, Holland; E. Heening, Sweden; M. Sokal, Poland, and M. Markovitch, Yugo-Slavia, added their criticisms to others, making the Russian defeat overwhelming.

NORA Bayes, comedienne who delighted audiences in Broadway and London theaters for more than a score of years and cheered many persons privately by her generous acts, died at a Brooklyn hospital.

She had gone almost directly from singing at two benefits to the hospital for an abdominal operation. She was apparently well on the way to recovery when a relapse came.

Miss Bayes once wrote that she was born in Joliet, Ill., and other sources fixed the date as 1880. Her real name was Leonora Goldberg. She is survived by her husband, Benjamin L. Friedland, whom she married three years ago on the steamship Leviathan, and by three young children she had adopted.

AN INVESTIGATION of the 1928 Presidential and congressional campaign by a special senate committee has been proposed from two sources.

Senator Nye (Rep.) of North Dakota, chairman of the Teapot Dome committee, which has been inquiring into past campaign funds, says that, if no one else proposes a resolution to have a committee check up on the organization of the two parties, he will do so.

In a formal statement Senator Capper (Rep.) of Kansas gave notice that he would seek to have the senate provide the machinery to inquire into expenditures in the coming campaign.

Great Men

Great men are different from others only in that they have a more intensive knowledge of one thing and use their knowledge with more confidence and power.—American Magazine.

Only 2 per cent of the trees struck by lightning in national forests catch fire, but this causes 17 per cent of the forest fires.

"Business First" in Mind of Bridegroom

Senator Smoot talked to a group of reporters about business. Among other things, he said:

"Sentiment should be kept out of business. That is an excellent precept. But even excellent precepts can be carried too far.

"At a fashionable wedding not long ago the bridegroom failed to turn up. Noon sounded, then one o'clock, then two. Everybody was in despair.

"But a little before three the young man arrived, smiling and breathless. He explained that he had been trotting about from bank to bank cashing the numerous checks that had figured among the wedding presents.

"'You can't stop a cashed check,' he murmured tenderly to his bride as they took their places at the altar."—Detroit Free Press.

Evidently Was Hungry

Albert Brown, a down-and-outer, walked into a restaurant at Mount Carmel, Ill., and asked for a handout. Two persons who heard Brown's story agreed to pay for all he could eat Brown made away with seventeen hamburger sandwiches, nine cups of coffee, seven slices of bacon, two pints of milk, three oyster stews, six jelly rolls, two cans of beans and six glasses of water.

When Children Complain

Children are naturally happy and playful when they complain of headache dizziness, are cross and feverish, restless at night, have bad dreams and no appetite for play, it is a sure sign of an upset stomach that can be quickly remedied if you give them

MOTHER GRAY'S SWEET POWDERS

They act quickly and gently on the bowels, relieve constipation, cleanse the stomach and sweeten the feverish breath. They break up colds and act as a tonic to the whole system. Children like to take them. This safe and pleasant remedy has been used by mothers for over 30 years. Mother Gray's Sweet Powders are sold by all druggists; accept no substitute.

Grandmother Knew

There was nothing so good for congestion and colds as mustard. But the old-fashioned mustard plaster burned and blistered.

Musterole gives the relief and help the mustard plasters gave, without the blister and without the blister.

It is a clean, white ointment, made with oil of mustard. Gently rub it in. Watch how quickly the pain disappears.

Use Musterole for sore throat, bronchitis, tonsillitis, croup, stiff neck, neuralgia, headache, congestion, asthma, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

MUSTEROLE

DOES NOT BLISTER

Better than a mustard plaster

Drought Is Not Always Harmful

Insufficient Moisture for One Crop May Be Ample for Another.

(Prepared by the United States Department of Agriculture.)

The term "drought," as applied to a lack of moisture in the soil for proper plant growth, embraces many conditions which differ with each type of agriculture. What may constitute insufficient moisture for one sort of crop, or one part of the country, may be ample for another crop grown in different soil or in a different climate, says the weather bureau of the United States Department of Agriculture.

In the East, where precipitation is usually well distributed, a period of 30 days without beneficial precipitation constitutes a drought, which would be especially bad if the subsoil were not well supplied with moisture at the beginning of the drought period. Over the Pacific coast states possible drought is chiefly in the colder half of the year.

Hurts Nonirrigated Crops.

A generally dry winter season may be disastrous to nonirrigated crops. In the central valleys and Great plains, drought during the early spring months will greatly diminish the wheat yield, and drought in midsummer brings disaster to the corn crop. A short period of drought in the eastern part of the country during the early spring months will frequently greatly curtail the hay crop, but may not seriously injure wheat; in fact, it may prevent excessive straw growth. A period of drought may be beneficial to corn in its early growth, forcing the roots to greater depths. Drought of short duration may be quite disastrous to corn when it follows a wet period immediately preceding the formation of the ear, when abundant moisture is required. If previous wet weather has caused the root system to develop near the surface, the supply of moisture available in the subsoil may not be reached in time to prevent loss.

May Benefit Cotton.

Moderate drought is not always associated with scanty production. It may prove beneficial to cotton by hindering the activity of insect pests that do not multiply in dry weather. If the cotton plant remains somewhat dormant during drought and resumes growth promptly when moisture is supplied, the crop may develop after the period of worst insect infestation is over.

Early droughts are particularly detrimental to most truck and small-fruit crops, as growth and development of these are usually rapid and any material interruption is decidedly harmful.

Development of a Plan Needed for Good Garden

The first step toward making a successful garden is the development of a plan showing the general arrangement, direction of rows and area devoted to the different crops. More economical use may be made of the area available by planning for succession, companion and intercropping. For example, a crop of late beets may be planted after a crop of early peas have been harvested or a crop of lettuce may be raised between the tomato plants and gathered before the tomato plants need all the space. Fresh peas, beans and corn may be had over a longer period by making several plantings at intervals of two weeks or by planting early, mid-season and late varieties. The likes and dislikes of the members of the family should be considered and selections made accordingly.

Fanning Mill to Clean Seed Most Satisfactory

A few hours spent indoors cleaning seed with a fanning mill may save many days in the hot sun next summer and will pay handsome dividends in the form of bigger and better crops.

A farm fanning mill operated at the correct speed and equipped with the proper sieves and screens is capable of doing an excellent job of cleaning clover, alfalfa and other seeds. Since experiments have shown that the main object of cultivation after the preparation of the seed bed is the eradication of weeds, and since most weeds are introduced by means of impure seed, the use of cleaned seed will save a great deal of future work. The value of a good fanning mill in cleaning farm seeds has been demonstrated by hundreds of farmers.

Agricultural Hints

Soy-bean hay as a roughage is equally as valuable in the ration as is the seed.

* * *

The main thing in inoculating soy beans is to make them real dirty with the right kind of dirt.

* * *

Swiss chard belongs to the beet family and is grown the same way—in rows thinned 6 to 12 inches apart.

* * *

Treating fence posts with creosote makes many kinds of wood posts last 20 or more years. The treatment costs but little.

* * *

Let the hoe be your garden putter, brassie and niblick, for half an hour a day, and you will surprise yourself with a weedless garden.

Orchard Information

SPRAY APPLE TREE FOR OYSTER SHELL

The oyster shell scale is one of the most common of scale insects that work on neglected apple trees. Most of the unsprayed farm orchards are infested to some extent by this pest, says the Iowa Homestead. It is found on most of the common orchard trees as well as on many shrubs.

The scale is about one-eighth-inch long, rather dark in color but under a magnifying glass very much resembles an oyster shell, hence the name.

The scale lives over the dormant period in the egg state. During the dormant season the eggs can readily be detected by lifting the scale with the point of a knife blade. Only a small percentage of the scale will carry the eggs. These hatch out early in spring, about the time the trees begin to break into blossom. At this time the insect is active, but soon attaches itself permanently to the twig.

Control methods are simple and effective. If the infestation is seen, spray the trees in the late spring before the buds unfold. One can use lime-sulphur wash at the rate of one gallon to eight gallons of water made from liquid lime-sulphur, or dry lime-sulphur, three pounds to ten gallons of water. A thorough job of spraying must be done. See that the main trunk and branches are covered with the spray mixture.

If one prefers to do so a spray mixture made from crucible oil, one gallon of the spray oil to twenty gallons of water can be used. One application is not sufficient to control the scale entirely but continued applications of lime-sulphur during the summer months will hold them in check. It may be necessary to put on a second dormant spray the following year, after which time there will be very few left.

When Planting Trees

Don't let the sun, drying winds, or frosts at the roots.

Prune any broken or injured roots with a sharp knife.

Dig the holes big enough for all the roots without cramping them.

Plant in fine loam, enriched with well-rotted manure.

Don't let green unrotted manure come in contact with the roots.

Spread out the roots in their natural position and work fine loam among them, making it firm and compact.

Don't plant too deep. Set the tree an inch or so deeper than it was before.

Remove all broken branches, and cut back at least one-half of last year's growth of wood.

If the season is dry water thoroughly twice a week.

Keep the soil fairly fertile. Mulching in the fall with manure is a great help.

Plums Usually Damaged Much by Insect Pests

Plums are usually damaged more by insects than apples are, for the reason that we have the wild plums growing in most all sections, so already have all the pests that belong with them to attack any tame sorts we may plant. Each insect has its preference of certain fruits and varieties ripening in season most adapted to its natural life habits; thus we find the curculio infesting cherries, and early ripening plums, such as the Opata and Sapa, and others of the earlier ripening sand cherry hybrids. Where no attempt is made to check these pests by spraying, the fruit of Opata and Sapa are often infested to such an extent as to be almost worthless for family use; while later ripening varieties of the pure plum may be almost as badly damaged by the gouger.

Varieties Susceptible to Fire Blight Disease

Some varieties of pears and apples may be unusually susceptible to fire blight. Where this is true, the diseased wood and cankered areas on the limbs and trunk should be removed during each dormant season. If this clean-up work is done each year, the source of infection of fire blight will be largely eliminated. With apples and pears which are susceptible to fire blight, it is best to have as many scaffold limbs as possible, so that if one becomes girdled near its base by a fire blight canker, it may be removed without the loss of too much of the bearing surface of the tree.

Time to Spray

It is probably or certainly some better to put on two curculio sprays, but one good spray seems to give satisfactory results. If two sprays are used the first one should be put on as early as possible. That would be when most of the shucks have split, but before a large per cent have dropped off. If only one spray is used, it should be applied a little later, when about one-third to one-half of the shucks are off. This curculio spray is very important, and should not be neglected.

MAKE YOURS "A Skin ...ove ...ch"

Who can resist the charm of a beautiful skin?

Nearly every woman's skin would be lovely . . . if it weren't for one of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

EVERY DAY your skin is changing! Old skin dies—new skin takes its place.

Make this new skin as it forms, the clear, flawless complexion everyone loves and admires!

The famous Woodbury skin treatments will help you to overcome any of the six common skin troubles listed here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple, clear directions for each of these treatments, and the treatment for normal skins, are in the booklet wrapped around each cake of Woodbury's.

A skin specialist created Woodbury's Facial Soap. Use it—and see what a wonderful improvement it will make in your complexion!

A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

WOODBURY'S FACIAL SOAP

America Far in Lead

The United States leads the world in the production of electric horse power, according to a survey just completed by the Department of Commerce. Forty per cent of the total power of the world is generated in the United States. Similarly, with respect to the manufacture of electrical goods, America leads, producing about 50 per cent of the world's total.

Marvelous Accuracy

A machine recently invented by P. P. Cloff of the Bell Telephone laboratories, New York, measures a billionth of an inch.

Scramble Nostalgia

Miss New—Oh, dear, I feel so homesick!

Other Girl—Where is your home?

Miss New—In Maine during the summer, at Palm Beach in winter, and the rest of the time we live in Brookline, Mass.

Hubby's Argument

Mrs.—That woman turned up her nose at my coat.

Mr.—Probably just showing her contempt, my dear, for a man who'd pay so much money for one.

Rumors always precede scandal.

Vast Irrigation Project

About 2,000,000 acres could be irrigated by the Boulder dam basin in the states of Nevada, Arizona and California and in Mexico. The construction period would be about seven years from the time work is started on the construction railroad. The dam, to store 25,000,000 acre-feet, would cost $41,500,000 and power development an additional $31,500,000, according to bureau of reclamation estimates.

A girl never tries to extinguish the spark as long as a man has money to burn.

12 Choice Trees and Plants

named in order from left to right as they appear above.

1 Mountain Ash Tree 1 year. White flowers turning to clusters of red berries.
2 Japanese Berry Shrubs. Yellow flowers followed by red berries.
2 Red Gold (*Sugar Saver*) Strawberry plants. Berries up to 8½ inches.
2 Number 38 Hybrid. New earliest to ripen dark red strawberry.
2 Everbearing Strawberry plants. Will bear berries from July to November.
1 Hardy Violet plant for border, foundation or potting.
1 Madam Chereau Iris. Beautiful, hardy perennial.
1 Russian Olive shade tree 1 year. Silver leaves and fragrant yellow flowers.

In three years time you probably would not sell these trees and plants for $25.00 and they will add greatly to the attractiveness of your place and be a permanent advertisement for our nurseries.

Write Today! and we will send twelve trees and plants **Free at planting** time in spring 1928. Include 25c for packing and mailing or not, as you please. A postal will bring them.

Catalog describing our Hardy "*Blizzard Belt*" Profit Making new Strawberries, Orchard Fruits, Ornamentals, etc. FREE.

Our new *Red Gold* or Sugar Saver Strawberry is the result of 17 years of strawberry breeding and is far ahead of any strawberry we have ever grown. Has 30 day fruiting season. We have counted 43 berries, buds and blossoms on a single fruit stalk and eleven stalks on one plant, the tallest of which measured 15½ inches and so stout and sturdy that they held the big berries up out of the dirt and made picking a pleasure. Largest *Red Gold* berry to-date measured 8½ inches around. Berries are very sweet and meaty and have that good old fashioned wild strawberry flavor. They only require one half the amount of sugar for making the very highest grade of preserves, saving a full pound of sugar with each quart of *Red Gold* berries.

If you want these twelve choice trees and plants, write for them today. It will pay you to get acquainted with our PROFIT MAKING Nursery Products.

The GARDNER NURSERY Co., 800 N. 10th St., Osage, Iowa

Mr. Wm. Smith has been quite ill at his home since Sunday. Wednesday he took a turn for the worse but at this time he is reported to be holding his own, so we hope that by next week we can report him entirely well again.

Mr. and Mrs. Ing. Lauritsen came Sunday for a few days visit with Klemme relatives and friends. They live at Sheboygan, Wisconsin where Mr. Lauritsen is in the contracting business. He has contracted for a number of buildings and houses for this year.

Harry Pringnitz and Miss Florence Trumbell were somewhat shaken up in an auto accident when the car in which they were riidng skidded off the grade Sunday evening and upste with them. Harry is nursing a fracturered rib or two but Miss Trumbell escaped with minor injuries.

Rev. Grosshuesch should take out a patent on his goat feeding device. He has quite a herd of small goats which are bottle fed. In order to accomodate their ravenous appetites he has constructed a rack which holds the line of botles at the right angle and its a real sight to see the goats get their meals from the mechanical "mother" goat.

We always like to open our mail and find a check from some subscriber, as by that token we know they enjoy reading The Times. The other day we received a postal money order for two year's subscription from S. H. Day, of Hubbard, Oregon There was just one thing lacking We would like to have had a letter from Mr. Day as it would be of interest to his Klemme friends. Come on S. H., let's hear from you! And thanks for the remittance. — The Editor.

On our way back from Des Moines Saturday, Editor Jorgenson and family stoped at Ames for a visit with C. W Wiles. Clarence has a nice garage and is agent for the Wolverine line of cars. Business is good for Mr. Wiles. Another stop at the house and we saw Mrs. Wiles. She informed us that Sunday was their twenty-fifth wedding anniversary and that Howard and family spent the day with them. They both had the flu since their visit in Klemme. but have recovered.

Had Supt. Penrod been less agile he mighth ave been the victim of a serious accident the other day when he went to mail a letter at the depot and nearly got hit by the passenger engine. Mr. Penrod took a tumble a few feet ahead of the oncoming train as he crossed the track but it's hard to kill and Irishman and he had no thought of playing the harp just yet, so scrambled to his feet and let the train go past! However, there are a few more "silver threads among the gold," as a result of the narrow escape.

Miss Ethel Wellemeyer is teaching grades three and four while Miss Mildred Wheatman is at home, waiting to see whether or not she will come down with the mumps, as she has been exposed. In ored not to expose pupils Miss Wheatman and the school board decided on this "vacation." We comend them on their action in trying to hold down contagious diseases at school and take no chances. So many pupils have been forced to remain at home and miss school because of chicken pox, and should mumps break out here it would greatly interfere with the operation of the school and it might be necessary to close it down in that event.

How About You?

Have you $220.00 in the bank? That should be your share of the $26,000,000,000 savings on deposit in the banks of the United States. If you have less in your account or if you have no account at all, others are saving just that much more to make up the average.

Why not start now? By the end of the year, through thoughtful management and persistent saving, you can have that $220.00 which belongs to you, and be started on the way to independence.

LEMME TEACHERS WILL COME BACK

LL BUT TWO HAVE SIGNER TO RETURN HERE NEXT YEAR

emme Grade Teachers Paid Less Than Average, Report Shows

Klemme parents seem to be well eased as a general rule, with the achers, both in the grades and the gh school, this year. The action of e school board in re-electing all the teachers seems to have met th the general wishes of the parts of pupils in the Klemme school. The board gave the teachers a nited time to sign contracts to ach in the schools the coming year d at this time all but two teachers ve signed contracts to return. We are hoping that these teachers y see their way clear to sign for other year, for they are both exllent teachers and it will be hard find teachers to replace them. At this time of the year there is turally more or less discussion as the amount of pay the teachers ceive. Some contend they do not ceive enough, others say they are ing paid about the average price. e editor has taken the time to ok into the matter and we gather r information from the directory blished by the state board of edation, which is reliable. Here we d a wide variaton n salares paid h school teachers, but the grade aries run more uniform.

We find that Klemme is paying s for grade teachers than the surnding towns, for instance:

Garner pays their grade teachers m $110 to $120 per month.

Britt, $115 per month.

Corwith pays four grade teachers 10 per month and three receive 20 per month.

Kanawha salaries were not given d neither was Crystal Lake.

Hayfield pays their grade teach- $110 per month.

Goodell pays $110 and $115.

The Klemme grade teachers have n paid $100 per month, which is to $20 less than the neighbor- schools are paying.

The Klemme school is indeed forate to be able to hire such good de teachers at a less sallary than er schools are paying.

Of course the board is anxious o d down expenses and lighten the es. However, by taking a chance getting good teachers at a saving dollars and cents may cost much the educaion of our children. We e a fine lo of school children in mme and we want them to have equal chance with those in other ools, regardless of a few extra lars spent for good teachers.

Especially must great care be exsed in the selection of grade chers. They represent the very ndation of our school system. A d, firm foundation is the life of structure, material as well as cational or spiritual. A proper nning and training in the grades the pupil to better look out for self for hte added duties when reaches the high school.

We are glad to report that Mr. M. Penrod will return to Klemme for ther year as superintendent and school instructor in mathemaand agriculture. Mr. Penrod been with us for two years now has given universal satisfaction. is a type of man of great value the community as well as the ool. He is a man of clean habits, istian character, a good managconscientious and fair to all he s with and is ever ready to corate in any community affair. has good musical talent and is dy at any time to assist in the ool, community or church activi-

Miss Wilma Trumbell, principal the high school has not signed contract at this time. Miss mbell teaches English and she very capable instructor in this ult branch of high school work. s well prepared for the subjects teaches and has had experience. takes a keen interest in comity affairs and is ever ready to her assistance when needed.

Miss Trumbell expects to go to California this summer and may teach in that state However, the people of Klemme would like to have her sign a contract to teach here for another year at least.

Donald M. Lewis who teaches in the high school and conducts the orchestra has been with us one year and has signed to stay again next year. We are glad to have im with us again as we beleive he is well qualified for his work. Mr. Lewis is a fne young man and is well liked by all.

Carl Heiden teaches manual training and coaches boys athletics as well as supervising the 7th and 8th grades. This is Mr Heiden's first year of teaching but he has made good. We are glad to sta e that he has signed up and will return again next year. Mr Heiden's boys have shown real ability in the manual arts department and his basket ball team turned out far better than we expected, as he had practically all new material to work with

Miss Lenabelle McGinnes has likewise signed to return next year She is a very capable high school teacher in Home Economics, History and has charges of girls physical training. Her clas of girls have become fine cooks and have displayed some real art in the making of clothing.

Miss Phyllis E. Root will return as teacher in the 5th and 6th grades Miss Root is well trained for her work and has a pleasing disposition hat will make the most sullen pupil smile at difficult work.

Miss Mildred Wheatman will return as teacher in the 3rd and 4th grades. She is well prepared in her work and her pupils have shown fine progress under her direction. She is a live-wire teacher, full op pep and displays real musical ability.

We are sorry to report that Miss Lenora Wheatman, for two years teacher in the primary and 2nd grade has not yet signed her contract. She is perhaps the best primary teacher the Klemme school has ever had and the pupils certainly get a good start in school wor kunder her direction We believe the board should do their utmost to reain Miss Wheatman. Besides being an excellent teacher she is a good pianoist and is ready to co-operate at al times in programs both in the school and in community and church affairs.

AUXILIARY TO RUN MOVIE SHOW HERE

LADIES WILL PUT ON PICTURE SATURDAY EVENING

Have Leased Theatre As A Community Project

Klemme has a live-wire Legion Auxiliary No job seems to big for them to tackle and put across. For some time Klemme has been without a moving picture show and noone seemed to want to take chances on running shows, as it has been a sing proposition in the past.

However, the Auxiliary were not afraid to tackle the job and accordingly leased the theatre of John N. Day and took possession April 1st.

Along with the picture shows the ladies intend to put on dances to help defray expenses and their first dance is tonight. The Ladies will conduct dances that will be popular with all, both old and young, and will have popular music as well as the old-time favorites, so that all hould be pleased.

The Auxiliary, in booking their moving pictures, are using care to select only the best pictures, clean, wholesome entertainment that will be enjoyed.

The ladies are not in the picture business to make a lot of money. All they desire is to break even and give the people of Klemme a good clean entertainment. They are using this as their "community project," and he people of Klemme and vicinity should give the ladies their co-operation and support in order that they may put it over

The first moving picture show is this week, Saturday night and a omparitively small price is asked for admssion, adults 25 cents and 10 cents for children This should be within the reach of all

Make your plans so that you can attend the show Saturday night.

LITTLE DONALD GROH DIED TUESDAY AFTERNOON

Funeral Services To Be Held Here Friday Afternoon

Calvin Donald, 2 year old son of Mr. and Mrs. Alex Groh who reside southeast of Klemme, died Tuesday afternoon following an illness. Since birth the little one had been bothered with live trouble which finally caused his death

Funeral services will be held in Klemme Friday afternoon at the Reformed church in Klemme and interment will be made in the local cemetery.

The sympathy of the community is extended to the bereaved family.

KANWHA TRIMS KLEMME MEN IN VOLLEY BALL GAME

Visitors Too Speedy For Local Net And Ball Slappers

The business mens volley ball team came over from Kanawha Friday night and invaded the local prune peddlers' camp.

Kanawha again warped it to the local aggregation by defeating them four out of five games. However the Klemmeites showed much improvement in the art of slapping the ball over the net and in future encounters they may be able to play the District Champions a closer tilt.

Anyway, everybody had a fine time.

PETE MERKEL HAS FIRST FORD TUDOR IN COUNTY

Was Ordered June 11, 1927 and Delivered April 4, 1928

Pete Merkel has the first two door Ford Sedan of the new model to be delivered in Hancock County.

Pete was so sure that the new Ford would be a real car that e put in his order with the Garner Auto Co., of Kemme on June 11 last year and then just—waited.

And what's more, Pete says he is glad he waited!

HARDWARE STORE BEING REMODEL'D

ED. JACOBS REMODELING HIS HARDWARE STORE

mprovement Wil Give Added Space For Display And Storage

E. F. Jacobs is making vast improvements and changes in his hardare store.

Work of re-modeling started a w weeks ago with installing a numer of new bins for bolts. Next n rder new shelving was installed for he large stock of paint carried in tock Other shelves along the east all were all widened out so that early double the capacity of stock an be carried on the shelves. The ool cabinets and building hardawre abinets toward the front of the tore were next in line for a change.

The more recent remodeling and ow in progress is the remodeling of he room at the front and west of he present main room and which eretofore has been used only for a torage room. This is being fitted p with a new plate glass front and he interior fixed up. The partition etween this room and the main oom will be torn down which will ive Mr. Jacobs a double front store nd more display room. This new oom wil be used mostly for displayng heavy hardware, such as toves nd ranges, washing machines, seprators, etc., and will also be fitted p with shelf room along the walls.

Mr Jacobs informs us that he alo intends to change about the show cases, counters and display racks nd may install display tables in heir place, the newer method of display now used in the larger stores nd which gives a clear visiom over he store.

The improvements are certainly ine and when completed Mr. Jacobs vill have one of the best hardware tores in northern Iowa.

METHODIST CHURCH NOTES

A. W. Gaugor, Pastor

We are looking forward to Easter as one of the great days of the hurch calendar. It carries with it a nessage of joy and new life.

In our plans for Easter we are lanning to give full expression to he real spirit of the day. As herefore we will have a baptismal serice followed by the reception of nembers.

An Easter message by the pastor will be a part of the morning service This will be especially directed to the children who are urged to be present.

During the Sunday school hour an Easter program will be rendered. This is put on by the smaller Sunday school folk.

Special Easter offerings will be taken to be applied for mission work and should be commensurate with our Easter joy.

On Sunday evening an Easter Cantata will be put on by some of the older scholars and teachers of the S S.

Liberty's Easter Program will be carried out after the Sunday school.

A cordial welcome awaits the public at all these services and programs.

NINE CARS STOCK SHIPPED THE PAST WEEK

Eight Cars Shipped Saturday; One Car Shipped Tuesday

Eight cars of live stock were shipped Saturday night. The Shipping association had four cars of hogs and a car of mixed stock. C. A. Larsen shipped two cars of hogs and a car of cattle. Tuesday Larsen shipped a car of hogs.

J. F. W. Vrba and wife to First National Bank, Garner. W. D., date 4-4-27, $1.00 Lot 1 block 43 Garner.

R. E Courson, Referee, to W. C. Tyrell, Jr. Referee's deed, date 3-1-28, $26,784.00. NW¼ 29 and part of NE¼ 30-95-23.

NEXT NUMBER OF LYCEUM ON NEXT FRIDAY NIGHT

Mr. Price Will Be The Entertainer For Next Number

Mr. Price who will address us on our Lyceum Course will be here on Friday evening of next week and we hope many will be on hand to hear him. He has been on the lyceum nd chautauqua platforms for several years and we believe he will give a strong address. The last two numbers of our course have been very good and we believe the next and last one will be. For those who do ot have season tickets the price of admission will be 25 and 35 cts.

P. T. A. Meeting Was Enjoyed

Neither Mrs. Lau nor Mr. Wellemeyer were able to appear on our P. T. A. program last Tuesday night. Rev Grosshuesch gave a brief talk on education in Germany and compared it with our system of tducation. It was very interesting.

Our grade children furnished several songs for the program which they renedered well, thanks to their teachers who coached them.

At the suggestion of Mr. Wellemeyer, our faculty took their turn nd provided a free lunch for the membership in attendance. Mrs. R. W. Elder, Miss Eunice Braund and Mrs. Waterman ably assisted in preparing and serving the lunch We understand some of our parents enerously donated cakt, cream, etc.

Other Klemme School News

Our Seniors are getting started n their Class Play.

Miss Trumbell has been coaching ome of our high school students for he Easter program for Sunday evning at the M. E. Church.

Sevtral of our students have completed their course of instruction nder Rev. Grosshuesch of the Reormed Church of Klemme and were onfirmed last Sunday morning. We ave been glad to see so many enolled in this worthwhile work.

In the absence of Miss Mildred Wheatman, who has gone home for a few days, Miss Edyth Haupt is supplying in grades 3 and 4.

Our attendance continues to improve but both pupils and teachers re very busy getting lost work made p We hope those who may contract ontagious diseases will exercise discretion in the interest of our school We have seven more weeks left of he school year and wish for the best f attendance during this time.

Mr. Heiden expects to visit home olks this week end.

AVERY TWIN LAKE NEWS

Mr. and Mrs. Needham and family f Mason City visited at the Henry Buseman home Sunday.

Mr and Mrs. Ben Swalve were unday afternoon visitors at the D. Swalve home.

Alvin, the youngest son of Mr. and Mrs. Emil Lau, has been quite ill he past week with the flu.

Mr. and Mrs. Fred Etchen visited at the home of Mrs. Etchen's parnts, the William Greiman home.

Mrs. Emma Schwichtenberg visited with Mrs. Dick Swalve last Thurs day afternoon.

Valentine Josten spent Sunday at the home of his son, Edwin.

Most farmers in this vicinity have finished seeding and are well along with field work.

Mr. and Mrs. Allie White and son, Albert, spent Sunday with Mrs. White's mother at Goodel.

Verner rPiebe has been very ill Monday and Tuesday with tonsilitis but is improving.

Mr. and Mrs. Henry Buseman and family were Mason City shoppers one day last week.

Ernest Schwichtenberg was a Goodell caller last Thursday.

L. W. Wesenberg delivered a new seeder in this community lately.

Erwin Haupt spent the week end at the Elmer Schlei and Mrs. Fred Haupt homes and also visited with other friends at Klemme.

Mr. and Mrs. Dick Swalve and family visited at the Emery Schaefer home last Saturday to see the new baby.

Verner Lau has been absent from school several days the past week on account of illness.

Mr. and Mrs. Robert Roths were visiting at the Henry Buseman home last week one evening.

GLADYS SCHLICHTING WINS CO. CONTEST

WILL COMPETE IN STATE CONTEST AT DES MOINES

Forty Spellers Took Part In County Contest At Garner Saturday

Miss Gladys Schlichting, daughter of Mr. and Mrs. Fred Schlichting, a student of the Klemme eighth grade will represent Hancock County the state spelling contest to be at Des Moines, April 20th..

Gladys represented the Kl school at the county spelling contes held at Garner Saturday afternoon, in which about forty boys and girls from all over the county competed for the county championship and the right to represent Hancock County in the state contest at Des Moines. The winner of this contest will recieve a trip to Washington, D. C., with all expenses paid. One speller from each county will take part in he state contest, sponsored by the Des Moines Register.

Julia Zwald, of Dist. No. 6, Garfield township was "runner-up" in he county spelling bee and remained in the line of "battle" until she went down on the word, "adieu."

The contest started at 2:30 p. m. and was not concluded until nearly two hours later. Miss Luella Smeby pronounced the words taken from he Des Moines Register list. Supt. M. F. Penrod, of Klemme; Supt. E. Rankins, of Crystal Lake and R. Fish of Kanawha were judges.

The winer of the contest was awarded $2, the second $1 and the next seven to remain in line, 50 cts ach The names of the ones reiving awards in their order were: Gladys Schlichting, winner, Julia Zwald, second; Enolia Olson, Dist 2, Britt; Vernon Pueggel, St. John's School; Ruby Beinert, Dist. 6, Madison; Mildred Schoenwetter, Dist. 9, Liberty; Richard Schubert, Dist. 5 Britt.

Gladys Schlichting has a go hance of winning out in the st contest as she has had some experience by being one of the final remainers in the county contest last year and she is "going strong" this year.

The people of Klemme are glad he made such an excellent showing n the county contest Saturday as he spelled all of the words with ease and confidence. We congratulate her on her good luck and hope he may win the state contest, which tself is a great honor, and the trip to Washington one of great educaional value.

Notice is hereby given, That the undersigned has been duly appointed nd qualified as Administratrix of he Estate of Frank Roths late of Hancock County, State of owa, deeased.

All persons indebted to the estate are requested to make immediate payment; and those having laims against the same will present them, duly authenticated, to he undersigned, for allowance.

Dated March 31, A. D. 1928.

MARY ROTHS, Administratrix. By Ramsay & Blackstone, Attorneys. (Pub. April 5-12-19, 1928.)

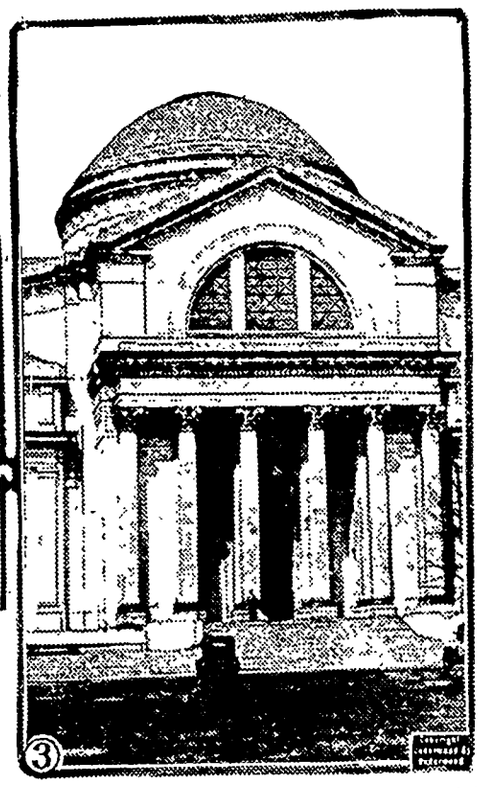
Card Of Thanks

We wish to thank our neigbors and friends for their many acts of kindnesses and flowers given Mr Schuldt during his illness, and for the floral offerings and words of sympathy extended to us in our bereavement. We wish to thank the choir and others for their part in the services.

Mrs. Ernest Schudt and family.

NEW NEIGHBORS INVITED TO F. B. MEETING

A most cordial welcome is extended to all new neighbors and members to attend the Farm Bureau Meeting at the Center School House in Liberty Township, Friday evening April 6th. A good program, good speakers, music and refreshments. —Committee.



1—Fokker's largest plane, for 14 passengers and mail, built for western air express of Los Angeles. 2—Shiek Hamid, Arab prince of Bahrein, and retinue, in Irak where holy war against the British is threatened. 3—Dome of New National museum in Washington, found in danger of collapse because of slipping of keystone.

NEWS REVIEW OF CURRENT EVENTS

Chicago Disgraced by War of Politicians and Criminal Gangs.

By EDWARD W. PICKARD

WARFARE between Republican factions in Chicago has reached such a stage of virulence that the entire nation is not only interested but amazed and shocked. Leaders of both sides, most of them candidates for nomination in the approaching primaries, profess lofty motives and personal uprightness, but the evident truth is that all of them are making use of the lowest criminal elements in the great city. It is a war of gangs and whatever may be said of the candidates, there is nothing to choose between the two crews of vicious thugs that are employed. Last week a long series of bomb outrages was climaxed by the bombing of the homes of Senator Charles S. Deneen, leader of the faction opposing the Small-Thompson-Crowe crowd, and of Judge Swanson, running against Crowe for the state's attorneyship nomination. Each faction blamed the other for this affair, and the authorities up to the time of writing have failed to find the perpetrators despite offers of reward totaling $65,000 and complete immunity. Unprejudiced observers are convinced that the struggle between rival gangs of "alky" dealers and bootleggers is closely connected with the political conflict as well as being responsible for the numerous murders and bombings; and the gamblers and others engaged in organized crime also are deeply interested.

SENATOR Frank B. Willis' sudden death in his home town, Delaware, Ohio, changed the Republican preconvention campaign startlingly He had been carrying on a strong fight against Hoover for the Ohio delegation and Lowden had not entered the state. The demise of Willis seemed to leave the secretary of commerce unopposed there, but it was pointed out that 34 of the 51 Willis candidates had named Lowden as their second choice, and others had given Curtis or Watson second place in their preference. Ohio members of congress said it would be impossible to drop the name of Willis from the primary ballot.

It is assumed that Governor Donahey of Ohio, a Democrat, will appoint a member of his party to fill out the unexpired term of Willis, and the prediction is made that he will select Atlee Pomerene.

Lowden was indorsed by the Missouri state convention, and was assured of 21 of Minnesota's 27 votes; while Hoover was pledged the support of the Maine delegation. Watson's fight on Hoover in Indiana was becoming very lively, the senator especially attacking the secretary's attitude on international issues. It had been believed Hoover would be unopposed in New Jersey, but Lowden has now entered the primaries in that state. Hoover's board of strategy has estimated that the secretary lacks only 69 votes to insure his nomination, and if that is true it is apparent that Mellon, controlling the Pennsylvania delegation, controls the situation.

On the Democratic side the California primaries attract attention, for the fight there is three-sided, Smith, Walsh and Reed all being contenders. It had been hoped there would be a clean-cut contest between Smith and Walsh in South Dakota, but the state Democratic leaders, for local reasons, have prevented this. Dry Democrats of the South assert that the only southern delegations that Smith can get in southern states are those of Arkansas and Louisiana. In Arizona the state central committee appointed twelve delegates, uninstructed, but it was said they were favorable to the Smith candidacy.

WITHOUT a dissenting vote the senate passed the revised Jones bill authorizing the expenditure of $325,000,000 for flood control on the lower Mississippi river. The measure does not entirely meet the views of President Coolidge. While it declares for the retention of the principle of local contribution for flood works, it expressly relieves local interests of further contributions toward this particular project. Neither is there any mention of an economic commission to study the financial condition of the people along the lower Mississippi, as recommended by the President. In all other respects Mr. Coolidge likes it better than the Reed plan approved by the house committee.

The Jones bill, as passed by the senate, recognizes the principle of local contributions as sound, but asserts that the previous expenditure of $292,000,000 by local interests in the Mississippi valley represents a full compliance with this principle. Instead of creating a new commission, it provides that the work shall be in immediate charge of the present Mississippi river commission under the direction of the secretary of war and the supervision of the chief of engineers. This represents a continuation of present policies and is a feature which has been insisted upon by the administration. It also provides that the Jadwin plan, as recommended to congress by President Coolidge, shall be the basis of the flood control scheme. Provision is made for a board to reconcile engineering differences between the Jadwin plan and the Mississippi river commission plan

It is expected that the construction of the flood control works will require a period of eight or ten years and that the appropriation for the first year will be from $30,000,000 to $40,000,000.

ANOTHER big measure was passed unanimously by the house—the naval appropriation bill carrying $360,000,000. The total of $48,000,000 is provided for continuing construction of eight 10,000-ton cruisers and two fleet submarines, $6,575,000 is carried for modernization work and gun elevation work on two battleships, and an additional $31,315,000 goes for naval aviation.

When the marine corps appropriations came up the Democrats attempted to ascertain the cost of maintaining marines in Nicaragua. When this failed Representative Abernethy (Dem., N. C.), criticized the sending of American marines to Nicaragua to oversee elections.

BY A vote of 15 to 6, the house committee on agriculture approved a revised McNary-Haugen farm relief bill. The Ketcham export debenture plan was rejected by a vote of 13 to 8. The measure is similar to the revised plan offered by Senator McNary, chairman on agriculture, and reported favorably by that committee It provides for marketing agreements with co-operatives for the handling of surplus crops and the payment of losses by means of an equalization fee assessed upon the entire production only when price stabilization is not obtained through the use of government loans. Like the McNary bill, the house measure also eliminates restrictions upon the appointment of members of the proposed farm board and otherwise seeks to meet objections raised when President Coolidge vetoed the McNary-Haugen plan in the last congress.

CAPTAIN KOEHL, Baron von Huenefeld and Arthur Spindler, German aviators, secretly left Berlin on a projected flight across the North Atlantic, and made the first stage of the journey, to Baldonnel airdrome near Dublin, in safety. There, at this writing, they still are awaiting favorable weather for the transoceanic part of the flight. They are using the single-motored Junkers plane Bremen in which Captain Koehl attempted a similar flight last year. The aviators asserted their plans were scientifically formed and that if they encountered cold winds and rain they would head direct for New York to avoid danger of ice formation on the wings.

Colonel Lindbergh, after his week in Washington giving rides to senators, representatives, diplomats and other personages, announced that he was ready to withdraw from public life for the time being, and soon after quietly departed for Lexington, Ky., in his famous plane. From there he went on westward, his destination being presumably San Diego. In Washington there were reports that he was considering making a round-the-world trip under the auspices of the State department. In San Diego a new plane is being built for Lindbergh, similar to the Spirit of St. Louis but larger and more completely equipped.

BECAUSE Albert B. Fall is too ill to travel to Washington, Atlee Pomerene, representing the government, went to Fall's home in El Paso, Texas, to take his testimony in the Teapot Dome conspiracy case. Regular court procedure was followed, defense attorneys questioning Fall and Pomerene conducting the cross-examination. The former secretary of the interior still contended that the Teapot Dome leases were executed for the best interests of the government and that the bond transaction with Sinclair was perfectly legitimate and was executed in payment of a third interest in the Fall ranch at Three Rivers, N. M.

Henry M. Blackmer, missing witness in the oil lease case, has resigned as a director of the Midwest Refining company, which concern is owned by the Standard Oil of Indiana. It was believed in Washington that John D Rockefeller, Jr., had brought pressure to have Blackmer quit.

NEW oil regulations issued by the Mexican government appear to have settled the controversy between that government and the United States, and Ambassador Morrow is being credited with great skill in handling the negotiations. The regulations give evidence of Mexico's determination to recognize the rights held by foreigners in oil properties prior to the adoption of the Constitution of 1917. Those who take confirmatory concessions under the amended law get a confirmation of their old rights rather than a new grant of rights The government at Washington is satisfied with the settlement, and if the oil men are not they will probably have to fight alone hereafter.

HENRY FORD is to be summoned before the senate interstate commerce committee, which is investigating the coal situation, to explain how he can pay labor in his nonunion mines in West Virginia and Kentucky union wages or more. Neither the miners nor the operators are eager to have Ford explain his system, for he is against the union and he puts the other operators to shame.

Illinois mine operators declined to hold further wage parleys with the union until the latter agrees to arbitrate for a wage scale less than that provided for in the Jacksonville agreement, which meant that most of the mines in the state would close down. Strip-mine operators of the Indiana district signed a contract with the United Mine Workers to continue operations under the Jacksonville wage scale until March 31, 1929

SECRETARY OF LABOR DAVIS reported to the senate that the number of persons in the country actually employed at wages or salaries in January was 1,874,050 less than in 1925. Among the things that have brought about this slump in employment he listed the floods in the Mississippi valley and New England, the Florida tornado and the long-continued disturbance in the bituminous coal fields. The report precipitated a lively debate in the senate, the Democrats questioning its accuracy and asserting the number of unemployed was nearer four or five millions.

MARSHAL PILSUDSKI, dictator of Poland, found himself up against a bunch of hard-boiled Communists when the new parliament opened, and the disturbances were such that the police were called in and the sitting was soon suspended When the diet reassembled the opposition succeeded in electing its candidate for speaker, Dashinski, by a vote of 206 to 140 for Pilsudski's candidate, Bartells.

POPE PIUS made a speech strongly criticizing the Fascist training of youth and rebuking the Catholic Centralists. In reply Premier Mussolini's council of ministers announced that a decree law soon will be passed prohibiting the Catholic organization of boys called "Catholic Scouts." The decree will make the Ballilla, which is a Fascist children's organization, the only one permitted in Italy. This means the Italian government will take full charge of the training of the nation's youth.

POULTRY

CHICKEN BREEDER MUST PICK BIRDS

"To make progress in breeding poultry for egg production, a poultryman must be able to select breeding stock that will transmit to its offspring the most desirable egg qualities. These qualities are correct size, shape, color, and shell texture of the eggs, and a tendency to lay a large number of eggs," said Prof. G. O. Hall of the Cornell poultry department, speaking on breeding poultry for egg production recently.

"In any breeding program there are three fundamental principles which must be kept in mind. They are first, a standard of excellence or ideal; second, constant breeding toward that ideal; and third, courageous culling from the time eggs are selected for the incubator until the time when males and females are put in the breeding pens.

"Aside from the personal element of the poultryman himself, two sets of factors control results. The first set can be grouped under the term, 'heredity'—those causes which are internal and relatively hard to control. The characteristics of an individual due to this set of factors are possessed by the individual at the time of birth, although they may be influenced a great deal by the second set of controlling factors. Inherent characters are dependent, in part, upon this second set of factors, environmental conditions and influences, under which a bird lives. Feeding, housing, and general care and management fall under environmental conditions and influences.

"The most accurate method of controlling heredity is by the use of a system of individual pedigree hatching and progeny testing. Such a system requires trapnesting and carefully-kept records. Birds to be pedigreed should be carefully selected and only such mating or lines which show progress towards the desired goal should be continued from year to year.

"When it is impossible to do individual pedigreeing, pen mating may be used In pen mating, from three to five males may be used in as many pens with 12 to 20 selected females each, and the progeny from each pen may be marked so that the different lots can be identified later. The offspring from each pen can then be observed, and the male lines continued from only those birds which show best results.

"Egg production may be improved also by selecting the best individuals, both males and females, and mating them by the flock or mass method. This is the most common practice among farmers. Progress with it is slow, however, and after a time a point is reached where the average egg production increases little, if any, from year to year."

Skim Milk Is Excellent Feed for Young Turkeys

Sweet skim milk should be the first feed given to poults (young turkeys), according to "Turkey Talk," a University of Minnesota bulletin on raising turkeys. It is first fed at thirty-six to forty-eight hours of age, and continued as the only liquid for several weeks. No water is recommended. A pound of dry skim milk in four or five quarts of water will give the fresh, sweet product desired.

Poultry Facts

Feed grain liberally when using lights.

* * *

Be regular in management and the use of lights.

* * *

The hen's comb is a good index to the activity of the egg organs.

* * *

Oat hulls should be eliminated from chick rations on account of their indigestible character.

* * *

Finely ground oats cannot be handled by young chicks, as the hull is still too bulky and indigestible.

* * *

Geese should not be used for breeding purposes until they are two years old. A gander may be used the first season.

* * *

Mixing 10 or 20 per cent of whole oats in the all-mash feed was very satisfactory in recent tests at the Ohio experiment station.

* * *

Many poultry keepers regard oats as an important part of the ration for laying hens, providing a satisfactory way of feeding this grain can be found.

* * *

Little chicks are like children in the respect that disorders of the bowels and digestive apparatus are quite common among them.

* * *

Early chicks should, if possible, be reared in indoor brooders, placed in houses which may be well ventilated and which have ample sunlight.

* * *

The addition of finely ground oats to the mash mixture is a popular method of feeding with some poultry men, but they often find it difficult to get the oats finely ground.

Shirt Made Souvenir

A white shirt front bearing the signatures of Challapin and other celebrated artists who appeared at a concert in connection with British music trades convention at Folkstone, England, was sold at auction five times and realized 300 guineas ($1,500). The shirt front was autographed by the artists while being worn by a member of the convention.

Clinching

"Oh, George, will you always love me like this?"

"Rather not, darling. I'll show you another hold tomorrow."—Everybody's Weekly.

Humanity is to get along with, not to denounce.

Earthquakes Made Study

Earthquake studies are to be conducted on a large scale in Soviet Russia, according to information received in Washington. One hundred seismograph stations are to be constructed and equipped with the latest types of instruments. Inasmuch as the whole vast interior of European Asia the scene of frequent earthquakes, is now virtually without facilities for the study of these phenomena, it is expected that the completion of this ambitious program will result in substantial additions to the world's earthquake information.

Its Joyous Climax

"Did that new play have a happy ending?" "Sure. Everybody was glad when it was over."

American Forest Week, 1928

Observe It if You Would Help Save This → from Becoming This →

Photo by Underwood & Underwood

Photo by U. S. Forest Service

By ELMO SCOTT WATSON

THE week of April 22 to 28 has been designated as American Forest week in a proclamation by President Coolidge, and all Americans are urged to do their share in a proper observance of this week. It is noteworthy that among all the multifarious "weeks," set aside for special observance by this group or that organization which has a special interest in having their particular week "observed," American Forest week is the only one to which the federal government has given recognition and support. For it is not a tool for advancing the views or serving the purposes of any special group or organization. It does not identify itself with any particular program, but seeks to make better known certain essential facts about the forestry situation in this country and to promote dscussion of this problem from every angle. Being strictly educational in plan and purpose and seeking to serve the best interests of the whole people, it is one "week" which every American citizen can "observe" conscientiously and should observe as a part of his civic duty.

The idea of devoting seven days in the year to public education on forestry matters originated on the Pacific coast eight years ago. In 1921 President Harding issued the first proclamation which brought the influence of the government behind the idea. When Calvin Coolidge became President he also gave his sanction to the plan and he has issued a proclamation for American Forest week every year since that time. Many governors have also issued similar proclamations so that the movement is truly a nationwide one.

At first the week was called Forest Protection week, but because of the magnitude of the forest problem, President Coolidge in 1925 enlarged the scope of the educational program and the more inclusive name of American Forest week was chosen. In recognition of the international scope of the forestry problem the authorities of the United States and Canada in 1926 jointly agreed that the week should be celebrated concurrently in the two countries. The Canadians call theirs "Save the Forests week," but its purpose and its observance is essentially the same as our American Forest week. The joint observance of the week was continued last year, and, as President Coolidge points out in this year's proclamatiou, our Canadian cousins have the dates April 22 to 28 marked in red on their calendars.

American Forest week is an annual call to all citizens, young and old, to take part in bringing about better forest conditions, its purpose is to give opportunity for every form of interest in trees and forests to find expression, each in its own way, and its aim is that the general welfare of the nation in respect to forestry may be promoted by the taking of common counsel, the formation of intelligent public opinion and the stimulation of action, individual and collective, under the impulse given by observance of the week. General supervision of plans for the week is under the direction of the American Forest week committee of which Frank O. Lowden, former governor of Illinois, is general chairman, and this committee is composed of representatives from nearly 100 organizations, representing every conceivable form of interest—the federal government, state governments, outdoor, wild life and recreational interests, foresters and forestry associations, the lumber industry, large consumers of forest products, organized labor, groups interested in the preservation of water resources, scientific and civic organizations, women's organizations and a host of others. Outstanding among these in carrying on forestry educational work not only during the seven days of American Forest week, but during the 365 days of the year is the American Tree association, of which the veteran worker for forest preservation, Charles Lathrop Pack, is president.

Although the forestry problem is so extensive in all its ramifications and there are so many angles to the question of how best to preserve this great natural resource and make it increasingly valuable to the nation, the prime necessity, as President Coolidge emphasizes in this year's proclamation, is the suppression of the fire hazard and the preservation of the forests which we already have even before steps can be taken for planning for the forests that are to be. Prevention of forest fires, especially unnecessary fires, is the one virtually important plank in the national forestry platform. While it is true that the original forest resources of this continent were sadly depleted by wasteful lumbering methods in the past, foresters estimate that more timber has fallen before the flames than before the ax. Modern lumbering methods, based upon an intelligent understanding of future as well as present needs, have replaced the old extravagance, but the fire demon still exacts his dreadful toll and the acreage of forest land each year swept by forest fire is about twice the area cut over by logging operations.

For this situation, for the 80,000 fires which, in the words of the President, "scourge our woodlands, steadily undermining their vitality," the blame rests, as he says, upon every one of us, insofar as we are indifferent to our individual responsibility in improving conditions which will lessen the fire hazard. But most of all it rests upon the careless citizen who has the least right to go into the woods.

But, important as prevention of forest fires is, it is not the only forestry need which the educational program of American Forest week points out. Another highly important one is the necessity to replace the forests which have been destroyed by fire or logging operations with new forests and the way to fill this need is summed up in the simple watchword of "Plant trees!" Of all the organizations united in promoting American Forest week, few have done more in furthering this constructive work than the American Tree association. As before stated, this association is on the job with its educational work every day in the year.

Two years ago the association, to mark the semicentennial of the first step in forestry taken by the United States government, issued 100,000 copies of a Forestry Primer, a plain statement of the forestry situation in this country, which was distributed to schools throughout the country. Since that time the demand for the primer has so increased that now more than two million copies have been distributed to schools, organizations, scout leaders and women's clubs and it forms the basis for most of the American Forest week programs and special exercises. The association has also encouraged the planting of memorial groves and memorial trees along highways, dedicated to the memory of men who lost their lives in the World war. It has established a national honor roll in which such plantings are registered, as are trees planted in honor of various distinguished Americans. It has encouraged the planting of trees as a part of "city beautiful projects" of many municipalities and in many other ways has shown the individual citizen how he can have a part in this important undertaking of replacing our dwindling forests.

But the esthetic and sentimental aspects of tree planting are not the only ones which the American Tree association has fostered. It has had its share, too, along with such agencies as the United States forestry service, state and city forestry departments and the schools of forestry in our universities, in taking into account the economic factor in forest conservation. It has encouraged the planting of trees as a producing and profitable crop which should be added to our national agriculture. It was this economic angle of the situation which President Coolidge refers to in his proclamation when he says, "To make our vast empire of forest land fully productive of continuous crops of timber will have momentous consequences in our national life. It will give agriculture the advantage of a new valuable crop. It will afford permanent employment to millions of men in the forest industries. It will provide raw materials for many industries. It will furnish traffic for our railroads. It will maintain foreign and domestic commerce. It will restore our forests as conservers of soil and water, and as givers of health and pleasure to our people."

In that last sentence the President touched upon one vitually important point in the forestry program—the planting of trees as conservers of soil and water and factors in flood control. The necessity for such control is more apparent now than ever before in view of the disastrous floods which swept the Mississippi valley and New England last year. How the planting of trees will help solve the problem is summed up by President Pack of the American Tree association in the following words:

Flood waters of the Mississippi have directed the thought of the nation to means for preventing a similar disaster in the future. One of the agencies to that end is planting of the headwaters land of all streams flowing into this agricultural backbone of the nation to trees.

But there is another flood menace that bears directly on the future economic leadership of the United States and that is the flood of population. The experts give figures showing our population is increasing at the rate of a million a year.

This means a constantly increasing call on the forests for lumber. Forest products are the cornerstone of industry so let us do a twofold job in putting our millions of idle acres to work growing trees. They will help hold the water back and at the same time provide forests for the future. Planting of forests is the only phase of flood relief that will produce a revenue. All other measures will cost the taxpayers millions. Let us grow trees for a growing people.

So in the light of all these facts it is apparent that American Forest week is one of the most important of the whole 52 in this year 1928. Time was when the average American citizen was aware of such a thing as tree planting only on Arbor day and then only because he happened to hear his children talking about the Arbor day exercises in their schools. Arbor day is still an important day in our national calendar, but since its aim is essentially the same as that of American Forest week its observance is gradually becoming—and appropriately so—merged in the observance of American Forest week.

Forest Week Proclamation

FOR several years a special week has been set apart for public discussion of our forests and of what must be done to safeguard and restore them. Among the agencies making for progress in this direction, American Forest Week has proved its usefulness, and I am glad to proclaim it again and, to announce that Canada is again concurrently observing a similar week.

The rehabilitation of our forests demands first of all that the forest fire evil be suppressed. Many of our forested states, with the coöperation of timberland owners, havo undertaken organized protection against forest fires; and in recent years, under the Clarke-McNary law, the federal government has given its support to the movement. This great coöperative enterprise must be extended and strengthened until every forested county in the United States is safeguarded against forest fires.

But we are still far from the goal of complete protection. Every year, on tho average, 80,000 fires scourge our woodlands, steadily undermining their vitality. For this bad situation, the blame falls equally on us all. Public agencies rarely provide adequate protection against fire, the timberland owner is too often indifferent to his property, the forest worker is too often neglectful of the future forest; the average citizen is too often careless with firo in the woods We must all gain such respect for the forest that its destruction through indifference or carelessness shall be unthinkable.

We cannot permanently abuse our forests with impunity The soil is the ultimato source of all our wealth and of life itself One-fuorth of our American soil is best suited for forests. Much of this land is already idle. More of it is being made idle by destructive logging and fire. Yet we cannot safely permit our forest land to lie fallow and useless any more than we can permit our farms and factories to lio idle.

To make our vast empire of forest land fully productive of continuous crops of timber will have momentous consequences in our national life. It will give agriculture the advantage of a new valuable crop. It will afford permanent employment to millions of men in the forest industries. It will provide raw materials for many industries. It will furnish traffic for our railroads. It will maintain foreign and domestic commerce. It will restore our forests as conservers of soil and water, and as givers of health and pleasure to our people.

We already have made a beginning in forest renewal; but the task is stupendous, and we should permit no satisfaction over what has been done to blind us to the magnitude of what remains to be done.

Now, therefore, I, Calvin Coolidge, President of the United States of America, do hereby designate and set aside as American Forest Week the week beginning April 22 and ending April 28, in this year of 1928, I recommend to the governors of the various states that they also designate this week for special observance by all our people; and that where practicable and not in conflict with law or custom, Arbor Day be observed during the course of the same week. I urge that during that week all citizens and appropriate organizations—including public officials, legislators, business organizations, educators, editors, clergymen, landowners, and others—give thought to the preservation and wise use of our forests, to the end that energetic forest policies will be adopted in all communities.

CALVIN COOLIDGE.

Free Demonstration

Paints Varnishes Enamels Lacquer

Lowe Brothers PAINTS & VARNISHES

Some remarkable tests will be made—tests that will show why certain products are best for certain purposes. You will be surprised at the results that can be secured with paint, varnish and lacquer. This is your opportunity to get expert advice about any painting or decorating you may want to do. See these demonstrations and learn how you can produce artistic results yourself.

You will be pleased and surprised at the beautiful effects that can be easily and quickly obtained by anyone with LOWE BROTHERS Quick Drying Enamel. It comes in stiking colrs, dries in from four to five hours, ready for recoating in the infrequent cases when more than one coat is required, and dries hard, ready for use over night. This enamel has the desirable qualities of lacquer. It has no unpleasant odor and is no more dangerous as a fire hazard than other oil or varnish paints and enamels—just the thing for woodwork, furniture, metalwork, and toys, etc.

Come and see demonstrations of the use of Quick-Drying Enamel and other finishing materials.

See the demonstrator, with an iron heated to 400 degrees, iron a wet towel until dry on a surface finished with Neptunite Varnish without injuring the varnish. These and other demonstrations including the making of artistic wall decorations will make it well worth your while to visit our store during this demonstration.

Moreover, we will have with us an expert from the Lowe Brothers Company paint factory at Dayton, Ohio, who will glady giv helpful advice for your painting work.

MAKE OLD PIECES LIKE NEW In A JIFFY WITH PAR-O-KEET
A Lacquer—Dries In One Hour

We'll show you with PAR-O-KEET, the new brushing lacquer, how you can easily renew the finish on your old table, stand, chair, etc—and use the finished piece almost immediately. Our demonstrator will be glad to show you how to produce your own artistic results with Par-O-Keet. The results will surprise you. Come and see how easy this work is done and how you can do it.

$20.00 WORTH OF MERCHANDISE WILL BE GIVEN AWAY FREE—SEE OUR WINDOWS!

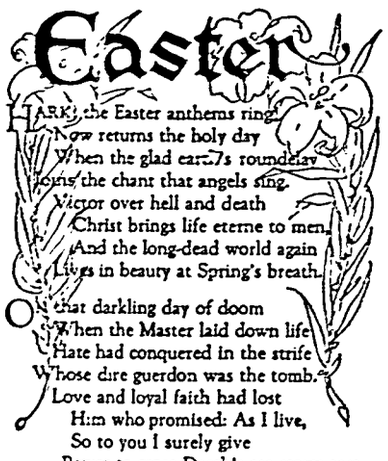
Easter



HARK, the Easter anthems ring!
Now returns the holy day
When the glad earth's roundelay
Joins the chant that angels sing.
Victor over hell and death
Christ brings life eterne to men,
And the long-dead world again
Lives in beauty at Spring's breath.

O that darkling day of doom
When the Master laid down life
Hate had conquered in the strife
Whose dire guerdon was the tomb.
Love and loyal faith had lost
Him who promised: As I live,
So to you I surely give
Power to cross Death's sea storm-tost.

YET the swift circling hours
Found the joy between the tears,
Wrought the wonder of earth's years,
Worked the will of heavenly powers.
Warring Death and Hell in vain
Trusted massy bolt and bar;
Strong the Son of Man afar
Dragged them captive in His train.

SING, O Earth, thy song of joy!
Nature, don thy robe of flowers!
Easter smile from all th bowers!
Life's reborn to full employ.
No myst'ry in th' sacred story
Can the God-Man's triumph dim.
Whom the deathless angels hymn
Mortals laud as King of Glory!

—Chicago Journal

In Joseph's Little Garden

The dust of twenty centuries has blown in upon the little garden where Joseph, and Nicodemus, and others, performed a very solemn and a very sorrowful duty when they tenderly spiced the body of the Nazarene, wound it in white linen, reverently laid it away in the hollow of a rock, and sealed the tomb with a stone that was to remain until the angels rolled it away to flood the world with a new light.

Many books have been written about what happened in this little garden; the logic and the eloquence of the world's wisest men have been piled around even some of the minor incidents of the story as we repeat it today; philosophers have dug into it; science has cut into it with the keenest of its lances; but the light and beauty of the story, with its sacred implications, with its promise of the silvered cycles that, unbroken, must run on unendingly, remain unmarred by the bitter bickerings of these two thousand years.

Even now humanity is surging restlessly in its quest for happiness. It is not in wealth, with its evil vanities and coarse ostentations; it is not in power, with its uneasy crowns and wasted opportunities; it is not in fame, with its broken dreams and fading rainbows; and yet, humanity, still fickle as moths, continues to pile itself around these wasting candles, still unmindful of the very nearness of the thing humanity craves most. Happiness is in the great quiet which had fallen upon Joseph when he begged Pilate for the body of the Nazarene, in the spiritual awakening which men and women experience when they gather in the quiet places of this earth, where voices are low and tender, and where lights are soft, and where music is gentle and soulful in its reaches.

The winds of the marching seasons have scattered the leaves of the little garden of Joseph's time; the rocks are worn by the elements; the lines are broken and changed; the landscape is different; the paths are buried; but the meaning of what happened here is a priceless and enduring human heritage, a radiant hope ever growing in its beauties.

Easter Custom Gives Privilege of Kissing

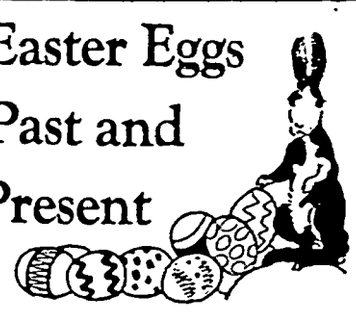
Public love-making, an old-time Easter custom, is still a feature of the holiday in various parts of the country. On the first Tuesday after Easter, the young men of Hungerford, a small town on the borders of Wiltshire and Berkshire, may safely kiss every maiden they meet. This privilege has been handed down since John o'Gaunt's day, and the men are expected to give an orange in exchange for the salute.

Exchange Not Robbery!

Many years ago a large sum of money was bequeathed to the town authorities of Smedgate, in Yorkshire, on condition that every Easter the interest on the money was distributed among poor people who wished to get married but had not enough money to buy the necessary furniture.

In some parts of the country girls have an Easter test that is supposed to indicate the identity of their future husbands. The test consists of selecting an onion to represent each of the eligible men. All the onions are then placed in the chimney corner to force their growth. The first to show signs of sprouting is considered to represent the lucky man.—London Tit-Bits

Easter Eggs Past and Present



The custom of associating eggs with Easter, like many other customs of Christian festivals, was derived from pagan usages. Eggs had been associated with the worship of Ashtoreth, of the Astarte of the Phenecians, Isis of Egypt, Diana of the Greeks and Romans and Eostre of the Teutons worshiped in spring. Easter is said by some to have derived its name from the latter goddess; others say it was named for an old pagan spring festival in honor of the sun's new birth in the east. Its time coinciding with that of the Resurrection, the symbol was taken over by the council of Nice 1,602 years ago, and the day of celebration fixed as the first Sunday after the paschal full moon, the season of the Hebrew Passover. The egg with its life germ, destined to burst forth after the appearance of death, became popularly associated with the general idea of resurrection, just as the Egyptians had adopted it as a sign of man's regeneration, and the Jews as a symbol of their delivery from bondage.

The lore of Easter eggs touches on many phases of life in many different countries. Under old ecclesiastical laws in England rent was payable in eggs of Easter; games were played with them; and in the north of England children asked for them to play with.

The custom of dyeing Easter eggs is centuries old. Commoners for the most part dyed them red as a symbol of Christ's blood. Lords and ladies covered theirs with gold leaf. Later the decorations were elaborated, particularly in continental Europe. Sometimes the eggs were merely marbled in a variety of colors; sometimes they bore cupids and love knots, flaming hearts and signs of the zodiac. Again, they would be halved and the shells hinged together with ribbon and lined with gilt paper and religious pictures. Venetians used to send out gift eggs bearing their portraits.

Just how the hare came to be connected with Easter customs we do not know, but we do know that among some nations the hare is a type of the moon. In fact, the Chinese represent the moon as a rabbit pounding rice in a mortar, while Hindu and Japanese artists paint the hare across the face of the moon. As the time of the Easter festival is governed by the phases of the moon this may be an explanation of their connection.

The mythical natural history of the Hindus tells us that hares live on the shores of the lake of the moon.

In Swabia the children are not allowed to make shadow pictures of rabbits on the wall, because it is considered a sin against the moon.

The colored folk of the Southern states have a strong belief in the power of the "left hind foot of a graveyard rabbit" killed in the dark of the moon.

In County Warwick, England, if the young men of the town can catch a hare and bring it to the parson of the parish before ten o'clock on Easter morning he must give them a calf's head, one hundred eggs for their breakfast and a groat in money.

Nowadays the Easter bunny has become so confused with the Easter egg custom that the hares are supposed to lay the many colored eggs the children find on Easter morning.

EASTER SYMBOLS

Lily's Significance

The lily is the symbol of Easter because it signifies purity and because it is one of the earliest spring flowers, typifying the rebirth of nature after the long winter sleep.

EASTER DAY

Glorious Blessed Easter day!
Flowers are blooming, birds are gay,
Jesus Christ, our Risen Lord,
Is by earth and heaven adored,
Paschal Lamb for sinners slain,
Holy and Blessed is His name.
He for us has paid the price,
Turned our darkness into light.

FARM STOCK

CHANGES MADE IN MARKETING WAYS

(Prepared by the United States Department of Agriculture.)

Current developments in the co-operative marketing of live stock are having a far-reaching effect on the live stock industry, according to C. G. Randell, Department of Agriculture economist, addressing the School of Co-operative Marketing, at Manhattan, Kan.

These developments include the effect of motor truck transportation on local live stock shipping associations, the growth of co-operative live stock selling and purchasing agencies at central markets, the co-operative selling of live stock direct to packers and other buyers, and the movement of stocker and feeder cattle, sheep and hogs direct from the range to feed lots.

There now are approximately 3,000 live stock shipping associations in the United States and 2,000 other associations that handle live stock as a side line, Mr. Randell said. The majority of these associations were organized from 1918 to 1922 inclusive, primarily as a protest against the margins that local buyers were taking on live stock purchased from farmers. By 1923 the associations had passed the experimental stage and many of them were functioning as efficient business organizations.

About this time, according to Mr. Randell, live stock began to be transported to market in increasing numbers by motor truck. Many associations adjacent to large central markets were driven out of business by truck competition from associations in more distant areas, but in some sections the associations have met this competition by operating trucks themselves. Other associations have secured the services of farmers who own trucks and have contracted with these farmers to haul the stock to the associations. By centralizing the business at one given point, associations have been able to load out hogs in double deck cars and thus effect a considerable saving in freight; also by handling a large volume of business they have reduced their operating cost per unit to such a point that a local buyer cannot successfully compete with them.

The department, through the bureau of agricultural economics, is making a five-year survey of the local live stock shipping situation. Thousands of records have been gathered for the years 1923 to 1925, inclusive. Many associations replying to the bureau's 1927 schedules stated they were "out of business due to the competition of the truck." Completion of the survey is expected to produce valuable data on current trends in the local live stock shipping situation.

Outlook Is Held Good for Breeding Horses

The United States has five million fewer horses than it had in 1920. Furthermore, the competition of the tractor is tending to eliminate the poorer draft types, leaving a field and a profitable market for the draft horse of good quality and weight.

For the foregoing reasons, W. C. Coffey, dean of the department of agriculture of the University of Minnesota, in a talk to horse breeders of Minnesota at their annual meeting in connection with Farmers' and Homemakers' week at University farm, said that the outlook for the horse breeding industry was good.

J. S. Montgomery, nationally known as a live stock judge and a horseman, manager of the Central Co-Operative Commission company, South St. Paul, supported the statement by Dean Coffey. He said there was a distinct shortage of draft horses throughout the eastern section of the corn belt, and predicted a steady income and good prices for the next five years at least.

Clean Out Sheep Barn Before Lambing Time

Clean out the sheep barn thoroughly when you are ready to begin lambing, bed it deeply and then add more straw now and then to keep the quarters clean, but don't clean the shed any more until you are done lambing. The heat generated in the bedding will do much to keep young lambs from chilling on cold nights. As soon as reasonably warm weather arrives clean the shed promptly and after that once a week change the bedding. Be sure to dock the tails at ten or fifteen days of age and make wethers out of the rams. If you are not experienced in these jobs get some neighbor who can show you. It is really very simple and attended with very little danger if you are careful

Why Sows Eat Pigs

Depraved appetite due to some abnormal condition which almost always is caused by improper feeding usually is the reason for sows eating their pigs, and the way to stop it is to balance the ration. Lack of protein or mineral matter is indicated, and the addition of skim milk, buttermilk or tankage or the placing of a mineral mixture before sows during pregnancy is suggested. Keep the pigs away from their mother except at nursing time for a few days.

Mothers, Do This—

When the children cough, rub Musterole on their throats and chests. No telling how soon the symptoms may develop into croup, or worse. And then's when you're glad you have a jar of Musterole at hand to give prompt relief.

As first aid, Musterole is excellent. Keep a jar ready for instant use.

It is the remedy for adults, too. Relieves sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of back or joints, sprains, sore muscles, chilblains, frosted feet and colds of the chest (it may prevent pneumonia)

To Mothers: **Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.**

To get relief when pain tortured joints and muscles keep you in constant misery rub on Joint-Ease.

It is quickly absorbed and you can rub it in often and expect results more speedily. Get it at any druggist in America.

Use Joint-Ease for sciatica, lumbago, sore, lame muscles, lame back, chest colds, sore nostrils and burning, aching feet. Only 60 cents. It penetrates.

FREE Send name and Address for 12 day trial tube to Pope Laboratories, Desk 3, Hallowell, Maine.

Joint-Ease

PISO'S for coughs

Quick Relief! A pleasant, effective syrup—35c and 60c sizes. And *externally*, use PISO'S Throat and Chest Salve, 35c.

KREMOLA SKIN BLEACH

Wonderful and sure. Makes your skin beautiful, also cures eczema. Price $ .25. Free booklet. Freckle Ointment removes freckles. Used over forty years. $1.25 and 65c. Ask your dealer or write Dr. C. H. Berry Co., 2975 Michigan Ave., Chicago

Wed-Lock

Having been detained late, "in conference," Walter Anthony strolled into Studio Inn and said thoughtfully: "Let's see; I've got to get some flowers and some candy and some theater tickets and—"

"What's the trouble?" Jake wanted to know. "Doing some mental arithmetic?"—Los Angeles Times.

Fizzled Out

"When I was a boy," said the vain man, "everybody said I was going to be President of the United States."

"That just goes to show," returned his political friend, "that it isn't wise to start a boom too far ahead of election."—Boston Transcript.

Oldest English Will

The will of Lady Alicia West (1383) is the earliest will in English at Somerset house.

France Eyes Reindeer as Beasts of Burden

Reindeer may become used extensively in place of oxen and horses in the mountain districts of France, if the experiments, just agreed upon, of raising them in the Haute Savoie district proves a success. The French ministry of agriculture has granted a subsidy to a society to help it with its reindeer farm.

It may come as a surprise to many to know that reindeer are actually in use already in one town in France so that the Lapps will not be the only ones in Europe to hear reindeer bells in villages. If one takes the train from Annecy, where the lake is intensely blue, to Chamonix, at the foot of Mont Blanc, he will pass through the village of Megeve. Should it be in the season of snow, and should he care to descend, he would be likely to see reindeer drawing sledges.—Exchange.

Magical Power Failed Wizard in Emergency

Howard Thurston, the magician, has astonished thousands while in Pittsburgh by extracting rabbits and American flags from the most unlikely places. It is even said that recently while paying a visit of charity at the home of a destitute miner he awed and overjoyed the miner's wife by extracting $1 bills from her hair and presenting them to her with his compliments.

But while on a visit to our office the other day, his magical gifts evidently deserted him temporarily Wishing to write a note to the dramatic critic, who happened to be out, he searched in vain through his clothing for a pencil, turning his pockets inside out, with no end of trouble.—Pittsburgh Post Gazette.

Smokes Ecrasite Cigars

Smoking long cigars with an ecrasite cartridge in each is the feat of a young athlete at Baden, Austria. When he believes that the explosion is about to take place he holds the stump between his teeth and lets the "big bang" proceed. The youth has schooled himself to keep his head perfectly still and avoid a recoil by stiffening the muscles of his neck. He says that if an ordinary man smoked an ecrasite cigar, the recoil would almost blow his head off, but he has so trained his muscles that he will permit anyone to hold a sharp-pointed instrument close to the nape of the neck when the explosion takes place.

Valued Souvenir

Mrs. Mary Sylvester of Middleboro, Mass., has a widely prized souvenir. It is a piece of the telephone wire over which the first message between Boston and New York was sent 35 years ago. She was in a Brooklyn audience that heard the singing of "America" over the new device.

The Higher Grammar

Professor—Can you analyze this sentence?

Stude (after reading it)—That is a complex sentence; it needs psychoanalysis.—Boston Transcript.

Vain Admonition

"The cure for worry, my boy, is work." "Yes, but I'm worrying because I can't get work."—Boston Transcript.

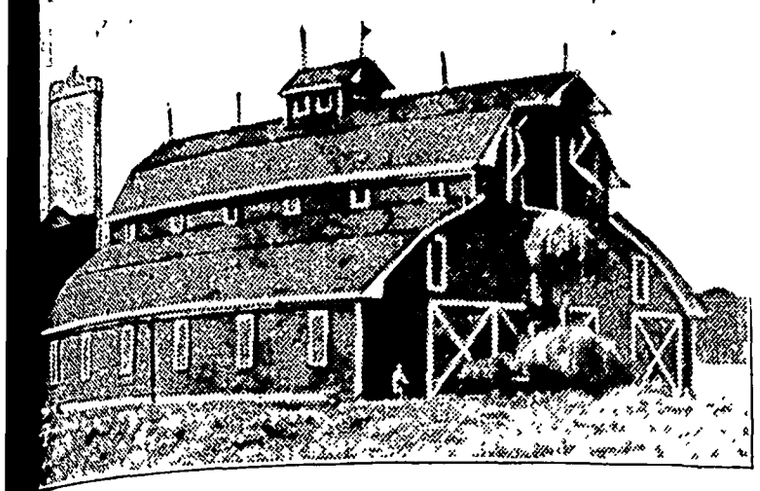
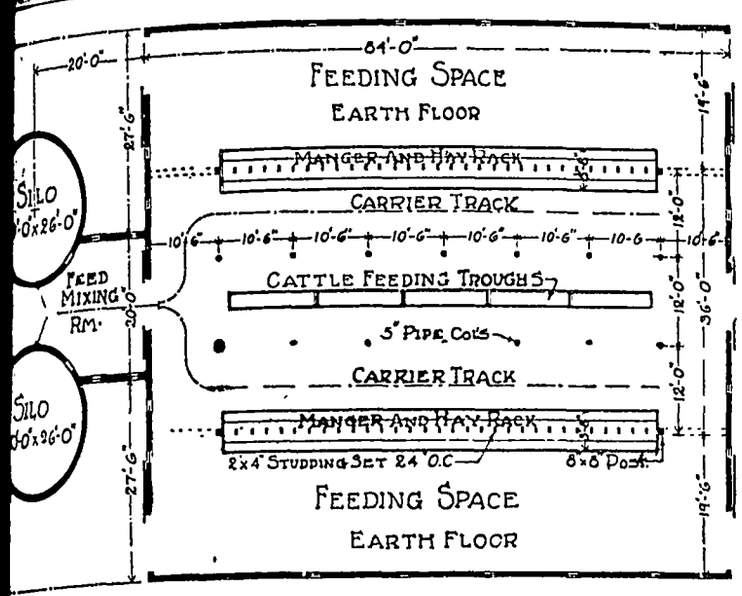
...itable Handling Depends Upon Proper Housing for Beef Cattle





By W. A. RADFORD

William A. Radford will answer ...ions and give advice FREE OF ... on all problems pertaining to the ...t of building work on the farm, ...e readers of this paper. On ac... of his wide experience as editor, ...r and manufacturer, he is, with... ...oubt, the highest authority on the ...ct. Address all inquiries to Wil... A. Radford, No. 1827 Prairie ave... Chicago, Ill., and only inclose ...ent stamp for reply.

...ch attention is given to the ques... of proper housing of dairy cat... ...ut it sometimes seems that beef ...e do not receive their due share ...ttention. If the raising of beef ... be made profitable good housing ...n essential and, when it is time ...finishing," a well planned cattle ...ng barn should be available. ...a barn is shown in the accom...ing illustration together with a ... indicating its interior arrange...t and equipment.

...he main portion of this barn occu... a space 75 feet wide and 84 feet ..., while at one end, there is an ex...sion consisting of a feed-mixing room connecting with two large silos. Doors are so arranged as to provide a straight drive through along each side and down the center of the barn, through the mixing room and out between the silos. Extending down the center of the barn is a long cattle-feeding trough with a manger and hay rack of equal length at each side of it and parallel. Between the feeding trough and these mangers, carrier tracks are provided for quicker and easier handling of feed.

While this barn is set on a concrete foundation an earth floor is entirely satisfactory for the interior, and this makes the cost of construction considerably lower than that of an equal-sized dairy barn, as does also the less elaborate equipment. The upper portion of the structure is supported on 5-inch pipe columns and above there is provided a large loft for the storage of hay and dry feed. With such a layout the beef cattle can be put in the best of condition for the market and should bring top prices when sold.

...ny Metal Lath Types Individually Effective

...etal lath, which of late years has ...n given wide acceptance in qual... construction, because of its fire... ...stance, plaster protection, ease of ...allation and adaptability to deco... ...ve requirements, is made in a va... ...y of types for use at various ...nts about the home.

...he main division in metal lath ...nufacture is between the expanded ... the wire types. Expanded metal ... is made from a piece of steel ...ich is punched in such a pattern that ...en the two sides of the sheet are ...led outward series of keys are ...med in the metal, these forming the ...d for plaster. Various weights and ...es of the lath are made, and gal...nizing or other protective processes ... given to the sheets to eliminate ...t.

The wire type of metal lath is also ...de in various weights for exterior ...d interior use. Cross joints of the ...res are usually spot welded. Treat... paper backing in some types guards ...ainst plaster falling behind the lath ...d automatically back-plasters it. The ...per backing also affords insulating ...lue.

While both expanded and wire types ...e in general use, the expanded type ...s of late years received wider usage ...an the wire type.

For particular locations metal lath ... strips and other forms expedites ...ork and is a valuable adjunct to ...ood lath. Cornerite, corner bead, ...visible picture molding, steel win...w and door casings with strips of ...etal lath attached, and other special ...pes are coming into wide usage.

...ouse Is Called Only as Good as Roofing

"No foot, no horse," is the very old ...ying. "No roof, no house," applies ...ith equal force. A house is only as ...ood as its roof. It must be roofed ...ubstantially if home's full protective ...urpose and assurance of comfort are ...o be realized.

...our roof, like the prow of a vessel, ...ust stem the tide of the elements. ... pushes upward against a continu... ...us stream of destructive agencies. ...eat and cold, rain, snow and wind, ...re forever pitting their undermining ...orces against the endurance of your ...oof.

It is the great protector of your ...ome and will faithfully perform its en...durance. It can do no more than that. ... weakling cannot be expected to do ... giant's work. Hence, if you put on ... roof that lacks the stamina to grap...le with heat, cold, rain, snow and ...ind—opponents that never weaken ...n their attack—you need not expect ...hat kind of a roof to outgame them. ... If the natural staying qualities are ...ot there, though you paint and patch, ...our roof will lose the battle. Mean...while, it has cost you more altogeth...er in money outlay than an enduring ...oof would have cost at the start.

Garbage Incinerator Now Built-In Basement Unit

The built-in garbage incinerator is one of the present-day devices for home labor saving which has an all-year-round usefulness, but its worth is more than ever demonstrable in winter, when trips through the snow and slush to the garbage pail are freighted with real dangers to the health of the housewife.

These outside trips to the insanitary, germ-laden garbage can are entirely eliminated with the built-in incinerator.

It banishes the garbage can nuisance for all time—eliminates rubbish heaps in the basement or other part of the building—and saves countless daily steps due to these insanitary and inconvenient pests which should have disappeared long ago with the passing of such things as the outdoor pump.

With the chimney-fed incinerator there is now no reason in the world to tolerate so obnoxious a source of disease as the garbage can.

This built-in convenience (which costs no more than a good radio set or washing machine) solves the problem of garbage and waste disposal in the modern home for all time. It handles not only garbage but all household waste—sweepings or dust from the vacuum cleaner, old magazines, waste paper, wilted flowers, tin cans, broken bottles—everything that is no longer wanted and which, unless disposed of at once, fights against clean sanitary conditions.

All waste material is deposited in the handy hopper door in the kitchen and falls down the flue into the incinerator chamber in the basement. It is lighted at intervals (a match does it) and the whole mass burns without further attention. Tin cans and other noncombustibles are flame sterilized and dropped to the ash pit and later removed with the ashes.

Simple Way to Test Harmony of Room

"Look around your rooms," says an interior decorator. "Move your eyes slowly from chair to table, to hangings, to lamps, to walls, to pictures, to floor. Study each closely before passing on, and, as your eyes move, watch out carefully for those tiny little jars your senses must receive if one object is out of keeping with its neighbor.

"That is one of the best tests I know for checking room harmony—the 'ensemble test,' it is called.

"Conduct this examination a few minutes each day and soon you will make some interesting discoveries. You will see the need for changing a picture about, replacing a hanging here and there, adjusting pieces of furniture or changing the floor coverings.

"In any event, you'll certainly do something to your rooms to increase the harmony of their furnishings."

Clean Pigs Are Winning Favor

Bigger Porkers and Higher Profits Result From Sanitary Care.

That long-standing belief that a hog is naturally a dirty creature who revels and thrives in a mud wallow has been completely wrecked by 500 Iowa farmers.

The fact is that the hog is as cleanly as any other farm animal, but until recently has never had a chance to prove it. Given clean pasture lands on which to feed, instead of the old-fashioned hog pen, regular baths and clean bedding, the hog will produce bigger and better pigs, and more of them. At the same time the death rate will be markedly lowered.

These are the facts brought out by F. L. Quaife, farm expert, reporting in the Farm Journal the results obtained by the 500 Iowa farmers who have given their porkers a chance to lead hygienic lives.

Expose Hogs to Parasites.

Farmers who raise their hogs year after year on the same ground and in the same unclean quarters are exposing them to periodical ravages of parasites which kill off many and stunt the growth of many more, the test cases, directed by Iowa farm bureau experts, show.

In one case an owner put 18 sows on clean alfalfa pasture land, washed them carefully before they gave birth to their litters and housed the pigs in clean quarters where parasites had no chance to develop. Of 180 pigs born, 174 were sold, fat and healthy.

Eight other sows were kept in an old-fashioned piggery under the old conditions. These gave birth to 48 pigs, of which only 16 were alive at the end of four months; and all of the 16 were stunted and unthrifty.

Under New Conditions.

Of a group of 8,836 pigs raised under the new conditions the average saved and sold was 6.8 pigs per sow, as against 5.2 in other years. A litter born in March and raised on pasturage had reached an average weight of 66 pounds by June, while a litter born the previous December and raised under the old conditions weighed only 38 pounds on an average at the same time.

"Most of these Iowa pigs were farrowed in April and sold in October; only six or seven months from birth to market," the Farm Journal article points out. "Most of the men had their pigs ready for market two or three months in advance of previous years and at just as heavy weights. Several of the men sold April pigs in September at weights well over 200 pounds. And not only did they get the benefit of a higher price but they escaped the period of the greatest danger from flu and hog cholera."

Unusually Good Control of Oats Smut Is Found

Iodine, long used as an antiseptic in medicine, is to be put to use in controlling plant diseases. After four years of experimenting with many preparations for the control of oats smut, plant pathologists of the Ohio agricultural experiment station have developed two dust formulas containing iodine and formaldehyde. Unusually good control of the smut is given. The two men who worked on this were R. C. Thomas and J. D. Sayre.

There were heavy losses due to oats smut last year and a large part of the seed to be sown this spring is unfit without treatment. The cost of treating seed with the new dusts should not be more than five to seven cents an acre, say the station men. For particulars regarding the treatment and where the dust can be obtained, write to the Department of Botany, Ohio Agricultural Experiment Station, Wooster, Ohio.

Materials Contained in a Crop of Sweet Clover

A good crop of sweet clover contains two and one-half tons of dry top and roots to the acre by the spring of the second year. This amount of material will contain 200 pounds of nitrogen or as much nitrogen as is contained in 20 tons of average farm manure. This is more nitrogen than is required to grow a 100-bushel crop of corn. Only 150 pounds of nitrogen are necessary to produce the stalks and grain of such a crop of corn. Thus the farmer can grow a fertilizer factory on his own farm that will furnish an abundance of nitrogen for his crops at a very small cost.

Agricultural Squibs

Market bulky farm feeds through high quality stock and increase your profits.

* * *

Pine trees can be moved in the winter time when the ground is frozen so that a pile of frozen earth may be moved with the tree.

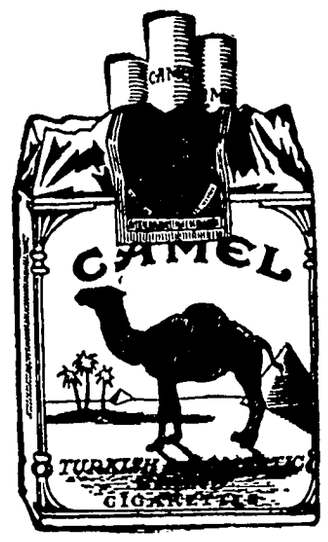
* * *

Leafy spurge is a comparatively new weed. It is gaining a foothold in several spots, however, and attention should be given immediately to eradicating it.

* * *

In pruning young orchards, it is seldom necessary to use a disinfectant to sterilize the small wounds made by the removal of branches. It is also true that there is much less disease in the young orchard than in the old.

If you smoke for pleasure



—Camels lead the way. The winning answer is "I LIKE 'EM."

Camels

The cigarette best-liked by so many smokers, it leads by billions

Fish Two Hundred Years Old

A carp, said to be about two hundred years old, has been caught by three boys in the Long Water at Hampton court. It weighed nearly 16 pounds, and was caught with a cheap rod and line with bread as bait. A similar fish was caught many years ago by a boy with "a penny cane and a ha'penny hook!" The fish made a valiant fight for freedom, but despite their excitement the three lads managed to land it. They refused an offer of £5 for it.

Enthusiasm is not fanaticism.

Cat Gets Own Fish

One of the fishermen in catdom is Peter Pan, a maltese belonging to A F. Marsh of Sangerville, Maine. His latest catch of a fish six inches long is vouched for by Millard Smart, who saw Peter coming up from Carleton stream with his freshly caught dinner. On going to see Peter's catch, Mr. Smart found the fish still alive and Peter with wet paws as a result of fishing in the brook.

One may wish to live 100 years, that is, if he can feel 20 years younger than that.

Used to It

"I can't understand Johnson. I had a row with him yesterday and called him every name under the sun, but he didn't take a bit of notice."

"He wouldn't. He's an umpire."—Passing Show.

Safety First

Tommy—Mom, this book says that atoms explode. His Mother—Well, be careful and don't play with any.

Nature cannot jump from winter to summer without a spring, or from summer to winter without a fall.

Lovable!.. the girl with a beautiful skin..

Youth and love—keep them by keeping a beautiful skin

Nearly every woman's skin would be lovely

if it weren't for one of these six easily-corrected faults:

Blemishes
Blackheads
Sallowness
Conspicuous nose pores
Excessive oiliness
Dryness

Just by keeping your skin free from these conditions, you can have one of those clear, smooth, fine complexions that everyone admires and turns to look at!

The famous Woodbury skin treatments will help you to overcome any of the six skin troubles listed here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful, health-giving treatments, which have helped thousands and thousands of women to gain a beautiful complexion.

Simple, clear directions for each of these treatments, and the treatment for normal skins, you will find in a booklet wrapped around each cake of Woodbury's.

A skin specialist created Woodbury's Facial Soap. Use it—and soon you will begin to see a wonderful improvement in your complexion.

A 25-cent cake lasts a month or six weeks—and every day you use it, it is helping to give you "a skin you love to touch."

WOODBURY'S FACIAL SOAP

A new Hat or Cap is waiting for you at our store.

—Just a tip for the ladies—We want you to see our line of new slippers and pumps for Easter—Silk Hosiery too.

G. W. Kluckhohn & Sons

Timely Suggestions --

Take no chances with your Home Butchered MEAT!

Of course you will cure your meat this season with Smoked Salt. It will save shrinkage, labor, fire risk and worry. It will give you better flavor and perfect cure. But be sure to get the original and genuine

Old Hickory SMOKED SALT
EDWARDS PROCESS

The only meat salt that is as good for table use as for curing meat. Smell it. Taste it. You can tell it at once from salt that has been mixed with pyroligneous acid or other dangerous chemicals.

We have it. Packed in ten pound drums and guaranteed genuine.

We have another car load of INTERNATIONAL Hog Feed coming. Get your orders in if you want some of this. More Pork at Less Cost, Guaranteed. International saves corn, shortens feeding period, helps to keep hogs healthy and free of worms, builds bone and muscle Takes place of tankage, oil meal, cottonseed meal, flour middlings, minerals and molasses.

It wil pay you to feed your stock with International Planters Cattle Feed, connins plenty of molasses, will not cake or harden in cold weather, will finish your cattle quickly and cheaply.

NOW IS THE TIME TO USE EGG MASH, get more eggs. We sell it here!

Card Of Thanks

We wish to thank our neighbors d friends for their many acts of dness extended to us during the ess and passing of our little Cal- n. Mr. and Mrs. Alex Groh and mily. 1tc

WORK ON KLEMME VENTURA ROAD MAY START MONDAY

West End Of County Project Will Be Graded First

County Engineer Merten of Garner was in Klemme Tuesday evening and from him we gather the information that work on the Klemme-Ventura road may start Monday, if weather conditions are favorable

B W. Diltz, of Swaledale received the contract at 22½ cents per cubic yard excavation He has a large grading outfit and can handle the work in a most satisfactory manner

Mr. Merten stated that the grading would probably start on the west end, at the east corporation line of Klemme and progress to the Cerro Gordo County line

The road will be a standard twenty-four foot grade, with the necessary height and slope.

The road should be open to travel the entire length in July. Graveling this fall is hoped for, but Mr Merten stated that this phase of the work probably could not be done until next spring because of shortage of funds for the purpose and also that the grade must settle before coating with gravel

Road Gang To Start Work On Goodel Road

The Brown Construction Co. are moving their grading machinery and equipment to the east part of Avery Township where they expect to begin work this week They had two car loads of hores shipped in from some lumbering camp in Minnesota where they were kept during the winter

ALL DAY MEETING HELD AT THE HOME OF MRS. SHERWOOD

Patterns For Children's Clothing Is Studied At Meeting

The Avery Township Farm Bureau Ladies Co-Operators of the training school held a very successful meeting at the home of Mrs. W L. Sherwood Tuesday This was an all day meeting

The project taken up was patterns for childrens garments A large number of paper patterns were cut and each lady received a group of nine different patterns including fancy stitching and designs to be used for trimming This was the second lesson in the 3rd year sewing course and was lead by Miss Merle Ramer, who has a very pleasing and pleasant way of demonstrating her work in which the ladies presen take a keen interest.

Those present were Mesdames C A. Arnold, A R. White, Wm. Johnson, F Bachman, Herb Marshall, D A Marshall, H. Barger, W Thada. L Wilson, Jay Griggs. J J Cook, W Waddingham and Wm. Gealow

At the noon hour luncheon was served in cafeteria style, the hostess being assisted by Mrs A R White and Jay T Griggs

The ladies enjoy this work very much, besides having a social good time and is looked forward to with great enthusiasm.

The next meeting will be held May 18th at the home of Mrs C A. Arnold.

APRIL SNOW STORM WORST OF OF THE SEASON

East And West Highways Blocked For Few Days

Our handsome spring weather became a furious winter blizzard Friday when snow began to fall in big quantities and a gale piled it into drifts several feet high in many places, blocking the roads and sewing up traffic on nearly all east and west roads Many cars were stuck fast on such roads and the county snow plows were stuck fast for a couple of days before they could be dislodged from the wet, frozen mixture.

Monday the sun came out and followed by a warm, south wind, the snow has nearly disappeared at this writing (Wednesday) However, the weather is far from settled and rain fell today to add to the stickiness of dirt roads which are about impassible now.

VENTUR ACREAMERY HAS NEW BUTTER MAKER

M. W. Dammon, of Myrtle, Minn., Is New Man On Job

A few weeks ago Mr. Otto Spies, who has been butter maker at the Ventura Creamery for a number of years resigned to accept a position at Ruthven, Iowa.

Mr Damon was butter maker at he plant at Myrtle, Minn, for about five years and is well recommended.

Mr. Dammon begins his new work next Monday morning.

Attends Birthday Party At Garner

Garner Signal.- Sunday, April 1, Mrs. Hannah Rohlf, surrounded by her children and grand children, celebrated a birthday anniversary. She had with her that day, Mr. and Mrs. Henry J. Rohlf and family and Mr. and Mrs. Frank W. Rohlf and family, all of Canton, South Dakota; Mr. and Mrs. Chris Jacobs of this city; Mr. and Mrs. John Meinders and family of near Britt; Mr. and Mrs. Edwin Jacobs and family of Klemme; Mr. and Mrs. Chas Papousek of Belmond Fourteen guests surrounded the board for the noonday meal while 19 made up the list of supper guests. This is an annual affair, as all the relatives make it a point to be with Mrs. Rohlf on the occasion of her birthday.

Liberty Twp. Caucus

Notice is hereby given that a caucus will be held at the Center school house in Liberty township on Thursday evening, April 26 at 8:00 p. m

JACOBS PAINT DEMONSTRATION POSTPONED A FEW WEEKS

Will Be Put On The Latter Part Of This Month

On account of the stormy weather and the impassible roads Saturday, E. F Jacobs did not put on his big paint demonstration.

However, he has already made arrangements to put on this feature about the latter part of the month. A factory representative will be a his store to demonstrate decorating, lacquering, varnishing, painting, etc.

Watch the Klemme Times for further announcements.

CANTATA AT M. E. SUNDAY EVE WAS VERY GOOD

Attendance Small On Account Of Impassible Roads

The Cantata and bible play put on by the young people of the Methodist church Sunday evening, was very well given and was greatly appreciated by the audience. The attendance was not as large as was hoped for but the condition of the roads prevented the people in the country from attending.

The cantata and play was given under the direction of Supt. M. F. Penrod and Miss Wilma Trumbell.

In the morning the little folks of the church put on a splendid program in charge of Miss Mildred Johnson.

AVERY VOTES FOR 3 NEW SCHOOLS

SPECIAL ELECTION CARRIED BY NEAR 3 TO 1 VOTE

Three New School Houses Are On The Building Program

At a special election Monday, the voters of Avery Township decided to build three new school houses this year. The vote carried favorably by 72 to 26, which is nearly a three to one decision. Some weeks ago a like proposition was submitted to the voters who turned it down by a small margin. Since that time plans were made over and the proposed new buildings were re-located, and the vote Monday showed this to be a very good move and in accord with the wish of a large number of people in Avery township

The new schools will be erected to replace old ones in Districts No. 2, 6 and 8. The buildings will be modern structures to replace buildings which are now in a sad state of condition.

The people of Avery township are to be congratulated on their good move to further education.

SNOW IN APRIL CAME AS A BIG SURPRISE

However, Last Year Snow Fell As Late As April 21st

The snow of Friday, which easily fell to a level of five or six inches and was extremely wet, came as a sudden jolt to the good spring weather we have been enjoying.

To keep history straight we find in our files that snow fell here last year April 21st, to a depth of about two inches. This all disappeared the next day.

FIRST AUXILIARY MOVIE DREW FAIRLY LARGE CROWD

Everyone Was Well Pleased With The Pictures Shown

Although the weather man made an awful mess of the roads and prevented very many country people from coming to town Saturday night and despite the dissagreeable weather, the first movie given by the Auxiliary Ladies was quite well attended and one hundred and thirty admissions were recorded at the box office. Had the weather been good the show would probably have been packed for both performanies.

The pictures were greatly enjoyed. Being of a humorous nature, peals of laughter were continuous.

The ladies have some very good pictures booked. Many are brand new, first run stuff For instance the feature for Saturday night appeared in a Mason City theatre only a few days ago.

METHODIST CHURCH NOTES
A. W. Gauger, Pastor

Our schedule wil be somewhat different next Sunday from usual.

District Superintendent Lease will be with us for the morning service in Klemme when he will preach and after which the Sacrament of The Lord's Supper will be celebrated.

The Liberty services will be held in the afternoon, beginning with the program which had to be postponed last Sunday on account of bad roads and sickness. The program begins at 1:30.

At the conclusion of the program Dr. Lease will preach and The Lord's Supper will be observed.

All wishing to contribute eggs for our hospital Easter Egg shower will kindly bring them by Sunday. Owing to the bad roads some were delayed in doing this.

NOTICE TO CHICKEN OWNERS

You are hereby ordered to pen up your chickens at once as in accordance with a town ordinance which prohibits the running at large of poultry of any kind.

PAUL GRANGE, Mayor. 2tc

NEW POP VENDING MACHINE IS INSTALLED AT QUANDT'S

Every Bottle Is Automatically Chilled In New Machine

Conrad Quandt, proprietor of the Crystal Cafe is always on the lookout for the latest in restaurant fixtures. Just this week Mr. Quandt installed a new type of Pop Dispenser which automatically cools each bottle of pop that passes thru it.

The machine is a sort of refrigerator with round tubes larger than a pop bottle in a horse shoe shape run down and under the cooling vice and up again on the other These tubes are loaded with pop and when any particular flavor is wanted a bottle is taken off a convenient rack and pushed into one of the tubes, which forces out an ice cold bottle of pop at the other side

CAMP FIRE GIRLS MADE GOOD ON DOUGHNUT SALE

The Camp Fire Girls held a meeting Monday night at the Legion Rooms. The next meeting will be held on Monday, April 23rd at the same place. A committee was appointed to see about providing refreshments for this meeting.

About $21.45 was taken in from the doughnut sale. 71½ dozen were sold. We wish to thank everyone who bought doughnuts. We also feel we owe an apology to the people who did not get theirs.

BODY OF FREDERICK KNOKE IS MOVED TO KLEMME CEMETERY

Buried In Reformed Cemetery Thirty two Years Ago

The body of Frederick Knoke was moved from the Reformed Church cemetery to the Klemme Cemetery and now lies beside bis wife, Wilhelmina, who died some omnths ago

Frederick Knoke was a young man when he died, in 1896, thirty-two years ago. His death was caused by injuries received when his team ran away.

Arthur Wellemeyer, local undertaker, exhumed the body and re-interred it in the Klemme cemetery.

The Junior Choir will meet Saturday evening

SMALL GARAGE BURNED THIS MORNING

A garage belonging to Levi Ridder on a lot north of Aug. Ridder's home burned to the ground this forenoon The cause is thought to be from a stove over-heating or throwing off spark, which stood in the southwest corner of the garage and was used for heating the building while working on the car.

Levi had the stove heated up warm the room sufficiently to paint a car for Fred Kluckhohn, parts of who's car he had painted and which were in the garage as well as Ridder's big Nash touring car when the blaze was discovered. Levi barely had time to rescue his car before the flames caught it. After getting his car out he went back to rescue the hood and other parts of Kluckohn's car and scorched this hand in getting them out.

A fairly good north wind fanned the flames immediately when the doors were opened and the building was entirely ablaze when the fire company arrived.

TWENTY SEVEN LADIES ATTEND CLOTHING DEMONSTRATION

Interesting Meeting Held At Home Of Mrs. Charles Griffen

The second lesson, in the third year clothing course, was held at the home of Mrs. Chas. Griffen, March 29th. This lesson was on Children's Clothing. Twenty-seven ladies were present. Miss Ramer gave some helpful suggestions on planning and trimming children's garments.

Famous American Duels

By ALFRED SORENSEN

AT A dinner party given in London in 1772 by General Oglethorpe, who took quite a prominent part in the settlement of Georgia, a discussion arose over the question whether duelling was consistent with moral duty. Dr. Samuel Johnson, who was one of the guests, maintained that a man had a right to defend his honor. Turning to Boswell, his biographer, he asked: "What would you do if you were affronted?" "I should think it necessary to fight," was his reply. "That solves the question," said Goldsmith. "No, sir!" emphatically declared Johnson, "it does not follow that what a man would do is therefore right. He who fights a duel does not fight from passion against his antagonist, but out of self-defense to avert the stigma of the world, and to prevent himself from being driven out of society. I could wish there were not that superfluity of refinement; but while such notions prevail no doubt a man may lawfully fight a duel."

Henry Clay, who fought two duels—one with Humphrey Marshall, and the other with John Randolph—held virtually the same opinion as Doctor Johnson, and advocated the passage of a bill by the United States senate against duelling. He admitted, however, that "the man with a high sense of honor and nice sensibility, when the question is whether he shall fight or have the finger of scorn pointed at him, is unable to resist; and few, very few, are found willing to adopt such an alternative."

During the days of chivalry in the southern states it required great moral courage not to accept a challenge, and there were very few refusals. John Randolph, whose duel with Clay was a bloodless affair, was challenged several times, but declined owing to "religious scruples." When he stood in front of Clay his hair-trigger pistol was accidentally discharged, muzzle downwards, before the word to fire was given. In the second round Clay missed his mark, and Randolph fired up in the air. Thereupon they "made up" and shook hands. Randolph was frequently branded as a coward, and was once publicly "posted" by Gen. James Wilkinson in the following insulting language: "In justice to my character I denounce to the world John Randolph, member of congress, as a prevaricating, base, calumniating scoundrel, poltroon and coward."

Notwithstanding this great provocation, as well as others of a like character, Randolph stood firm in his determination not to engage in "affairs of honor." In replying to Wilkinson's challenge Randolph concluded his note by saying: "I cannot descend to your level. This is my final answer." This was the cause of Wilkinson's vitriolic "posting" of the congressman from Virginia.

In 1785 Gen. Nathaniel Green twice declined to accept a challenge from Captain Gunn of Georgia, who thereupon threatened to personally assault him. But Gunn failed to carry out his threat as General Green sent him word that he was prepared to defend himself as he always carried pistols.

Gen. Sam Houston turned down several challenges. "If they quarrel with me that is their privilege," said he, "but I shall try to take care that they do me no harm."

Fablus Stanley and Zechariah Johnston, United States naval officers, had a misunderstanding in 1850 and the former sent the latter a challenge. Johnston refused to fight, thereupon Stanley "posted" him as a coward in a Washington hotel, and was court-martialed and dismissed from the navy.

General Harney, whose courage no one ever doubted, was challenged by General Summer, but instead of accepting he had the moral stamina to have the challenger court-martialed.

In 1884 John S. Wise, member of congress from Virginia, in replying to those who expected him to resent some severe newspaper assaults by fighting a duel with Page McCarty, said: "McCarty's abuse of me has no more effect than a dog barking at the moon. His invitation comes too late. Time has been when I might have been fool enough to indulge in such folly, but with age, and with a broader view of life and its responsibilities, I have bidden farewell to the McCarty type of manhood."

Sir Walter Raleigh, after he had killed several men in duels, and had declared that he would never fight again, was challenged by a young man to whom he replied. "If I could as easily wipe from my conscience the stain of killing you as I can this spittle from my face you should not live another minute."

Although duels, in various forms and with rules differing from time to time, date back to remote ages, "when the memory of man runneth not to the contrary," it was not until early in the Sixteenth century of the Christian era that duelling was adopted in Europe as a method of settling so-called "affairs of honor" in accordance with an established code. So prevalent did duelling become in France that Louis XIII issued an edict against the practice and sent many duellists to the scaffold. This severity, however, did not much abate the sanguinary encounters, but early in the reign of Louis XIV quite a number of noblemen, whose courage was unquestioned, made a compact to refrain from the fighting of duels. Their stand caused a falling off in these combats, and in 1644 Louis XIV organized a court of chivalry to pass judgment on "affairs of honor," which up to that time had been settled by a resort to arms. Today there is a law in France making the killing in a duel punishable as a homicide. In recent years duels have been of rare occurrence in France, generally resulting harmlessly and regarded as a joke carried out for notoriety.

In the United States—especially in the South and in California—duels were very common up to the close of the Civil war, army and navy officers and politicians being the most frequent participants. Today, however, a meeting to "shoot it out" on the "field of honor" is an unheard-of event and would be a front-page sensation.

One of the most determined and desperate duels ever fought in the United States was that in which DeWitt Clinton and John Swartout exchanged shots five times. It was the result of differences and bitter quarrels between the political followers of Clinton and the adherents of Aaron Burr.

DeWitt Clinton was admitted to the bar of New York at an early age, and immediately entering the school of politics he became an apt pupil under the tutorship of his uncle, George Clinton, Republican leader and governor, who made him his secretary and appointed him to other secretarial positions. George Clinton was a deputy in the New York provincial congress; a brigadier-general in the Continental army; was successively elected governor of New York from 1777 to 1795; then served in the legislature; was again elected governor in 1800; and was made vice president of the United States in 1804, filling that office until his death, eight years later.

DeWitt Clinton rose rapidly to eminence and power in the Republican party, and had fully as distinguished a career as his talented uncle. When he was twenty-eight years old he was elected a member of the lower house of the legislature, and the following year he became a state senator. From that time to the end of his life he was, with brief interims, a continuous office-holder. He was United States senator from 1801 to 1803, when he resigned to accept appointment to the office of mayor of New York city. After serving four years in this position he was removed, but was reappointed two years later. He was again put out of this office in 1810, but was reinstated and continued to serve as mayor until 1815.

Clinton was an unsuccessful Presidential candidate in 1812. From 1811 to 1813 he held the honorary office of lieutenant-governor, and in 1817 he was elected governor; was re-elected in 1820; declined to be a candidate two years later; and was again elected in 1824 and in 1826. His brilliant and remarkably successful career was cut short by death while still in office.

Clinton was a public-spirited citizen. At the very beginning of his career he was an earnest advocate of public improvement. It was owing to his efforts that the Erie canal was built, and this great achievement added much to his popularity.

Clinton and Burr became engaged in fierce political disputes in which offensive personalities were the outstanding features. John Swartout, an intimate friend and defender of Burr, became more or less mixed up in the quarrels of the two leaders.

Swartout, who had himself been hard hit by Clinton's vituperative references, took up an active defense of Burr and charged that Clinton's vicious attacks were based on personal and selfish motives. This angered Clinton, who denounced Swartout as a liar, a scoundrel and a villain. Such vilifying epithets were more than Swartout could stand and he accordingly challenged Clinton, who promptly accepted.

The shooting match took place in 1802 on the ground at Weehawken, N. J., where the famous duel between Burr and Hamilton was held in 1804, and where Hamilton's son had been killed in a duel in 1801. On reaching the designated spot Swartout demanded that Clinton should sign a written apology. Clinton indignantly refused to do anything of the kind. Just before taking their places Clinton remarked: "I wish I had the principal here." He referred to Burr, who, if he had stood before Clinton at that meeting, might not have lived to kill Alexander Hamilton.

Swartout was seconded by Colonel Smith, and Clinton by Richard Riker. The first shots were harmless. Riker, in accordance with the instruction of his principal, now requested Colonel Smith to ask Swartout if he was satisfied. "I am not," was his answer. Another exchange of shots were made without effect, and again Swartout was not satisfied. A third exchange resulted without injury, and Swartout, upon being again asked if he was satisfied, replied: "I am not, and I shall not be until the apology is made which I have demanded." His defiant attitude was certainly that of Macbeth who shouted: "Lay on, Macduff! And d—d be him that first cries 'Hold, enough!'"

The prepared apology, dictated by Swartout, was again presented to Clinton for his signature, with the declaration that if he refused to attach his name the fight must go on to the finish. Clinton declined to sign any paper regarding the matter in dispute, and said that "he had no animosity against Mr. Swartout and would willingly shake hands and agree to meet him on the score of former friendship." This friendly offer was declined and the combatants resumed their positions and fired the fourth shot. This time Swartout was wounded in the left leg, about five inches below the knee. He was not disabled and insisted upon proceeding with the contest, saying that it was useless to ask him to quit. At this stage of the affair Clinton once more asserted that he entertained no animosity. Furthermore, he stated he was sorry for what had occurred, and then offered to shake hands and forget the past. While this conversation was in progress, the attendant surgeon extracted the bullet from Swartout's leg.

For the fifth time he faced Clinton, and was again wounded in the left leg, a few inches above the ankle. Still standing, and determined as ever, he called for another shot. Thereupon Clinton refused to comply, and walked away. Swartout said he was much surprised at his action in neither apologizing nor affording full satisfaction.

While Clinton was in the United States senate he became involved in another "affair of honor." In the course of an animated debate he had used language that was offensive to Senator Dayton of New Jersey, who was a friend of Burr. The next day Dayton sent him a challenge which was accepted without any long-winded correspondence. They met on October 24, 1803, and upon Clinton making a satisfactory explanation and offering an apology the duel was called off.

Two years after this incident Swartout fought a duel with Riker, who was severely wounded. Riker became a judge of the city recorder's court of New York, and served on that bench for many years.

Early Recreation Spots

The earliest form of a public preserve devoted to outdoor recreation in the territory of the present United States was a city park, Boston common, acquired in 1634. The next example of public action of this kind covered a field related to that at present usually held by state agencies—the reservation to the people for "fishing and fowling," by an ordinance of the Massachusetts Bay colony in 1641, of "great ponds," water surfaces of ten acres or more. The first state park of larger size, set apart primarily for recreation, was one which is now a famous national park, Yosemite. Congress ceded it to California in 1865, and later it was returned to federal control.

The Cream of the Tobacco Crop

FRED NIBLO
Photoplay Director, *writes:*

"To a moving picture director there is no comfort or luxury like a good cigarette. Such a cigarette I have found in 'The Lucky Strike'—and during the filming of big pictures like 'Ben Hur' I smoked 'Luckies' even while directing in the open air thousands of supernumeraries, and never once did I ever suffer from throat irritation."

Fred Niblo

"It's toasted"

No Throat Irritation—No Cough.

New Rubber Source

That the euphorbia tree, heretofore considered as merely a bearer of latex and resin, will produce rubber, is the claim of a German chemist. He says that by his process three gallons of a latex having a high rubber content were extracted from 20 trees in two hours. A by-product of resin suitable for varnishes was also found. Samples of the rubber were sent to this country and England recently. The tree is prolific in southern Africa.

Silverware Missing

Hotel Proprietor—That crowd we had here last night did carry on.

Manager—Yes, and what's worse, they did carry off.

Tiniest Train Has Rush

The Hythe & New Romney railw of England, said to be the smalle public railroad in the world, recent carried 178,000 passengers in t weeks. The line is eight miles lo and operates over a 15-inch gau track. The train, consisting of ni cars and locomotive, weighs ab eight tons, the engine having all t modern equipment of those of stan ard-sized systems.

They Never Will!

What Dr. Caldwell Learned in 47 Years Practice

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time regardless of how much one tries to avoid it. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation, known as Dr. Caldwell's Syrup Pepsin, is a mild vegetable compound. It cannot harm the most delicate system and is not a habit forming preparation. Syrup Pepsin is pleasant-tasting, and youngsters love it. It does not gripe. Thousands of mothers have written us to that effect.

Dr. Caldwell did not approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. In a practice of 47 years he never saw any reason for their use when a medicine like Syrup Pepsin will empty the bowels just as promptly, more cleanly and gently, without griping and harm to the system.

Keep free from constipation! It robs your strength, hardens your arteries and brings on premature old age. Do not let a day go by without a bowel movement. Do not sit and hope, but go to a druggist and get one of the generous bottles of Dr. Caldwell's Syrup Pepsin. Take the proper dose that night and by morning you will feel like a different person. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headache and to break up fevers and colds. Always have a bottle in the home and observe these three rules of health: Keep the head cool, the feet warm, the bowels open.

W. B. Caldwell M.D. AT AGE 83

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin" Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

FARM POULTRY

TURKEYS REARED LIKE CHICKENS

Turkey rearing has been profitable when chick rations and methods of management have been used during growing period. The results of four years' experimental work with turkeys at Purdue university has shown that the turkey is very similar to the chicken in its feed and management requirements, in spite of the general belief that it belongs to the range country, must he hatched by hens, fed a special diet and given an endless amount of care the first few weeks of brooding.

Turkeys have been reared on limited grass range, confined to pens with outside platforms for direct sunlight and in pens with no direct sunlight when the ration carried 2 per cent cod liver oil.

The "all mash" and grain and mash type chick rations have been used with equally good results. When the "all mash" ration was used succulent feed, liquid milk, grit and grains were not fed, with apparently no unfavorable effect on the growth or mortality of the poults.

The factors that have been found most important for brooding are: 1. A good brooder with a temperature of 100 degrees Fahrenheit under the hover the first two weeks and adequate heat as long as the poults show a need for it. 2. A good chick ration fed in the same way one would feed chickens. 3. A clean pen and clean range (if used) throughout the growing period.

Wet Mashes Should Be Fed to the Goslings

Goslings should be fed soft feeds, or in other words wet mashes, made up of say four parts corn meal, three parts wheat bran and one part red dog. Five per cent of meat scraps should be added when one week old. This mash may be mixed with water or skim milk and fed in a trough, if scalded and allowed to cool so much the better. One precaution, which many beginners do not take, is necessary because goslings must have a certain amount of grit. This should consist of fine clean sand, which may be put in the bottom of the drinking dishes or added to the mash, one pound of sand to 100 pounds of mash. This mash should be fed four times daily for the first two weeks; three times daily for the next two weeks, and then, morning and night will do, provided, of course, they have plenty of range.

Heavier Breeds Useful for Raising Broilers

Heavier breeds should be used for broiler production, even though they do mature slightly less rapidly than light breeds. Any of the heavier breeds will be found satisfactory—the particular breed adopted for the purpose depending for its success upon the way it is handled. Just as we often make the statement that there is no best breed for egg production, so we will make the statement that there is no best breed for broiler production. There is a greater variation between the individuals within a breed than there is between breeds, and for this reason it is advisable to select the best that the breed offers and then proceed to handle the flock in the most approved manner to get the best results possible.

Close Inbreeding With Turkeys Is Dangerous

Close inbreeding with turkeys, as with all forms of live stock, must be carefully guarded to safeguard vitality. If you had but one old turkey hen so that you know that the young tom and young hens to which you refer are full brother and sister, there might be some danger in mating them, unless they are all especially strong and well developed. If you had more than one hen last year so that these birds might be only partly related the dangers would be much lessened; but vitality and development are essential even there and must always be guarded.

Favor White Hollands

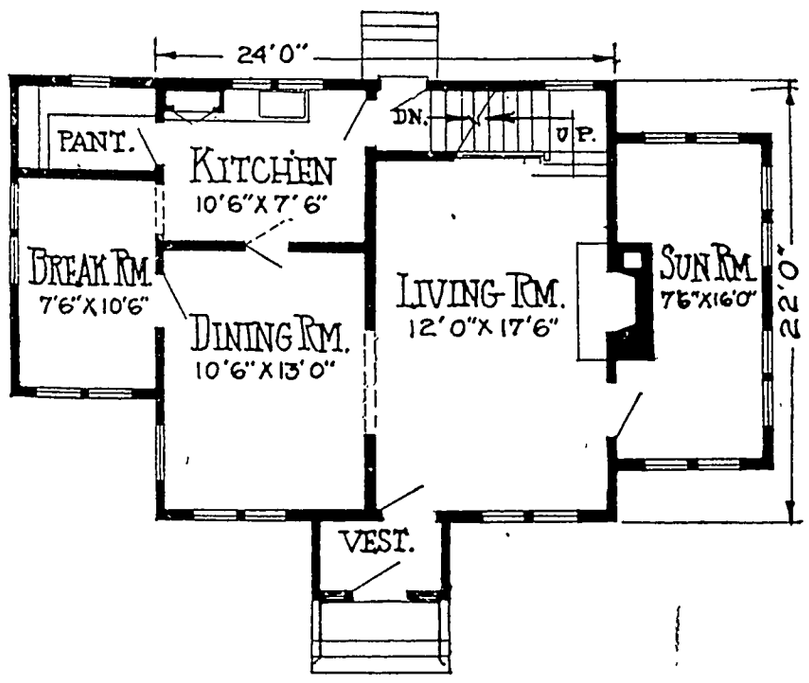
White Holland turkeys are greatly esteemed by those who raise them. They are inclined to be more docile than the other breeds. Probably they are not quite as vigorous. The question of health is one of foundation stock and care.

Undoubtedly the feathers of the White Holland are more highly prized than those of other breeds. The Bronze is the largest breed and undoubtedly excels the other in vigor and vitality.

Renewing Hen Flock

It may not pay to replace entirely your older hens with pullets every year, especially if you have Leghorns which are likely to lay pretty heavily in their second season. The cost of raising an entire new flock may offset the gain from a larger egg yield. But about half the older birds ought to be replaced with pullets, and the sale of the old hens and broilers, together with the heavier egg production will usually show a profit from this course.

Two Wings Add to Attractive Effect of the New England Colonial Style



First Floor Plan.

By W. A. RADFORD

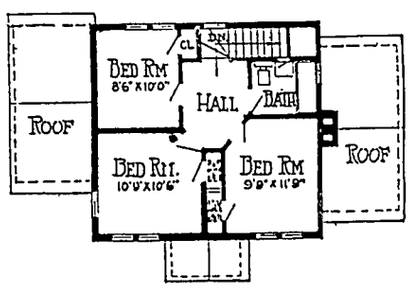
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Here is an excellent example of the New England colonial style of architecuture, in frame construction and with such modifications as are required to adapt it to modern standards and tastes. The house is a simple, practically square, two-story with gablo-roof type, but with a wing added at each end to relieve the boxlike effect and to provide space for a sun room and a breakfast room.

At the center of the front there is an entrance vestibule opening into a long living room at the right. At one side of this living room is a fireplace and a door opening into the sun room, the latter almost wholly inclosed with windows on three sides. At the far end of the living room the stairway to second floor rises directly from the room.

An arched opening connects the living room with the dining room, which is at the other side of the house and off of which opens the breakfast room. There are also doors from the dining room and breakfast room into the kitchen, which is placed just at the rear of the dining room. A portion of the breakfast room wing, to the rear of the breakfast room, is occupied by a large pantry opening off the kitchen. The kitchen itself is small but compactly arranged to facilitate the housework. At one side of the kitchen a door leads to a small rear entry and to the basement stairs.

The upper floor contains three bedrooms and bath. Three bedrooms are



Second Floor Plan.

all of about the same size and each is provided with a closet equipped with the most modern type of clothes hanging equipment which greatly increases the capacity of the closet. All the second floor rooms are grouped about a central hall and the bedrooms are all conveniently close to the bathroom.

Ventilators in Kitchen Are Desirable Adjunct

There are three general styles of kitchen electric ventilators, each style designed to fit a specific set of circumstances.

First of all there is the portable type, especially adapted for use by people who rent their homes. These ventilators come all ready to be hung up over a window, and may be easily removed when the family moves to another residence.

When you wish to start it you merely draw the window down from the top a bit and turn the switch which operates the motor.

The cup-shaped blades of the ventilating fan suck out all the unpleasant heat and fumes and steam and smoke and send them forth into the great outdoors. When the cooking is finished you just turn off the motor and close the window.

The "built-in" type of ventilator is a cabinet model designed to be installed in the house when it is being built. It must be specified in the plans of the house.

Its advantage over the portable type is that it cuts off none of the light from the principal windows, as it has its own little windows, both inside and out, and a single operation opens both windows and starts the fan going. Another motion shuts them and stops the motor.

The third type of ventilator, which is very, very scientific and which supplies the truly ideal form of ventilation, consists of a hood which is placed directly above the range and a pipe leading to the outdoors. The ventilating fan is in the pipe, and as the heat and fumes rise from the stove they are sucked up into the hood, along through the pipe, and forced outdoors.

An opening in the pipe affords general ventilation of the entire room at the same time. The advantage of this type of ventilator is that the cooking heat and fumes never get into the kitchen at all—they are removed directly from the stove.

In installing any system of ventilation it is desirable to locate the ventilating fan as near the range as it can be, so that the heat and fumes will traverse the shortest possible distance before being ejected into the open air.

Quite apart from the comfort and esthetic appeal of a ventilator, you will find that it will reduce your refrigeration bills, for your refrigerator will no longer have to fight high external temperatures. And a ventilator, by sending the grease and smoke laden air outdoors, makes your house easier to clean and keep clean.

Still another advantage of the electric ventilator is that it not only ventilates the kitchen, but actually performs this highly desirable operation for the whole house.

If your living room, for instance, gets smoky and hot, open the kitchen door, start the ventilating fan going and in a few moments your living room air will be fresh and sweet.

People who have top-story rooms they want to make comfortable and livable will find that a ventilator installed in the attic will turn the trick.

Plan Foundation to Support House Weight

Concrete foundation walls and footings must have sufficient strength to support the weight of the building safely and without settlement. When the foundation serves as a basement wall it must have strength to withstand the lateral pressure of the soil and also must be watertight.

For all types of buildings it is essential to extend the foundation below possible frost penetration, even though firm bearing soil is found at a shallow depth. Then the foundation will not be upheaved by freezing. The depth to which frost penetrates varies and may be as much as six feet in sections where winters are severe.

The base of the foundation is usually given a spread or footing to distribute the weight of the building over a larger area than covered by the area of the base of the walls. In determining the width of footings the character of the soil, as well as the weight of the structure, must be taken into account as the load-bearing capacity of different soils varies.

LIVE STOCK NEWS

PLANT SCAVENGER IS HARDY SHEEP

"There are 10,000 sheep in New Jersey at present. To satisfy the needs of the market there should be 25,000," according to William C. Skelley, of the animal husbandry department, New Jersey State Agricultural college, in a radio talk.

"The sheep is the plant scavenger of the farm," he said. "No domestic animal is capable of living on more kinds of food. Grasses, shrubs, roots, cereal grains, leaves, bark, and even seaweed, the resinant pungent leaves of evergreens, fish, and meat, all serve as food for this wonderfuly adaptive animal."

As they graze closely, sheep are splendid weed destroyers, especially since the weed seeds are more closely ground in their feces than in those of any other animal.

A flock of 25 to 50 breeding ewes can get a large part of their feed from material otherwise wasted on the average farm. With fair prices the wool alone will pay for their maintenance, for a flock of ewes can be fed upon leguminous roughage up until about a month before lambing time, when some grain is necessary to stimulate milk flow.

Another advantage, Mr. Skelley pointed out, is the small cost of starting a flock. Foundation animals are relatively cheap and twins are not uncommon. Buildings need not be expensive, as, except for newborn lambs, sheep need cool quarters to keep from sweating.

Sheep require the greatest amount of labor at breeding and lambing time, when the other farm work is usually slack. During the busy summer season they need little attention. They fit in well with general farm crops and with any class of live stock.

Lambs can be marketed eight or nine months after the ewes are bred. A premium is paid on early lambs which weigh from 30 to 40 pounds at the Easter season, because there are several foreign holidays at that time, and foreigners are great lamb consumers.

Sweet Clover Hay Will Thin Blood of Cattle

Sweet-clover hay has been put on the black list. It is claimed that sweet-clover hay contains a substance that makes the blood of cattle too thin to clot. At first, only moldy sweet-clover hay was blamed, then second-year sweet-clover hay came in for criticism.

The Illinois station tried feeding moldy sweet-clover hay to cattle last year, and the animals developed swellings under the skin. When opened, the swellings were found to consist of unclotted blood. Hemorrhages were found in the chest and abdominal cavities.

Trouble can be avoided by changing hay—feed sweet clover for ten days or so, then change to some other roughage for a couple of weeks, then back to sweet clover.

This trouble is not caused by sweet-clover pasture—only the hay.

Method of Training or Breaking Young Horses

A common method of training or breaking young horses to work is to harness the young horse beside an older steady horse. This is the most satisfactory way to give the young horse the preliminary training and experience that will accustom him to work so he can take his place in a team. This training should be started several weeks before regular field work starts in order to have the young horse accustomed to his duties and his muscles somewhat hardened.

Live Stock Hints

Don't feed the brood sows too heavily on corn.

* * *

A good horse sells readily while a mediocre one does not sell.

* * *

Good alfalfa hay is nearly equal to wheat bran as a live stock feed.

* * *

Alfalfa hay is the key to success with fall pigs. It may be fed whole in racks with good results.

* * *

As a general thing, roundworms in young pigs lead to a very high rate of runts, which spells low pork profits regardless of the cost of corn.

* * *

Yearlings and older cattle can be wintered on a cheaper class of feed than calves. The best ration for wintering these older animals is silage and leguminous hay.

* * *

Tankage contains from 40 to 60 per cent protein, depending upon the method of manufacture.

* * *

The secret of keeping ewes in good flesh is in having the ewes in the best condition at lambing time.

* * *

Quality is essential in the production of baby beef. Animals of poor quality will not fatten when young.

* * *

Numbers of horses and mule colts indicate further decrease in work animals for several years to come.

Don't Fuss With Mustard Plasters!

Don't mix a mess of mustard, flour and water when you can relieve pain, soreness or stiffness with a little clean, white Musterole.

Musterole is made of pure oil of mustard and other helpful ingredients, and takes the place of mustard plasters.

Musterole usually gives prompt relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

WHAT FARM ACCOUNTING MEANT IN THE MANAGEMENT OF A FARM

Successful Farmer Tells How Pencil Helped Guide His Operations and Swell His Income—An Aid to Better Credit—Shows Profits and Prevents Losses.

THE owner and operator of one of the most successful dairy farms in Wisconsin prepared recently for the Agricultural Commission of the American Bankers Association a first hand statement of the part farm accounting has played in the management of his enterprise. This operator, W. J. Dougan, tells the following story:

"When I started farming I began keeping a simple cash account, but soon found that it was not sufficient accounting for farm purposes. Such a record did not take into consideration the vital factors of improvements, growth of livestock or depreciation.

"Since 1910 I have kept a complete account on the accrual basis. The accounts, however, are no more than any farmer can easily keep. The outstanding benefits from keeping such accounts might be listed as follows:

The Way It Works

"1. Income tax reports made easier.—Accurate and dependable income tax reports can be made from the yearly accounts. By keeping them on file I am always ready to satisfy the tax inspectors.

"2. Accounting makes possible a budget system.—With the accumulated data of the past years, I can make out the budget for the coming year. The income being fairly stable, the budget problem is to adjust the expenditures. If one branch of the business will need extraordinary expenditure such as new machinery, there must be a cut in some other branch, such as building or livestock purchased, or fencing.

"3. Accounting gives a true basis for credit.—Especially has accounting meant for me larger credit and happy relations with my banker. With a complete financial statement before him the banker can intelligently determine what credit I should have. With a full knowledge of the farm profits in the past, I know what credit I should accept. No farmer or business man should accept credit from his bank unless he is able to put the money into productive investment, and his margin of profit assures the ability to repay the loan within a reasonable time.

"For the farm this reasonable time cannot be three or six months The farm turnover is too slow for that. A helpful and just period of farm credit for working capital must be from one to four years.

"There is another benefit from accounting—the benefit of knowing whether one is going up or down. By extra sales one might be flush of money and buy heavily, thinking he is coming out ahead, but in reality he is sacrificing the future. On the other hand, one might feel pinched, and have little money to spend, but in reality he is laying up capital."

The bankers Agricultural Commission has suggested the following form of farm credit statement, indicating the records necessary to be kept:

COUNTY KEY BANKERS

Who are they? County representatives of the agricultural committee of the state bankers association

By whom appointed? Preferably by the agricultural committee in cooperation with the President and Secretary of the State Bankers Association, and the Extension Director of the College of Agriculture.

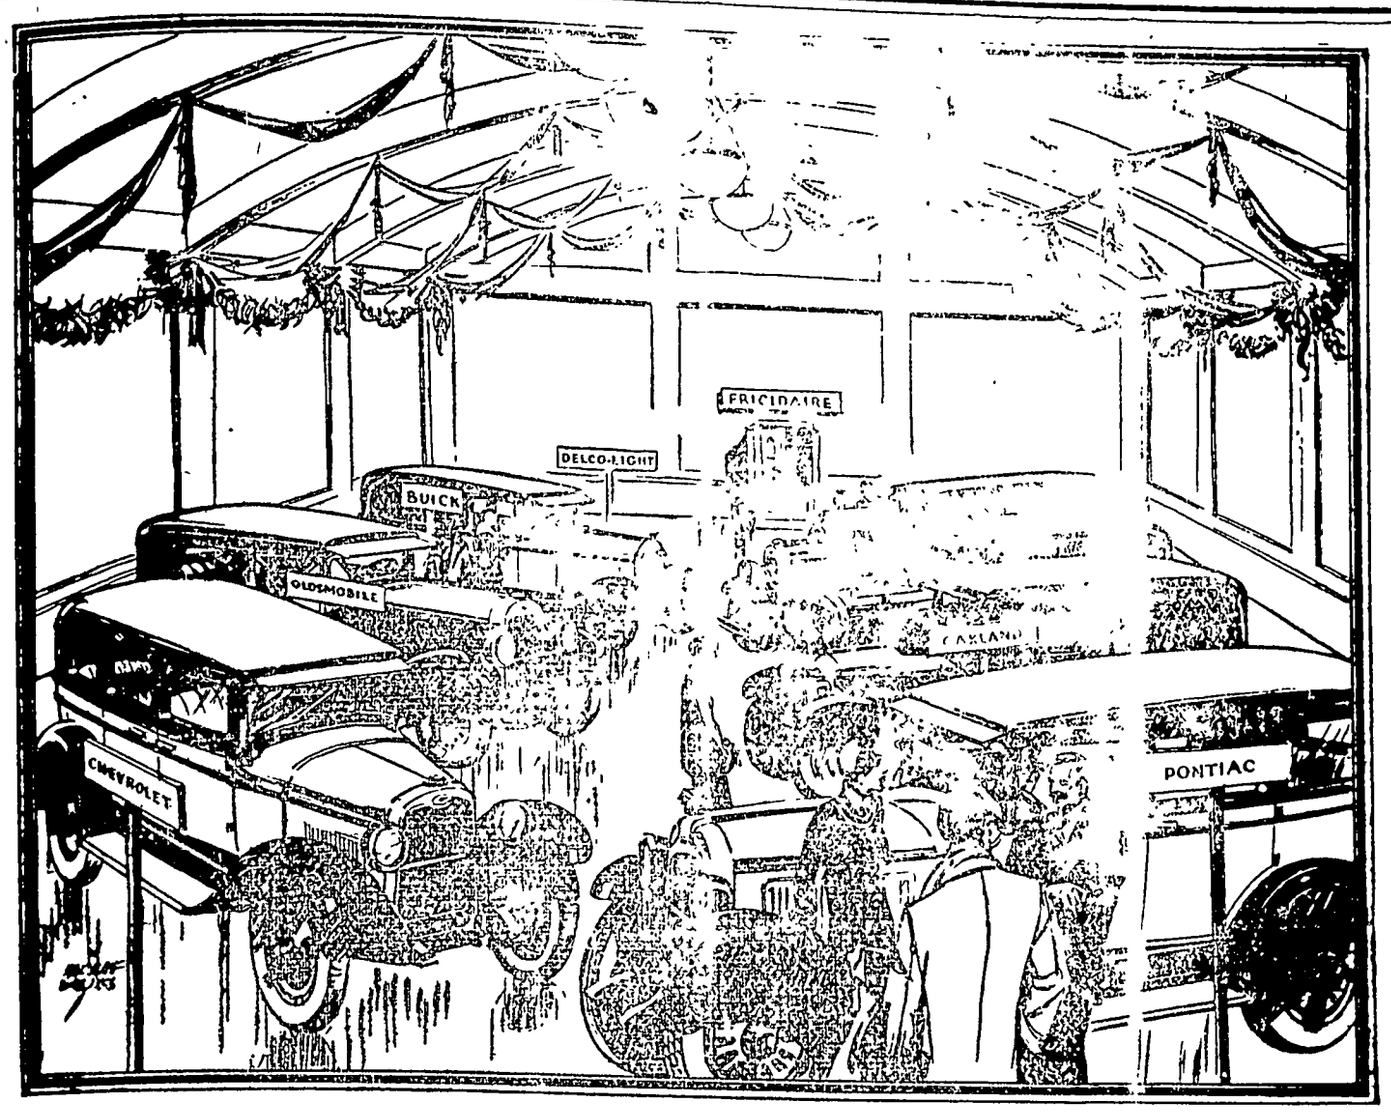
What are their duties?

1. To get in touch with each banker in their respective counties and get a line on what each is doing agriculturally.
2. To represent the agricultural committee of the state association in any county matters pertaining to agriculture in which banks or the bankers association are interested.
3. To serve as the medium through which the assistance of bankers of the county can be obtained to meet an emergency such as a sudden outbreak of disease or insect pest.
4. To be responsible for interesting the banks of the county in one or more of the agricultural projects approved jointly by the state committee and the college of agriculture.

How can they proceed?

1. By correspondence.
2. Present projects or plans at county banker meetings.
3. Make personal visits to banks in the county, preferably in company with the county agent.

Kentucky's Purebred Sire Special sponsored by the Kentucky Bankers Association, left Louisville recently making morning, noon, and afternoon stops every day. Besides exchanging a purebred sire for a scrub bull at every station, registered heifer calves, sheep, and pens of purebred poultry were to be given away. Exhibits and discussions, together with the preparatory work in which over 900 people are engaged, should stimulate raising the average production of Kentucky livestock, according to C. C. Dorsey, of Louisville, Representative of the Agricultural Commission, American Bankers Association.



Bring this complete automobile show *into your own home*

THE national automobile shows in New York and Chicago were too far away for most Americans to attend. But by clipping the coupon below, you can bring a representative automobile show into your home.

At the shows General Motors exhibited a complete line of automobiles —"a car for every purse and purpose." They are the quality cars of their respective price classes. They range in price-at-the-factory from $495 to $5,500. They include 89 models of every type and kind. They embody improvements tested and proved at General Motors' Proving Ground, which, together with the Research Laboratories, is maintained to assure continuous progress.

"A car for every purse and purpose"

The General Motors cars are briefly described below. The new models offer *more* performance, *more* comfort, *more* beauty than ever before in automobile history. *All* have 4-wheel brakes. *All* closed bodies are by Fisher. *All* have Duco finish. *All* are built of quality materials. And for their convenient purchase, General Motors has provided the standard low-cost GMAC Plan.

CHEVROLET. 7 models, $495 to $715. Bigger and better than ever before. 4-wheel brakes. Longer wheel base. Still more powerful engine. Luxurious Fisher Bodies. Shock absorber springs. New hood. New Duco colors. New instrument panel and other improvements. *ALSO* truck chassis: ½-ton, $395. 1-ton, $495.

PONTIAC. 8 models, $745 to $875. The lowest-priced quality "six." Improved from radiator to tail-light. For example: 4-wheel brakes, new GMR cylinder head, increased power, locking device, more luxurious Fisher Bodies. Finished in Duco in new colors.

OLDSMOBILE. 7 models, $925 to $1085. Entirely redesigned by General Motors, the new Oldsmobile has earned the title of "The Fine Car at Low Cost." Longer, roomier, more powerful—and the last word in styling. Fisher Bodies. 4-wheel brakes.

OAKLAND. 9 models, $1045 to $1375. The All-American Six. Advanced engineering and precision construction. Longer, lower and more beautiful Bodies by Fisher. Every convenience. 4-wheel brakes. New Duco colors. Harmonic balancer.

BUICK. 16 models, $1195 to $1995. The largest value in Buick's famous history. Beautiful low bodies by Fisher. Getaway like an arrow from a bow. Vibrationless beyond belief. Famous 6-cylinder "Valve-in-head" engine. Sealed-in chassis.

LASALLE. 16 models, $2350 to $2975. This beautiful car was designed as companion car to Cadillac. Has V-type 90 degree 8-cylinder engine which has made Cadillac the standard fine car of the world. Built in Cadillac factory. Continental in appearance.

CADILLAC. 26 models, $3295 to $5500. "What," General Motors asked last year, "can possibly be done to improve Cadillac?" The result is embodied in the new models now on display, representing the high-water mark of Cadillac's long history. Sumptuous bodies by Fisher and Fleetwood. 500 color combinations to choose from.

FRIGIDAIRE—The Electric Refrigerator. General Motors has applied the processes which have made the automobile available to every family, to the production of electric refrigerators. Frigidaire is the refrigerator made by General Motors and it is now the world's largest selling product in its field.

DELCO-LIGHT Electric Plants. Provide the conveniences and labor-saving devices of the city for the farm. Electric light and power plants, water pumps, etc. Used in more than a quarter-million homes.

(All prices F. O. B. at the factories)

CLIP THE COUPON

Mark on the coupon below the General Motors product or products that you would like to see. Check all of them, if you wish, for the illustrated catalogues are so detailed as to form a show in themselves. In your own home you may examine the whole General Motors line, point by point, at your leisure. With the catalogues will be sent free a little book entitled *"Principles & Policies."* You will find it unusual reading, for it takes you behind the scenes and shows just what General Motors is and what it is doing to continue to merit public goodwill.

NEWS REVIEW OF CURRENT EVENTS

Senate May Keep Tax Cut Down to 200 Millions—Week in Politics.

By EDWARD W. PICKARD

SECRETARY OF THE TREASURY MELLON presented to the senate finance committee his new program of tax reduction, and the Republican members of the committee, together with Senator King of Utah, Democrat, gave the plan their tentative approval in its general features. The result will be that the bill presented to the senate will provide for a tax cut amounting to about $200,000,000, instead of the $290,000,000 reduction called for in the house measure.

Mr. Mellon asserted that the prospective $252,000,000 surplus for the fiscal year 1929 already has been shaved to $212,000,000 and that if congress appropriates $30,000,000 for flood protection during that year the surplus will be further reduced to $182,000,000. On the basis of these figures he scaled down the administration tax cut maximum, which he placed at $225,000,000 last fall, to $200,000,000 without allowance for food control and to less than $182,000,000 if the expected appropriation for this purpose is made.

By a vote of 13 to 6 the committee formally approved a reduction in the tax on corporation earnings from 13½ to 12 per cent, meaning a reduction in revenue of $123,000,000; and it also approved the repeal of the estate tax, which will cut the revenue $7,000,000 more. In apportioning the remaining $70,000,000 it was necessary to decide whether to approve the scaling down of intermediate surtax rates proposed by Secretary Mellon, involving a loss in revenue of $50,000,000, or whether to use this amount in the reduction or repeal of the automobile and other miscellaneous taxes which Secretary Mellon believes should be retained. It was expected the committee would approve an increase in the exemption for small corporations as in the house bill.

CHARLES E. HUGHES having declined the job, the Republican national committee selected Senator Simeon D. Fess of Ohio as temporary chairman and "keynoter" of the Kansas City convention. There was no opposition to this choice, as Senator Fess is able and eloquent and has at all times been a loyal supporter of the policies of President Coolidge and of the Republican party. His name remained on the Ohio ballot as one of the Willis candidates for delegate at large, but he announced that if he were elected he would have no declared first choice for President. His second choice, as indicated under the requirements of the Ohio law, is Senator Curtis of Kansas. But it is known that he really favors Hoover if the drafting of Coolidge cannot be put through. The other Willis candidates for delegate also decided that they would go to the convention without first choice. Their second choice pledges, which are to stand, are 34 for Lowden, 8 for Curtis and 9 for Col Charles Fisher of Wilmington, Ohio. If the name of Charles G. Dawes is placed before the convention he will have the support of those delegates. All of which is contingent on their election in the primaries.

New York Republicans elected 90 uninstructed delegates, of whom the Hooverites claim at least 47. Among those chosen was Dr. Nicholas Murray Butler, wet leader, who defeated an avowed dry. In the Wisconsin Republican primary the La Follette forces received the first serious setback they have had in years. According to incomplete returns the total delegation at Kansas City will be made up of 15 La Follette men, pledged to Senator Norris, and 11 anti-La Follette men most of whom are uninstructed Hoover was the only announced candidate in the Michigan primary and will have that state's 33 votes.

After winning 30 Michigan delegates without contest, Al Smith next day captured 124 more votes in three states. These included 86 from New York, 12 from Maine and 26 from Wisconsin. In the Badger state the Walsh candidates were snowed under by the slate of delegates sponsored by National Committeeman J. M. Callahan and pledged to Smith. The voters, however, in marking their Presidential preference ballots gave Senator Reed of Missouri a three-to-one majority over the governor of New York. Smith's name had to be written in the ballot.

Reverting to the Republican situation, attention should be called to the action of the corn belt committee in Des Moines. Claiming to represent more than a million organized farmers, the committee adopted a resolution opposing the election of Hoover should he be nominated by the Republican convention. In that event the committee plans to throw its voting strength to the Democratic nominee.

GOVERNOR GREEN of Michigan appointed Arthur H. Vanderberg to fill out the unexpired term of the late United States Senator W. N. Ferris. The appointment is good only until next December, but Mr. Vanderberg announced that he will be a candidate for election to the senate in the fall. The new senator is editor of the Grand Rapids Herald and is a student and writer on American history and the Constitution. He is only forty-four years old

Cyrus Locher, a Democrat, was named to fill out the term of the late Senator Willis of Ohio by Governor Donahey. Mr. Locher is the state director of commerce and resides in Cleveland.

ALBERT B. FALL, in his testimony taken at El Paso for use in the trial of Harry Sinclair, said three Republican leaders—a former cabinet member now in Europe, a senator and a former senator—advised him to write the famous McLean letter to the senate Teapot Dome committee in 1923 in an effort to conceal a loan of $100,000 from Edward Doheny, oil magnate. In Washington it was stated the men named by Fall were Will Hays, Senator Reed Smoot of Utah and ex-Senator Lenroot of Wisconsin. Both Smoot and Lenroot branded Fall's story as utterly false. Lenroot said Fall told him he got the money from McLean and he then had every reason to believe Fall was telling the truth.

GENIAL, optimistic, picturesque old Chauncey M. Depew has passed away at the age of ninety-four years. The former senator from New York and chairman of the board of directors of the New York Central railroad succumbed to pneumonia at his residence in the metropolis only a few days after his return from a trip to Florida. Born in Peekskill in 1834, Mr. Depew was educated at Yale and then was admitted to the bar. He was active in politics all his life from his twenty-first year and attended every Republican national convention as a delegate since 1888 with the exception of that of 1924. At the 1888 convention he received 99 votes for the Presidential nomination. He served two terms as United States senator, from 1889 to 1911. In 1886 he entered the service of the Vanderbilt railroad system and remained with it until his death. For 13 years he was president of the New York Central. He was especially well known for his public addresses and his after-dinner speeches. He attributed his longevity to his "refusal to worry."

GREAT BRITAIN'S plan to keep up the price of rubber by restricting the exports, known as the Stevenson scheme, has failed. Prime Minister Baldwin announced to the house of commons that the government had decided that all restrictions on the export of rubber from Malaya and Ceylon would be removed beginning November 1, 1928. According to the Stevenson plan the exportable percentage of production was determined at the beginning of each quarter by the average price during the preceding quarter It was attacked especially by American users as an attempt by Great Britain to monopolize rubber, and was successful for a time. But Dutch competition in Sumatra, American conservation, German synthetic rubber and new planting projects doomed the scheme to failure. During recent months the price of rubber has steadily declined, and experts predict that it will stay low, despite the abandonment of the British plan, until the inefficient producers are driven out.

THE house committee on flood control accepted the senate's bill on that matter and all looked rosy until Tuesday, when President Coolidge advised the house leaders that he was not satisfied with the compromise effected and feared the pending measure would involve huge expenditures in excess of the $325,000,000 authorized. He still wished the appointment of an economic commission to study the question of local contributions, and favored a number of other amendments. The Republican house leaders therefore decided the bill should not be called up before the latter part of this week. The house committee also fears an adequate flood protection program will cost more than is provided for in the senate bill. In its report the committee contends that the cost of flood control works and rights of way under the Jadwin plan would be $295,000,000, which is exclusive of $111,000,000 for improving navigation. The Mississippi river commission's plan, which under the terms of the Jones bill may be adopted if desired in cases where it conflicts with the Jadwin plan, would cost $625,000,000 for flood control works and rights of way. Both of these apply only to the lower Mississippi river.

MINISTER MACMURRAY went from Peking down to Shanghai to settle with the Chinese Nationalist government the row over the Nanking outrages of March, 1927, and settle it he did, to the satisfaction of Washington, without yielding to the arrogance of the Chinese or sacrificing the prestige of the United States. The British press in Hongkong was astonished by Mr. MacMurray's success where the British minister had failed, and jeered at the settlement as one of expediency due to the approaching elections in America.

PREMIER MUSSOLINI and the pope seem both to be determined not to continue the controversy over the education of the youth of Italy. The Vatican organ in a conciliatory editorial declared the Holy See had no intention of projecting itself into the affairs of the Italian state, and the duce sternly notified the Italian press that this must be considered as absolutely closing the incident. It is understood that though there is to be no rescinding of the decree against Catholic boy scout organizations, a flexible formula for procedure will be found whereby the decree disbanding them in most places will be avoided.

SMYRNA, the unfortunate Asia Minor seaport, was shattered by a series of earthquake shocks extending through several days and affecting also a number of near-by villages. The fatalities were numerous and a great many buildings were destroyed, among them being some of the fine structures erected since the great conflagration of 1922. The first temblors were preceded by a terrifying display of celestial electricity.

FRANCE'S latest note to America concerning the Washington proposal for an unqualified multilateral treaty to end war accepts the plan with reservations, and leads Secretary of State Kellogg to believe a real step has been taken toward abolishing armed conflict. It is understood the next move will be to extend the negotiations to include England, Germany, Italy and Japan. Briand has abandoned his contention that the term "aggressive war" be substituted for "all war," but he makes it perfectly clear that the French government cannot allow the proposed treaty to interfere with French obligations under the league. The foreign minister also declares that the inclusion of all powers in the league is absolutely necessary in the interests of world peace.

PEACE negotiations between Poland and Lithuania, held in Koenigsberg, Germany, fell through mainly because Premier Waldemaras would not yield on the question of Vilna. He knew if he did, his government would be overthrown, for the Liths insist the city Poland grabbed must be restored to them. The conference may be resumed later, for three commissions were named to study questions of economics, security and nationalities.

Counter-Irritant

"Your husband seems to go to the office more frequently nowadays."

"Yes. His doctor said it was necessary for him to have something to take his mind off his golf."—Montreal Star.

A Hint For You

White Cloud, Kans. — "I took Dr. Pierce's Favorite Prescription during the critical period of life when doctors did me no good. I got five bottles of the 'Prescription' and I feel it saved my life. I also took three bottles of Dr Pierce's Golden Medical Discovery for stomach trouble and nervousness, together with the 'Pleasant Pellets,' and was permanently relieved. I don't think Dr Pierce's medicines can be beat for I know they saved my life. I feel that if others would take them they would be saved lots of money." —Mrs. A. D. Smith.

All druggists. Tablets or liquid.

Filling Really Vital Part of Prescription

It was in North Carolina where the colored people are looked upon by their "white folks" pretty much as if they were children who were never expected to quite grow up. A Northerner tells of his Southern host, a doctor, being approached by a colored man, more or less dependent upon the physician's bounty.

The darky carried in his hand a prescription blank, which he fingered hesitantly before asking his benefactor, with just a shade of suggestion in his tone, where he was supposed to have it filled.

"Take it right over there to that drug store, uncle," the doctor said, "and remember, I don't pay for having it filled."

"But," came the mournful remonstrance, "that 'scription don't do me no good 'tall if yoh don't pay for having it filled."—Detroit Free Press.

Fifty Years on Book

The first installment of the new French dictionary, prepared under the auspices of the French government, is about to be issued after fifty years of work. The task of compiling this great work is done under the supervision of the nation's forty immortals to whom it was assigned nearly three centuries ago. These persons jealously guard the admission of new words into the book and they receive official sanction after profound consideration because they feel that it is their task to keep the language pure. Only about 2,500 new words are put into this new edition and many words in common use are excluded for one reason or another.

All He Has Coming

"What do you get out of life?" demanded the carper.

"What I put into it, plus a fair interest," answered the thoughtful man. —Boston Transcript.

The Motive

Mary—Why did you muss your hair?

Doris—To make Jack jealous.

Eloquent Peace Plea Seen in Wooden Legs

Vice President Dawes, after eloquently urging the American Legion at Greenville to make its Paris parade a memorial to the dead, said to a reporter:

"The French lost horribly in the World war. They lost eleven men to our one. This is why our parade should be solemn and impressive—no gayety or fun.

"I wish it could be a plea for world peace, too. A plea for world peace—and that reminds me of a story.

"An American nurse stood at a railway station 'somewhere in France' during the war when a long freight train loaded with wooden legs went by.

"The nurse looked at all those thousands of wooden legs and sighed and said:

"'There goes a trainload of the best stump speeches for world peace that ever happened.'"

Impossible

Grace—Why can't you agree with your husband?

Mary—He always takes sides with the people I talk about.

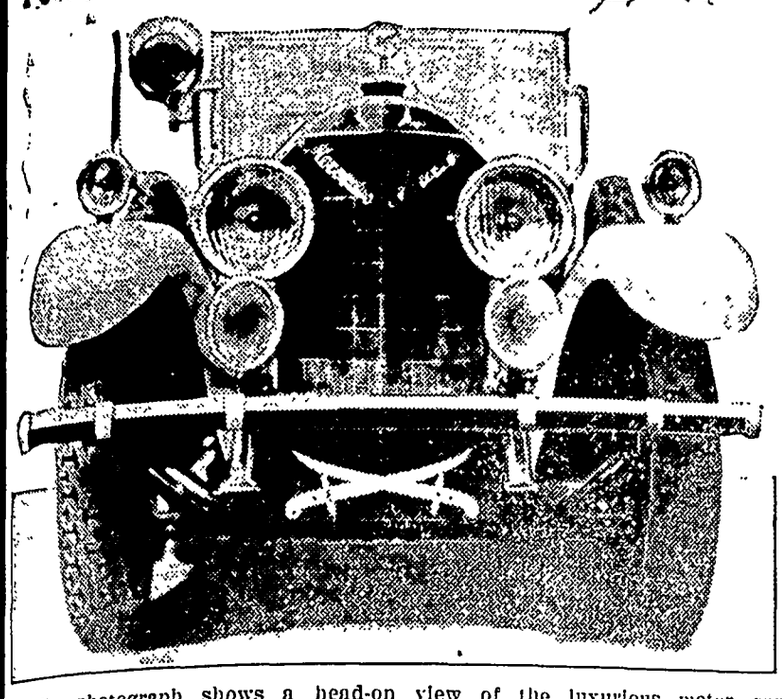
FORT ON WHEELS FOR AN ARABIAN KING



The photograph shows a head-on view of the luxurious motor car recently built for the king of the Hedjaz and which will be used chiefly for trips across the African deserts. The car resembles a fort on wheels and is equipped with two stands for armed sentries. There are five powerful searchlights and two horns to warn camel drivers of the king's approach. The machine was built at Bromley at an estimated cost of $15,000.

BREAKING IN THE NEW AUTOMOBILE

First 500 Miles Has Important Bearing on Kind of Future Service.

"The first 500 miles or so is the most important period in the life of a new automobile, and the manner in which the car is driven at that stage determines to a large extent the kind of future service it will give.

"The parts of a new car are carefully and accurately made, but just as a pair of new shoes must be 'broken in' before fitting comfortably, so these new parts must also be adjusted in order to function properly.

"High points on the bearing must be smoothed out, tool and grinding marks gradually worn away, a high polish acquired."

Expert Advice.

This is the statement of David Gregg, research engineer, who proceeds to give some expert advice about breaking in new automobiles.

To quote Gregg in part:

"First, follow explicitly the manufacturer's directions for the 'breaking in' period, which usually is 500 miles. After this period, and when the engine is warm, occasionally accelerate up to 40 or 45 miles an hour. Immediately the speedometer registers 40 or 45 slow down to around 35 miles an hour. This enables the oil to circulate freely among the moving parts.

"The short bursts of speed permit the parts to become accomodated to full load operation without danger of burning or sticking, which might occur with continued high speed running.

Complete Check.

"At the end of the first 1,000 miles the car should be driven back to the dealer for a complete check. See that the valve adjustment is correct, the compression even in all cylinders, the distributor contact points checked. The operation of the steering gear and alignment of the front wheels should be checked, and be sure the nuts which hold the wheels on the rear axle are tight and without sign of looseness.

"A car properly broken in and regularly checked at a good service station should give many thousands of miles of carefree operation at a minimum of expense."

Increase Shown in Auto Deaths During Last Year

Automobile fatalities in the United States last year increased more than 1,500 over 1926, the National Safety council estimates from partial reports of cities and states.

In 1926 deaths charged to automobiles aggregated 23,500.

Of the nation's eight leading cities four, Philadelphia, Cleveland, St. Louis and Boston, reported fewer deaths. Chicago, Detroit and Los Angeles show increases. New York is not mentioned in the council's incomplete survey.

Massachusetts again reports a reduction over the 1926 record. All of the cities in that state over 100,000 population, with the exception of Cambridge, reported decreases.

Connecticut, New York, Rhode Island and Texas were among states showing increases in deaths. In New York the death list jumped from 1,155 in 1926 to 2,422 last year.

Reduction of Number of Valve-Grinding Tasks

Widespread use of highly volatile, nondetonating gasolines is resulting in a great reduction of the number of valve-grinding jobs that the average repair shop does. This is to be expected and for the most part is entirely satisfactory. But it happens frequently that the car owner goes too far with the assumption that the valves are seating properly.

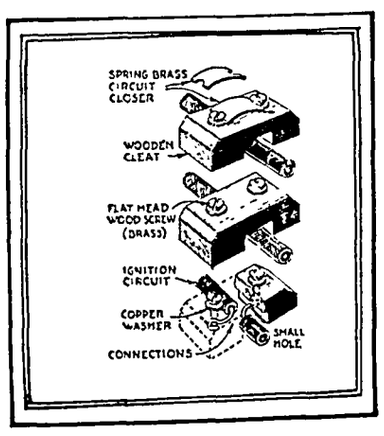
Even with the best of gasolines the valves do "stick up" after a certain period of usage. The car owner who grinds in the valves or has them ground in after, say, a year of service will recognize this by the difference in the car's performance.

Inspection of Cars

Motorists are finding it a costly proposition to assume that it is not worth while to get out of the car and look for possible damage after a minor collision. Many have driven away in such cases only to find relatively severe damage that they were certain could not have resulted. A recent case illustrates this. A motorist who was stopped to allow cross traffic to pass was backed into by another car. He started away, assuming that the other car had struck only his bumper. When later he inspected the damage he found a fender crumpled almost beyond repair.

Novel Secret Ignition Switch Easy to Conceal

The value of any secret ignition switch depends on how cleverly it is concealed. The switch shown in the illustration is so constructed that it doesn't look like a switch and can be placed in plain sight if necessary. No one would suspect the wire cleat of harboring a concealed break in the wiring. The cleat can be cut from any piece of hardwood. Drill the holes for the two screws and carve a groove for each wire end from the center notch to the screw hole. Then enlarge the screw holes just enough so that small loops can be turned in the ends of the wires and placed in these holes. Use flathead wood screws with copper washers and figure out the size of the enlargement at the bottom of each hole so that when the



The Particular Merit of This Secret Switch Is That It Need Not Be Hidden From View. It Does Not Look the Part.

screw is forced down tight, each wire end will be jammed between the side of the hole and the screw so as to get a good electrical contact. A piece of spring brass cut to snap under the edges of the flathead screws will complete the connection between the wire ends. Of course round-headed screws would ordinarily be used, but anyone noticing the flathead screws is most unlikely to attach particular significance to them. If you install this switch in an old car, dirty the cleat to make it look old.

Several convenient locations for the concealed switch will suggest themselves. Check up the location of the wire running from the timer to the dash switch and then choose the easiest location to get at.—Popular Science Monthly.

AUTOMOBILE ITEMS

When a woman occasionally does take a back seat, she drives the automobile from it.

* * *

As soon as this automobile war is over, we're going to try to get a pension for our old veteran.

* * *

If all these new cars get the mileage promised by their makers, it will be a tough break for the gas industry.

* * *

About 8,000 miles of concrete road way are to be built throughout the country this year, according to transportation experts.

* * *

A pneumatic automobile bumper has just been placed on the market, and the only thing now needed to make the joys of motoring complete is a pneumatic telephone pole.

Interest Taken In Poultry T. B.

Many States Plan for Control and Eradication of Dread Disease.

(Prepared by the United States Department of Agriculture.)

Tuberculosis in poultry is receiving considerable attention by live-stock interests in many states because of the danger of transmitting the disease from flock to flock and from poultry to swine. Many states have adopted a working plan for the control and eradication of the disease from poultry and much is being done to combat it.

Considerable tuberculin testing of flocks has been done, chiefly with the view of determining the possibilities of the test and its value in the clean-up campaign.

Limited Survey Made.

Incident to the studies inaugurated elsewhere, the United States Department of Agriculture, through its tuberculosis eradication division, made a limited survey to determine the extent of avian tuberculosis. The purpose of the survey was, principally, to obtain information relative to the prevalence of the disease in the states believed to be comparatively free. Nine states known to have a high per cent of infected poultry were not included. Of the remaining 39 states 27 were found to have some infected poultry; approximately 25 per cent of the 1,874 flocks tested were found to have some infection. More than 85,000 birds were tested, resulting in more than 9,300 reactors being obtained.

Examination of Flocks.

The usual physical examination of farm flocks incident to the tuberculin testing of the cattle was continued by the field men. During the fiscal year 1927 inspections were made of more than 211,000 flocks, containing over 16,500,000 birds. This gross inspection indicated nearly 6 per cent of flock infection in the states covered.

It is believed, says Doctor Wight, acting chief of the tuberculosis eradication division, that under the plans now in effect, and with the work being conducted simultaneously with the testing of cattle, marked progress will be reported in the near future.

Plan for Keeping Crows From Ravaging Crops

Following is the best method of keeping crows from ravaging crops: Make a paste of one ounce of powdered strychnine, two tablespoonfuls of starch and one and one-half pints of water, putting the starch and strychnine into the water, which is heated to boiling, and stirring well when the starch begins to thicken. This amount of paste is poured onto twenty quarts of corn and stirred into it until the poison is thoroughly mixed with the corn.

A little of this poisoned corn scattered over the field will kill a few crows and the rest will take warning and leave. Using whole corn for bait lessens the danger of poisoning smaller seed-eating birds. Care should be taken not to scatter the poisoned corn near buildings where domestic fowls or animals will pick it up.

It is always advisable before using this method to look up laws and local regulations regarding the distribution of poison. Local conditions may modify practices a great deal, especially in thickly populated districts.

Extra Fine Alfalfa May Contain Much Protein

Extra fine quality alfalfa hay may contain one-third more protein than wheat bran, while poor quality alfalfa hay may contain one-third less than wheat bran. The first cutting of alfalfa has, as a rule, a smaller proportion of leaves than the later cuttings, and the last cutting usually has the highest proportion of leaves. The leaves contain from 20 to 25 per cent of protein, while the stems contain from 6 to 10 per cent.

Exposure of hay to rain during curing may result in the loss of one-third of the protein of alfalfa hay. This greatly reduces the quality of the hay, and then, too, one of the least valuable nutrients, the crude fiber, is little affected by rain and thus forms a larger proportion of the hay.

Agricultural Hints

Guard against dogs and predatory animals.

* * *

Alfalfa or clover hay should be supplied to pigs being fattened in the dry lot.

* * *

Keep the sheep off low, wet land. Provide shelter in winter and shade in summer.

* * *

Sweet clover is a special purpose legume, especially adapted to soil improvement and rotation pastures.

* * *

The silo is a real enemy of the corn borer. When corn is put in the silo, any borers it contains never come out alive.

* * *

While feeding and housing are very important factors in securing better egg production, it is fundamentally a matter of breeding.

* * *

Burning over pastures and meadows to get rid of weeds and old trash does not pay, it injures the grass roots and removes desirable humus.

a skin to dream of--

Yours?

A skin with that brightness and radiance we call beauty—you can have it if you will!

Nearly every woman's skin would be lovely if it weren't for one of these six easily-corrected faults:

Blemishes *Blackheads* *Sallowness*
Conspicuous nose pores *Excessive oiliness*
Dryness

GIVE your skin a chance! Begin, today, to correct the faults that hide its natural attractiveness:—then see how lovely and smooth it will be!

The famous Woodbury skin treatments will help you to overcome any of the six common skin troubles given here. Hot and cold water—ice—and a cake of Woodbury's Facial Soap—that is all you need to carry out these wonderful treatments.

Simple, clear directions for each of these treatments and the treatment for normal skins are given in a booklet wrapped around each cake of Woodbury's.

Woodbury's Facial Soap was created by a skin specialist. Use it—and see what a wonderful improvement it will make in *your* complexion!

A 25-cent cake lasts a month or six weeks.

WOODBURY'S FACIAL SOAP

Rocks to Tell History

A history of the world told in rocks of each period, with words of pebbles and the pages of stone, is being prepared by Dr. A. R. Cook, who has just returned to England from a geological expedition to a number of districts in North America. He says that he will use the walls of a corridor in a museum for his history. Initial "pages" will show only stone formations. They will be followed by the first-known types of life embedded in stone, and then by fish, birds and reptiles, until human remains are reached.

His Life Work

Mother—Johnny takes less interest in arithmetic than in any of his other studies.

Uncle—Yes; he told me he's going to be a prize fight referee, so all he needs with arithmetic is to be able to count up to ten.

Stop All the Gaps

A man should always keep his fences mended and not stop merely with closing the gate.—The American Magazine.

Squirrels Made Trouble

Gray squirrels have taken to nesting in a power company's conduit boxes in Stockbridge, Mass. After the town was plunged in darkness one night electricians found that squirrels had eaten the insulation on some of the wires, causing a short circuit.

Many are called but few choose to get up when the alarm clock goes off.

Trifling troubles find utterance; deeply felt pangs are silent.—Seneca.

MINNIE BECKER DIED TUESDAY

FUNERAL SERVICES WILL BE HELD FRIDAY AFTERNOON

Final Respects Will Be Given At The Klemme Reformed Church

Klemme and community was sadly shocked when it was learned that Miss Minnie Becker, daughter of Mr Wm. Becker, Sr., had passed away at her home Tuesday evening, following a brief illness.

Miss Becker's condition was not known to be so serious and the general report had been that she was somewhat improved until the news of her death brought grief to mer many friends, relatives and niegabors.

Funeral services will be conducted by Rev Calvin Grosshuesch at the Klemme Reformed Church, tomorrow (Friday) afternoon at 2:00 o'clock.

The sympathy of the community is extended to the sorrowng family at this time.

Minnie Becker, Obituary
(By Rev. C. Grosshuesch)

Miss Minnie Margaretha Becker, daughter of Mr. and Mrs. Wm. Becker Sr, was born at Klemme, Iowa, on the 8th day of Februarv, 1883 On July 1st of the same year her parents brought her to Holy Baptism in the Ell Town Reformed Church, Rev Mosebach, Paster.

During her childhood days she attended the public and church schools and after completing the course of catechism instruction she was confirmed and received into full membership of the church by Rev. John Gatermann, then pastor of the Ell Town and Klemme congregations.

The father's home remained the home of he daughter, where with three other sisters, two brothers and her aged father she lived, until she was called to the home of the heavenly Father

About five years ago she underwent a serious operation for cancer at the Mercy Hospital at Mason City from which she fully recovered Several weeks ago Minnie became seriously ill with influenza, which brought about a complicated case of asthma and heart trouble which was the cause of her death.

The day before she died she desired to profess and strengthen her faith in Christ by partaking of the Lord's Supper, with the family circle. She fell asleep quietly and without much suffering at 7:30 p. m. on Tuesday, April 17th, 1928, at the age of 45 years, 2 months and 20 days.

Of the twelve children born to Mr. and Mrs Wm Becker Sr, three, (two sons and one daughter) died in infancy The mother died October 26th, 1913 A sister, Sophia, wife of Mr Haberkamp, died December 19th, 1925

Surviving her and mourning her untimely death are: her aged father; three brothers, William, Jr, Edward and Fred; four sisters, Mrs. Peter Josten, Mary, Anna and Rosie

Funeral services will be held at the Klemme Reformed Church Friday afternoon at 2:00 o'clock and burial will be made at the Klemme Cemetery Rev Calvin Grosshuesch officiating.

NOTICE

Proposals For Erection Of School House

Notice is hereby given that the proposals for the erection of a new school house in Twin Lake Township District No. 9 (5 miles west of Goodell, and 5 miles east of Kanawha) in the county of Hancock, state of Iowa will be received by the undersigned at the Center School House, District No. 5, Twin Lake township at 1:00 p. m., May 1, 1928, at which time the contract will be awarded to the lowest responsible bidder. The board reserves the right to reject any or all bids.

Plans and specifications may be seen at my place in Twin Lake township.

JULIUS PRIEBE, Secretary,
Goodell, Iowa, April 2, 1928.

CINDER ROAD TO BE BUILT TO JERUSALEM STREET

Five Car Loads Of Cinders To Be Put On Street To Elevator

At the present time the North Iowa Grain Company and the Standard Oil Company tanks and warehouse are more or less isolated from the business section of the town, marrooned on a island, so to speak, surrounded by a sea of mud

However this condition is to be speedily removed, as we are informed that the two companies above mentioned have shipped in five car loads of cinders with which to surface the street leading to their properties The town council are cooperating in the movement and will re-grade the street from the intersection near Wellemeyers store, north past the Standard Oil Company and the North Iowa Grain Co, connecting with the cats and west street known as Jerusalem St A culvert or two will be installed in needed places for drainage and when the preliminary work has been completed the cinders will be spread on liberally

When this project has been completed, which will be soon a good weather-proof street will be the result

We understand the cinders are being unloaded and the balance of the work will be rushed right through as soon as the weather permits

"Boosting the old home town" has suddenly take the form of a demand for landing stations wherever they can be used by air pilots

NEXT TERM OF COURT MAY 8TH

Clara Peterson, Britt
Pearl McNeish, Kanawha
Edith Nonnweiller, Garner
J. A Schroeder, Britt.

KLEMME TO HAVE BOY SCOUT TROOP

ALL BOYS OF SCOUT AGE ARE URGED TO ATTEND

Next Meeting Will Be Held At The First Nat. Basement Mon. Eve.

For some time there has been much talk, but little action, in the organizing of a Boy Scout Troop in Klemme However, Dr D. P. Anderson, assisted by Asa Arnold, came to the rescue of the situation and called a meeting of the boys interested Monday evening at the basement of the First National Bank

This meeting was attended by approximately a dozen "raring-to-go" boys of scout age, who were anxious to become members of the Scout organization.

It will take some time to fully organize the troop, as there are a number of details to be worked out such as appointing a board, making the proper connections with the district and state organization, etc.

The Boy Scout Organization is one that any boy can feel proud of being associated with and parents should give their support The organization teaches the boys not only how to have a good time but the more serious things in life are taught, as how to live right, to think right, to think and act quickly in emergencies, to do a good turn daily, but each the boy to be a patriotic and better citizen

Any parents or boys interested in the movement should get in touch at once with Dr Anderson or Asa Arnold

OVER SIX TONS OF BUTTER ARE SHIPPED HERE WEEKLY

Klemme Creamery Ships Out In Car Every Wednesday

The Klemme Creamery at the present time is manufacturing more than a ton of butter daily, in fact it exceeds that amount by several hundred pounds

Each Wednesday the creamery loads a refrigerator car with from 12,000 to 13,000 pounds of butter The car goes to Dows where that creamery adds another like amount and the car then goes direct to New York.

With the green pastures coming on the output will materially increase and the weekly shipments will increase.

By shipping in car load lots a sum of money is thus saved and which goes back to the dairyman in better prices for the raw product.

VOLUNTEERS WANTED FOR SERVICE IN KLEMME

Volunteers are wanted and all able bodied men, young men and boys in Klemme will report at the City Park at 7 00 p m. Friday, April 20th and come fully armed with lawn rakes and enter the battle!

Friday has been designated by the Mayor as Clean-Up evening for the park Let's all come with our lawn rakes and help get the dead grass, leaves and twigs removed from the city park lawn. If you want a city beautiful do your part now!

A. C. HALVERSON IS OUT FOR TREASURER

A C Halverson, of Miller, this week places his announcement in the Times as a candidate for the office of Treasurer of Hancock County

Mr Halverson is forty-two years old and has been a resident of Ellington township all of his life. Up until recently he has been farming but had a public sale this spring and moved to Miller

Mr. Halverson is a graduate of a business coures of Waldorf college and so feels that he is well qualified for the office he seeks.

He is a brother of the man who ran for the same office two years ago. This brother died about a year ago of cancer. Mr. Halverson states he intends to make a thorough canvass of the county and will meet every voter before the primary.

DESPITE BAD ROADS, STOCK SHIPMENTS WERE GOOD

Ten Cars Of Porkers And Beeves In Saturday's Shipment

To say that the roads are terrible is putting it mildly, and how such a large amount of stock was brought to Klemme over the week end is a mystery and the total of ten cars shipped out is nothing to be "sneezed" at.

One peculiarity of the Saturday shipment was that three car loads of cattle were shipped to the South Omaha Yards. Very seldom, in fact, it has been several years since a shipment of stock went to Omaha from here The cattle were purchased of Albert Schmidt by A B. Miller, of Manly, who shipped them to Omaha.

The Klemme Shipping Association hipped one car load of hogs to the J S Yards, Chicago.

John Larsen shipped one car load of cattle and one car load of hogs, U S Yards, Chicago.

C A Larsen shipped two cars of cattle and one car of hogs to Chicago, U S. Yards.

Albert Kraus shipped one car of hogs to the same destination.

John Larson and C. A. Larsen went in to Chicago on the stock train Saturday night.

COUNTY BANKERS PROPOSE A FEW CHANGES

Would Charge Large Outside Concerns For Handling Checks

At a recent meeting of the bankers of Hancock County, held at the First State Bank at Britt and which was attended by all of the bankers in the county with the exception of representatives from Woden, various details in banking business were discussed and some plans for the future were drawn up.

The matter of organizing a vigilance committee was brought up as outlined by the State Bankers Association. Under this plan the committee is organized and under the command of the county sheriff. In most counties, or a large number at least, the county buys the necessary fire arms and the banks provide the ammunition, and the entire committee is under the direction of the sheriff.

Other matters came before the meeting and acting on recommendations of the Iowa Bankers Association a resolution was unanimously adopted to make a charge to outside produce companies and large concerns clearing many checks through local banks, and who do not carry an account. The charge will be 4c on checks up to $40 and above that amount a charge of 10c per $100.

Another matter discussed was that of charging 25c on each check that is returned unpaid because of insufficient funds These kind of checks are a cause of expense to the banks who have to handle them and such a charge would take care of the expense of postage, etc.

All over the states the service charge is coming into its own and a program of education is planned that will eventually bring all banks into the service charge class.

The matter of printing individual and firm names on checks was also considered and no doubt in the near future the customer desiring a card on his check will pay the cost of printing, himself.

Opening and closing hours were talked over and the general opinion was that banking hours should be from 9:00 a. m. to 4:00 p. m. The hours before and after that time would give the bankers ample time for book work without being disturbed.

The officers of the Hancock County association are F. L. Bush, Kanawha, president; F. A. Arnold, Klemme, secretary.

Hancock county people are interested in banks and news of the doings of the bankers is of general interest.

FOR SALE OR RENT—My place with 6 room house, south front with sleeping and sun porch, 3½ lots, 2 blocks from Main St. Possession will be given Apr. 20th. Fred Musfeir. (Apr. 12-19-26p.)

EMIL BEIER HAS HIGH HERD IN NO. 3

ASSOCIATION RE-ORGANIZED AT RECENT MEETING

Will Hereafter Be Known As The Garner-Klemme Association

What has been known as cow testing association number three, Hancock county, has been reorganized, and in such reorganization, has been given a new name. Hereafter, in referring to this organization it will be spoken of as the Garner-Klemme association.

The re-organization meeting was held at the Farmers National bank at Garner Friday, April 6th and was well attended.

The increased interest in cow testing made it an easy matter to fill the association. At this time there are twenty-six dairymen in the vicinities of Garner and Klemme who hold memberships in this association

The annual report of the association will be published later, and some interesting data on feed costs and butter fat production is promised by the official tester.

The last report of number three shows that 303 cows were on test in 23 herds. This was for the month of March. The association averages based upon the 303 cows on test, 251 in milk and 51 dry were: milk 554 pounds, fat 25.4 pounds

Emil Beier Has High Herd

The highest average for herd was made by the p. b. h. herd owned by Emil Beier of west of Klemme. This herd of nine cows, all being in milk, made an average of 1237 pounds of milk and 40.45 pounds of fat

Thirteen p. b and g. h. cows owned by Chas. Haes of Garner, made an average of 1037 pounds of milk and 38.22 pounds of fat. All cows were in milk.

The p b and g h. herd owned by V. A. Cook, of southeast of Klemme, made an average of 1096 pounds of milk and 36.43 pounds of fat. 14 cows were in milk and 2 dry.

Klemme Dairyman Scores High

The p. b. and g. mixed herd owned by R. W Elder of Klemme, made an average of 848 pounds of milk and 36.09 pounds of fat. Eight cows, all being in milk.

Seven g. h., all in milk, owned by Ben Goll, near Klemme, made an average of 969 pounds of milk and 34.-3 pounds of fat.

Eighteen g. h., one dry and seventeen in milk, owned by Geo. Klesel, of Garner, made an average of 894 pounds of milk and 32.45 pounds of fat.

Eight g. h. and s. h. owned by J. J. Cook, southeast of Klemme, made an average of 841 pounds of milk and 32.22 pounds of fat. Six cows in milk and one dry.

BRITT BOOTLEGGER FINED $100 BY MAYOR GRANGE

Arrested By Marshall Finn Here Last Thursday Night

One Harold Smith who gave his address as Britt, Iowa, was arrested by Marshal Earl Finn and deputy Jack Steeman in Klemme last week Thursday evening and lodged in the city "hoose-gow."

Smith appeared before Mayor P Grange the following morning. At the time of his arrest he had in his possession five pints of alloged liquor and two empty bottles. He plead guilty to the charges brought against him and was fined $100 and costs Unable to pay the fine he was given permission to go to Britt, accompanied by Marshall Finn where he is said to have raised the money by selling his Ford enclosed car which he was driving. At last reports Mr. Smith was said to have gotten on a train for Chicago.

NOTICE TO CHICKEN OWNERS

You are hereby ordered to pen up your chickens at once as in accordance with a town ordinance which prohibits the running at large of poultry of any kind.

PAUL GRANGE, Mayor, 2tc

LEFT SATURDAY FOR VISIT IN GERMANY

Mr. And Mrs. Geo. Albers Left For Visit In Country Of Their Birth

Thirty seven years ago Mr. and Mrs. George Albers came to America from Germany to seek their fortune. In this they have been very successful and through hard work, and systematic saving they have accomplished their goal. They are the owners of some of Hancock County's best improved lands and farm home and they have a mighty fine family of children who are now able to look after the farm during the absence of the parents.

The end of the long journey over land and sea will take them to Dont St. 52 in the city of Heisfelde by Leen in Ostfriesland, Germany where they will be greeted by relatives and a few old friends.

The length of their stay in Germany will depend entirely on how well they still like the land of their birth. Mr. Albers stated they may return to the States in six weeks or they may possibly stay until later in the summer.

The Klemme Times will make its weekly trip across the great pond to keep Mr. and Mrs. Albers informed of local events.

COUNTY CHAMPION WILL GO ON FRIDAY

GLADYS SCHLICHTIN WILL COMPETE IN STATE CONTEST

Will Leave Friday For Des Moines For Spelling Contest

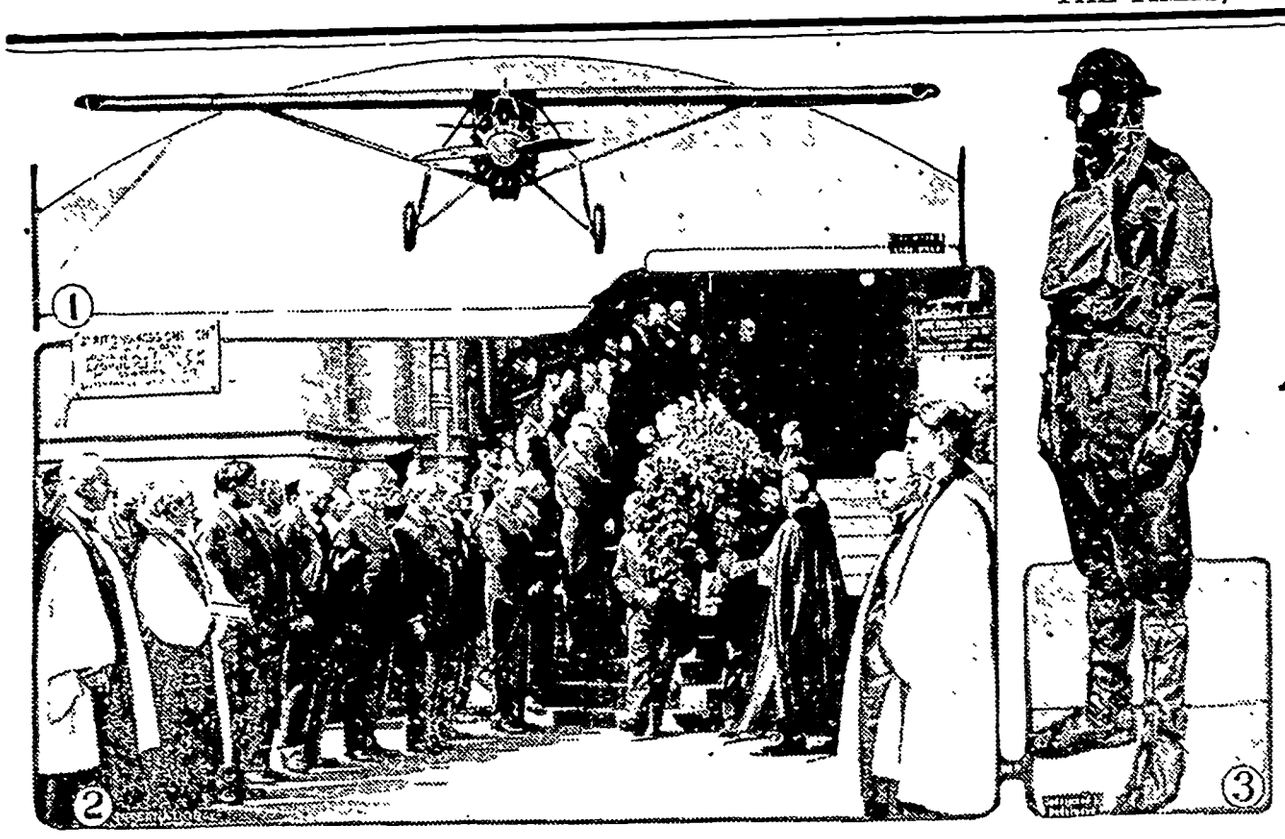
The Superintendent and Miss McGinnis will go to Des Moines Friday afternoon and take the Hancock County Spelling Champion, Gladys Schlichting, who will meet over a hundred spellers from other parts of our fair state in a contest at the Garrick theatre on that evening. Dr Horn from our own state University will be one of the judges. Dr. Horn has compiled the list of words the spellers have been working on this winter in preparation for this contest. He has had much to do with the speller we are using in Klemme at present.

Seniors Working On Play

Our Seniors are hard at work these days and evenings on their class play which they are very much interested in. It is a well balanced play with leading parts. It seems to be full of action and unique situations of unusula interest.

Last Six Weeks Period Begins

This week marks the beginning of the last six weeks of this semester and we hope an extra effort may be made by every one involved to avoid failures. Many can be avoided if extra time is put in both at home and at school. Report cards were given out today and should be given more than passing notice. If they contain D's or E's it means there is grave danger of the student having to repeat the work. We are permitting high school students to come earlier to school if for study and several are here each morning soon after eight o'clock. Those coming for play and recreation before the first bell rings at 8:30 are unwelcome. Exceptions are made for those who come from the country who must start in plenty of time to make certain they will arrive on time.



1—Head-on view of the new plane built at San Diego, Calif., for Colonel Lindbergh, similar to the Spirit of St. Louis but more completely equipped for night flying. 2—Scene at the funeral of the late Chauncey M. Depew in New York. 3—New gas-proof uniform tested by ordnance officers of the United States army, which protects the wearer at all points.

NEWS REVIEW OF CURRENT EVENTS

Two Germans and an Irishman Cross Atlantic East to West in Plane.

By EDWARD W. PICKARD.

EAST-WEST crossing of the north Atlantic by airplane is an accomplished fact. Two Germans and an Irishman succeeded where French and English had failed at the expense of seven lives. Baron von Huenefeld, Capt. Herman Koehl and Commandant James E. Fitzmaurice of the Irish Free State air forces, starting from Dublin in the Junkers plane Bremen, just managed to get across the ocean in safety. Encountering strong head winds and a heavy snow storm, they wandered some four hundred miles northward of their course and finally, with fuel tanks empty, landed on Greenly island in the Strait of Belle Isle. They were only 100 miles from the open sea. The plane was slightly damaged in landing but the daring aviators were unhurt and made their way to a lighthouse, whence news of their arrival was sent out to an anxiously waiting world.

DISGUSTED and indignant citizens of Illinois gave the Small-Thompson-Crowe machine a terrific walloping in the Republican primaries and felt that they had in a measure redeemed the state and especially the city of Chicago. Governor Small was defeated for renomination by Secretary of State Louis L. Emmerson by a majority of more than 400,000, and State's Attorney Crowe of Chicago was beaten by John A. Swanson by nearly 105,000 votes. Frank Smith, whom the United States senate refused to seat after his election last year, went into the discard, the senatorial nomination being won by Otis F. Glenn of Murphysboro. Big Bill Thompson, mayor of Chicago, protagonist of the "America First" campaign and relentless enemy of King George of England, sought only one office, that of committeeman for his ward, and the voters denied him even that. The same fate befell President of the Board of Education Coath who carried out Thompson's orders to dismiss Superintendent of Schools McAndrew.

In congress and elsewhere great satisfaction was expressed over the renomination of the veteran Representative Martin B. Madden of Chicago, long one of the most useful and industrious members of the lower house. His constituency has become almost wholly negro, but he decisively defeated his colored rival. For congressmen-at-large the Republicans named Mrs. Ruth Hanna McCormick, daughter of the late Mark Hanna and widow of Senator McCormick, and H. R. Rathbone, dropping Congressman Dick Yates. The voters of the state showed strong preference for Lowden as Presidential nominee and he will have at least forty-nine of the state's delegates at Kansas City.

Illinois Democrats put through a slate practically uncontested and by their preference votes determined that Al Smith will have fifty-two sure Illinois votes in the Houston convention, and he may get the entire delegation of fifty-eight.

One murder of a negro and several kidnapings and assaults marked the Chicago primaries, but the picture of a saturnalia of slaughter and other crimes presented in the press of London and Paris was scarcely justified by the activities of the gangs of thugs that worked for both the Republican factions.

REPUBLICANS of Nebraska divided their preference votes between Senator Norris and Lowden, and they renominated Senator Howell. The Democrats were solid for Gilbert M. Hitchcock for President. Vermont will send a solid delegation to the Republican convention instructed for President Coolidge. Most of Nevada's delegates will be for Hoover, and so will all of Michigan's. Despite the progress made by the Hoover campaign, there were signs of increasing opposition to the nomination of the secretary of commerce. After a tour of Indiana and the corn belt, Representative Dickinson of Iowa, Republican and one of the agricultural leaders of the house, predicted that if Hoover were the Republican nominee Indiana would go Democratic in the fall, and other states of the Midwest, normally Republican, might follow suit. Some of the party leaders in Washington are beginning to suspect that Hoover may not be the best vote getter among those seeking the Presidential nomination. Idaho's delegation to the Republican convention will be solid for Senator Borah.

WET members of the National Republican club gained a victory when the national affairs committee of the club adopted a resolution urging repeal of the eighteenth amendment. The resolution was to be presented to the full membership Tuesday of this week for action, and a hot fight was anticipated for the drys were putting up a forceful opposition. The club, whose headquarters are in New York city, is national as its name indicates. President Coolidge is an honorary president ,and among the members are Vice President Dawes, Herbert Hoover and Frank O. Lowden.

BY A vote of 53 to 23 the senate passed the McNary bill for agricultural relief. Various amendments were first made, but the equalization fee and other features objectionable to the President remained untouched, and consequently his veto was expected. It was stated at the White House that Mr. Coolidge would like to help the farmers, but cannot see that any good purpose would be served by his signing the McNary measure. He is convinced the equalization fee would be declared unconstitutional by the courts.

The President also made it known that he was not likely to sign the flood control bill unless it was materially modified. Elimination of local contributions, according to his judgment, means that it becomes a matter of bestowal of favors upon certain localities. When one locality is taken care of he thinks it is inevitable that other sections will demand action on the same basis. One objectionable feature from the President's standpoint is the provision under which the federal government presents a locality with valuable property and then proposes to pay the locality for damages.

WITH the warm approval of the President, Secretary of State Kellogg is moving forward on the way toward a multi-lateral anti-war treaty. With the co-operation of the French government he has sent notes to Great Britain, Germany, Italy and Japan asking those powers to state their reaction to the proposal for the conclusion of a treaty renouncing war as an instrument of national policy. If the responses are favorable it is hoped France will recede from her demand for the inclusion of numerous reservations.

FEDERAL Judge W. H. S. Thompson of Pittsburgh threw out of court the suit of five former members of the Ku Klux klan to restrain the order from operating in Pennsylvania, ruling that he was without jurisdiction and that it was a matter for the state courts to handle. The opinion climaxed three days of sensational testimony, during which klansmen were charged with burning men alive in Texas; organizing a "night riders" terrorist branch in Oklahoma and Ohio; horse whipping "offending citizens" and causing riots and other disorders.

TRIAL of Harry F. Sinclair for the alleged Teapot Dome conspiracy got under way swiftly in the District of Columbia Supreme court because Justice Bailey took the examining of veniremen out of the hands of the lawyers and qualified twelve jurors in three and one-half hours. One of the first witnesses was Mahlon T. Everhart, son-in-law of Albert B. Fall. He told the jury the whole story of Sinclair paying Fall more than $300,000 within a few months after the then secretary of the interior had turned the Teapot Dome oil reserve over to a Sinclair company. The money was paid ostensibly for a one-third interest in a ranch and for improvements to the property Everhart said Sinclair neither asked nor received receipts for the payments Of the money paid $233,000 was in Liberty bonds.

IN A decision written by Chief Justice Taft the Supreme court ruled that congress has the power to delegate its legislative authority to the President in the administration of the flexible tariff law. Justice Taft in his opinion compared the delegation of power to that vested by congress in the Interstate Commerce commission which controls railroad rates. He held that the tariff law was designed to secure revenue and that the declaration for protection of domestic industry did not invalidate it.

Three opinions bearing directly upon current prohibition enforcement methods were handed down by the Supreme court. One, which sustained conviction of an alleged dope peddler, was accompanied by dissenting views in which Justice Brandeis scored the use of entrapment methods in law enforcement. Another opinion upheld the validity of padlock injunctions against property even after an alleged violator of the dry law has been ousted from the premises. The third sustained the conviction of John P. Donnelley, former prohibition administrator in Nevada, for failure to report an alleged violation of the Volstead act for prosecution.

FEDERAL troops in Caracas, capital of Venezuela, backed up by university students, staged a revolt last week and engaged in a battle with loyal troops at the San Carlos barracks. The mutineers were speedily defeated, several being killed and many arrested. Since early in February there have been student riots on various occasions in Caracas. In putting down these demonstrations the government placed many students under arrest, and the casualties have been reported heavy.

JUST why any Italians should desire to kill that nonentity King Victor Emmanuel is a puzzle, but they did attempt it, last Thursday A big bomb was exploded in Place Julius Ceasare, Milan, while the streets were crowded with people waiting for the king to arrive for the opening of a trade fair. The monarch bad not reached the scene but fourteen persons were killed and some forty injured.

HENRY Ford is visiting in England and was the guest of honor at a dinner given by the American Society of London. It was announced that the automobile manufacturer would make the first speech in his life, and he did, but it was only twenty-nine words long. Said he:

"I just want to say Mrs. Ford and myself are greatly honored tonight to be present to meet so many distinguished representatives of two great nations. I thank you."

SENATOR JOHNSON'S pet Boulder Canyon dam bill, reported favorably by the irrigation committee, apparently is going to have hard sledding. Senator Ashurst of Arizona filed a minority report assailing the measure as "a reckless and relentless assault" on his state. Asserting that the bill was drawn wholly in the interest of California, the Arizona senator declared that it "proposed to sever Arizona's jugular vein," by denying it rights to irrigation and power from the Colorado river. When the measure was reported by the committee, Senator Ashurst gave notice that he would conduct a filibuster, adding that if the proponents of the bill expected to pass it at this session the senate would sit "until the ides of November."

THEATRICAL and automobile interests presented their best arguments to the senate finance committee for repeal of the admission and automobile taxes. The theater group, headed by William A. Brady and Frank Gilmore, said the legitimate theater had been "handed the worst of it" and that the spoken drama had almost disappeared in many states. The automobile men promised cuts in prices equal to the tax if the latter is removed.

RAILROADS MUST SIGNAL CROSSING

Motorist Is Entitled to Notice That Train Is Approaching.

"In October of last year the interest of motordom was stimulated by a decision of the Supreme Court of the United States," says a bulletin issued by the legal department of the Chicago Motor club. "In this case the court substantially held that the driver of an automobile must come to a full stop before crossing a railroad track and if, from the place where the automobile was stopped, a clear view of the track could not be had, he was required to leave his car, walk to the track, and determine conclusively if there was an approaching train.

At His Own Risk.

"The court further held that if a motorist relied upon not hearing the train, or any signal, and took no further precautions, he did so at his own risk."

The bulletin points out that "While this decision will have considerable effect upon the courts of the country, its language is probably much more alarming to a layman than it is to a lawyer. For the reason that no detailed reference is made to the facts surrounding the case, the decision is in a measure dangerous, and an unfortunate expression of dictum."

Signals Required.

It is the opinion of the legal department of the Chicago Motor club "That the dictum of the Supreme court in this case was not intended to raise the standard of care required of a motorist and lessen the obligation of a railroad company; that the law still imposes upon railroad companies the duty to give expected and required signals and not to run at an unlawful rate of speed. If a motorist's view is obstructed and his hearing of an approaching train is prevented, and especially if this is done by the fault of the railroad company and the company's servants fail to warn him of its approach, and induced by this failure of duty, which has lulled the motorist into security, he attempts to cross the tracks and is injured, having used his faculties as best he could in the circumstances to ascertain if there was any danger ahead, negligence should not be imputed to him, but the company. If in the exercise of ordinary care, a motorist has no knowledge or notice to the contrary, he should have a right to assume that an approaching train will not operate in violation of the law," concludes the bulletin.

Check Car's Wiring to Get Best Road Service

Sudden stopping of the engine or even certain types of skipping often can be traced to a loose high-tension ignition wire from the coil. This is particularly true if the wire fits into the coil at the underside, for then the weight of the wire tends to pull itself loose.

If the wire can be moved in and out of its connection with little effort it should be made to fit in tightly. Just spread the metal contacts at the end of the wire and push the wire back into its connection. An extra precaution is to tape the wire to the coil.

Gasoline Engines Used by an Eastern Railroad

Steam engines on the passenger train service of the Baltimore & Ohio railroad are being replaced by motor locomotives in the Shenandoah region. This adoption follows experiments in which gasoline motor engines were found able to haul cars accommodating 71 passengers, and baggage, an express and mail car in good time. However, railroad officials think that much more powerful gasoline engines will have to be perfected before they can handle unusually heavy traffic and make steep grades.

Keep Chain on Spare

"The more, the merrier," applies to skid chains. Motorists who have dismounted from a warm car to change a flat tire and then have had also to change a chain from one tire to another never will question the point Keeping a chain on the spare tire is an excellent way to reduce the time required for a tire change in winter Therefore, if one normally uses four chains, five are better and, if only two, three represent a big improvement. Try it and be convinced.

Car Lubrication Needs

Car owners usually recognize the need for a lighter lubricant in transmission, differential and engine when the mercury drops. Why not extend this consideration to other units? The steering and spring shackles are particular places where lighter lubrication is distinctly in order A heavy grease hardens when cold, and because of this certain parts of the steering and shackles are operating dry. Since they are moving parts the effect is wear. A heavy oil should supplant the grease used in warm weather and even this might well be thinned with ordinary medium oil from time to time.

Traffic Signal Does Away With Policeman

A traffic signal with ears is the newest device which may further simplify the solution of the traffic problem. It is the invention of Charles Adler, who recently demontrated its practical use. Motorists will be able to control traffic themselves with the aid of the new signal device. The sound of the automobile horn, ten feet distant from the signal, affects the "ears," which

Charles Adler Experimenting Further With His New Invention.

are metal boxes resembling radio microphones. When the approaching motorist toots his horn the "ears" transmit the sound and cause the red signal to change to green long enough to permit him to pass the intersecting road. After a sufficiently long interval, the light changes again to red until another customer comes along and sounds the horn.

Owner Should Know the Price of a Repair Job

Casting a glance here and there about one's favorite repair shop or service station is a profitable occupation at times. An instance is to be found in the case of the price schedules that are posted in those places which go in for "flat-rate work."

Under the impression that it is too expensive, the car owner frequently defers having a necessary repair made to the automobile. The shop's price schedule often teaches the error of such a surmise. Repair prices are well worth knowing and every motorist should arm himself with this knowledge.

AUTOMOBILE HINTS

A soft tire doesn't turn away wrath

* * *

Much automobile engine wear can be prevented by changing the oil at regular intervals.

* * *

The race is getting healthier, authorities say—but not the race to the railroad crossing.

* * *

The foot that seems positively eager to locate the accelerator has difficulty in finding the brake.

* * *

Who cares a hoot about the f. o. b price of a car? Why don't they tell us how much a month?

NEW GIANT OMNIBUS BUILT FOR LONDON

The photograph shows at the left the new giant omnibus built for service in London, shown in comparison with one of the regular busses now in use. The large machine is built to carry 104 passengers, twice the number carried in the smaller machines.

Real National Music

"America has no more truly national music than the old fiddler tunes which were born of the mountain song birds, the chirping of the crickets and the murmur of mountain streams," declares Henry L. Bandy of Petroleum, Ky., the champion fiddler of that state.

"Every child should be taught these old songs first," he says, "for these are the nation's folk songs and an expression of the rugged days upon which the country is founded."—Farm and Fireside.

Took Inventor's Name

The first waterproof cloth was made by a Scottish chemist, Charles Macintosh, in 1923, and his name is still applied to some grades of the cloth, according to Liberty.

Don't Neglect Your Kidneys!
You Can't Be Well When Kidneys Act Sluggishly.
DO you find yourself running down—always tired, nervous and depressed? Are you stiff and achy, subject to nagging backache, drowsy headaches and dizzy spells? Are kidney excretions scanty, too frequent or burning in passage? Too often this indicates sluggish kidneys and shouldn't be neglected.
Doan's Pills, a stimulant diuretic, increase the secretion of the kidneys and thus aid in the elimination of waste impurities. Doan's are endorsed everywhere. Ask your neighbor!
50,000 Users Endorse Doan's
Bruce L. Lindsay, 705 N 2nd St., Cedar Rapids, Iowa, says: "My kidneys were disordered and I had a dull ache in the small of my back. Stooping and lifting were difficult and I felt listless and like doing any work Doan's Pills did me a lot of good and since using them I have had none of the former troubles. I gladly recommend Doan's."

Asthma Left and Never Returned
Got Entirely Rid of the Disease After Suffering 17 Years.
Asthma sufferers will be deeply interested in a letter recently written by Mrs. Mary Bean, Nashua, Iowa. She says:
"I had asthma for 17 years, coughed most of the time and couldn't rest, day or night. I tried everything, but got so weak I could hardly walk across the room. After taking part of one bottle of Nacor, I could do most of my housework. That was 8 years ago. I recovered completely, am still feeling fine with no signs of asthma."
Hundreds of other sufferers from asthma, bronchitis and chronic cough have reported their recovery after years of affliction. Their letters are in a booklet of valuable information about these diseases, will be sent free by Nacor Medicine Co., 710 State Life Bldg., Indianapolis, Ind No matter how serious your case, write for this free booklet. It may give your whole life a new meaning.

FARM STOCK

ELIEVING BLOAT OF CATTLE EASY

epared by the United States Department of Agriculture.)

With the approach of the season en cattle graze greedily on fresh, en pasture and when other conditi s favorable to bloating are pres- stockmen may prevent losses from cause by a few simple precau- s. Observations of veterinarians the bureau of animal industry, Unit- States Department of Agriculture, icate that crude means of relev- bloat are sometimes used, due to k of preparedness and failure to erve sanitary requirements. "It not usual," one federal veteri- rian recently reported, "to see un- led cuts two or three inches long cows' flanks. These are knife cuts sorted to in the relief of bloat, d in some cases the contents of the unch ooze from the cuts. Such nelty, and the danger from infec- n, suggest a few timely hints on e proper treatment of bloated ani- als."

Bloating may be caused by any nd of feed that produces indiges- on, but the disorder is due usually alfalfa, clover or other succulent sture plants eaten greedily, espe- ally if wet by dew or rain. Frosted sturage is likewise dangerous. Feed ten too hastily and in large quanti- es, when wet or cold, is imperfectly gested. Gas forms rapidly in the unch, and if relief is not obtained time, affected animals may die om the accumulation of gases. In ese cases distention of the stomach so great as almost to prevent eathing.

In severe cases of bloating, swell- g of the left flank is very notice- ble, sometimes rising above the level the backbone. When struck with e tips of the fingers the flank emits drumlike sound. The animal is ainly distressed and moves uneasily. inally it may reel and fall if not elieved.

In mild cases when the animal can alk, driving it for a quarter or half n hour is sometimes effective. An- ther treatment that is often success- ul is to coat a rope or twisted straw and with wagon grease or pine tar nd place this in the cow's mouth as bit, tying it behind the horns. This nsavory bit results in movements of he tongue, jaws and throat as well s stimulating the secretion of saliva. The treatment aids in the escape of as and overcomes indigestion.

In urgent cases where the gas must e allowed to escape without delay, he use of a trocar and cannula is ffective. The operation should be erformed by a veterinarian.

A trocar is used in extreme or rgent cases when the animal prob- bly would otherwise die. With this nstrument there is the least danger f infection, since the hole closes com- letely when distention of the skin eases. The various layers of the kin adjust themselves to its relaxed condition, thus closing the hole.

Live Stock Losses Can Be Cut by Sanitation

"The major part of our live-stock losses, especially what may be termed 'the infant mortality,' is directly trace- able to parasites," said Dr. W. A. Riley, head of the department of bi- ology of the University of Minnesota, In addressing a class at the recent farmers' and homemakers' short course. "We are coming to know that such losses are controllable, just as the hookworm in humans is con- trollable. The round worm, which causes a large part of the loss of young pigs, is a case in point. Death losses are not the total economic toll. Stunted growth and the general slow- ing down of the live-stock industry hit the farmer's pocketbook quite as hard. Proper sanitation, coupled with the transfer of the young stock from infested stalls, pens and feed lots to clean quarters and pastures, will re- duce the losses to a negligible point."

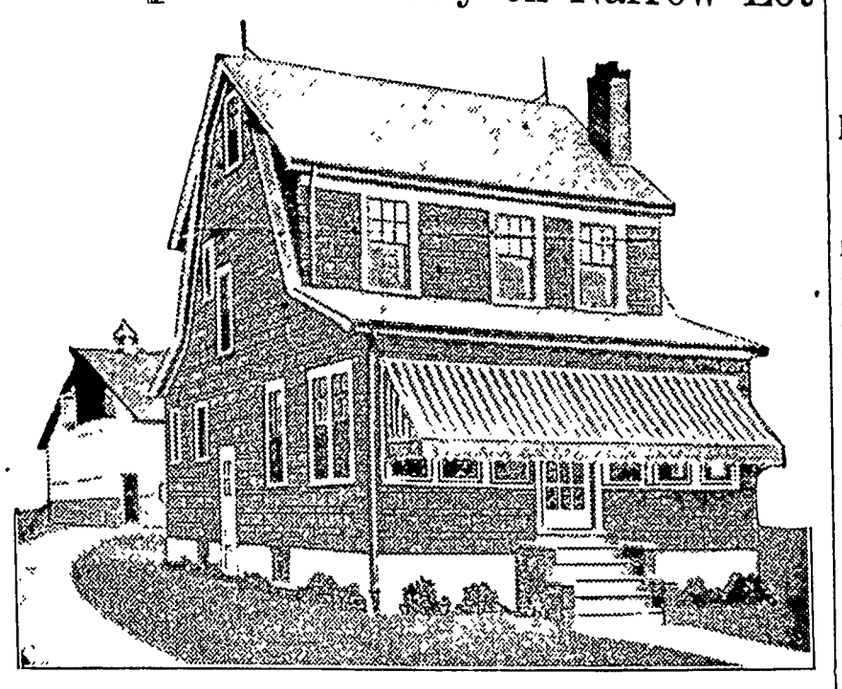
Alfalfa or Clover Hay in Ration for Calves

Some alfalfa or clover hay should be included in the ration for calves or yearlings being fattened for mar- ket. In case legume hay is not avail- able, good results may be secured by furnishing ground limestone or bone meal to the amount of one-tenth of a pound per steer daily. A ration consisting of all the silage and grain the calves will consume in addition to two pounds of alfalfa hay and one pound of cottonseed meal per calf daily will result in good gains and finish. Alfalfa or clover hay and full grain feeding will prove satis- factory.

Sows Look for More

Even though they are getting all the feed they need the sows will usual- ly look for more. They do better, however, if they are not fat. A sow that is in thin, active condition in the fall will gain 75 pounds or a little more before farrowing if she is fed right. A sow that lays on fat is more likely to have weak pigs, and get restless at farrowing time. On the other hand, a sow that is too thin has no reserve to produce the milk for her litter.

Design for Attractive House That Will Fit Nicely on Narrow Lot



By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to prac tical home building, for the readers of this paper. On account of his wide experience as editor, author and man- ufacturer, he is, without doubt, the highest authority on all these sub- jects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

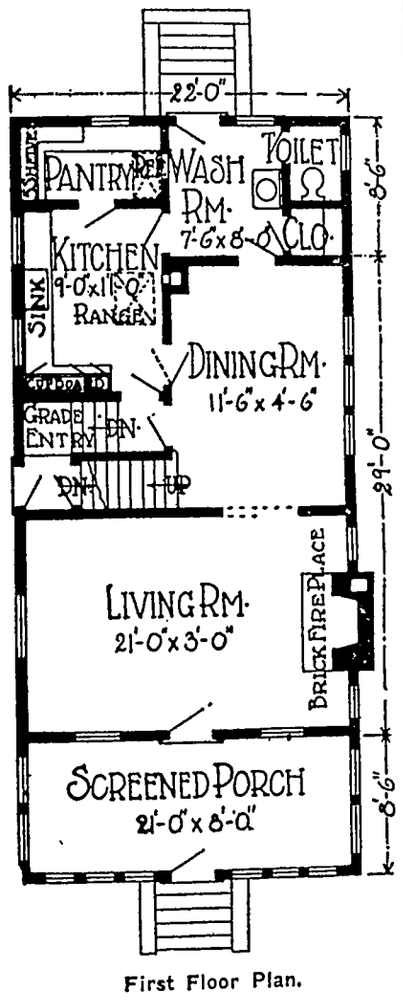
Shingled walls make a home at- tractive in exterior appearance and something out of the ordinary, as will be seen by the home design shown in the accompanying illustrations. This is a six-room house, 22 feet wide and 29 feet deep.

One of the attractive features of this farm home is the porch, 21 feet wide and 8 feet deep. While it is an open porch, it is so designed that it can be screened in for summer, or glassed in for winter.

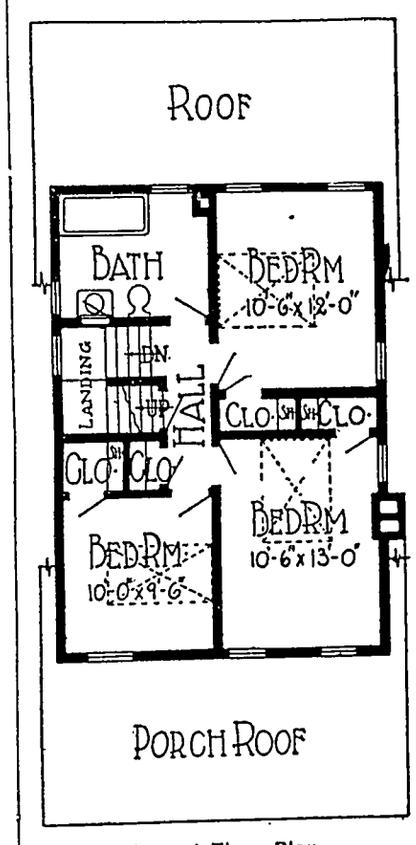
The floor plan which accompanies the exterior view shows the arrange- ment of the six rooms and their sizes. The living room extends across the front of the house and is 21 feet long by 13 feet wide. Adjoining the kitch- en is a large washroom. Three bed- rooms and bath are shown on the sec- ond floor.

The house is of frame construction set on a concrete foundation with a basement the same size as the house dimensions. Here is ample room for the basement heating plant and stor- age of fuel and of vegetables, etc.

This type of home is not usually found on farms, but is very popular among suburban home owners. How- ever, for the farm family that wants a medium-sized home, at a reasonable cost, this design is recommended. Its rooms are large and comfortable and include all of the modern conveniences that are required by farm families.



First Floor Plan.



Second Floor Plan.

Door Vital Part to Weigh in Building

Frequently a house that is plain and unpretentious in itself is distin- guished by a handsome doorway, one, needless to say, that is in keeping with the architectural style of the house. This was true of the early colonial houses. Their builders cen- tered the interest upon the entrance.

The evolution of the door is a fas- cinating study. There is the senti- mental side that might be considered; the hospitality of the open door, the sense of security from the closed door, and on the other hand tragedies are connected with the closing of a door.

There also is the historical side. This would reveal how every style of door reflects the history and social life of a country. The colonial doors of New England show chapters in our country's history. First, the stout, solid plank door was a protection against the Indians, while later, with the coming of more security and leis- ure these plain plank doors were or- namented with nail heads and ring pulls. As the colonies prospered the rich sea captains called in skilled workmen from the shipyards to cun- ningly carve and ornament the doors of their fine mansions.

Some of these early colonial doors stand out so conspicuously for their beauty that architects and designers have come from all over the country to copy and study their lines. Man- ufacturers have sent students to copy these doors, in full or in part, so that they might be reproduced by machine and thus brought within the means of the modest homebuilder of today.

Today it is possible to purchase stock doors or stock millwork from the colonial or other established arch- itectural styles. These are faithful copies and within the means of the average homebuilder. Sometimes a very plain house, as was stated in the beginning, may be given character through the use of a beautiful door- way.

Utility of Tile

Fireplaces, backing for stoves and kitchen sinks are now made more decorative and more easily cleaned with tiling.

Gumwood Is Popular for Interior Trim

Gumwood is the builder's oppor- tunity to provide the beautiful and distinctive hardwood paneling so much desired for living room, dining room or library at a cost that meets the average budget.

Utilize the soft natural coloration of gumwood, heightened by the deli- cate figure nature grows in this na- tive wood. Or a finish to conform to the decorative scheme desired. Gum- wood is peculiarly adaptable to fine finishing effects; its cell structure is so uniform that it does not absorb too much of any staining or enameling material, and there is no resin to come through and spoil the finish.

What are known as the sapgum grades are ideal for built-in break- fast nooks, service cabinets, cozy cor- ners and the like, where gray, ivory or white enamel finishes are desired. For all general interior woodwork "plain" gumwood, finished natural, is recommended because of its soft color qualities. It does not show finger marks, and is easily kept in perfect condition.

Colored Tiles Useful for Decorative Touch

With the development of the stucco house there has arisen a demand for a satisfactory method of adding the decorative touch, and tiles, because of the range of colors they offer, and because of their durability, were quickly recognized as one of the best materials for this purpose.

Introducing color by use of tiles is architecturally and artistically cor- rect, because of the basic relationship of these materials and because there are available in the wide range of tiles textures and finishes to corre- spond with any stucco treatment.

Varying the appearance of the stuc- co exterior has been accomplished with tiles in various ways. Tiled gables, arches, pediment and panels are appropriate because based on pre- cedent; the lower story may be tiled, or a frieze or band may be used in a purely ornamental way. Whenever in this connection color is desired, tiles are proper and suitable.

POULTRY

BATTLE WORMS AND DISEASES

"Wage War on Worms and Disease" is the slogan adopted by the poultry specialists of the New Jersey State Agricultural college, who suggest sev- en "words to the wise" in a campaign against disease in New Jersey.

"Hatch or Buy Chicks Early" is the first. Figures from the farm egg-lay- ing contest for five years show that chicks hatched before May 15 pro- duced 75 eggs the first six months from November to May, and those hatched after May 15 produced 68 eggs for the same period.

"Keep Brooder House Clean." The steps suggested for cleaning a brooder house thoroughly are: first, scrape the floor, thus removing all accumu- lated droppings and litter; second, sweep the ceiling, wall, and floor; third, scrub the floor, side walls, and window sills with hot lye solution; fourth, clean all brooding equipment; and fifth, after the house is dry spray with an approved disinfectant.

"Provide Clean Range or Close Con- finement." By clean range is meant ground on which no chickens have been raised for at least a year and where no poultry manure has been scattered for at least two years.

If room is so limited that clean range cannot be provided, close con- finement is recommended.

"Keep Old and Young Stock Sep- arate." Do not let the youngsters come in contact with the laying stock which may be carrying the germs of coccidiosis and roundworm while be- ing apparently healthy.

"Build Screen Manure Pit." This will partially eliminate the common fly which is a fruitful source of worm infestation.

"Supply Wire Dropping Boards." As dropping boards furnish a good source of infection, these should be screened to prevent the birds from walking on the droppings. A half-inch mesh wire stretched tightly beneath the roost poles is recommended.

"Clean Dropping Boards Daily." From May to October, droppings should be cleaned from the boards and placed in the screen manure pit.

Gapeworm Pest Spread to Chicks by Turkeys

United States Department of Agri- culture, in discussing gapeworms, points out that the two most impor- tant items in the control of this pest are, first, to keep the little chicks away from turkeys, and, second, to brood chicks only on clean ground. Turkeys may carry gapeworms at any age, the grown birds showing no evi- dence of their presence. The depart- ment reports that in most of the out- breaks investigated turkeys have been present on the infested farm.

Ground on which chicks have been raised before and on which mature poultry has ranged is almost certain to be infested with eggs of the round- worm and tapeworm, as well as the gapeworm. Hence the young chicks should by all means be put on clean ground each year. Plowing the lots is quite effective in breaking up para- site trouble.

Poultry Hints

Do not turn lights off too early in the spring.

* * *

Too much bulk cannot be handled by young chicks.

* * *

Early roosting keeps the chicks from crowding into the corners.

* * *

Fowls can be culled at night by use of flashlight with a blue-tinted bulb.

* * *

Do not stop feeding early and late in the day when lights are finally left out.

* * *

Giving the chicks some form of milk at the start stimulates their appetites and promotes growth.

* * *

A suitable mash, fed throughout the summer, balances the grain ration and keeps the chicks growing without any setbacks.

* * *

Any shelter that protects fowls from storms and severe weather is an incentive to egg production.

* * *

Sometimes (but not always) gos- lings will live and make some growth if compelled to rely on their own re- sources to get nourishment.

* * *

The extra expense for a double floor in the brooder house is a good in- vestment. A warm and dry floor can be made by including a sub and top floor with a layer of tar paper be- tween them.

* * *

Plymouth Rock hens with extremely small combs are apt to produce small eggs, it is claimed by breeders.

* * *

Removing the cockerels at broiler age gives the pullets more room to grow and develop. Birds of both sexes will grow better when separated.

* * *

During the muddy days of spring it will be well to keep the layers shut in the house during the forenoon to avoid tracking the nests with muddy feet and thus soil the eggs which dis- count them for market purposes.

WHEN PROMOTERS USE "CHARITY" TO DECOY TRUSTFUL CONTRIBUTO

Investigations of Various Schemes for Defrauding P Out of Money Disclosed by Bankers Association— Many Kinds of Fake Industrial Promotions Used as Bait.

By W. R. MOREHOUSE

Public Relations Commission, American Bankers Association

MILLIONS of dollars raised under the disguise of charit to line the pockets of promoters. Ticket sales on raffles commonly used, and while the loss to any one person who a ticket is small the aggregate loss for United States runs into millions of dol Usually the promoters of these schemes make a contract with some charitable i tution to conduct a campaign for funds behalf of the institution. They are to the campaign in the name of the institu and share the proceeds. The whole sch is often one of deception. To those have been led to believe that their contr tions go practically 100 per cent to cha the following case we investigated sh prove illuminating.

W. R. MOREHOUSE

A number of promoters recently contr ed with a charitable institution to put campaign to raise funds by the raffle new automobile. So far as the public c tell from the banners used in displaying automobile, the full amount of the sale p of the tickets went to the institution. T was nothing to convey any other impression. Apparentl was open and above board and was being conducted by who were contributing their time gratuitously.

For several days a new automobile, mounted on a truck, was driven up and down the streets, with banners telling about the drive for funds for the charitable institution. One day the truck would go by displaying one of the popular makes of automobiles. A few days later it would parade by displaying some other popular make. Periodically the truck would pull into the curb where it would park for several hours while the promoters pleaded with passers-by to take tickets on the raffle and thereby help a deserving charitable institution to meet its bills.

Thousands "Touched"

Thousands of people, touched by the appeal for help, bought tickets, the total sale running into the thousands of dollars. Contrary to the belief of the ticket buyers their contributions did not go 100 per cent to charity. Instead the charitable institution received but 26 cents on the dollar, the promoters getting 52 cents on the dollar as their net profit, or twice the amount received by charity, while the remainder of 22 cents on each dollar represented the amount charged against gross sales by the promoters as expenses.

In other words, every person who bought a 50 cent ticket for the sake of charity, contributed but 13 cents to charity and 37 cents to those promoting the scheme. Whether you give to charity or make an investment it will pay you to get the facts!

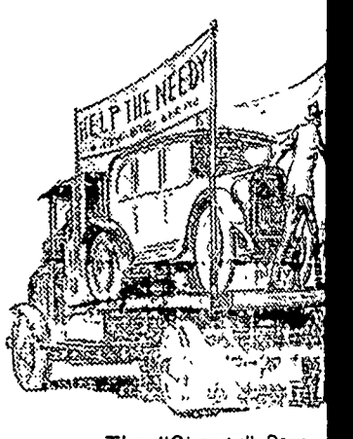
Unfortunately there is a general impression abroad that wildcat promotions are confined to oil, mining and new inventions. The truth is, many stock selling promotions are operated under the name of other industries.

False Claims

A certain group of promoters investigated offered for sale stock in a proposed woolen mill. In order to sell the stock they resorted to the use of misrepresentation and false claims. After renting space on the ground floor of an office building fronting on a busy street they began their campaign Orally and by printed advertisements extravagant claims were made for the proposed corporation which were grossly false.

It was claimed that the prom had the support of the Chamb Commerce, but it did not have such an endorsement. It was cl that the corporation had a signed tract for the sale of millions of do worth of its product—orders e to keep the mills running day night for many years and accord insure its success, but all that was a valueless fake agreement.

It was claimed by two of the cipal promoters that they had many years of experience in the facture of woolens.—in fact ha ganized and financed a woolen which is th largest in the U States. The facts were these tw



The "Charity" Drive

moters had not been connected any mills for over twenty years they had attempted at different to promote mills, all of which failed. One of the promoters sented that formerly he was pres and general manager of one o largest woolen mills in Canada. fact was the mill referred to had into bankruptcy and he had been taker of the plant

This story of misrepresentatio be duplicated in practically the industrial field, and because o dustries are being exploited wi tent to defraud, it behooves eve vestor to investigate carefully. should consult his banker before ing his savings out and losing on some wildcat investment.

WASHKOWSKY'S OLD SHOE

We call the attention of the American Bankers Association to the case of Mr. Washkowsky of Brooklyn. Mr. Washkowsky is hard working and thrifty, but like so many of us his education is defective; who is to blame for that we don't know. Mr. Washkowsky has been saving a part of his weekly wages for a long time, but hadn't told Mrs. Washkowsky where he was depositing his nest egg. That was a mistake, probably, but an inquiry into it belongs to another branch of education with which it is probable the bankers association cannot be held to have any concern.

But with Mr. Washkowsky's depository it has. He chose for that purpose an old shoe. He kept the shoe and its mate in his closet, and up to the other day had tucked away in one of them savings amounting to $350. On that same other day Mrs Washkowsky, rummaging Mr. Washkowsky's closet like a good housewife, seeking what she could throw away or transfer to another place where Mr. Washkowsky couldn't find it, as is the habit of good housewives, found this same pair of old shoes. We suppose she said to herself, Mr. Washkowsky not being present to have it said to him, "Isn't that just like a man?" and acting thereupon just like a woman she sent the shoes to the cobbler to be repaired. It was either that or the ash barrel for them, and being frugal and Mr. Washkowsky paying the cobbler bills anyway, she sent them to the cobbler.

A distraught man was Mr Washkowsky when he next went to make a deposit in his old shoe. "What new place," he asked in that martyr affected by husbands on simila casions, "have you found for my shoes?" Mrs. Washkowsky told expecting to be praised for thoughtfulness. Women—but another branch of education.

Mr. Washkowsky went to the bier and found his shoes, but no money, which we cannot but fe not remarkable. We hope he will it, but he hasn't yet, which should cause no astonishment

But what we would like to from the American Bankers As tion is what steps it is taking to courage people of magpie habits keeping their money in stoves, s mantle clocks, behind wall pict under floor boards and similar p We have made no exact calcula but from casual evidence we ar clined to believe there are en funds hidden away in such place this enlightened and progressive try to pay off the national debt. that we advise paying it off, bec that would leave congress nothi fuss with Mr. Mellon about; but posited in banks our banker have some to lend when we nee which he now never has: he money is very scarce. We hold not; it is merely in Mr Washkow shoe.

Seeing that we have been pur education, or something called for several centuries, we cannot feel this is a bad showing and the bankers association is some responsible. It hasn't sufficiently pressed on the people that it banks and what they are for. Washkowsky hasn't heard. And are a lot of him in this count

OBITUARY OF JOHN NEWBERGER OF CANISTOTA, S. D.

Was Father Of John And Louis Newberger Of Klemme

(From The Clipper, Canistota, S. D.)

John Newbereger passed away at the home of his daughter, Mrs. E. H. Hoiten on last Friday evening at eight o'clock. Cause of death was largely due to old age and grief over the death of his wife who died only three weeks previous. His health has been very poor for the past two years and twice during that time he has been near death's door, but rallied and his relatives began to hope that they might keep him with them for years yet. But the death of his wife seemed to break his fighting spirit and he could not successfully combat diseases when attacked in violent form.

John Newberger was a man who was highly respected and liked by all who knew him We have heard is old farm neighbors remark that a better neighbor never lived than John Newberger. He was a devout Christian gentleman More than once we have seen him and Mrs. Newberger wending their way to the house of worship in weather which was scarcely fit for much younger people to be out in.

John Newberger was a man who loved his family, a devoted husband and father, deserving of the great love and respect they had for him.

The children and grandchildren will sadly miss his kindly smile and pleasant words, and so will the rest of us To them goes out the profound sympathy of the people of this community in their bereavement

Funeral services were held at the Lutheran Church Monday afternoon attended by a large concourse of people

There was a profusion of floral ocerings. At the conclusion of the services thffe body was taken to the cemetery and laid to rest beside that of his wife.

John Newberger was born in Germany Feb 5, 1846, being 82 years, 2 months and 1 day old at the time of death.

He came to America in 1865 and settled at Ackley, Iowa. In 1867 he was married to Christina Hirth of that place. To this union two sons were born, John and Louis, now residing at Klemme, Iowa. In 1869 his wife died and soon thereafter Mr Newberger moved to Freeport, Ills February 9, 1875 he was married to Miss Magdaline Eichhorn and they came to South Dakota in 1879 and settled on a homesteead six miles northeast of Canistota where they lived until coming to Canistota in 1904 where they have since enjoyed a happy life, surrounded by the four children, Philip, William, Mrs. E. D Schleuter and Mrs. E. H. Hoiten, until death took the mother three weeks prior to the father's death.

Besides the relatives mentioned above left to mourn Mr. Newberger are nineteen grandchildren and also great grandchildren, two sisters and two brothers. The sisters being Mrs Eva Euhhorn of Ridott, Ill., Mrs Kathryn Sessler of Canistota, Jake Newberger of Ackley, Iowa, and Peter Newberger of Sioux Falls, S. D.

TEACHERS—The Times again is stocked on construction paper in the handy 9x12 assorted color packet at 25 cents tfc

Baby's bootees and stockings must be at least one-half inch longer than the foot.

A fool and his forest fires are soon started.

Every child should learn to swim.

Two can drive crazier than one.

Boxed Stationery, latest tints at 50c, 60c, 75c, $1.00 and $1 25. At The Times Print Shop. 1tc

Briefs Today Briefer Than in Former Days

Laymen have often wondered why in the legal profession briefs are so called, when, as a rule owing to the more or less elaborate legal phraseology, they are anything but brief

A lawyer explains that this name was given because such documents "are supposed to cover the necessary subject matter in as brief a space as possible." It is also pointed out that many of the "Whereases," the "aforesalds" and the "to wits" are really essential

Although the uninitiated may still flounder in the mazes of law technicalities, modern briefs are very much less encumbered with verbiage than were the briefs of the earlier days says the New York Times. The modern tendency is to simplify.

Writing long legal documents used to be profitable, because, to begin with, they were prepared by scriveners who were paid by the word.

An amusing story is told of a certain ancient scrivener in England who has lived through the ages because he perpetrated the most voluminous brief ever evolved in the profession It was so prodigiously long the authorities thought the time for reform had come.

They decided to make of him an example. The wordy manuscript was affixed to a placard board and as punishment the scrivener was forced to parade with it all about the town

Character Shown by Manner of Laughing

"People who laugh heartily may be trusted," said a student of psychology recently. "These people laugh with the eyes and the whole body as well as the vocal cords, and they are usually generous and sympathetic.

"Laughter is a sure indication of character. The man who laughs in his throat, with an almost straight face, for example, is generally shrewd and cautious, and not always over scrupulous in his methods.

"'Inside laughters,' whose shaking shoulders express their mirth, are good-natured, and make excellent parents, while those who laugh without a smile are hard-hearted and cruel People with little jerky laughs are often of shallow character, and are unable to withstand temptation. They are, however, often mentally brilliant

"People who laugh explosively and loudly are not the hearty, bluff creatures they are generally believed to be

"The large-hearted souls are those who laugh but rarely, but whose joy is reflected in eyes, lips, and face."

Defect in the Painting

Zeuxis, a famous Greek painter who lived in the latter half of the Fifth century, B. C., is reputed to have painted a bunch of grapes that looked so natural that birds came and pecked at them. This is said to have occured during a competition between Zeuxis and a young rival named Parrhasius Zeuxis admitted that his rival surpassed him when Parrhasius painted a curtain by which the older artist himself was deceived, says Pathfinder Magazine. Pliny gives a different version of the story. He says Zeuxis painted a boy holding grapes toward which birds flew The artist, commenting upon the incident, said that if the boy had been as well painted as the grapes the birds would have kept at a distance.

Connecticut River

This name was given to the river before the region was colonized Connecticut was formed from the first settlements near the mouth of the river.

The same occurred in many other cases—the Tennessee and the Missouri rivers, for instance.

The colonies and states near the mouth of the streams took the names of the rivers.

When the first settlements were made in what is now the state of Connecticut the region along the upper Connecticut river was an unexplored wilderness.—Philadelphia Inquirer.

Take Time to Smile

Smiles are antiseptic The honey bees outnumber the hornets Insults like mud, drop off when dry Smile or the spectators will think you are a flat tire. Laugh or other tourists will conclude you have run past your garage.

Quit crying; too much of this globe is salt water now. Borrow some yeast and put it into your dough Laughing is the best way of lifting the face and then one side will not be higher than the other The strongest fort in the world is comfort. There is no law against laughing.—Exchange.

Wanted Plenty of Them

Little Frances had returned from a visit with her grandmother in the country. While there she had heard of flocks of sheep and flocks of chickens.

Her mother had taken her down town to buy a new dress, when Frances saw a large number of dresses her size in the store and she said, "Oh, mother, please get me a whole flock of those pretty dresses.

Path to Wisdom

The most of us are too fond of people who agree with us, and have too little use for those who do not. If we would but cultivate the latter a little more than we do, we might gain more wisdom than we now have—Grit.

Home grown feeds are usually the cheapest if they are properly balanced.

FREE For Testing 2 Plants RED GOLD Sugar Saver Strawberry

A marvelous new berry, rich, sweet, needs only half as much sugar.

We have counted 41 berries, buds and blossoms on a single stalk, eleven stout, sturdy stalks on one plant.

Wild Strawberry Flavor

Write today, we will send plants at planting time. Inclose 10c postage and packing, or not, as you please. "Strawberry Right" plant catalog FREE.

THE GARDNER NURSERY COMPANY
Box 602, Osage, Iowa

Ice Cold Pop

That's the kind you get in our new Pop Dispenser.

Every bottle is deliciously ICE COLD Any flavor you want. Come in and see this new machine work.

When you want Pop, you want it COLD, that's just what you get here!

Crystal Cafe

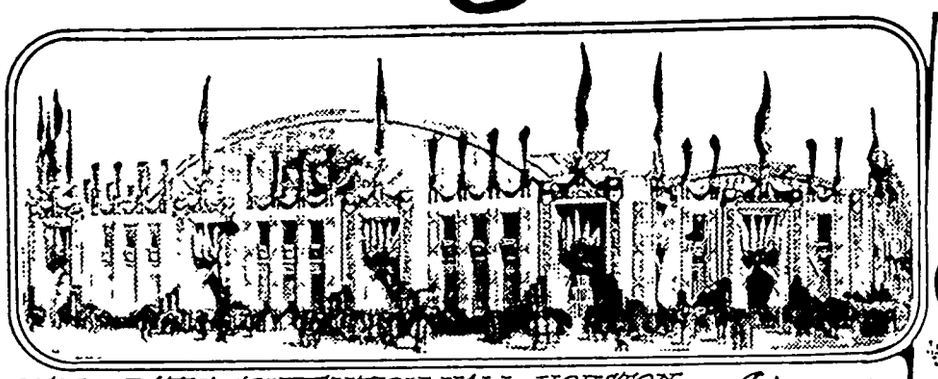
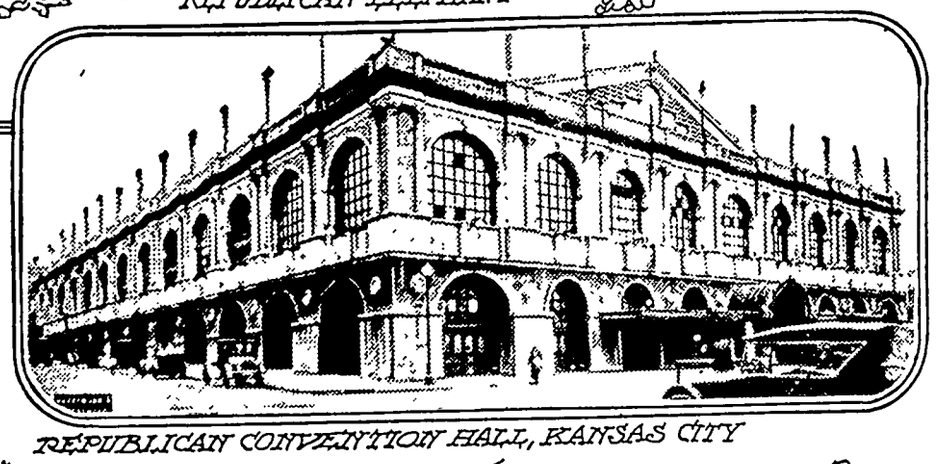
Stabling Our Political Zoo



DEMOCRATIC CONVENTION HALL, HOUSTON

FIRST USE OF THE DONKEY SYMBOL

FIRST USE OF REPUBLICAN ELEPHANT



REPUBLICAN CONVENTION HALL, KANSAS CITY

By ELMO SCOTT WATSON

IN KANSAS CITY, MO., there stands a public auditorium with a seating capacity of 14,000, down in Houston, Texas, they are planning to build a similar hall which will hold 25,000, and these two great structures will be used next June to "stable our political zoo." That is to say, the Republican national convention at which candidates for President and vice president of the United States are to be nominated will be held in Kansas City June 12 and two weeks later, June 26, the Democrats will meet in Houston to name their standard-bearers in the 1928 campaign.

The Republican "zoo" is pretty much a one-animal affair, consisting of an elephant bearing the legendary brand of "G. O. P." Of course, the figure of a bull moose may be seen by some lurking in the shadows but it will be only a ghostly animal, reminiscent of the days of 1912. The Democratic "zoo" is somewhat richer in number and variety of its "animals." First and foremost is the donkey, which is as universally the symbol of the Democratic party as the elephant is of the Republican, but many persons of the Jeffersonian and Jacksonian political persuasion will tell you that the rooster is the true symbol of their party. The Tammany tiger will also be much in evidence at Houston, since one of the leading candidates learned how to crack the ringmaster's whip in Tammany hall. As for the camel, symbol of the "drys," where will it be stabled—in Kansas City or in Houston? It may be welcomed into both. And then again, it may be cast out by both "into the desert air" where it is supposed to flourish.

The use of these symbols for political parties or certain factions in them has become a recognized part of our political history and nearly every one of them has an interesting history. The rooster as an emblem of the Democrats was the first to appear on the scene and it came about it this way: In 1840, Joseph Chapman was a Democratic candidate for the Indiana legislature from Hancock county. Things were looking gloomy for the Democrats at that time for it was soon after the panic in Van Buren's administration and the Whigs under the leadership of Gen. William Henry Harrison, the "Hero of Tippecanoe," were developing great strength. About that time George Pattison, editor of the Indianapolis Constitution, wrote to a certain William Sebastian of Greenfield as follows: "I have been informed by a Democrat that in one part of your county thirty Van Buren men have turned for Harrison. Please let me know if such be the fact. I think such a deplorable state of fact cannot exist. If so, I will visit Hancock and address the people relative to the policy of the Democratic party. I have no time to spare, but I will refuse to eat or sleep or rest so long as anything can be done. Do, for heaven's sake, stir up the Democracy. See Chapman, tell him not to do as he did heretofore. He used to create unnecessary alarm; he must crow; we have much to crow over. I will insure this county to give a Democrat majority of 200 votes. Spare no pains."

This letter happened to fall into the hands of the Whigs, who promptly published it in an Indianapolis paper as a means of ridiculing the Democrats. However, it had the opposite effect and "Crow, Chapman, Crow," became the slogan of the Indiana Democrats. When the Indiana Sentinel was launched in 1841 it carried at the top of the front page the picture of a proud rooster and under it the slogan of "Crow, Chapman, Crow." In time this symbol spread all over the country and became the popular emblem of the Democratic party. It is still much in use by the Democrats themselves, although the more widely used symbol by cartoonists is the donkey.

The donkey, as well as the Republican elephant and the Tammany tiger, is the product of the genius of one of the greatest cartoonists this country has ever known, Thomas Nast. Nast, a Bavarian by birth, came to this country as a boy. In school he was more interested in drawing pictures than he was in his books and at the age of sixteen he took some of his drawings to the editor of Leslie's Weekly who hired him for the princely sum of four dollars a week, to draw illustrations of news events. Nast left Leslie's in 1860 for a position on the New York Illustrated News but it was not until he began drawing for Harper's Weekly that he attracted much notice. By the third year of the Civil war his war pictures, which stirred the patriotic blood of the North and sent hundreds of young men to join the colors, had made him known throughout the country and President Lincoln was said to have declared once that Nast's cartoons were "the best recruiting sergeants on the side of the Union."
